**Fractal Golden Ratio/ Phase Conjugation: Cause of Gravity**

By Daniel Winter and Dr. Martin Alexander Jones

[Fractalfield.com](http://Fractalfield.com)

Fractality has been the hypothesized cause of gravity in countless theories. In this paper we show how the perfected fractality of the golden proportion in geometry is the cause of gravity due to defined (in a previous paper<sup>1</sup>) compression. Compressions may be used to model any system that obeys general systems laws. (mention examples- Andre Linde.. others). What has been missing is a clear assembly of the evidence- AND a compelling hypothesis of HOW fractality causes the gravity. This is our intent.

Premise 1: fractality is precisely the geometry of perfected infinite compression.

The Klein-Gordon equation is as follows:

Previous paper showed that  
perfected

$$\nabla^2 \Psi - \frac{m^2 c^2}{\hbar^2} \Psi = \frac{1}{c^2} \frac{\partial^2 \Psi}{\partial t^2}$$

compression with the harmonic series normalizing coefficients was shown to have the golden proportion as the frequency proportionality constant. This points to the premise. Refer to previous paper. (Where  $||A_n||^2$  is the Harmonic Series squared).

$$\frac{\partial \Psi}{\partial \phi} = \sum_{n=0}^3 A_n n \phi^{n-1} e^{i(\frac{p_n}{\hbar} x - \phi^n \omega_o t)} = 0$$

Premise 2: infinite non-destructive charge compression- was the essence of Einstein's description of the unified field electrical cause of gravity.

Premise 3: Golden Ratio - for example - the infinite series .618..., 1.0, 1.618..., 2.618..., .... - is precisely the embodiment and perfection of

- non-destructive self re-entry
- self similarity / self embedding
- recursion / embedding / entanglement perfected
- the perfection of the conjugation of phases (phase conjugation- as in recursive construct adding and multiplication of wave heterodynes

In our previous paper<sup>1</sup> we showed using Klein-Gordon equations- that golden ratio is the perfection of maximum constructive wave interference- first in a line - and then in 3D. If we are correct- and we believe that is shown- that golden ratio is the maximum form of constructive wave interference in general- THEN it follows necessarily that golden ratio is - the generalized solution to:

1. maximum constructive wave compression
2. maximum fractality
3. charge implosion the origin of centripetal forces
4. the origin and perfection of the negentropy often measured from phase conjugation
5. and the GRAVITY.

We present the evidence

Einstein was clear- (infinite) constructive (electrical) compression DEFINED gravity (hence IMPLSION OF CHARGE): That is the wave problem - Dan Winter's team solved mathematically, demonstrating Golden Ratio phase conjugation infinite constructive charge compression using Klein-Gordon generalized wave equations.

Dan Winter- has shown more recently- that this golden ratio phase conjugate implosion of charge which causes gravity - reaches a limit condition at the Planck sphere dimension- where the phase conjugate pine cone translation of vorticity converts the charge inertia from transverse to longitudinal EMF

- which IS gravity waves- and the bioactive / action at a distance field wave mechanic- see [www.fractalfield.com/physic](http://www.fractalfield.com/physic)

This way of producing charge acceleration (named 'the gravity') thru the speed of light (longitudinal EMF)

- also accounts for mitogenic radiation, "DNA radio", (collective unconscious/ ancestral memory) and the physics of most spiritual wisdoms- including body plasma fields surviving death.

Dan Winter's phase conjugate charge implosion theory of gravity- defended- thanks!

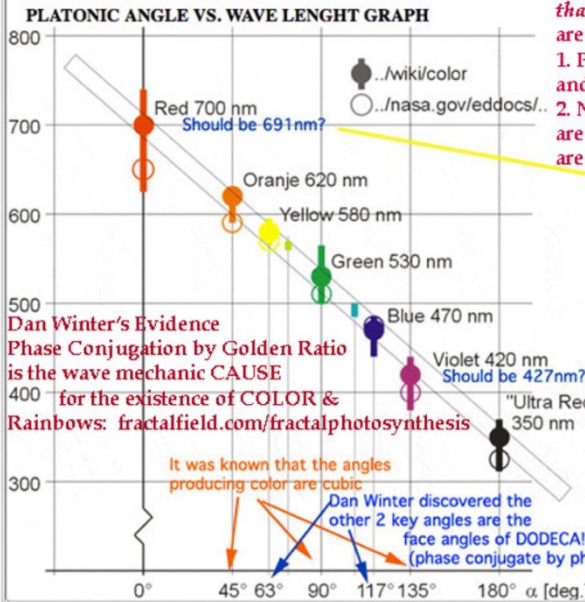

Mark Rohrbach - Mark Rohrbach - ([phymarket.blogspot.fr](http://phymarket.blogspot.fr)) letter to Physicist Elizabeth Rauscher - May 11, 2017 Hi Elizabeth, Attached is the paper I was telling you about that gives a derivation of Dan's work for his phi-ratio implosion idea (here Mark attached PDF of our paper published in GS General Science Journal - originally from [www.fractalfield.com/mathematicsoffusion](http://www.fractalfield.com/mathematicsoffusion)

**Smoking Gun#2: Photosynthesis is CAUSED By Fractal Charge Collapse!**  
**The Only Exact Colors which CAUSE Photosynthesis**  
**are EXACTLY (phase conjugate implosion) Golden Ratio Exponents of PLANCK!**

Below- Dan Winter's strong evidence- COLOR PERCEPTION- is a PHASE CONJUGATE Phenomenon- (along with his original discovery that PHOTOSYNTHESIS frequencies are precisely phase conjugate to Planck length)

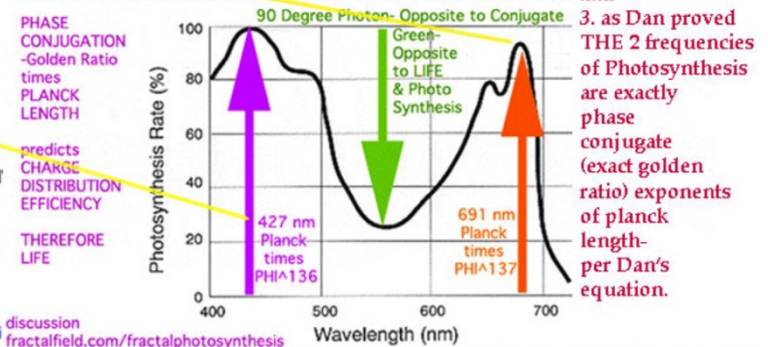

For me then I strongly hypothesize - that the REASON color exists - is that the photons as toroids are forced to angle their relative approach in 3D to the DODECA faces- this ALLOWS them to PHASE CONJUGATE CONSTRUCTIVELY - and THIS is what causes them to emerge at the dodeca face angles CALLED- COLOR!

3 dramatic new physics equation evidences from Dan Winter that color perception / and biologic photosynthesis are the SAME NEGENTROPIC PHASE CONJUGATE COLLAPSE wave mechanic

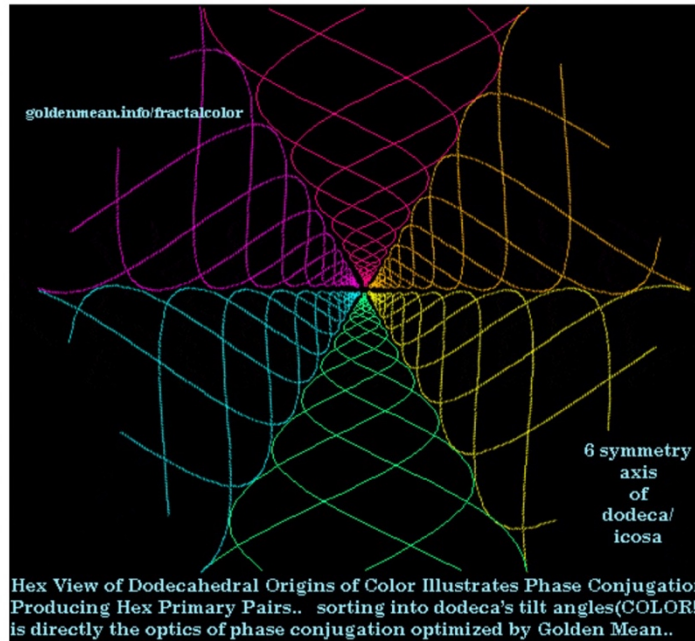

1. Photons (travelling toroidally)- within the visible octave- the red 691 nm, and purple 427 nm are EXACTLY phase conjugate exponents of planck..
2. Note bottom left- platonic symmetry tilt angles of ALL the primary colors are CUBIC (red 0 /orange 45 /green 90 /violet 135) - while Yellow/Blue are precisely the 63/117 degree DODECA PHASE CONJUGATE face angles!

Photosynthetically Useful Radiation. A graph of the rate of Photosynthesis and its relationship with different wavelengths of light indicates shows that the middle region of the visible light spectrum is of the least importance as far as photosynthesis is concerned.

Dan's perspective: RE: new symmetry model of ORIGIN OF COLOR - below - based on DODEC - Dan suggests that the most likely reason the primary colors frequencies (P1=R, P2=Y, P3=B) differential angles are accurately predicted by the dodecahedron planes central angles is because PHASE CONJUGATION is specifically permitted BY THE GOLDEN RATIO stellations of this dodecahedron. He hypothesizes that the REASON the photon toroidal vortex HAVE to find dodeca symmetries - and thus create COLOR- is because that dodeca array is the only way PHASE CONJUGATION and therefore 3D sorting / successful compression + distribution can happen.

Below- how the cubic symmetry of color photon toroids- nesting to produce the angles of the photon CALLED COLOR, embed to produce the 3 pairs of primary colors- which are the cube of 4 wave mixing CALLED phase conjugation.. which is also- the hex shadow of dodeca.. (the 63 degree and 117 degree photon phase angles of yellow and blue: which ARE the face angles of the -phase conjugating- dodecahedron.

quad implosion tracks mapped by four axes of the tetra symmetry, showing exact Phi ratio beat nodes 10 Golden Spirals-on Dodec 60 degree cone illustrate- PHASE CONJUGATION PERFECTED? = 4 wave mixing

**A New Paradigm of Fractality in Wave Mechanics, Enriches Ancient Philosophy of Beauty and Reveals a Powerful Breakthrough in the Profound Physics of Centripetal Forces / Compression Perfected Key to Gravity and Consciousness.**

The Sumerians had a profound influence on Egyptian culture as they developed a sophisticated system of writing and mathematics, which they used to build monumental structures and record their knowledge of the world. This knowledge and wisdom were then passed on to the Babylonians and later to the Egyptians, who further developed and refined it to suit their own needs. In this way, the transfer of knowledge and wisdom from the Sumerians to the Egyptians was a crucial step in the development of the scientific understanding of our universe.

Pythagoras, the Greek philosopher and father of mathematics, studied with some of the most renowned Egyptian scholars of his time, learning about geometry, astronomy, and theology before returning to Greece and establishing his own school of philosophy. As a result the schools such as Plato's Academy were greatly influenced by the teachings of Pythagoras and the Egyptian mystery schools.

Plotinus who is considered one of the most important figures in the development of Neo-Platonism, defined the understanding of beauty as a manifestation of the divine, a reflection of the One in the material world. He believed that beauty was understood as the perception of forms, which were the archetypes or idealized versions of objects and concepts created by fractal compression fields, were also reflections of the One, and that they existed in a higher realm beyond the physical world.

The material world, on the other hand, was seen as a realm of imperfection and change, where objects and concepts were imperfect copies or reflections of the ideal Forms. When we perceive something as beautiful in the material world which is a fractal compression field, we are actually perceiving a reflection or shadow of the ideal form in the higher realm. The experience of beauty was thus seen as a spiritual experience that allowed one to glimpse the divine and to move closer to the ultimate reality of the forms. This understanding of beauty as the perception of forms as reflections from a higher realm, created by fractal charge compression, has had a significant influence on the Western aesthetic tradition, and has shaped the way that we think about art and beauty even today. Ultimately perfected compressibility may be the very essence of beauty!

The connection of beauty and compression fields lies in the fact that compression fields create natural forms that exhibit unique patterns and symmetry, which are often perceived as beautiful. The critical threshold is to understand the function of golden ratio and fractality in compression fields and wave mechanics to enrich the scientific definition of beauty.

Today, this solution to implosive fractal centripetal force seems to be the biggest challenge of the scientific community to comprehend the fundamental mechanism of all self-organizing and centripetal systems being fundamentally defined by perfected compressibility. I believe we become The Hero with a Thousand Faces when we succeed to understand the real cause of gravity, consciousness and life force, with the simple definition of what makes a fractal field mindful, as beautifully defined by Dan Winter.

Golden ratio, the climax form of fractality, was described by the early philosophers like Plato to define the connection of all mathematical relationships as the key to the physics of the cosmos. We already know from Mathematics that golden ratio contains both arithmetic and geometric progressions together allowing the only possible way for constructive wave interference by adding and multiplying constructively. Moreover, Dan Winter, in this book, defines how golden ratio harmonics, when they radiate from the Planck constant, beautifully articulates the most fundamental principle of self-organization in biologic functions, and heavenly systems and even what stabilizes gravity itself, as the principal of perfected fractal centripetal force.

In their use of sacred dimension scaling, we have evidence that golden ratio perfected harmonic frequency distribution of Planck constant (Planck-Phire) was not only understood by the Sumerians as geometrically described in the tablet of Shamash tuned to Planck, it was also utilized by subsequent cultures such as the Eastern Roman Empire (dimensions of Omphalion tuned to Planck, Hagia Sophia, Constantinople). The powerful principal emerges that the very concept of "sacred" in dimensioning is precisely perfected utilizing the planck-phire scaling which tunes charge collapse perfected.

In modern times, the methods and techniques of science have continued to evolve and become even more sophisticated, leading to countless discoveries and advancements. However, despite the numerous discoveries and advancements made in various scientific fields, the mainstream scientific understanding of the universe still contains many mysteries waiting to be recognized.

With the correct definition of wave mechanics, we may be able to shed more light on the mysteries of the universe and gain a more comprehensive understanding of the world around us. Until now, no one has ever realized that self similarity perfected / embedding perfected is precisely fractality perfected which in itself is a radically powerful wave mechanic. In fact solving perfect wave compression and perfect fractality in wave mechanics is probably one of the oldest and actually most important problems in all of physics. – end intro

==

If they knew what caused gravity – they wouldn't have to write this:

““What I am going to tell you about is what we teach our physics students in the third or fourth year of graduate school... It is my task to convince you not to turn away because you don't understand it. You see my physics students don't understand it... That is because I don't understand it. Nobody does.”

— Richard Feynman

[QED: The Strange Theory of Light and Matter]”

**PLANCK-PHIRE – perfected fractal charge collapse: cause of gravity, consciousness, life force, and negentropy:**

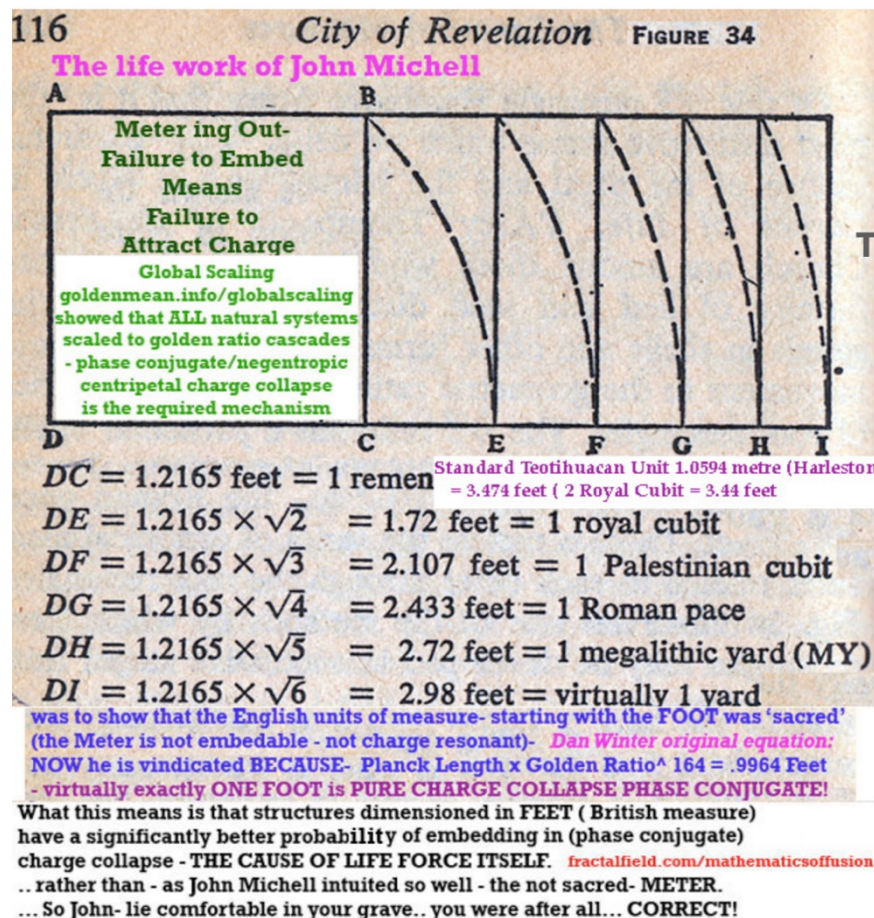

First – let's start here- with what may be the most profound and yet simple implementation of fractal charge implosion.

– HOW perfected CHARGE COLLAPSE- DEFINES ALL “SACRED DIMENSIONS”!

We introduce the idea of constructive charge collapse as the very ESSENCE of the idea of ‘sacred’ units of length (and later.. time).

The core idea below – is that (.9964 ) British Foot is exactly Planck Length x Golden Ratio ^164 (Sacred by compressibility).

Virtually all other ‘sacred dimensions’ then geometrically lock together (invite compression).

The specific origin and principle of the concept of ‘sacred dimension’ is precisely (phase conjugate /fractal) CHARGE COLLAPSE IMPLOSION PERFECTED

this enables negentropic implosion connection to the longitudinal ARRAY..

So practically – if you want whatever it is that you are building- to be sacred.. (literally – blessed) - could we be more clear- on how you need to choose dimensions! The very word- sacred refers specifically to the compression enabled where fractality permits waves of charge to converge non-destructively. **SUCCESSFUL CHARGE COLLAPSE DEFINES SACRED SPACE.**

Fractality for dummies... In simpler words- where waves and fields converge at the place of perfect meeting. Implosive squeezing invites ‘ all paths and errands to meet’!

