The Heart Coherence team - using the basic insight from Winter, successfully launched Heart / EKG biofeedback making **empathy** (phase lock) and **coherent emotion** (passion) measurable (using 2 channel cepstrum of EKG). The new HeartTuner Pro04 software includes 'BlissTuner' to allow **3 of the most important features of BLISS - to be gently and carefully teachable in the new 2 channel brainwave setup for HeartTuner:**

- A- **Golden Ratio** between the Major Harmonics - Usually Alpha to Beta in EEG Spectra. See Korotkov- soulinvitation.com/blisstuner
- B- Cross Hemispheric Synchrony (Both Hemispheres in Symmetry)
- C - Overall Internal COHERENCE.
