Dan Winter -

The Politics of Bliss

Bliss is threatening to a culture because it is inherently addicting and contagious. Like atomic reactions, Bliss has a critical mass for groups. Whatever or, more particularly, whoever is perceived as the major source of Bliss activity will tend to be worshipped (often as a guru) or loved. This may result in the formation of a cult that is permissive and whose members behave in ways that appear “irrational” to the rest of the community.

This means Bliss techniques that become popular tend to become burning political issues and involve the law.

For humanity to survive, however, all laws must be re-examined in light of whether they permit humanity, and especially our children, to sustain Bliss.

The Electrical Definition of Bliss

Bliss is the condition of the ability to radiate charge to infinity sustainably. This requires perfect fractal embedding. It is also the (self-referent) definition of how electrical fields become self organizing and self aware. More detail on measuring the onset of Bliss requires

introducing spectrum analysis to identify harmonic cascades. This is the principle behind the Heartlink EKG harmonic analysis. It is not just the EKG which identifies its bliss and charge radiance moment as becoming a Phi cascade, this also becomes the harmonic signature of:

- a) Planet long magnetic lines becoming self-aware (Gaia hypothesis physics).
- b) Cancer membranes becoming again healthy and embeddable/touch permissive (<http://www.soulinvitation.com/cancer>).
- c) Public utilities changing 60 Hz in their grid to a Phi harmonic based on Hydrogen and the Schumann

resonance, so our power grid feeds gravity and awareness. (See “What’s Poisoning the Farm”.)

- d) DNA enveloping itself in long wave folds based on Phi multiples to enable ensouling, lucid dreaming, time travel.
- e) Voice prints which heal, and (sun) light optical spectra which serve life natural spectra in classroom lighting creates attention span, while the mercury vapor light spectra at your gas station or grocery store is measurably killing you and everything alive underneath it.

The Religious History of Bliss

Billy Graham never bothered to explain that to be self-

empowered in the Physics of Rapture you need to understand and enact for yourself how charge becomes a fractal (life force)! No willy-nilly God outside you is going to do this for you.

The Shaker's shake, the Quaker's quake, and the Sufi's turn: all these are examples of attempts at entering into the electrical symmetry of Bliss. It is the function of ritual to achieve proper charge embedding (Radiance Symmetry). For all living things, it is a matter of "embed or die".

The Pope, the King and the Priests murdered the Cathars and the Templars and the Druids and the Witches and the... and the... and the ... largely because they still had access to a way to Bliss collectively. So the religious history (as opposed to her-story), of Bliss is that if you find Bliss and attempt to share it you get murdered.

The history of ciphers, Baconian Shakespeare, Voynich Manuscript, Enochian Ophanic, and so on, is largely to encode the symmetry which permits Bliss into enough secrecy to prevent murder. Historically, the reason you get murdered for teaching Bliss is because those who cannot bear the electrical fusion experience (Rapture) of no secrets, who have not sorted their memories/ waves into the compressible and therefore shareable (proper death preparation), unconsciously choose to prevent others from doing so.

Romance and Bliss

The vast magnetic rush of genes sensing the implosive possibility of electrical wave fusion into the superluminal is called "falling in love". Romance should be captivating and fixating, because from an electrical perspective

this is how DNA achieves an immortal state.

If you do not achieve Bliss, you do not sustain or create the membrane waving-in phase, called an immune system. This is because the gland phonon electrical Sonics braid the membranes to a phase sustainable state (<http://www.soulinvitation.com/cancer>).

When DNA crossing achieves very high voltage, you do see stars. Genes are aware when the possibility of charge collision (hugging), will create an immortal – Blue Fire Incubus/ tantric –cocconing. In essence, proper Tantric swooning requires fractal landscape Star maps. A Tantric swoon is another name for the little cocoon of Ultra-Violet and Microwave cell emission, which grows antonymous when cellular Bliss, often pre-orgasmic, is fed back into itself.

Romance can be seen as an appropriate cellular urge to achieve the right mutual annihilation of light beams (which make a phase conjugate mirror) and result in emotional cleansing. This gives new and useful meaning to the romantic term, conjugal relations. When two opposing sets of beam phases collide in exactly the right symmetry of implosion, romance is the result. This is a "romantic" extension of the quantum mechanical ideal where only equal and opposite wave collisions make sustainable quanta. (Nothing else 'matters'). In falling-in-love physics, this means that only exactly symmetric equal and opposite voltages complete the implosion which sends gene waves into stars (superluminal and gravity making). This is an extension of the Celestine Prophecy that all human interactions (particularly sexual) are about charge. It also

relates to the Gurdjieff/ Bennet notion of sexual relations, which note that an electrical short or overload has to be the result of all sexual relations between members not of equal charge.