Dr. K. Korotkov – our friend- measured and proved sacred space IS fractality in air- where the tribes went for ancestor phone calls. That introduced our measurements of sacred space and living architecture- [goldenmean.info/architecture](http://goldenmean.info/architecture) . We measure how the weak (Schumann related) charge field frequency signature of harmonic inclusiveness- is a practical way to predict which spaces cause life and growth and.. spiritual possibility: ref [www.flameinmind.com/lifeforce](http://www.flameinmind.com/lifeforce)

Next we USE that idea of perfected CHARGE COLLAPSE- to discover WHY objects fall to the ground.

Gravity is created by golden ratio /fractal ‘conjugate’ charge compression- because only in that geometry is recursive interference (heterodyning) in-PHI-knit-ly constructive. In only this geometry not only do wave lengths/ frequency -recursively interfere (heterodyne) constructively but ALSO the charge wave PHASE VELOCITIES – add and multiply constructively. This converts a portion of the energy of fractal COMPRESSION – in to ACCELERATION (of charge) toward center. We strongly believe - this centripetal acceleration of charge toward center- which results from fractal conjugate compression – is specifically THE origin of THE GRAVITY. -

Is there any OTHER way to explain the fractal structure we have newly proven for hydrogen? This author newly discovered that the 3 primary (‘ionized’) Radii of hydrogen are PERFECTED golden ratio multiples of Planck! If ever there was a smoking gun- of fractality at work???

We insist this is such precise evidence – of fractality setting up gravity making – specifically by charge implosion- that we will not allow ANY physicist to call this coincidence!

**Dear PHYSICIST- NO one will accept your answer that it could be a ‘coincidence’ that 3 hydrogen radii are precisely golden ratio exponents of PLANCK- SO - you must now deal with my answer to why: It is because golden ratio ‘conjugation’ of phases is HOW HYDROGEN IMPODES & MAKES GRAVITY**

Golden Ratio IS Self-Similarity also reveals the electrical nature of compression: perfect compression Perfected - Therefore this IS fractality Perfected!

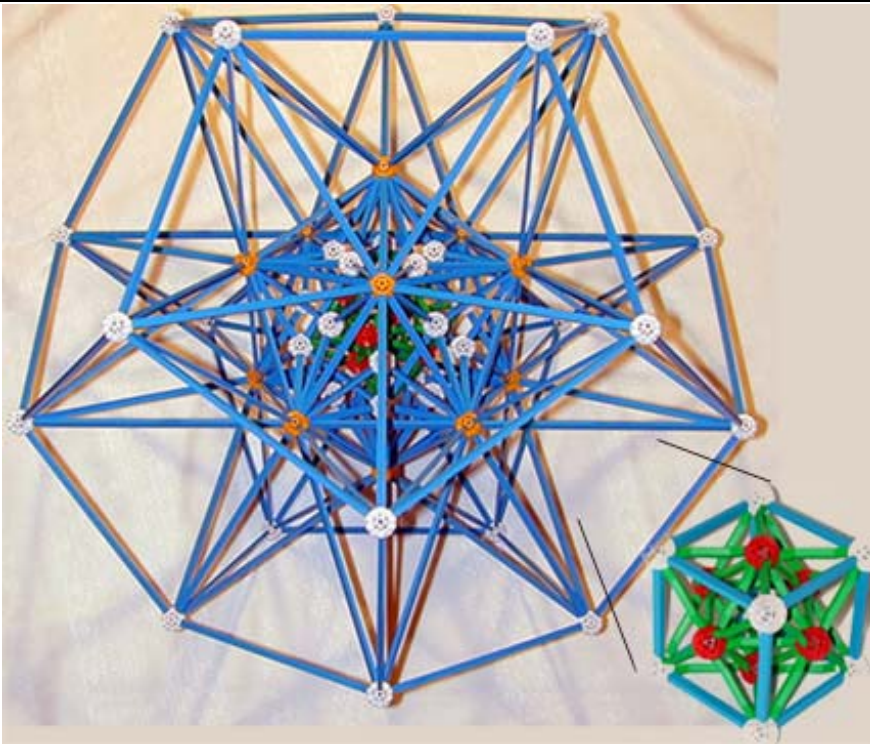

**The “Holy Grail” of Fusion / Implosion**

Dear Scientist: if you say golden ratio phase conjugation is NOT the cause of gravity- then pray tell us.. why is HYDROGEN BUILT THAT WAY???

On the next few pages we show our physics literature publications – based on golden ratio x planck.

TO summarize- we used Klein Gordon generalized wave equations to prove golden ratio maximizes CONSTRUCTIVE wave interference (therefore compression) on a line. We then show that one golden ratio segmented line is precisely converges to center in the 3D nest of stellated dodeca (“Star Mother”)- which we insist is functionally the only possible 3D fractal.. for example in hydrogen and DNA.

We have now proven this is the essential structure of hydrogen – This underlies our strong suggestion that - this GOLDEN RATIO QUANTUM FIELD THEORY- is EVIDENCE OF FRACTALITY AND AS WE SHALL SHOW – POINTS TO THE CHARGE COLLAPSE GEOMETRY AS THE CAUSE OF GRAVITY.

#### STAR MOTHER -KIT

[goldenmean.info/kit](http://goldenmean.info/kit)  
[geometricmodels.org](http://geometricmodels.org)

Note how the x,y,z values of each of the vertex of all the nodes in the star mother- are simple exponents (whole number multiples) of Golden Mean .618 , 1.0, 1.618, 2.618

This is mathematic evidence- that -EACH POINT IS ALWAYS A MULTIPLE OF GOLDEN RATIO DISTANCE TO CENTER POINT!

Pure fractality in 3D! In this sense- we suggest the infinite dodec/icos stellation (like hydrogen) is in a way ‘the only possible ‘3d Fractal’!

-The Golden Coordinates of the Star Mother:

If - cube edge = 2 units

Then the tetra edges would be square root of 2 times 2

Dodeca edge = .618 times 2

Icosa edge = 1.618 times 2

and the NEXT outer dodeca stellation edge 2.618 times 2

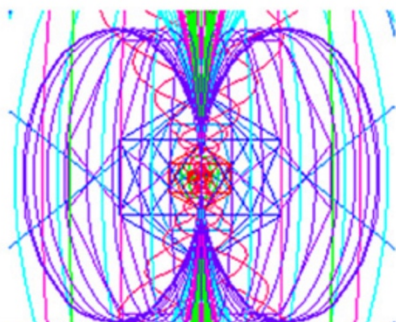

The below 2 pages are especially for the technically oriented ( not essential for general readers).

### Abstract

It has always been self-evident that virtually every living structure, leaf symmetry and the pent geometry of almost every living protein, uses the golden ratio for an electrical reason. Golden Ratio defines beauty in general for reasons which are also fundamental to physics. It is also self-evident, by inspection, that golden ratio solves the problem of recursive wave interference because it is the only solution to both adding and multiplying (recursive wave interference precisely turns recursive wave addition into multiplication). The authors present their new evidence of the golden ratio structure of hydrogen as one more evidence of the fundamental solution it poses to constructive wave interference, which IS constructive compression. Earlier they noted software emulation which showed golden ratio as the general solution to constructive interference. Here they show the wave-equation mathematics proof. The first set shows golden ratio is the solution to constructive compression (implosion / fusion) in a line. Then they show how that precise line of golden ratio points extends out each axis of symmetry of the pent dodeca which is the proven shape of hydrogen, DNA, Earth Grid, and the UNIVERSE. Further a model is presented for how this golden ratio causes gravity electrically: As a portion of the inertia encounters recursive constructive wave interference by golden ratio, in addition to the wave lengths, the wave phase velocities are hypothesized to heterodyne constructively recursively. This way of turning compression into (charge) acceleration is hypothesized to be the core wave mechanism of phase conjugation (apparent self-organization) and the centripetal forces of gravity, lift force, color, and perception.

## Fractal Golden Ratio/ Phase Conjugation: Cause of Gravity

By Daniel Winter and Dr. Martin Alexander Jones Fractalfield.com

Fractality has been the hypothesized cause of gravity in countless theories. In this paper we show how the perfected fractality of the golden proportion in geometry is the cause of gravity due to the defined (in a previous paper<sup>1</sup>) compression. Compressions may be used to model any system that obeys general systems laws. (mention examples- Andre Linde., others). What has been missing is a clear assembly of the evidence- AND a compelling hypothesis of HOW fractality causes the gravity. This is our intent.

**Premise 1:** fractality is precisely the geometry of perfected infinite compression.

The Klein-Gordon equation is as follows:

Previous paper showed that perfected

$$\nabla^2 \Psi - \frac{m^2 c^2}{\hbar^2} \Psi = \frac{1}{c^2} \frac{\partial^2 \Psi}{\partial t^2}$$

compression with the harmonic series for the normalizing coefficients was shown to have the golden proportion as the frequency proportionality constant. This points to the premise. Refer to previous paper. (Where  $||A_n||^2$  is the Harmonic Series squared).

$$\frac{\partial \Psi}{\partial \phi} = \sum_{n=0}^3 A_n n \phi^{n-1} e^{i\left(\frac{p_n}{\hbar} x - \phi^n \omega_o t\right)} = 0$$

**Premise 2:** infinite non-destructive charge compression- was the essence of Einstein's description of the unified field electrical cause of gravity.

**Premise 3:** Golden Ratio - for example - the infinite series .618..., 1.0, 1.618..., 2.618..., .... - is precisely the embodiment and perfection of

- non-destructive self re-entry
- self similarity / self embedding
- recursion / embedding / entanglement perfected
- the perfection of the conjugation of phases (phase conjugation- as in recursive constructive adding and multiplication of wave heterodynes

In our previous paper<sup>1</sup> we showed using Klein-Gordon equations-that golden ratio is the perfection of maximum constructive wave interference- first in a line - and then in 3D. If we are correct- and we believe that is shown- that golden ratio is the maximum form of constructive wave interference in general- THEN it follows necessarily that golden ratio is - the generalized solution to:

1. maximum constructive wave compression
2. maximum fractality
3. charge implosion the origin of centripetal forces
4. the origin and perfection of the negentropy often measured from phase conjugation
5. and the GRAVITY.

### We present the evidence

Einstein was clear- (infinite) constructive (electrical) compression DEFINED gravity (hence IMPLOSION OF CHARGE): That is the wave problem - Dan Winter's team solved mathematically, demonstrating Golden Ratio phase conjugation infinite constructive charge compression using Klein-Gordon generalized wave equations. Dan Winter- has shown more recently- that this golden ratio phase conjugate implosion of charge which causes gravity - reaches a limit condition at the Planck sphere dimension- where the phase conjugate pine cone translation of vorticity converts the charge inertia from transverse to longitudinal EMF - which IS gravity waves- and the bioactive / action at a distance field wave mechanic- see [www.fractalfield.com/physics](http://www.fractalfield.com/physics) This way of producing charge acceleration (named 'the gravity') thru the speed of light (longitudinal EMF) - also accounts for mitogenic radiation, 'DNA radio', (collective unconscious/ ancestral memory) and the physics of most spiritual wisdoms- including [body plasma fields surviving death](#).

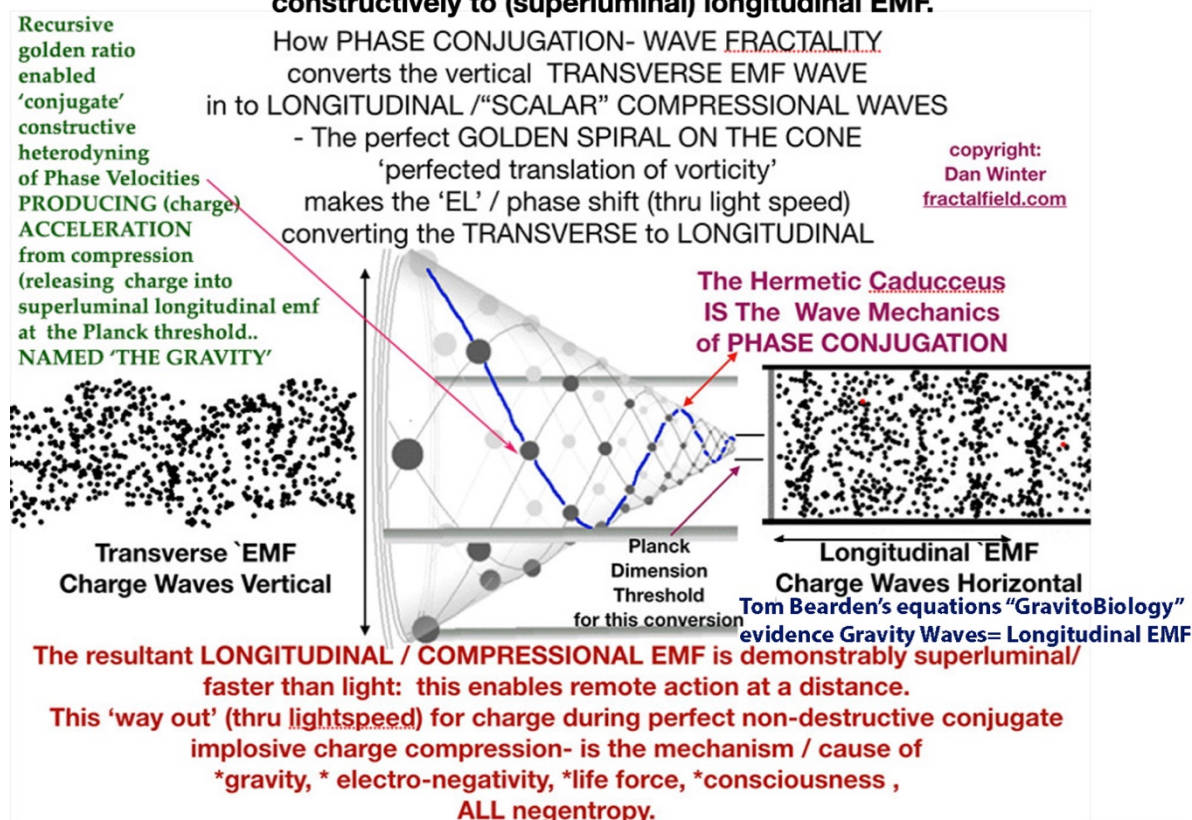

**Dan Winter's phase conjugate charge implosion theory of gravity- defended- thanks to**

**Mark Rohrbach** - Mark Rohrbach - ( [phxmarker.blogspot.fr](http://phxmarker.blogspot.fr) ) letter to Physicist Elizabeth Rauscher - May 11, 2017" Hi Elizabeth, Attached is the paper I was telling you about that gives a derivation of Dan's work for his phi-ratio implosion idea. (here Mark attached PDF of our paper published in GS General Science Journal - originally from [www.fractalfield.com/mathematicsoffusion](http://www.fractalfield.com/mathematicsoffusion)

- "Compressions, The Hydrogen Atom and Phase Conjugation" (Magazine source link for pdf- followed by link to the same paper - at the original fractalfield pub)

**How does that phase conjugate fractal compression- causing gravity (and perception) become constructive/ implosive/centripetal: the transverse EMF inertia is translated constructively to (superluminal) longitudinal EMF.**

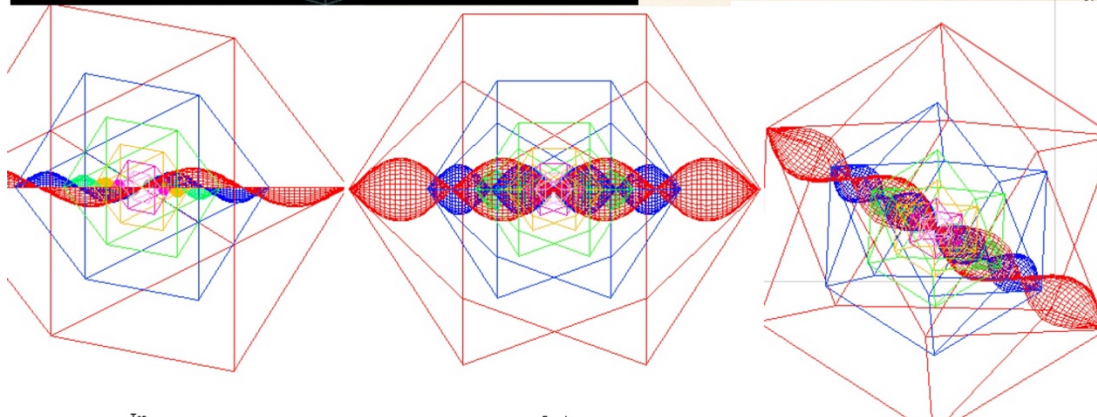

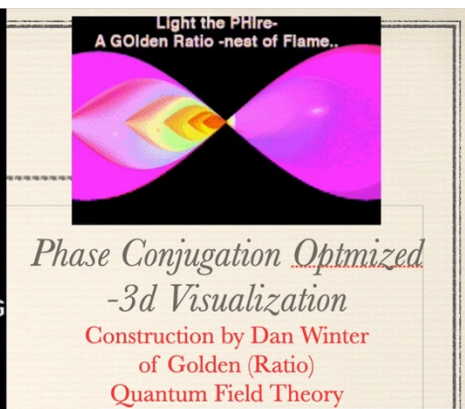

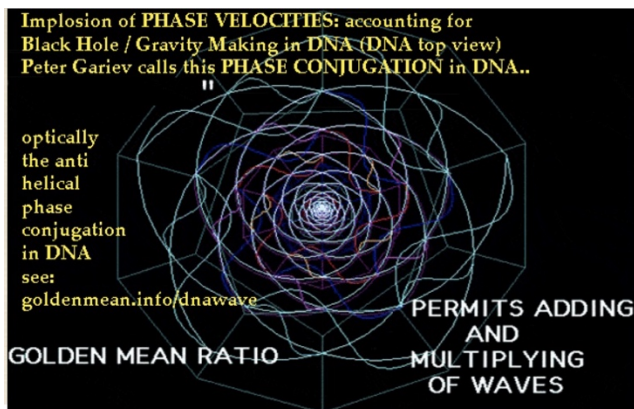

(above) The golden ratio 'caduceus' geometry on the vortex – creates perfected 'translation of vorticity' converting local transverse EMF- to longitudinal ('scalar') emf.

How golden ratio- permits the recursive constructive heterodyning/ wave interference which is non-destructive compression: (image next page).

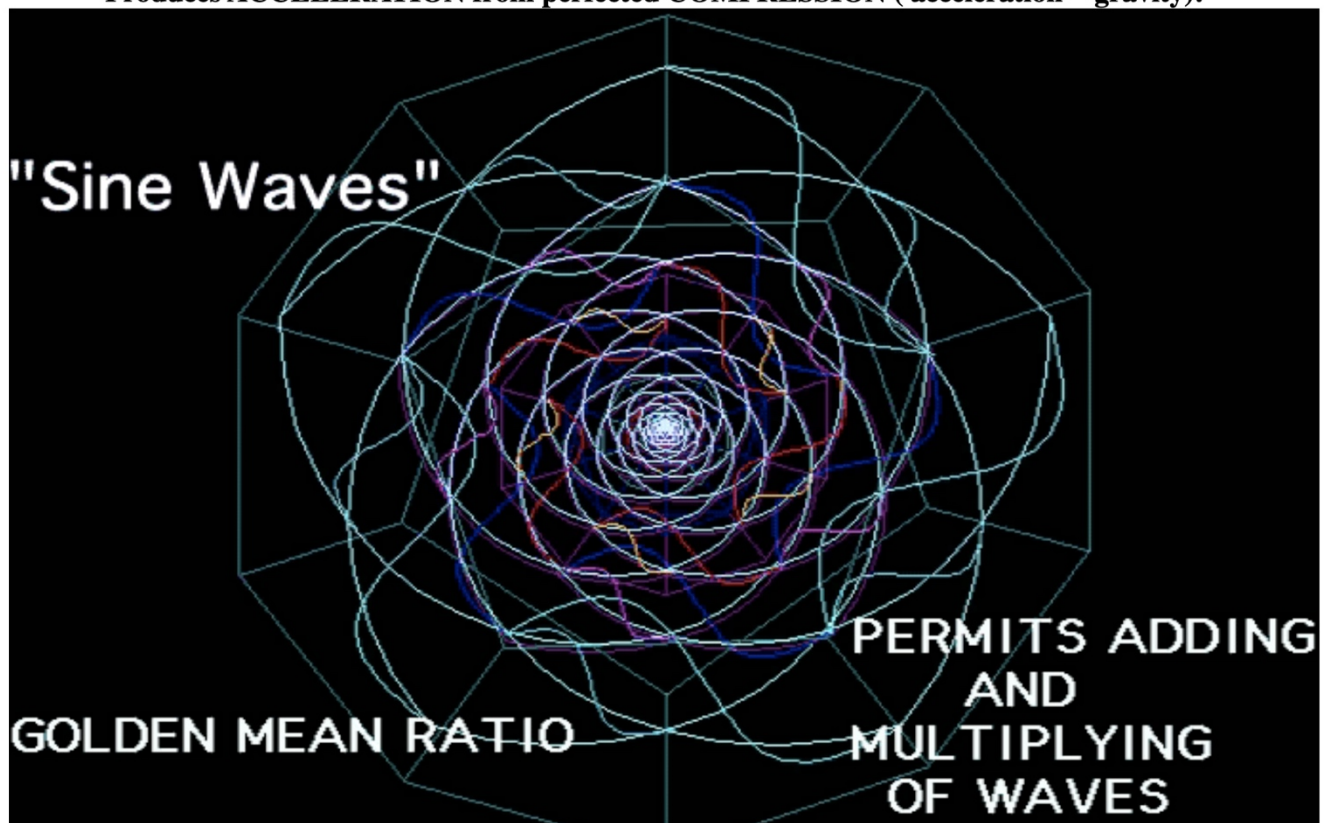

Where does the negentropy come from? Negentropy is a name for self-organization, that is to say, emerging from disorder (entropy). A plasma or charge vortex based on PlanckPhire charge collapse -becomes negentropic because:

1. The charge gains centripetal inertia (implosion) going down to center
2. The centripetal force of compression in to fractal phase conjugation – ENABLES ONLY THE CHARGE WAVES WHICH ARE IN FRACTAL PHASE LOCK TO EMERGE BY PASSING THRU THE CENTER. THIS MEANS – THAT ALL WAVES NOT IN FRACTAL PHASE DISCIPLINE ARE CANCELLED AT THE IMPLOSIONS CENTER. THE RESULT OF THIS IS INCREASED ORDER ON THE OTHER SIDE OF PHASE CONJUGATE IMPLOSION. This phenomenon of increased order or self-organization or negentropy is well documented in phase conjugate optics- but little understood for example in phase conjugate magnetics – and other spectra.
3. A practical example might be when your body achieves charge implosion as bliss or kundalini process- you should likely get younger ( as some say I have). In general we have been teaching that having access to serious bliss process- will toast parasites- from astral to intestinal.

We present key examples- of our Planck times golden ratio exponents of charge equation (like photosynthesis, Schumann harmonics , major orbital dynamics etc) – as revealing prime examples of negentropy in action.

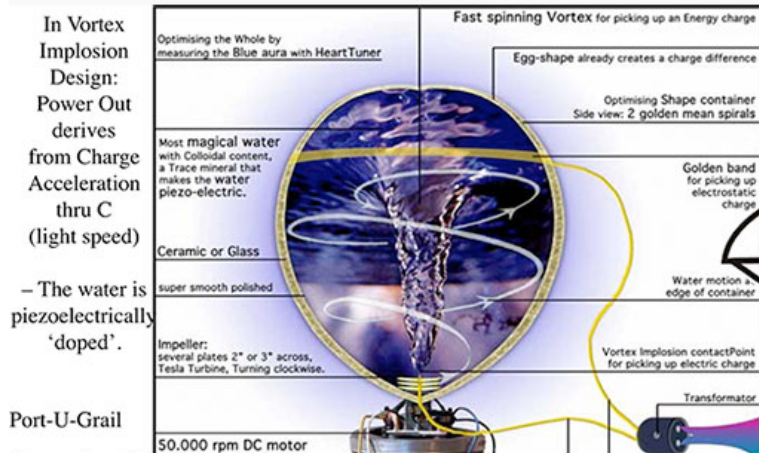

**Recursive adding and multiplying ('heterodyning') of both wave lengths AND velocities creates a cohere-ing of wave front SPEEDS thru the speed of light. This opens the 'drain-hole' for charge to move out - PRODUCING the Phenomenon called GRAVITY. Thus capacitance (charge) in the symmetry of self-similarity or fractality is how gravity is CREATED because this successful heterodyning of waves Produces ACCELERATION from perfected COMPRESSION ( acceleration = gravity).**

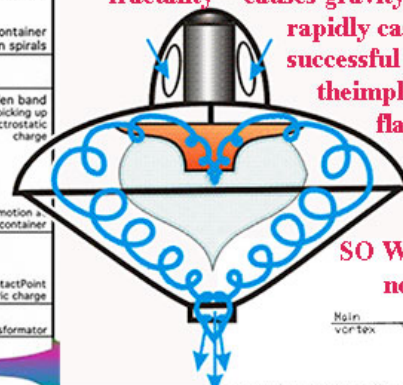

**Challenge to Earth Science! "IF you knew WHY a vortex (mercury/water/piezo..) MAKES Gravity**  
**(spontaneously gets colder/negentropic / and implodes charge from the vacuum),**  
**THEN - you could know why objects fall to the ground ( and how the Nazi's won the war)..**  
**AND the CAUSE of LIFE FORCE, CONSCIOUSNESS and all CENTRIPETAL / NEGENTROPIC Forces..**  
**AND then the ET's would categorize Earth as interstellar worthy (meaning until then - we symbolize STONE AGES !)**

**Dan Winter fractalfield.com/conjugategravity**  
**has clearly described by equation HOW this**  
**fractality causes gravity - and has built a**

**interference.**

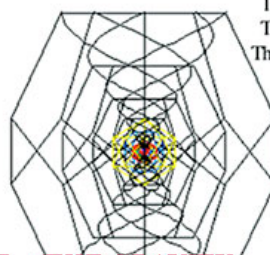

**Accurate Plot of the Equation Path of Hydrogen Radii to Planck**

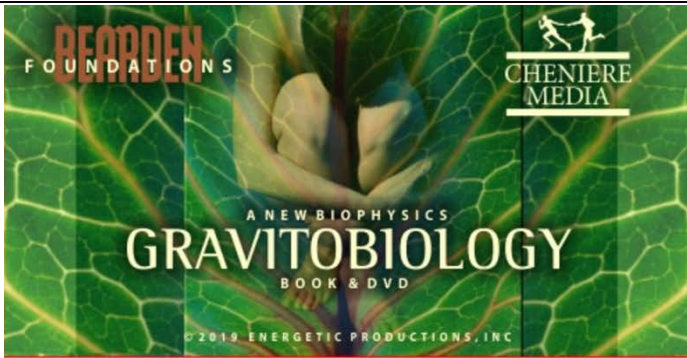

Varying the tilt angle (here, into and out of the plane of this paper) of the vortex cascade or "light cone" which the heart's vortical muscle was impedance coupling, would determine this critical RATIO between adjacent nested fields. And by this ratio, the geometric efficiency of the fields ability to couple and continue their cascade bringing information between large fields like planets gravity bodies, to glands, and into cells and DNA.

Here  
 Is where  
 Compression  
 Becomes  
 Acceleration..

**phase velocity**  
**charge wave**  
**heterodynes**  
**recursively**  
**constructively**  
**then charge**  
**compression BECOMES**  
**CHARGE ACCELERATION TOWARD CENTER (THE GRAVITY)**

It is Tom Bearden's book "GravitoBiology" where he provides strong evidence that coherent longitudinal emf component IS the 'stuff' of gravity waves.

### ***HIDDEN ELECTROMAGNETIC MECHANISMS FOR BIOLOGICAL EFFECTS***

**In 1989 at a keynote lecture** at the Whole Life Expo in Los Angeles, California, Tom Bearden introduced the concept of Gravitobiology.

This he explains for an hour and half using slides and his unparalleled knowledge of not only the scientific literature, but also historic and contemporaneous research being carried out in Russia and elsewhere.

Originally called photobiology, this new field was based on the work of the Russian Gurwich in the 1920s and 1930s who was studying emissions from cells, especially the burst of activity as they were fertilized.

Many other scientists in Russia, working in military institutions, took these experimental findings, developed them further, and weaponized them. Scientists in other countries such as Germany also formulated extensions of these theories based on their additional research findings.

Lisitsyn's work on deciphering the brain's electromagnetic frequencies is also discussed.

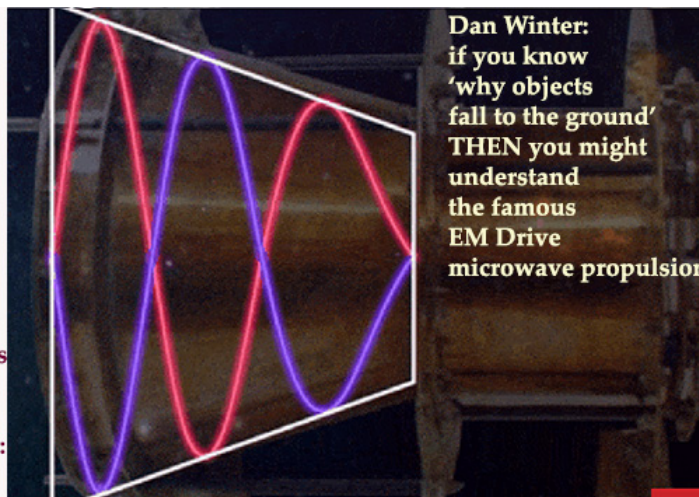

But it was Tom Bearden who then took all of their foundational work, melded it together, and then applied quantum mechanics to create the new science of Gravitobiology. The complete science of using all electromagnetic mechanisms to effect biological changes.

This is an exciting journey into territory that is deliberately hidden from public view which will keep you sitting on the edge of your seat as Tom Bearden helps navigate you into this tangled web that is now being

**This graph of the microwave path - in the famous EM propulsion drive would be more accurately called PHASE CONJUGATION**

**Dan Winter:**  
 if you know  
 'why objects  
 fall to the ground'  
 THEN you might  
 understand  
 the famous  
 EM Drive  
 microwave propulsion

(above) The famous ‘EM” drives make gravity because the microwave trapezoid conjugates /implodes the frequency cascade at the foci. At the conjugate point the compression produces directional longitudinal emf (gravity). It needs to be tuned- accurately by my Planck equation for optimization.

The focus of this book: there is probably a majority of scientists who now recognize – charge collapse defines or underlies both consciousness- and gravity. So – IF we learned the cause of charge collapse- we would then learn the cause of consciousness and gravity. Here we claim to have solved that problem: the cause of charge collapse (and therefore consciousness and gravity) – IS namely PLANCKPHIRE – which is the fractality perfected geometry of Planck length or time x integer exponents of golden ratio.

This chart below presents strong evidence that “Planck x integer exponents of golden ratio” predicts numerous very convincing example of negentropic / self-organizing wave systems such as: From hydrogen radii to 2 EXACT colors/ frequencies motorizing photosynthesis, to sacred length dimensions, DNA, orbital mechanics and much more. These are the ROOTS of self-organization, centripetal forces, and negentropy in general!

Dan Winter's compelling formula: THE Fractal Physics:

Exact integer exponents of golden ratio (phase conjugate) multiples of PLANCK length and time

Graphic: the back cover of his new book [www.fractalfield.com/fractalspacetime](http://www.fractalfield.com/fractalspacetime)

Animated in 3D: [www.goldenmean.info/grail](http://www.goldenmean.info/grail)

- the generalized wave geometric cause of gravity, life force, and biologic negentropy
- why objects fall to the ground
- how wave geometry creates negentropy so well proven in phase conjugate optics
- how Earth and it's Schumann harmonic cascade (Dan newly proved is a precise 'conjugate pump wave') creates the self organization evidenced in the GAIA HYPOTHESIS
- golden ratio phase conjugation is the only wave geometry which defines a 'fractal field'
- these virtually exact integer exponents of golden ratio (phase conjugate) multiples of PLANCK length & time predict:

(Dan Winter's original discoveries)

- \* multiple exact radii of hydrogen

Update: May 2015

- \* the exact only 2 frequencies which motorize photosynthesis

Winter's equation

- \* virtually exact Schumann Planet harmonics

Perfect Implosive Negentropy

- \* the brainwave (ALPHA / BETA) frequency cascade of peak perception / bliss

ALSO predicts ADP/ATP Wavelength

- \* virtually exact duration of the Earth year and Venus year

AND- exactly the

- \* virtually exact frequencies PRIORE and also RAUSCHER used to heal

HRV LF and HF frequencies!

- \* exact frequency and geometry used to create commercially proven life giving (bioactive) fields at

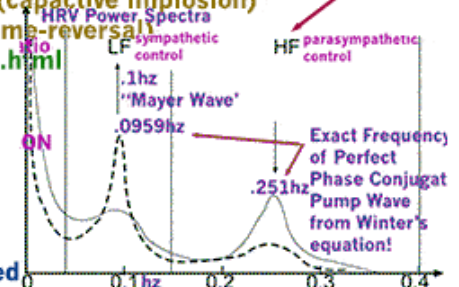

TheImploder.com (hydrodynamic implosion) and Pyraphi.com (capactive implosion)

and the PRIORE rejuvenation field. (phase conjugate plasma time-reversal)

[www.goldenmean.info/phaseconjugate/RejuvenationFieldTech.html](http://www.goldenmean.info/phaseconjugate/RejuvenationFieldTech.html)

And documented rejuvenation effect:

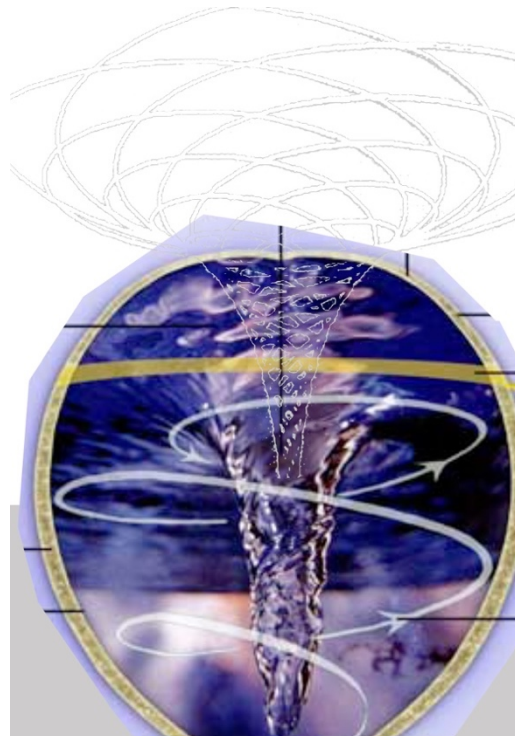

[www.imploderspa.com/ImploderSpaBrochure.pdf](http://www.imploderspa.com/ImploderSpaBrochure.pdf)

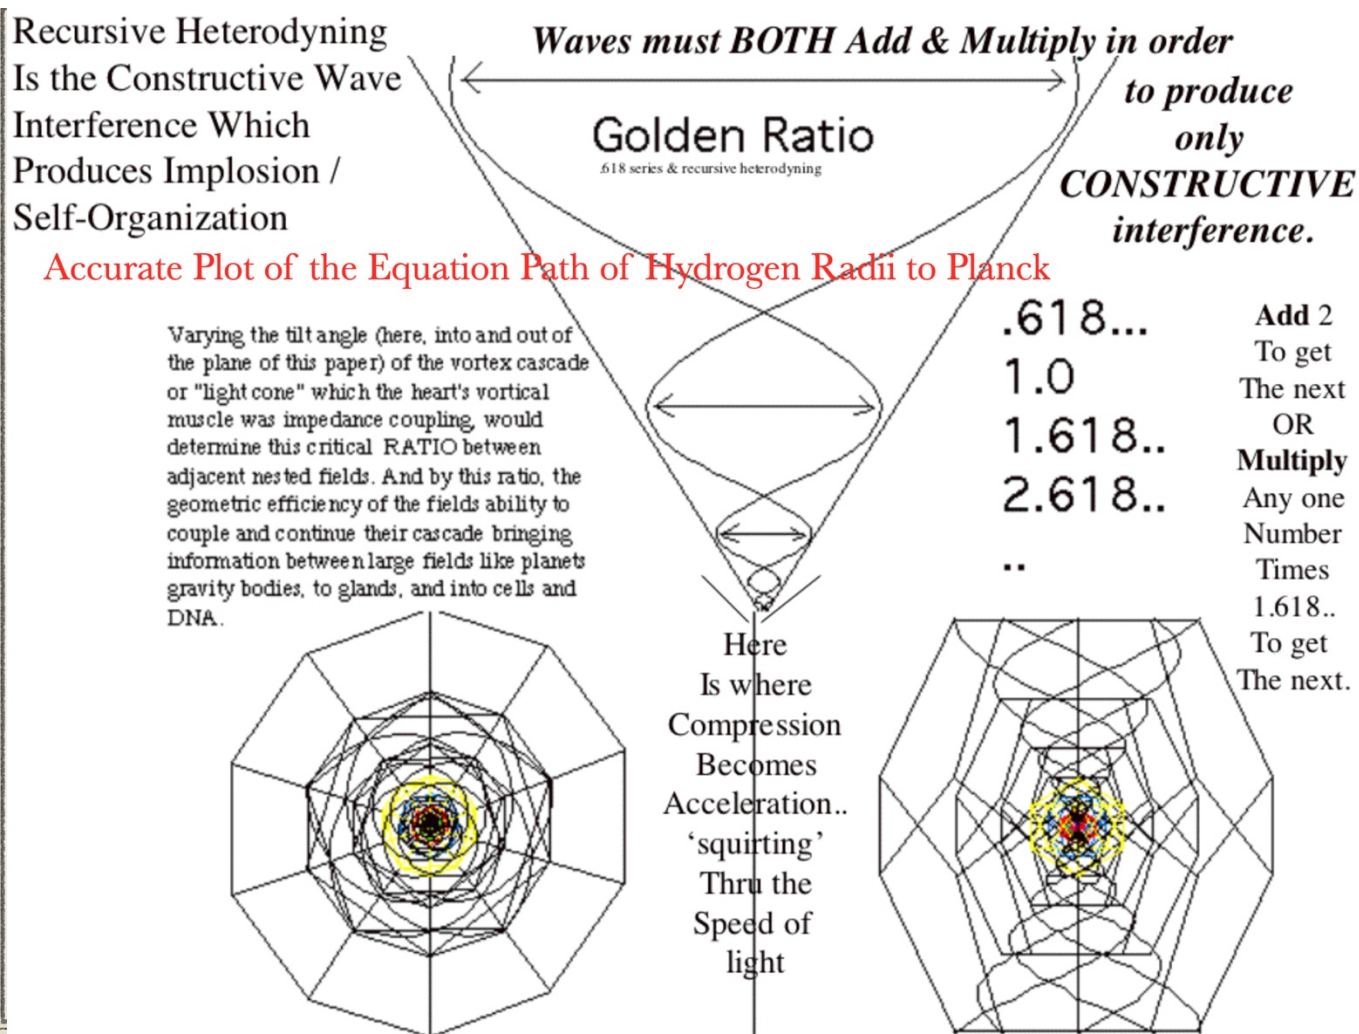

"God is the perfectly replicable part of the pattern/wave /meme because charge distribution perfected conjugation / fractality is what make any field centripetal, negentropic, and hence mindful.. God's domain- Dominus Vobiscum: literally- The Divine=Perfectly Branched

What does charge collapse even mean?