Addiction and Bliss

It was not a mistake that Mother Nature designed DNA and glands to continuously re-seek their last moment of maximum electrical current. This is an electrician's definition of addiction and fixation.

Illustrative of this point, is how Marty Wuttke succeeds clinically in eliminating Attention Deficit Disorder and addiction employing simple neurofeedback training to complete the cascade of EEG harmonics. (See links at: Ritalin: Poisoning the GEOMETRY of Attention in our Young?,

<http://www.soulinvitation.com/ritalin/index.html>).

When Bio-structures sit in the midst of maximum current and charge flow, they know they have successfully embedded, at least for that moment, into life, memory and information itself. That is why all places of maximum current and charge density on this planet, like atom smashers and transformer arrays, become nodes where huge amounts of the collective mind get nodally attracted for better or (usually) for worse. If the locus (geometry) of that magnetic flow focus, is not embeddable (life giving), then all the biological life force sucked into such human ignorance magnetic vortex, will lose spin/ be killed/ create death/ thanatos. That is why you will never find elementals or the Schumann resonance, or much EKG bliss, near 60/50 cycle current (The frequency at which the voltage required to stop the heart is lowest, is a prime example of a non-life giving choice.)

The up side is that where maximum current and charge through (the) genes is sustained, that is called "eternal life" and "peak experience". Mechanically, this can be examined as a symmetry operation by noting that if you put high current through DNA or gold monofilaments just at the moment of crystallization, they become measurably superconductive. This is because the inherent dodeca recursion wratchet, which is DNA (<http://www.soulinvitation.com/superDNA>) and Gold Valence (<http://www.soulinvitation.com/gold>) permit implosion connectivity/perfect Phi fusion in their core. The implication for genes in teenagers is that they unconsciously (and correctly) know that if they do not achieve Bliss (charge density), they are dead anyway. So therefore they are appropriately willing to risk everything to get bliss. If our culture could teach legitimate and sustainable techniques for Bliss, then we would not lose our teenagers. (See Hygienes for Bliss: <http://www.soulinvitation.com/sbhowtos1.html>)

Dan Winter The Sacred Geometry of Love

DAN WINTER is world renown for his teachings on the physics of sacred geometry, and the relationship of our heart's harmonics to love. A Psychology graduate, master computer graphics animator and musical keyboard artist Dan's work in recent years has focused on the way in which musical waveforms associated with emotions turn out to embed pure geometry. His theories on geometry and magnetism inspired the development of the Heart Tuner. This breakthrough computer application dramatically demonstrates that heart waves embedding can scientifically measure the levels of compassion between people and their emotional index.

Evening Seminar: The Physics of Emotion and Bliss \$35

A multimedia visual extravaganza. See how DNA braids & unites with your heart & consciousness. Geometry and magnetism, earth energy & feng shui.
PERTH: Thursday 24th Oct. 7.30-10.30pm

One Day Workshop: How Hearts & Genes Create Gravity \$149

Experience the Heart Tuner, the physics of Life Force, Fractals, Human Biology of Bliss and Free Energy, Charge Compression - the key to surviving the solar maxima.
PERTH: Saturday 26th October 10am-6pm

One Day Workshop: Heart Coherence - Heart Tuner Intensive \$149

Measuring heart wave coherence, heart rate variability, heart musical key signature, Heart link training for relationship counselling, peace making, EEG brainwave work, measuring lifeforce and electrosmog.
PERTH: Sunday 27th October 10am-5pm

Heart Tuner - Health Professionals & Practitioner Training \$149

PERTH: Wednesday 6th Nov. 10am-4pm

Keynote Speaker at Conscious Living Expo

Thursday 31st October 7pm-9pm

Forum on Science of Peace and Spirituality
Friday 1st November 4pm-7pm
 The Heart Tuner - Music and Biowaves for Healing \$35 CL \$30

Saturday 2nd November 1pm-4pm The ET origins of DNA & Galactic Evolution \$35 CL \$30

The Love Heart Tuner Demo

See Dan Winter demonstrate the amazing Heart Tuner. Measure your heart coherence and compatibility with your partner. **PERTH: Stand 2 at the Conscious Living Expo in Perth October 31 to November 3**
SYDNEY: Stand N49 MBS Festival, Nov. 14 to 17
 More details www.fengshuiseminars.com

ADELAIDE, November 8 to 10, 2002