When charge falls down the vortex wormhole – ( in hydrogen' fractal dimensions for example) – it is like a super-fluid whirlpool. Down this little black hole- there is a certain geometry (specifically requiring golden ratio) – which produces some ACCELERATION toward center- only when the compression geometry is fractal / conjugate /golden ratio.

When these waves- start their golden ratio constructive adding and multiplying recursively.. this is what produces (phase velocity) acceleration toward center, the principle behind gravity AND consciousness. This is literally charge implosion.

This is effectively the only geometry of perfected charge collapse, as evidenced by the earlier compelling chart showing all negentropic dimensions, require golden ratio exponents of Planck thus producing centripetal force generation.

**CONSCIOUSNESS as CHARGE COLLAPSE:** How the physics of spin becomes centripetal.

How does perception / observation collapse the wave function by introducing an artificial still point? As we discuss- Bill Tiller famously proved focused human attention causes fields to compress. This is also strong evidence consciousness itself is electrically centripetal. We suggest specifically all centripetal forces INCLUDING consciousness – are in effect caused by perfecting charge collapse.

The natural continuous rotation of waves of charge – into 'slip knot' toroids- is in effect the only origin of mass or matter.

Remember that charge rotation (spin)- is the only origin or definition of mass- because that rotation is the only way INERTIA is stored, gyroscopically, which is clearly the deep definition of mass. Similarly, charge rotation has a PERIOD of rotation, which relative rotation rate then is the only origin or definition of time.

So, regarding the illusion of still point collapse, in fact, there is never an actual still point among nested rotations. We call the way perception ‘forces’ an illusion of stillness, upon what is never in fact actually still- an ‘artifice’ or quite literally ‘artificial’. The illusion of still points is just that: an illusion. Yet in order to HAVE PERCEPTION this COLLAPSE into an ‘illusion’ of stillness, is necessary. This is one way, probably among many, in which scientists talk about **perception, or even consciousness, being either the cause of, or the result of WAVE COLLAPSE. The point is, that some kind of POINT must be made, among waves (which are never actually a point) for perception and consciousness to occur.** (The problem of the observer).

Remember we are actually proposing the real point of collapse is precisely the Planck dimension itself, where golden ratio conjugate MAKING the only kind stillness possible. We suggest in this conversation, that still point at center which Planck dimension defines, is actually a ( longitudinal node ) CONNECTOR to something MUCH bigger ( the “ARRAY” of fractal nodes ).

**Phase Conjugate (& Fractal) Charge Implosion is the ONLY Perfected/ Non-Destructive Wave Collapse: and precisely how charge vorticity (conjugate caduceus) translates transverse to longitudinal (scalar) emf - the ONLY physics of gravity waves, action at a distance.. and how consciousness propagates.. (quantum 'entanglement' IS phase conjugation /embedding perfected)**

**Dan Winter**    [fractalfield.com/conjugateperception](http://fractalfield.com/conjugateperception)    [fractalfield.com/conjugategravity](http://fractalfield.com/conjugategravity)

**All part of the joys of occupying a planet so far from downtown (Nobel committee have heads in the sand)..**

**We just announced:  
The CAUSE of Gravity  
&**

## The CAUSE of Consciousness..

planck x exact powers of Golden Ratio  
= CHARGE COLLAPSE PERFECTED=  
(LONG list - hydrogen radii,  
sacred dimension, all biologic  
negentropy - AND orbital mechanics!

**& Cause of LIFE-implosive charge collapse**  
- cause of seed germination for example.

peak perception [flameinmind.com](http://flameinmind.com)

**AND - cause of attention in EEG?!?!?! NO** One wants to admit there's a naked elephant in the room!

- Emporers of Physics... with no clothes on..
  - EINSTEIN: Infinite Non-Destructive Charge Collapse:  
IS The solution to gravity AND the unified field
  - Eugene Wigner & Jonny Von Neumann:  
CONSCIOUSNESS CAUSES Wave Function Collapse
  - Roger Penrose & Stuart Hameroff:  
Consciousness LEADS to the Collapse of the Wave Function..
- tio==BUT - Asking them what CAUSES - Wave Collapse... -  
 and Therefore Consciousness AND Gravity...  
 (Implosion/ Negentropy and ALL Centripetal Forces)  
 is exactly like  
 asking them What Causes Objects to Fall to the Ground..
- . clearly they were clueless..

# Wigner - von Neumann Interpretation

## Consciousness Causes Wave-function Collapse

5:24 / 17:37 • Enter von Neumann >

- 0:49 a wave-function for a particle that goes both left and right. This is called a superposition.
- 0:55 According to the standard interpretation of quantum mechanics such a superposition
- 1:00 means that the particle is indeed neither left nor right, but both, until you make a measurement. The
- 1:07 moment you measure the particle, you know whether it went left or right, and the wave-function
- 1:13 "collapses" to one that fits to your observation. Albert Einstein didn't like this at all. Yes,

#quantum #consciousness #physics

- 1:20 that guy again. Einstein said, this collapse happens faster than light, that's a "spooky
- 1:27 action at a distance", so it has to be wrong. But Bohr said, there's nothing wrong with that,

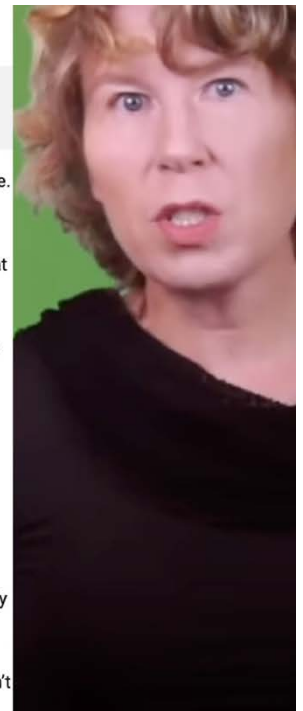

Per Sabine Hossenfelder – “Einstein said that since the wave collapse happens faster than light- that’s a ‘spooky action at a distance’” We say the faster than light wave collapse which causes mass and ‘particles’ is precisely fractal phase conjugation tuned to Planck- called “PlanckPhire”. This necessarily generates a directional output of coherent longitudinal emf- from the implosion- which is specifically how Tom Bearden defined gravity waves by equation ( “Gravito-Biology”).

Roger Penrose

Stuart Hamaroff

- 14:21 Finally let me add a brief comment about Roger Penrose and Stuart Hamaroff, who are maybe
- 14:26 most famous for claiming that consciousness has something to do with quantum mechanics.
- 14:31 Their argument however is a completely different one. It's that the collapse
- 14:36 of the wave-function leads to consciousness, not that consciousness leads to the collapse.
- 14:43 They have this idea that in the human brain there are certain large molecules, the microtubules,
- 14:50 that can form coherent quantum states, and their collapse is relevant for consciousness.
- 14:56 There are several problems with this. First of all you wouldn't expect such large molecules
- 15:02 to remain in quantum superpositions for a sufficiently long time in the human brain. Second,
- 15:07 all cells have microtubules, so how come my liver isn't also conscious? And third,

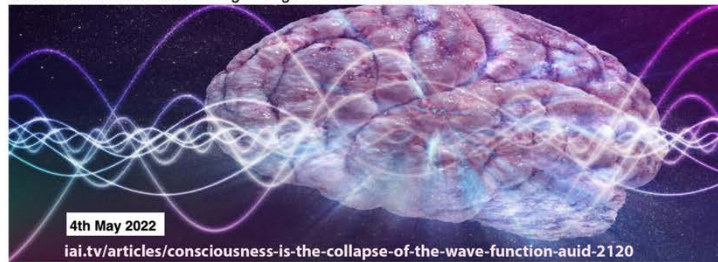

Sabine also points out the ironic controversy between those who say consciousness leads to charge collapse- versus those like Roger Penrose and Stuart Hameroff -who say the collapse of the wave function leads to consciousness! She is also mentioning one of the most famous theories of consciousness based on MICROTUBULES- from Hameroff. I had the privilege of lecturing to Hameroff's Physics of Consciousness group co-founder Prof Gary Schwartz – Phd Cardiology students ( physics of -realheartcoherence.com ). The microtubule theory of consciousness IS fascinating- and points to a charge collapse 'wave guide' geometry - but in itself- is useless to describe WHERE consciousness goes during out of body experiences and remote viewing – and does not in itself address the cause of charge collapse- or why consciousness so measurably causes charge to compress ( Bill Tiller ). Nevertheless – as we see -images below- the double cone octa geometry of microtubules DURING mitosis – beautifully points to phase conjugation.

## Consciousness is the collapse of the wave function

Quantum mechanics and the organic light of consciousness

[iai.tv/articles/consciousness-is-the-collapse-of-the-wave-function-aid-2120](http://iai.tv/articles/consciousness-is-the-collapse-of-the-wave-function-aid-2120)

**Stuart Hameroff** | Anesthesiologist and Quantum Consciousness Theorist and Researcher. Professor Emeritus at The Department of Anesthesiology and Center for Consciousness Studies, The University of Arizona, Tucson, *Quantum mechanics suggests that particles can be in a state of superposition - in two states at the same time - until a measurement takes place. Only then does the wavefunction describing the particle collapses into one of the two states. According to the Copenhagen interpretation of quantum mechanics, the collapse of the wave function takes place when a conscious observer is involved. But according to Roger Penrose, it's the other way around. Instead of consciousness causing the collapse, Penrose suggested that wavefunctions collapse spontaneously and in the process give rise to consciousness. Despite the strangeness of this hypothesis, recent experimental results suggest that such a process takes place within microtubules in the brain. This could mean that consciousness is a fundamental feature of reality, arising first in primitive bio-structures, in individual neurons, cascading upwards to networks of neurons, argues Roger Penrose collaborator Stuart Hameroff.*

**Penrose turned the conscious observer around. Instead of consciousness causing collapse, wavefunctions collapsed spontaneously, causing a moment – a 'quantum – of consciousness.**

### Consciousness and the collapse of the wavefunction

Penrose was suggesting Objective Reduction not only as a scientific basis for consciousness, but also as a solution to the 'measurement problem' in quantum mechanics. Since the early 20<sup>th</sup> century, it has been known that quantum particles can exist in superposition of multiple possible states and/or locations simultaneously, described mathematically as a wavefunction according to the Schrödinger equation. But we don't see such superpositions because, it appeared to early quantum researchers, the very act of measurement, or of conscious observation, seemed to 'collapse' the wavefunction to definite states and location - the conscious observer effect - consciousness collapsed the wavefunction. But this view put consciousness outside the purview of science. Another proposal is 'Many Worlds' in which there is no collapse, and each possibility evolves its own universe.

Penrose turned the conscious observer around. Instead of consciousness causing collapse, wavefunctions collapsed spontaneously, causing a moment – a 'quantum – of consciousness. Collapse, or quantum state reduction, occurred at an objective threshold in the fine scale structure of spacetime geometry.

**While the wave-function is viewed by many as pure mathematics in an abstract space, Penrose characterized it as a process in the fine scale structure of the universe.**

Penrose first likened quantum particles to tiny curvatures in spacetime geometry (as Einstein's General Theory of Relativity had done for large objects like the sun). Superposition states of multiple possibilities, or of delocalized particles, could then be viewed as opposing curvatures, and hence separations in the fine scale structure of the universe, spacetime geometry. Were such separations to continue, 'Many Worlds' would result.

But such separations would be unstable, and reduce, or 'collapse' to definite states, selected neither randomly, nor algorithmically, but 'non-computably', perhaps reflecting 'Platonic values' embedded in spacetime geometry. Thus while the wave-function is viewed by many as pure mathematics in an abstract space, Penrose characterized it as a process in the fine scale structure of the universe.

Next visuals: more on the microtubule as mechanism of phase conjugate charge collapse ( if not as Stuart Hameroff suggests- mechanism of consciousness itself??) –

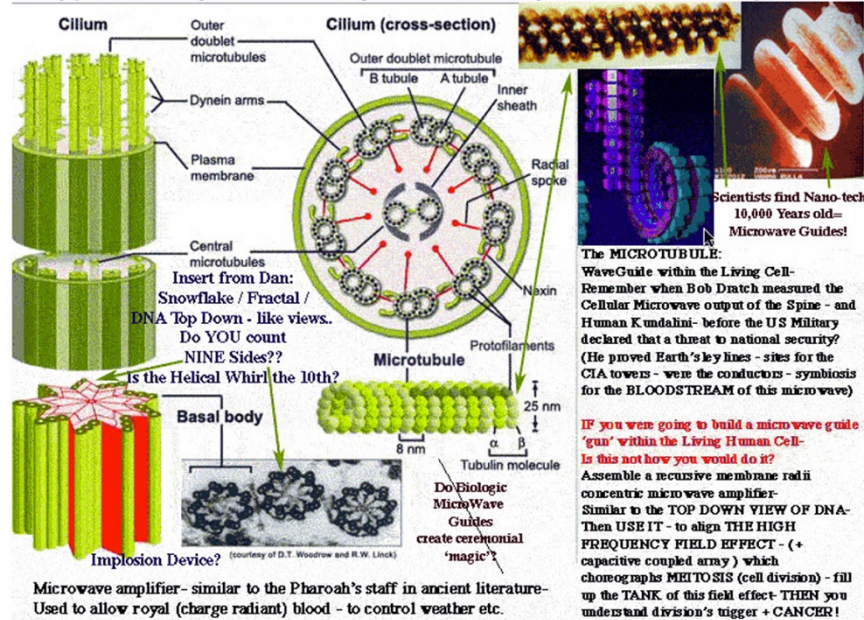

## Microtubule as implosive conjugating waveguide for implosive ensoulment- WHEN it is aligned in the DOUBLE CONE which enables phase conjugate 4 wave mixing DURING Mitosis

Star wars: micro 'Chloridians' in the blood -/ Montauk's 'boson 7' are cellular microwave conjugators indicated 'djedi' / longitudinal plasma projectors from evolved cellular microwave.

The (dodeca water inhabited) sub-cellular **MICROTUBULE** as a mechanism of consciousness . Speaking of WAVE GUIDES for the miraculous!

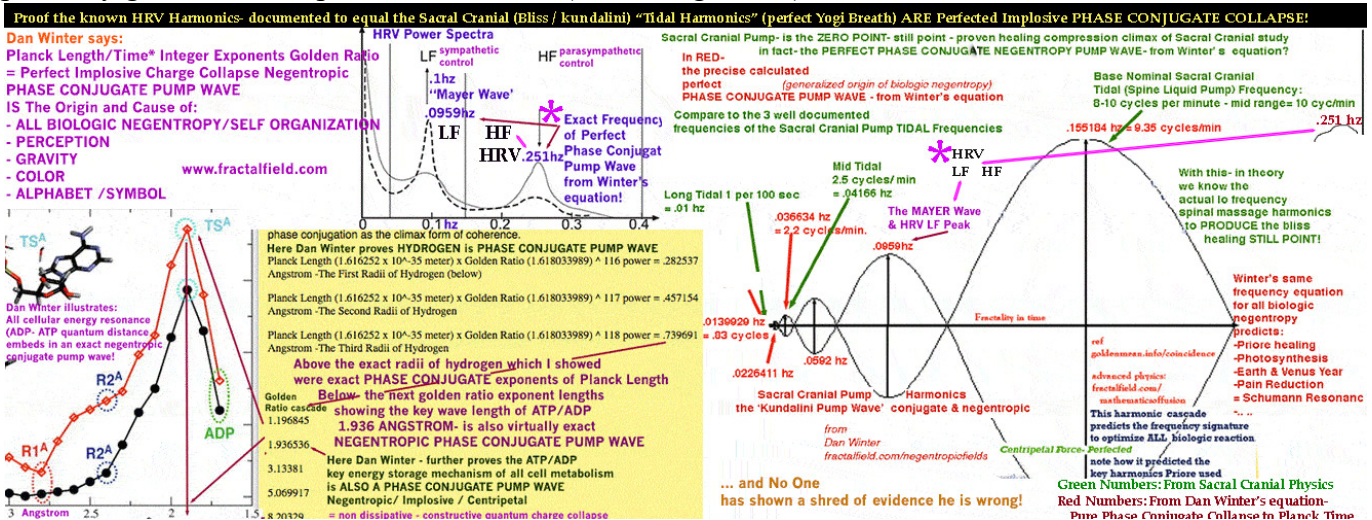

(The images in this pic are from the biophysics literature - the text / concept is from Dan Winter - not from Stuart!

- more on the [biophysics of microwave guide and humans affecting their environment / steering tornadoes with their radiance - at goldenmean.info/dowsing](#) )

We suggest the recursive or self similar capacitive and microwave guide geometry of microtubules (& DNA?) conduct by implosion - biologic information. This creates the holy communion of charge radiance which defines life and makes biology efficient. Fractal compression geometries for capacitive coupling (& microwave?) create the compression (implosion) which turns into acceleration. This fusion / implosion collapse principle enables capacitance to be propagated with velocities faster than light - (Hodowanec / Ramsey) accounting in part for biology's 'multiple connectedness' (or in the obtuse language of todays physics: 'NON-LOCAL' communication.) The knowledge of the charge environment SYMMETRY which allows this communication to happen ( [goldenmean.info/architecture](#) ) - turns religious myths about bliss and enlightenment - into a SCIENCE OF HYGIENE - for their practice. BIOLOGIC COMMUNION WITH NATURE - becomes in effect THE PHYSICS OF EMBEDDING... charge... Dan Winter.

See in the image- the microtubule as implosive wave guide for microwave- is useful background - to Bob Dratch's famous spine bliss microwave mapping of metabolic density ( better than hospital scanners- if the US government had not made this tech illegal) - based on ATP/ADP microwave lengths- WHICH are precisely golden ratio exponent of Planck!! ( 1.936 angstroms).

Next- we look more at the phase conjugation implosion wave geometry supported by the octa / double cone shape of the MICROTUBULES during Mitosis. We say this is strong evidence that nentropic charge collapse caused by phase conjugation wave mechanics- is the centripetal field HOLDING the billions of cell parts together DURING the ritual dance of cell division!

Maternal  
Paternal

Mitosis from Dan Winter fractalfield.com

This is the formation of a '4 wave mixing' phase conjugator

Interphase Prophase Metaphase Anaphase Telophase

Figure 2: Mitosis

Double Cone 4 wave mixing conjugator

Somatid/ Plasmoid Microzymas form a CONJUGATE ARRAY around the microtubule double cone!

Prophase is the first stage of mitosis. In this stage, chromosomes are at the greatest elongation begin to coil and become condensed. Chromosomes are then become visible and can be viewed the light microscope. During this phase, nuclear membrane disappears and spindle fibers and Kinetochores hold the chromosomes and attached at the spindle fiber.

Prophase

chromatids kinetochore microtubule spindle fibers centromere

Microtubules

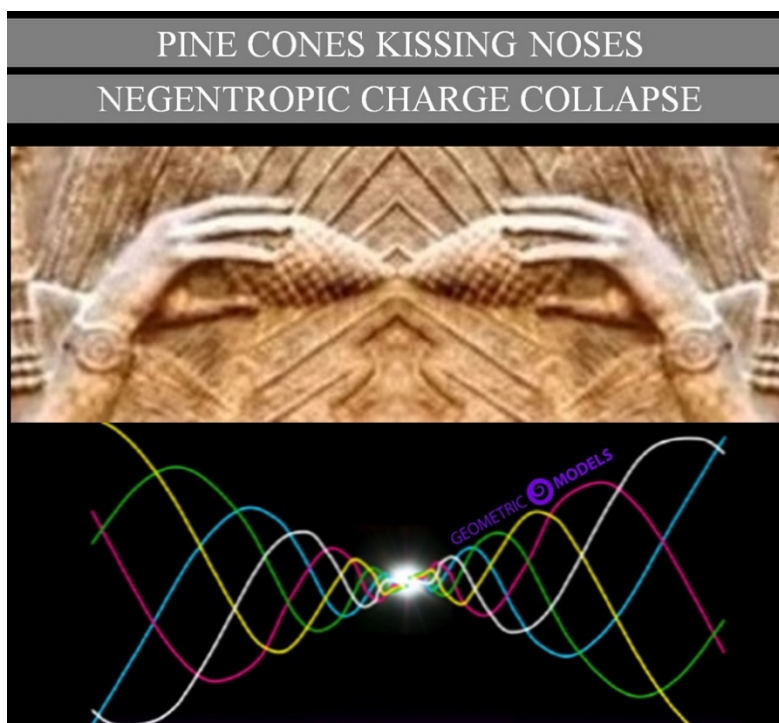

The microtubules then attach to the chromosomes. ....to form the optically phase conjugate double cones!

GIVING new meaning to the (bliss phonon induced implosive recursive DNA braiding called) the GRAIL in the blood : (next slides

SO – as we have seen the principles of double cones ‘kissing noses’ charge collapse- fits very well many of the well known models of consciousness- including the microtube and jitterbug metaphors.

## Consciousness, Cognition and the Neuronal Cytoskeleton – A New Paradigm Needed in Neuroscience

[www.frontiersin.org/articles/10.3389/fnmol.2022.869935/full](https://www.frontiersin.org/articles/10.3389/fnmol.2022.869935/full)

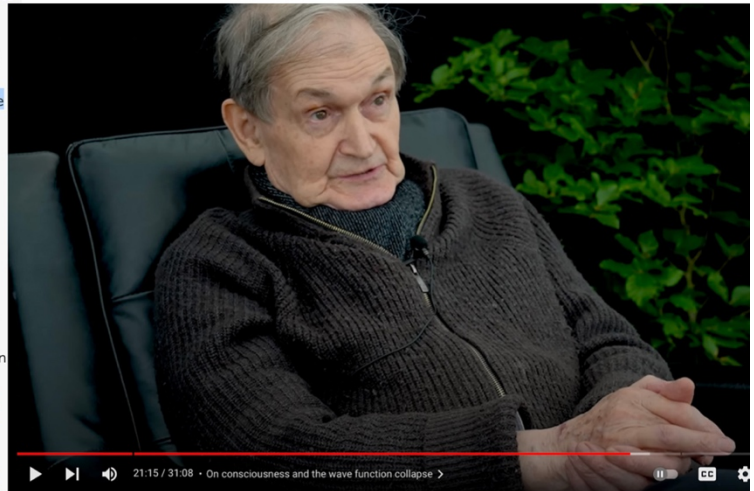

Stuart Hameroff<sup>2,3\*</sup> <sup>1</sup> Department of Anesthesiology, The University of Arizona, Tucson, AZ, United States  
<sup>2</sup> Department of Psychology, The University of Arizona, Tucson, AZ, United States  
<sup>3</sup> Center for Consciousness Studies, The University of Arizona, Tucson, AZ, United States

Viewing the brain as a complex computer of simple neurons cannot account for consciousness nor essential features of cognition. Single cell organisms with no synapses perform purposeful intelligent functions using their cytoskeletal microtubules. A new paradigm is needed to view the brain as a scale-invariant hierarchy extending both upward from the level of neurons to larger and larger neuronal networks, but also downward, inward, to deeper, faster quantum and classical processes in cytoskeletal microtubules inside neurons. Evidence shows self-similar patterns of conductive resonances repeating in terahertz, gigahertz, megahertz, kilohertz and hertz frequency ranges in microtubules. These conductive resonances apparently originate in terahertz quantum dipole oscillations and optical interactions among pi electron resonance clouds of aromatic amino acid rings of tryptophan, phenylalanine and tyrosine within each tubulin, the component subunit of microtubules, and the brain's most abundant protein. Evidence from cultured neuronal networks also now shows that gigahertz and megahertz oscillations in dendritic-somatic microtubules regulate specific firings of distal axonal branches, causally modulating membrane and synaptic activities. The brain should be viewed as a scale-invariant hierarchy, with quantum and classical processes critical to consciousness and cognition originating in microtubules inside neurons.

Is consciousness really a computation? In his book *The emperor's new mind*, Sir Roger Penrose (1989) suggested that consciousness was not entirely algorithmic, that it required a "non-computable" factor outside the brain's intrinsic neuronal computation. The only possible non-computable source, he further contended, was outside classical physics, a proposed self-collapse, or "objective reduction" ("OR") of quantum superposition states—a "collapse of the quantum wavefunction." But quantum state reduction was, and is, yet another mystery. In the early 20th century, it appeared to scientists including Niels Bohr that quantum particles could exist in superposition of multiple co-existing locations or states. But when measured, or consciously observed, superpositions would apparently "collapse," or reduce to particular states and locations. Quantum physicists John von Neumann, Eugene Wigner, and more recently Henry Stapp and philosopher David Chalmers have taken the view that conscious observation causes quantum state reduction, that consciousness "collapses the wavefunction" (Chalmers and McQueen, 2022). However, this view is "dualist," leaving consciousness and quantum superposition unexplained and outside science.

Rather than consciousness causing collapse, Roger Penrose took an alternate view, proposing that collapse occurred naturally, and that collapse caused consciousness. He suggested that quantum state reduction—collapse of the wavefunction—is due to an objective threshold ("objective reduction," "OR") in the fine scale structure of the universe, that such events produced the rudiments of phenomenal conscious experience (or "qualia").

To do so, and based on Einstein's general relativity, Penrose explained superpositions as tiny separated curvatures in spacetime geometry. Were such separations to continue, one might imagine, each spacetime curvature would evolve its own universe, as suggested in the "Many Worlds" hypothesis (Everett, 1957). However, Penrose deduced that spacetime separations would be unstable, and undergo OR based on the quantum uncertainty principle at time  $t = \hbar/E_G$  ( $\hbar$  is the Planck-Dirac constant, and  $E_G$  the gravitational self-energy of the superposition) (Penrose, 1989, 1996; Hameroff and Penrose, 1996a).

**Consciousness does require a plasma vortex to implode (collapse)- it can start with the body- but ultimately does not require the body. Could this be the beginning of a spiritual physics?**

When philosophers began taking physics into account- to understand consciousness- it was fashionable to consider that essentially- matter is just a name for a (rotating) wave of charge. Since most everyone who understands physics these days would agree that the very idea- of the existence of particles was fundamentally 'a mistake'. What we have been calling particles are in fact cloud like bundles (quantized by Planck) of rotating charge, circulating in a media of compressibility. That compressible media- sometimes called ether- is an embracing superfluid.. (unified field / vacuum energy) composed of charge. Essentially - what we have been calling plus and minus charge - (quite literally yin and yang) - is essentially the difference between compression vs rarefaction of charge.

**Qualities of the universal energy / ether: The compressibility of Charge.**

**The universe is comprised of a single unified compressible media – called simply ‘charge’ or ether. This unified field embedded as the background substance of all material- is defined by:**

- **Compressibility**
- **Behaves like a ‘superfluid’**
- **Stores inertia when it rotates (called ‘mass’)**
- **In certain ‘rose-like’ geometries (fractal / conjugate) it becomes centripetal – creating gravity, consciousness, life, and negentropy. In this way it eventually self-organizes and becomes ‘intelligent’ and alive!**

Here we excerpt from our previous book:” Origin of Negentropy”

## What is Negentropy and Self Organization in wave systems?

Hopefully most of us agree now that essentially all of physics is a wave function. The illusion that there is such a thing as a particle- has clearly been a distraction. The reason we incorrectly imagined the possibility of a particle was due to the way in which waves of charge gathered in packets because their lengths had to divide evenly into their rotation diameter (what it means to be quantized). In fact the universe appears to be comprised of a compressible media which stores inertia. I choose to call that universal compressible and fluid like substance: CHARGE. But it is often called ETHER, or CHI, or Zero Point, or Vacuum Energy- or in more universal parlance- The FORCE be with You, or Grace etc etc.

What is important is to agree on the qualities of the universal fluid- more than the name. It is clearly compressible. It clearly behaves like a fluid. It clearly stores inertia when it rotates. And in certain geometries (fractal, conjugate etc.) this unified field- appears to become centripetal and eventually self organize and become intelligent and 'alive'. Learning to create that geometry among waves- is what this book is about. Agreeing on the absolute universal nature of this compressible media- is a first step in therapy for the sad schizophrenic state of mind of those who imagine gravity is made of a different substance than electromagnetism. A unified field state of mind- requires understanding that the 4 so called fundamental forces- differ in symmetry but not substance.

Akhenaton / Moses started on therapy for the divided mind when they conceived of the concept of ONE GOD. A spirituality based on oneness can only be based on a physics which understands the same unified field.

Einstein might have succeeded in representing this unified field mathematically if he had not been dealing only with the version of Maxwell's equations – that Oliver Heaviside castrated by removing the {quaternion} ability to represent spin. So Maxwell's equations BEFORE Heaviside had a 4<sup>th</sup> quaternion element- that added rotation or spin descriptor- in addition to x,y,z vector descriptors. Heaviside saw fit to drop the spin representing element- making it easier for students to play with the arrays mathematically- but unfortunately in the critical electric field descriptions- of (implosive?) VORTEX fields- you cannot describe well the field dynamics WITHOUT the descriptor specifically quantizing SPIN! Imagine trying to model the charge vortex spin which causes gravity by spiraling into centripetal phase conjugation, if your modeling equations have just been castrated of the 4<sup>th</sup> quaternion element which represents spin! This is part of the issue – preventing understanding how phase conjugation produces longitudinal wave acceleration BY CHARGE IMPLOSION – called gravity. Thus then he also could not understand how golden ratio heterodyning enabled phase velocities to accelerate constructively through the speed of light (which is now frequently measureable- Prof.Ray Chiao for example whose measures are 1.5 to 1.7 x C light speed- interestingly centered near golden ratio).

Gravity is in essence NOTHING more than charge acceleration. Where did it go? (hint- thru light speed- in SPITE of Einstein claiming this was impossible )

I like calling the universal background fluid or energy CHARGE- because the concept of its universal compressibility -leads nicely to the ideas of plus and minus charge- being essentially compression versus rarefaction of the background ether. This also fits nicely with well known philosophies like YIN and YANG being simply tendency to compress or rarefy.

Once we agree that the universe is made only of waves of charge, we can then see how easy it is to conceive of all the particles of physics as being simply slip knots or 'packets' of these waves or charge. When these waves of charge enter rotation- like in a slip knot or torus- they store inertia (imagine a gyroscope). Physics is clear: the only definition we have for mass is that inertia created by (charge)

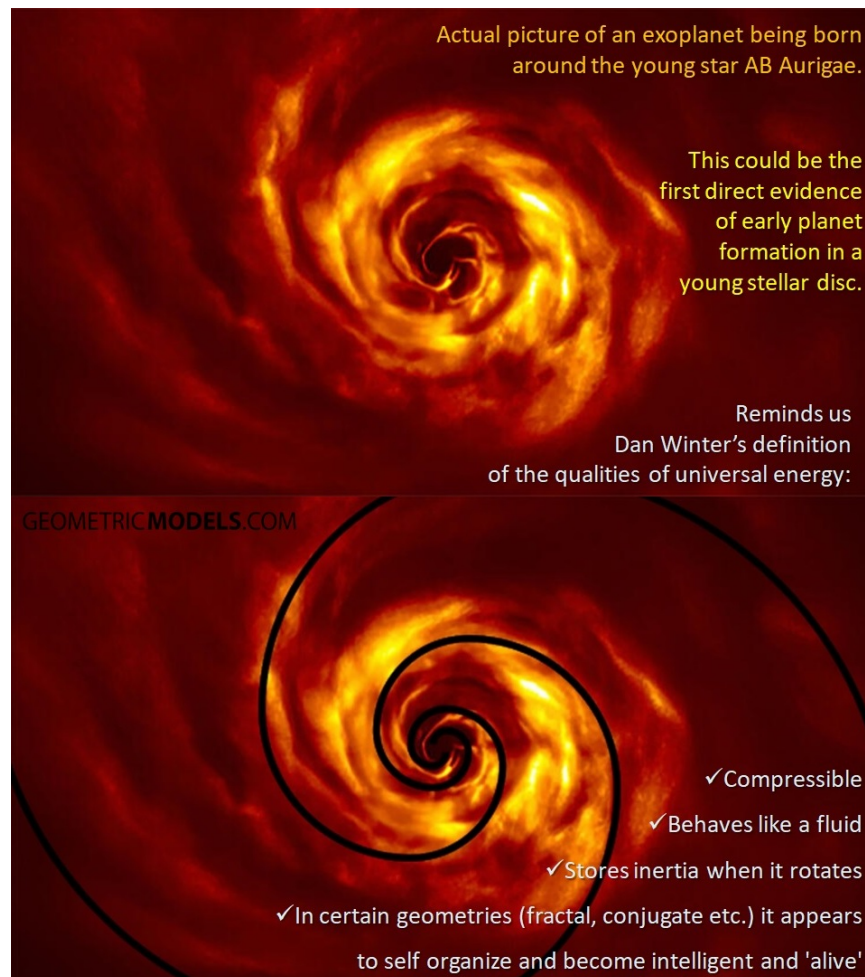

rotation. (SO charge rotation and the inertia it stores is the difference between matter .. and ‘doesn’t matter’!)

This helps us develop a clear language in which to think about creation. We can extend this concept- that rotation (of charge) is the only definition we have for MASS- to say also - this same rotation (of charge) is the only definition we have for TIME. Since time is only the name we give to the period (of time) it takes for charge to rotate.

In other words - if charge (or the universal substrate ether)- did not rotate- we would have no definition or existence of either mass or time. Quite simple and quite elegant - it is to think this way - because later it will allow us to understand things like perfect EMBEDDING and FRACTALITY - in the simple terms of nested and compressing systems of rotating charge.

By thinking so clearly about charge rotation as being the only definition of mass and time- we will later then be better able to sort out all these metaphors about multiple dimensions and timelines etc. – end excerpt

====

Let's meditate here on the ESSENTIAL fluid dynamic DIFFERENCE between centripetal and centrifugal.. as in .. plus vs minus charge?

Let's rephrase this physics of spin- since it is so central to all creation and physics.

**So what is the origin of spin? Spin is the only 'creator' ( of mass and time and...).**

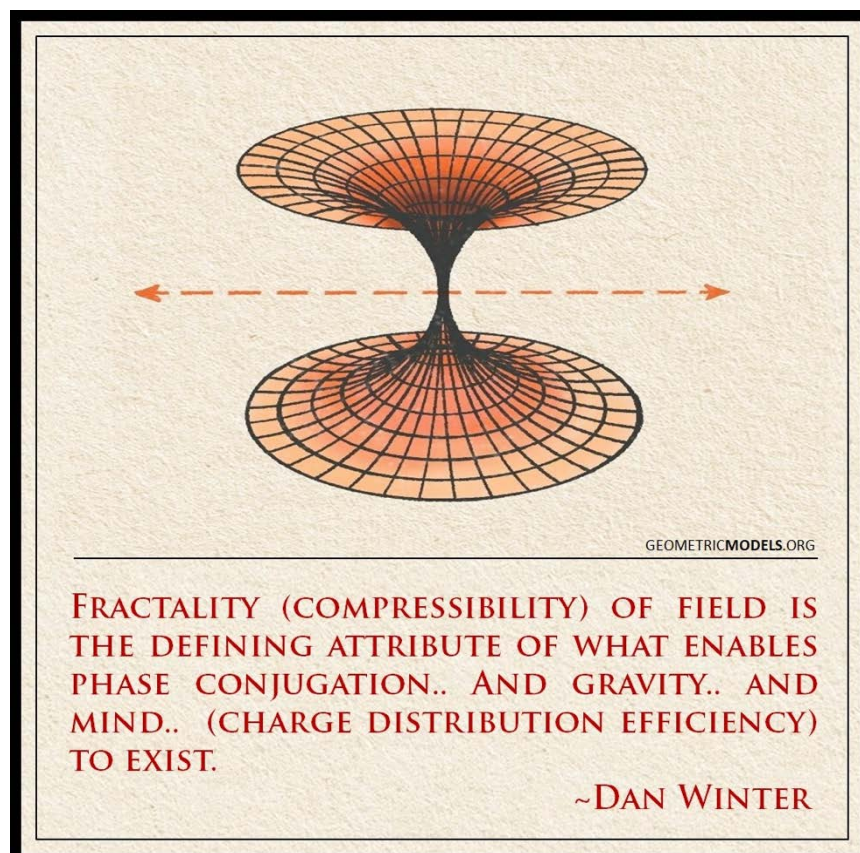

Any wave of charge which does not rotate or spin constructively – reinforcing constructively its nodes- simply ceases to exist. SO the origin of spin or rotation lies in the simple fact that there is *no existence* in a world made of only waves- OTHER than rotation / spin.

Let's summarize again - When the universal waves of charge rotate- that rotation of charge (gyroscopically) creates the inertia stored- which is the only origin or definition of mass. Further- that rotation of charge - creates a 'period of rotation' which is the only origin or definition of time. So time is merely a name for relative rotation rate. Watches speed up when accelerated toward lightspeed- simply because some of the inertia of acceleration of the (toroidal) charge bundles is -translated in vorticity- in to increased rotation rate (named the passage of time). It is this author's view that naming this process of acceleration as 'bending space time' - was not helpful- and did not clarify the actual physics -that the only thing being named by time was spin rate. Specifically - the matrix of spinning charge in the array called space, in the history of spin rotations - called time- acceleration does not bend space or time- it merely bends the curvature of rotating charge - in to or out of the centripetal centers of rotation. Of course physics had no way of dealing with the implications of centripetal or imploding charge -because - until now - physics had seemingly no clue why ANYTHING was centripetal (hint- perfected charge collapse). And THEREFORE had no clue to the cause of gravity, consciousness, life force, or negentropy.

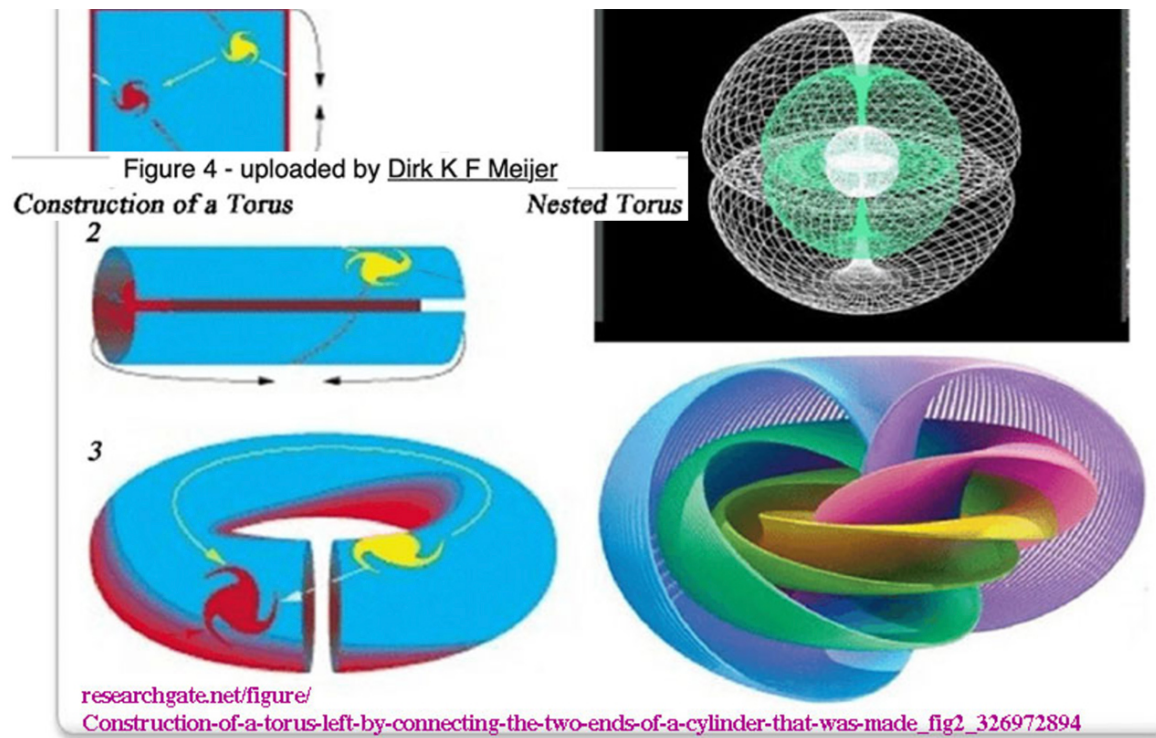

The reason for here emphasizing this clear definition of mass vs time- as simply rotation (of charge)- is to set the 'stage' to understand what is deeply meant by 'the collapse of charge'.

In effect we are re-inventing the definition of TIME ( & gravity and consciousness)- using only the principles of charge rotation and CHARGE COLLAPSE. This begs us to appropriately redefine the physics of COINCIDENCE! (after we realize that time only names relative charge rotation rate). The ability for one orbit of rotation to couple and connect with another charge rotation- is obviously – the principle of (capacitive) charge coupling between rotations. SO clearly whatever enables charge to couple (or phase lock) – between rotations would then be the only definition of coincidence. ( Discussion: [www.goldenmean.info/coincidence](http://www.goldenmean.info/coincidence) ) - Example: astrology, or couples meeting on a train by ‘coincidence’ because their daily ‘rotations’ – lined up... The point is to see then why FRACTAL charge rotations would enable more coincidences- because charge COLLAPSE would enable more connections or coupling- between rotations.

*..And now- for a short (imploding) donut break..*

Construction of a torus (left) by connecting the two ends of a cylinder that was made from a simple plane, by which two wave functions can be repeatedly connected through a toroidal information flux. The nested torus structures (right) show multiple tori within the single torus. Right below: nested representation of fiber-filled torus (Hopf fibration), as also derived from torus geometry.

Text above: Dirk Meijer, Text below: Dan Winter

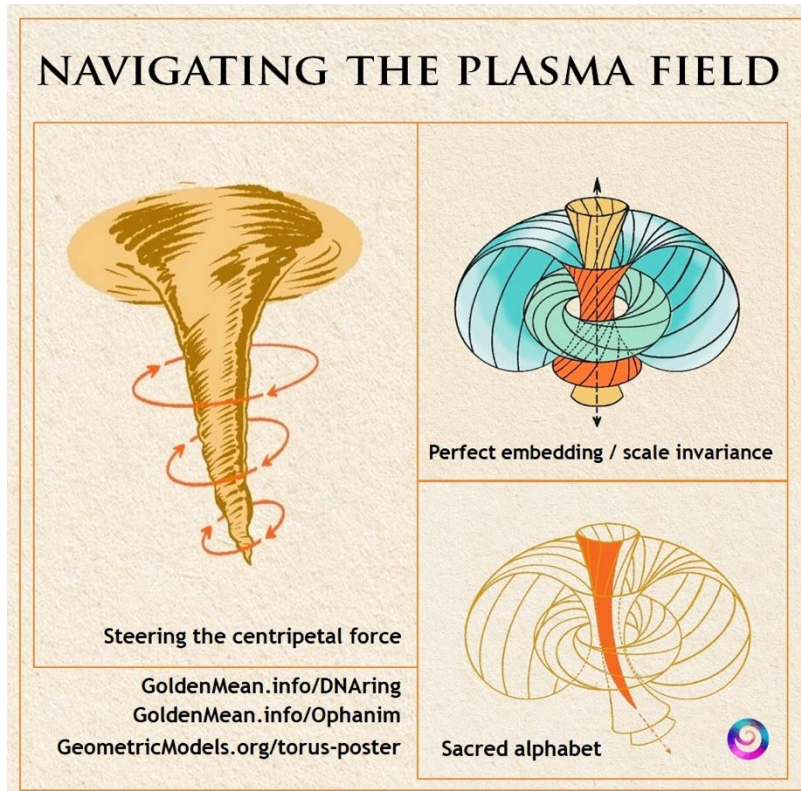

.. electrical symmetry origin of EKG .. AND .. EEG Implosion..

We are AWARE THAT WE ARE AWARE ..

SPECIFICALLY BECAUSE OF CONSTRUCTIVE (PLASMA) RECURSIVE SELF RE-ENTRY..

WHERE THE TURNING INSIDE OUT- RECURSION - CREATES IMPLOSIVE COLLAPSE

AT THAT NODE OF COMPRESSION- THE LONGITUDINAL ARRAY IS EMBEDDED .. AND 'INHABITED'

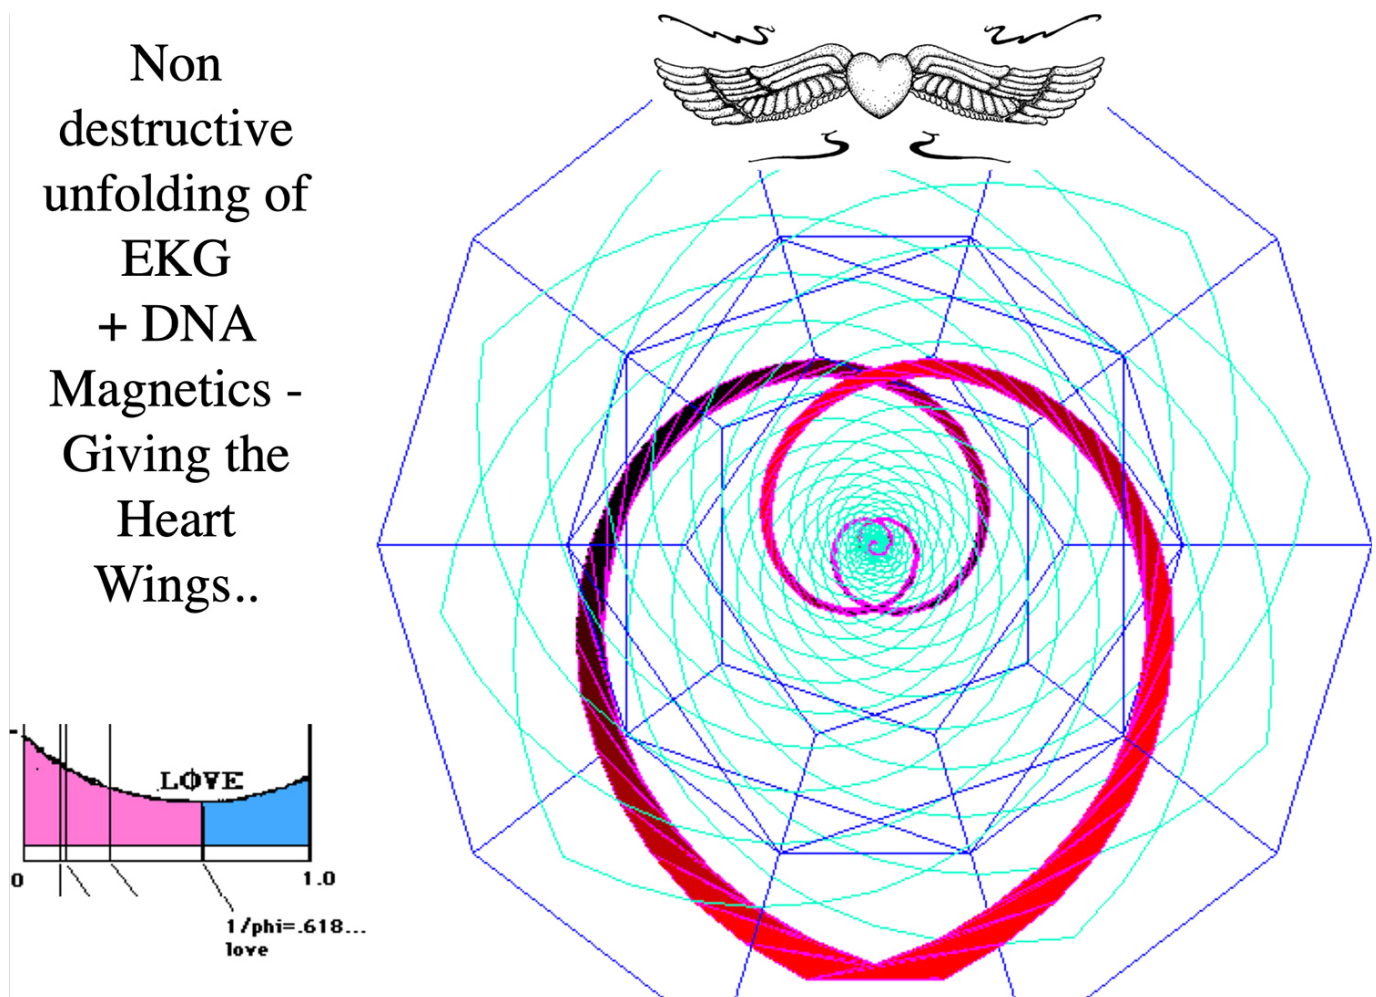

The key is to see that it is in fact recursive turning inside out- non destructive compression- which fractally enables increasing connections ( phase conjugation) at center – in toroidal charge dynamics. Eventually when this implosion phase conjugates accurately to Planck tuning- a node of superluminal ‘longitudinal interferometry’ connectedness is established at center. This emergent longitudinal wave interferometry from perfected compression- is the stuff of gravity- as for example the golden ratio (now evidenced by my equation for hydrogen radii) way hydrogen – MAKES gravity. This also emerges as longitudinal coherence from bliss in DNA recursive braiding/ implosion – and becomes ‘DNA radio’ – ‘collective unconscious/ akashic records etc-. This is part of our contention in the creation of aura longitudinal coherence which measureably enables lucid dreaming- who takes memory through death – and quite literally how SOUL is made.

Longitudinal emf coherence is also effectively THE mechanism of all action at a distance- including stargate /portals. We discuss below- where conventional physics describes entanglement into Rosen Bridge- we say entanglement /embedding perfected defines Phase Conjugation.

### A romantic interlude?

One could get fairly romantic about this idea- extending the famous medical advice: “A healthy heart is a FRACTAL heart” ( Ary Goldberger MD) - Studying this ( [www.goldenmean.info/holarchy](http://www.goldenmean.info/holarchy) ) we have learned – that fractality in the heart- is defined by harmonic INCLUSIVENESS – this is the fastest way to measure immune health - ithrve.com . Harmonic inclusiveness means you have made space in your heart – for ALL.... Which is equivalent to compression perfected. The valentine symbol for love – is precisely that golden ratio compression or collapse perfected.

Perfected charge collapse- in EKG implosion is also the measureable physics of compassion- and harmonic inclusive HRV- the premiere measure of immune health. Goldenmean.info/holarchy

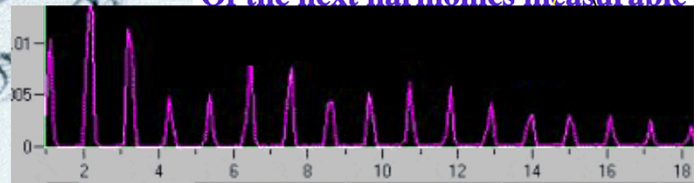

History of Dan Winter's discovery and original publication of Heart Coherence:  
realheartcoherence.com

Dimpling Inside Out: Map to Compassion?

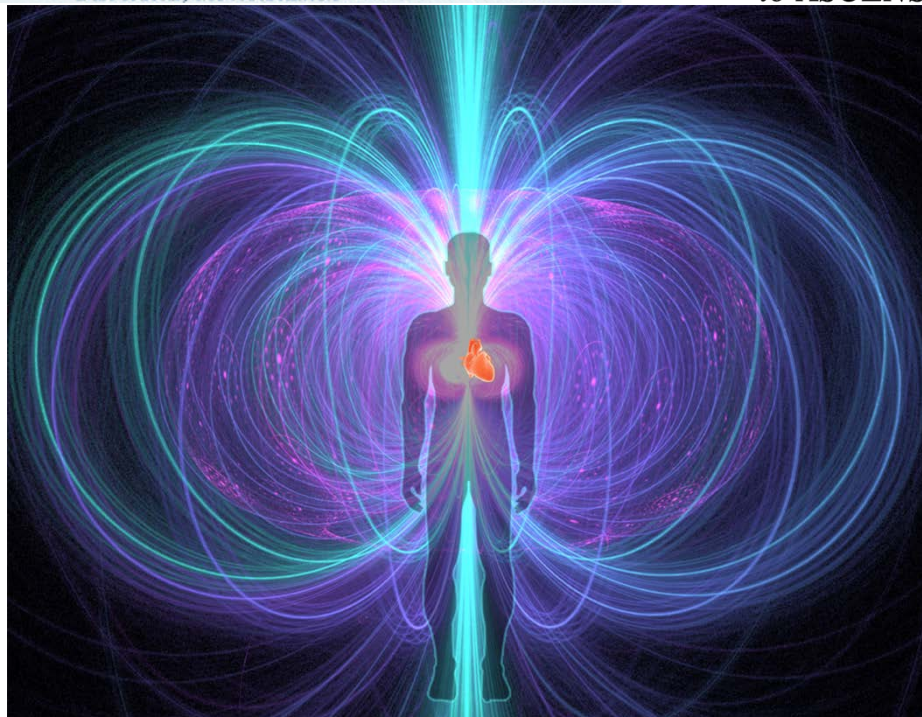

Compassion is learned  
When the little picture inside  
Your heart becomes  
So 'self'similar' ( or 'fractal')  
To the shape of magnetism  
In someone else -  
That perfect compression -  
The 'fractal attractor'  
Sucks the Out-Side - IN !

This RECURSIVE -  
TURNING INSIDE OUT -  
Becomes IMPLOSION -  
Which is the electrical  
RUSH associated with FEELING.  
And shows up in the ASCENSION  
Of the next harmonics measurable

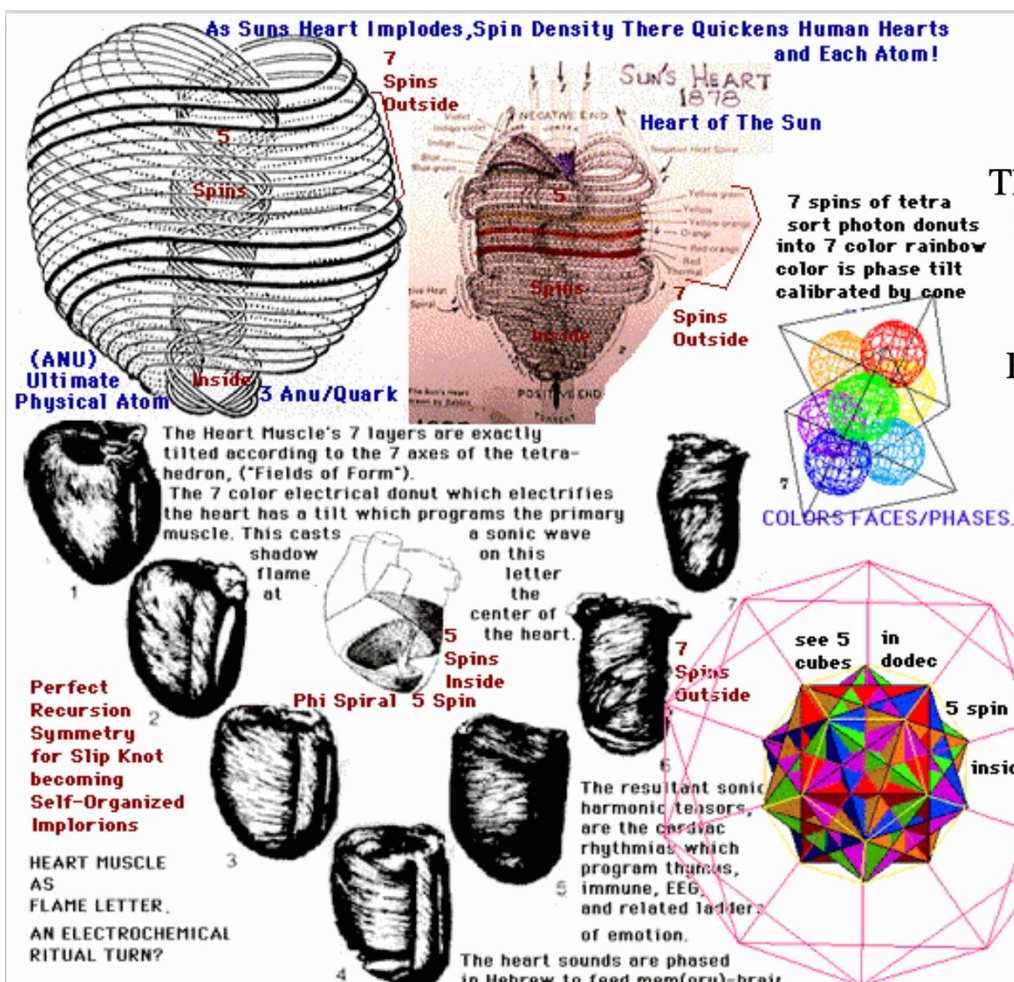

About the deep interconnectedness of all things,  
where even your feelings have a direct influence on the environment,  
which becomes visible on a computerscreen by the new invention of  
Dan Winter, the Hearttuner.

Relationship - COMPASSION  
- to ASCENSION

*Below the famous Heart 7 layers- in Tetra cube axial symmetry index – whose compression shadow MAKES the heart harmonics coherent- and later becomes the so called “Alphabet of the Heart” (my earlier book) – and the Hebrew alphabet : [goldenmean.info/dnaring](http://goldenmean.info/dnaring)*

## ANU: Heart of SUN, HUMAN, & HYDROGEN

The “Slip Knot”  
Of perfect  
Fusion appears to be  
The Same Gordian Knot  
In the ‘Anu’ coeur of  
Hydrogen, in the  
Human  
Heart, and in the heart  
Of the Sun as seen  
clairvoyantly  
By Babbitt & others.

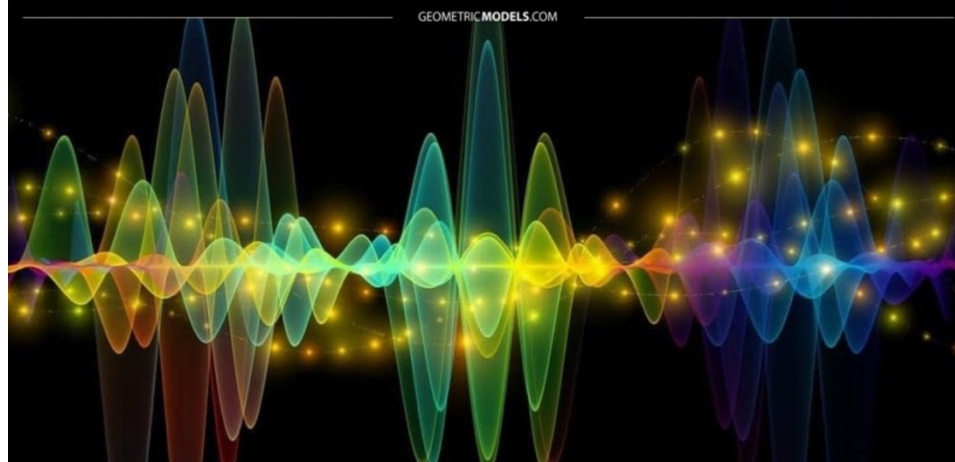

The fire of life itself  
lies in the symmetry  
Operations  
Which make this  
Self-organizing  
IMPLOSION  
Self sustaining...

We look now at  
Why implosion...?

“The life of living plasma (and medically how you find out IF you have an immune system in your HRV) is the extent to which it is harmonic inclusive- quite literally- BEING a shareable wave!

The harmonic inclusiveness in HRV (fractal heart harmonics) which medicine clearly correlates to immune health- is exactly the non-destructive compression among harmonics which golden ratio phase conjugation perfects.”

-Dan Winter

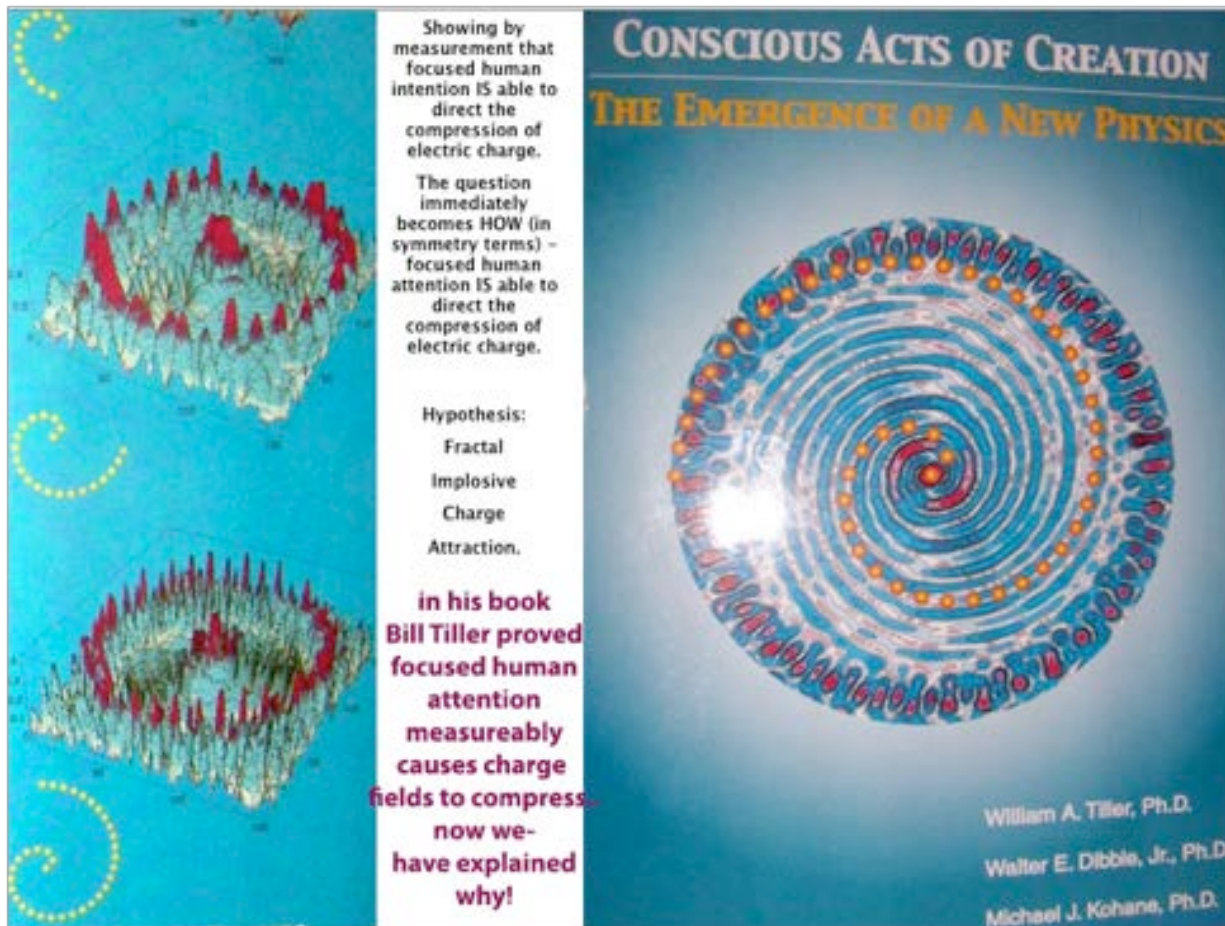

**Back to charge collapse perfected- BEING the physics of observation / perception AND consciousness itself: (reprise from [fractalfield.com/conjugateperception](http://fractalfield.com/conjugateperception) )**

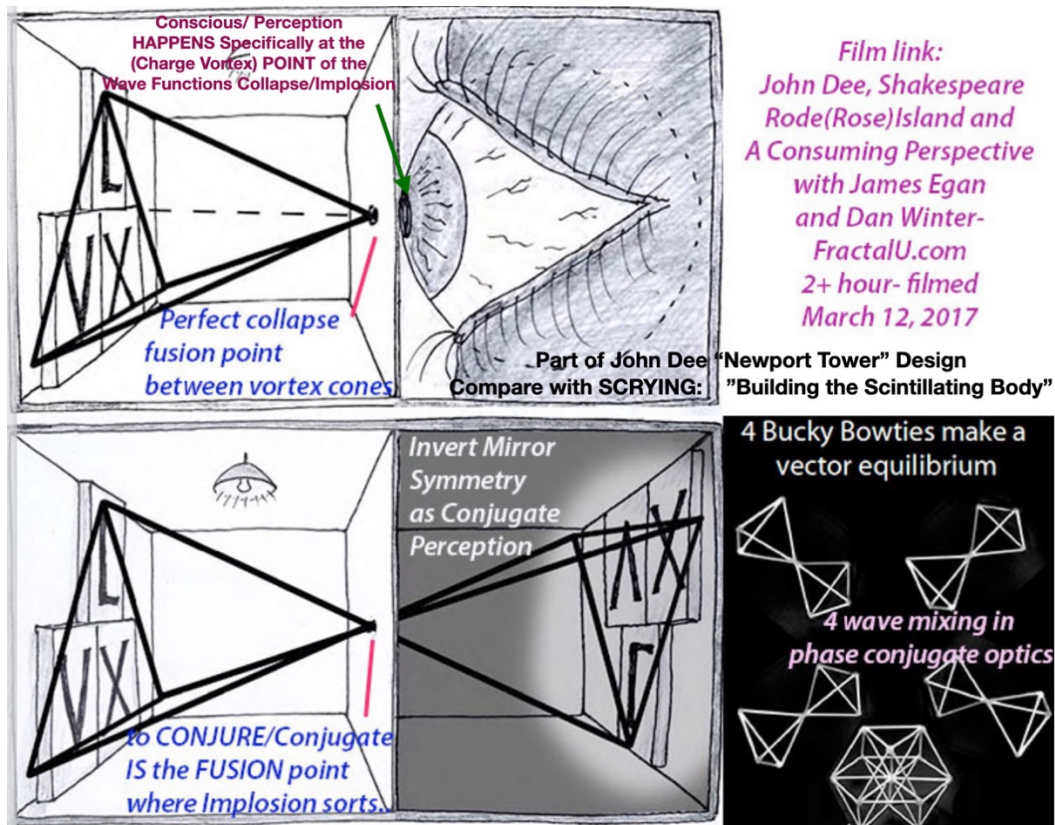

In trying to describe the nature of perception- in this context- as apprehending/ perceiving clouds of spin- physics has traditionally wallowed in the agony of realizing that in fact stillness- in the spin - did not and could not actually exist. So - physics way of dealing with this agony of not being able ever to know actually where a particle was- ( and thus was perceived) - was to say - perception COLLAPSED the moving wave - at the moment of perception (in to a still point which was somehow 'unreal').

**Obviously this way of describing perception as simply 'charge collapse' with the shocking limitation- of not knowing the cause of charge collapse- is wholly unsatisfactory. Physics seemingly had no clue - of the origin of ANY centripetal force- and THEREFORE physics has not determined CAUSE of ANY charge collapse. This is the messy, disastrous state of affairs- currently. This is the reason physics does not know why objects fall to the ground- AND simultaneously this is specifically WHY physics cannot know the cause of consciousness. As Maurice Cotterell famously once said- (paraphrasing) 'these physicists seem a relatively arrogant bunch for not seeming to have a clue why objects fall to the ground.'**

Our gruesome plot thickens nicely when we consider how recently- our famous - Bill Tiller (book:"Conscious Acts of Creation") - measured in so many ways- that focused human attention - CAUSES charge to compress! Talk about charge collapse. So explain that one!

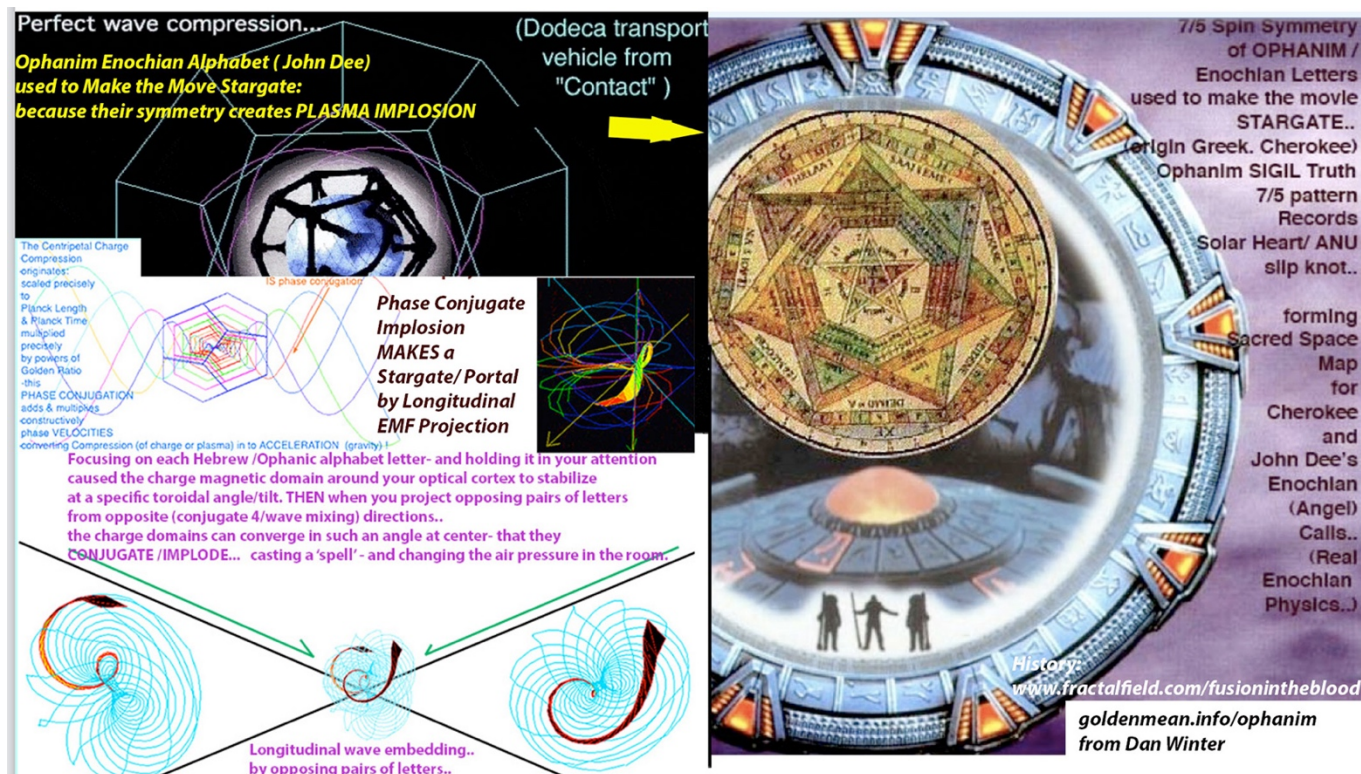

It is even richer- that in the 'scintillation point' - where vision turns inside out - in a pinhole camera- is the (conjugate?) flashpoint - which John Dee- used for ancestor and spirit communication! So - at the point of compression-we somehow have the point of connectivity! What IS that?

IS implosive compression or charge collapse of plasma - INTO a vortex conjugate point- the very DEFINITION of perception ( <https://theraphi.net/plasma-and-vision-dans-premier-university-lecture-for-2019-frequency-key-to-feed-the-eyes/> , also [www.fractalfield.com/conjugateperception](http://www.fractalfield.com/conjugateperception) ). This is the key point of our investigation (more below).

In this picture we introduce some more advanced themes- regarding implosive charge collapse 'pinholes' vs stargates and portals:

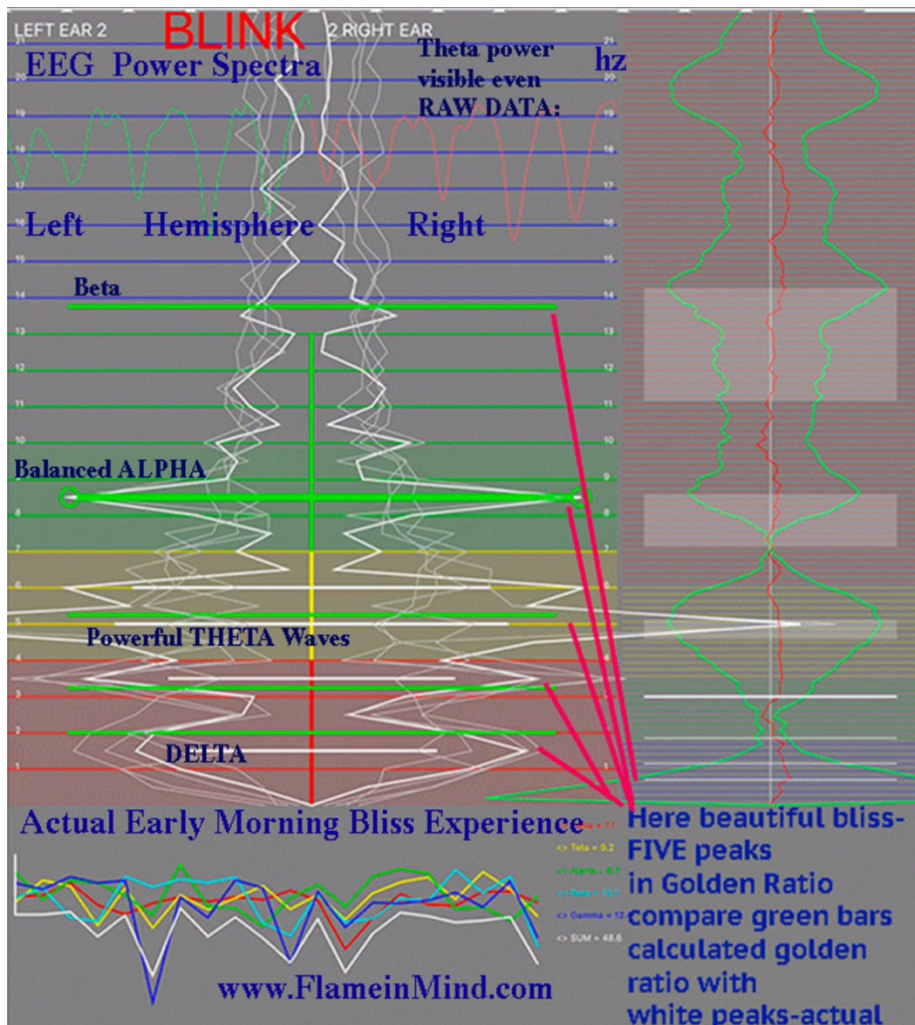

More on toroid donut symmetry physics of charge implosion in the origin of alphabets: [goldenmean.info/dnaring](http://goldenmean.info/dnaring) and the more advanced (angelic plasma?) [goldenmean.info/ophanim](http://goldenmean.info/ophanim)

Next- measuring charge implosion in brain-waves: [flameinmind.com](http://flameinmind.com) (image below – 5 EEG harmonics in golden mean ratio).

Intro- to charge collapse- mechanism of (peak) perception in Brainwaves.

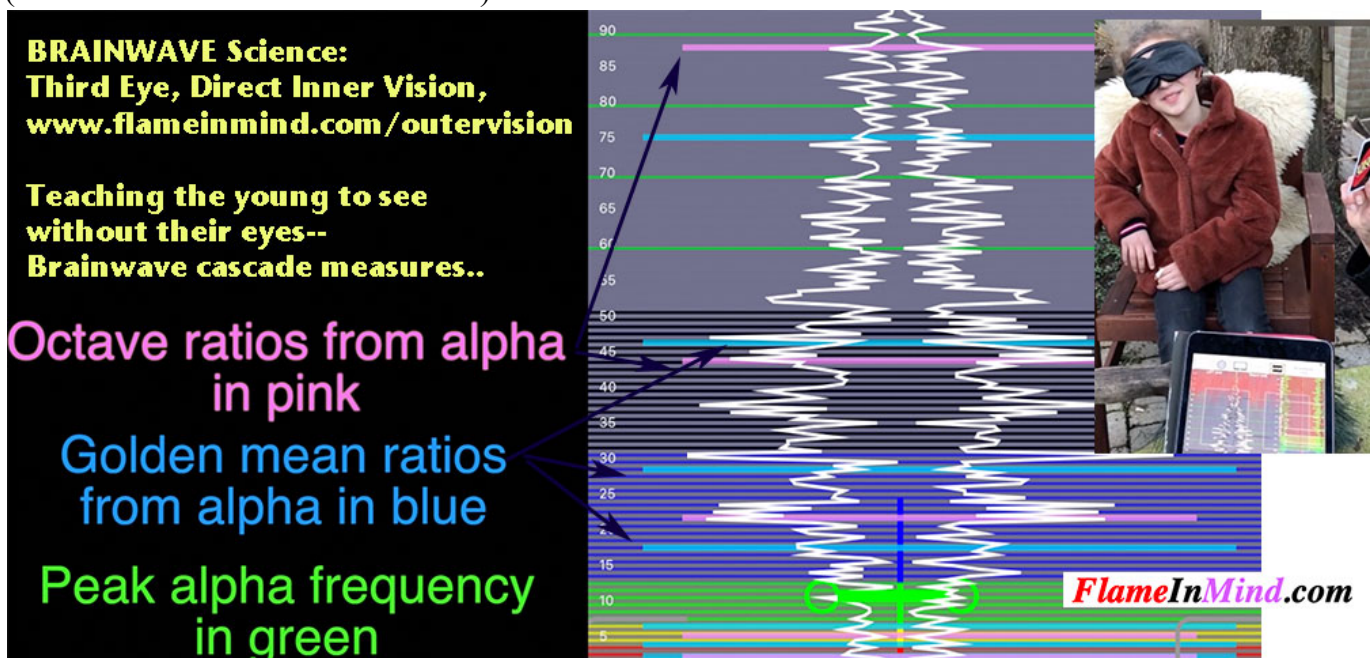

Examples of measuring golden ratio charge collapse in the brain- correlating to peak perception and bliss. Again the principle of perfecting charge collapse by golden ratio conjugation IS the general mechanism of peak perception – which becomes bliss / kundalini. Charge implosion PRECEDES the charge radiance called human bliss. This expands the aura in to the longitudinal emf coherence- physics of lucid dreaming, remote viewing, and ultimately memory through death. It is literally as we have been teaching, the implosive compression of charge which IS the SOUL.

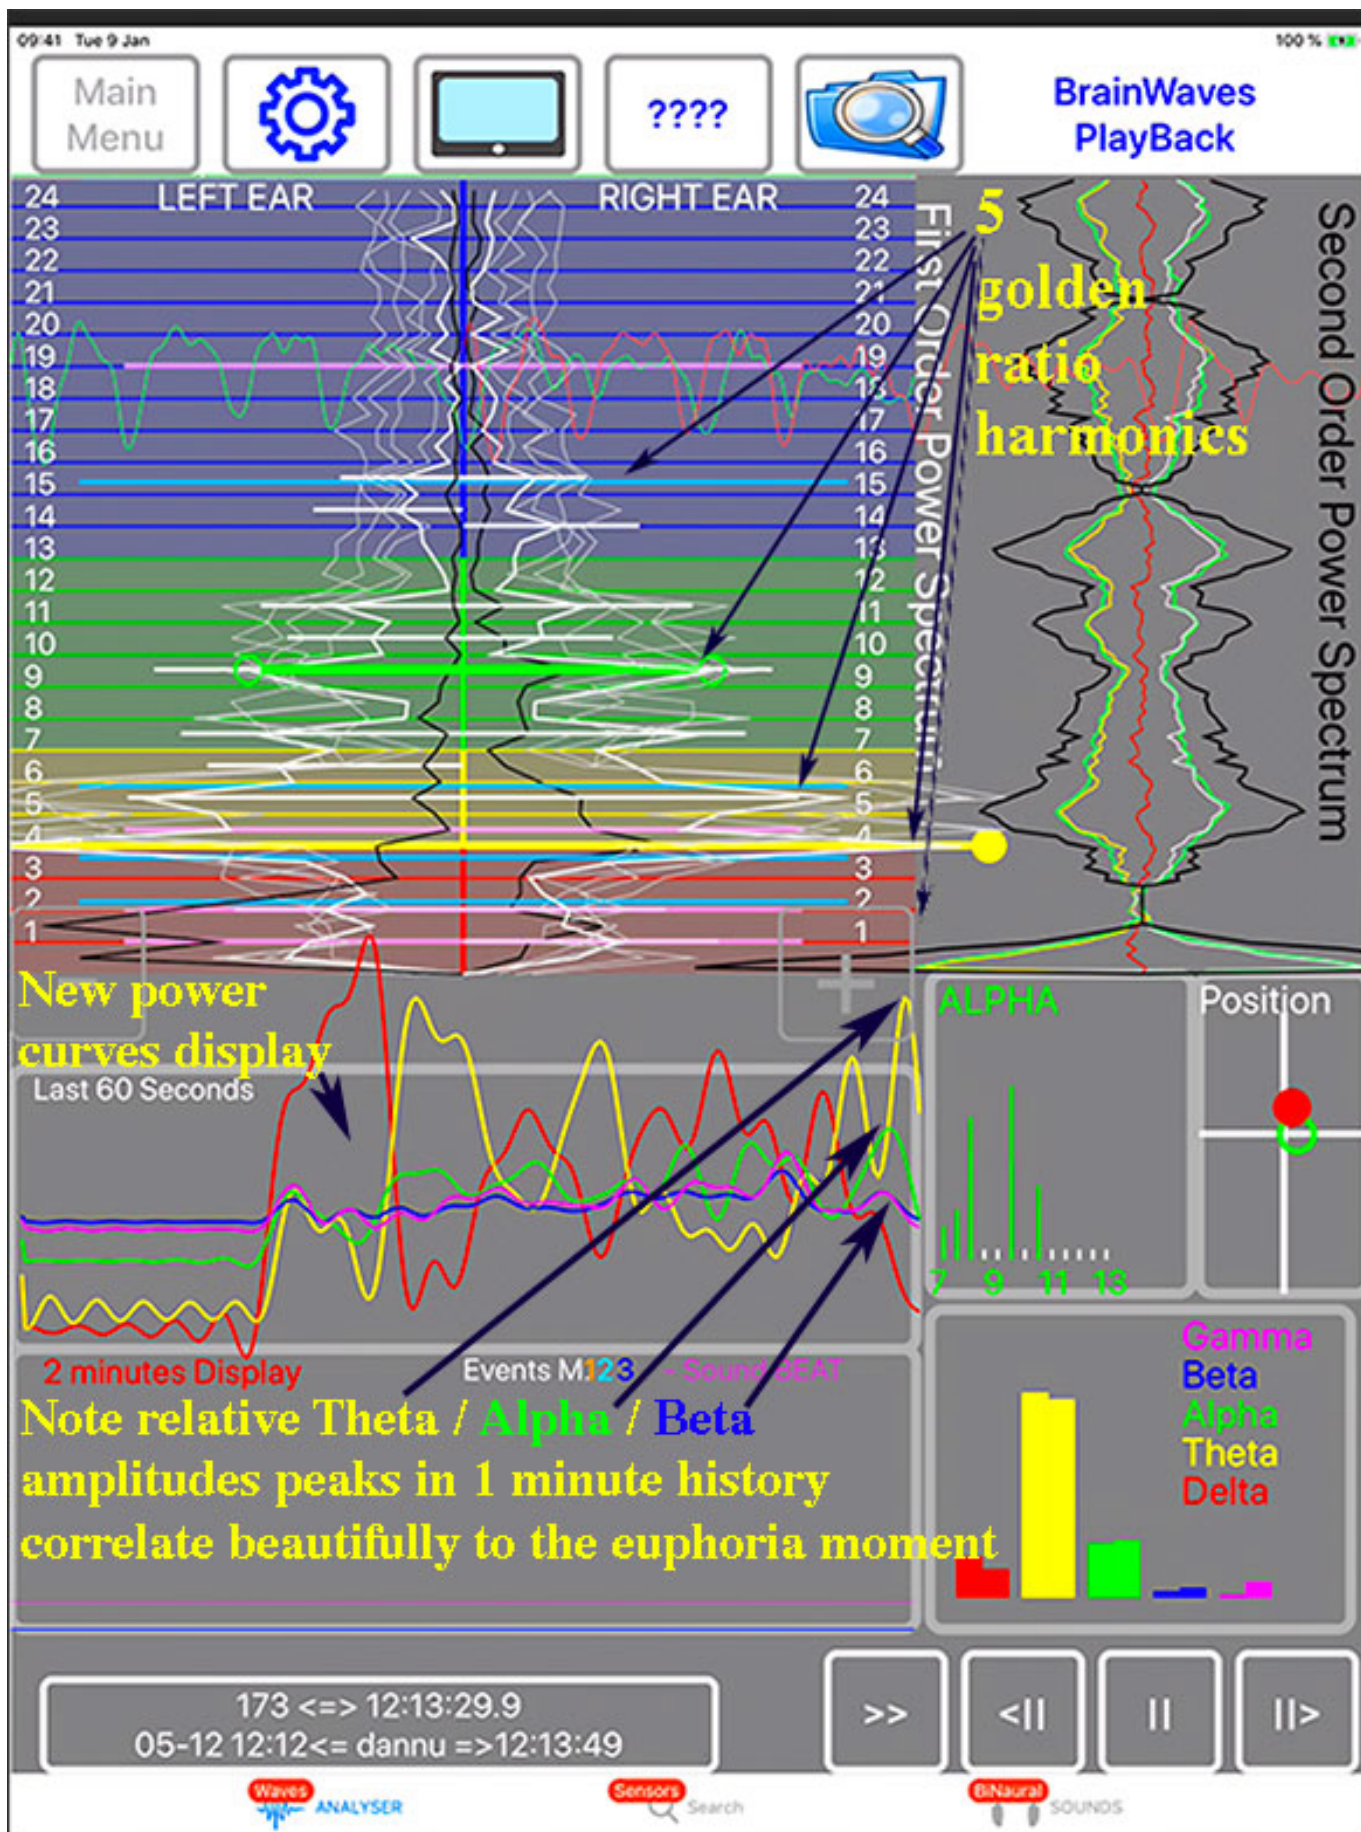

Lets look at  
brainwaves / EEG

What is the  
brainwave signature  
of peak perception?

Conjugation/  
Fractality  
causes perception:  
[fractalfield.com/  
conjugateperception](http://fractalfield.com/conjugateperception)

We have the (golden ratio) brainwave frequencies which identify when children can see without their eyes  
( [www.flameinmind.com/outervision](http://www.flameinmind.com/outervision)) .

It is important to emphasize that the children who begin to see without their eyes- during a trance/ relaxation ( alpha to gamma cascade) **CONSISTENTLY** report they see an **INNER VORTEX WORMHOLE LIKE TUBE**- open inside- which **BECOMES AN EYEBALL!** We insist the (octave & golden) harmonics in their brainwaves become the shadows of a cube/dodec ('Star-Mother') nest of tensors- which are the inner fingers enabling them to squeeze the inner plasma vortex (called consciousness) – to a point!

## Flame In Mind

## Imploding into a vortex

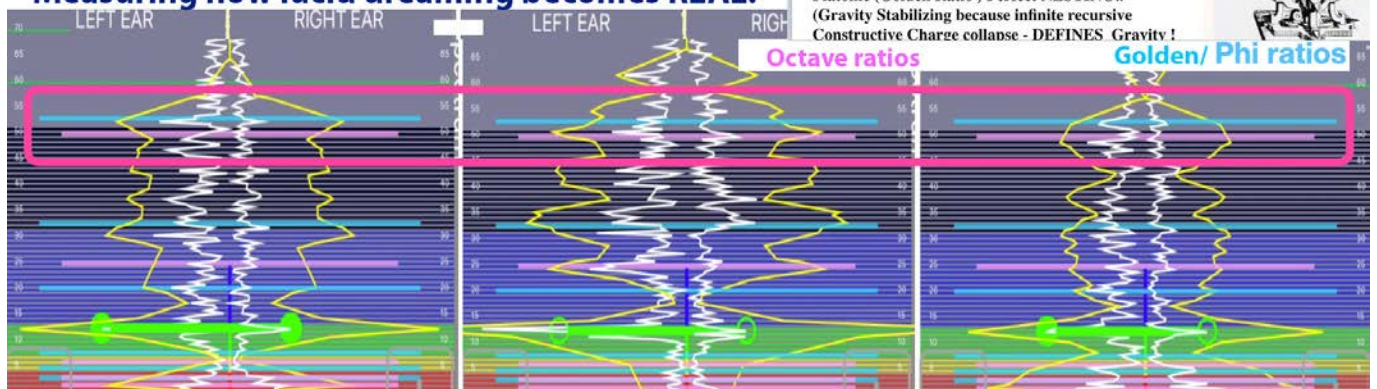

**A Cascade of Coherent Harmonic Frequencies lead to an Implosion in our Energy Field: a Vortex being Opened**

This golden stairway to heaven- ladder of frequencies **ALSO** (at higher amplitude) identified when Jean Charles Moyen famously and repeatedly **BILOCATED** with witnesses.

**Lucid Dreaming/Portals  
Brain Heart Implosion .. with  
Jean Charles Moyen,  
Dan Winter  
Patrick Botte  
FLAMEINMIND.com/lucidbrain**

**Implusive  
Compression  
Geometry  
in the  
Aura**

**Measuring how lucid dreaming becomes REAL!**

And note he described it as turning inside out! ( [flameinmind.com/lucidbrain](http://flameinmind.com/lucidbrain) ) . He said generally just before he experiences this implosion- one eye will see where he has been just as the other sees where he is going. We discuss ‘thru the pinhole’ camera below.

So when the brain implodes electrically- using a frequency cascade of ordered octave and golden ratio harmonics in phase- the result is a squeeze through the ‘squirt gun’ of Planck. At this threshold as we have explained- the transverse emf -translates vorticity (image above) and becomes longitudinal emf coherence. This coherence is also a prerequisite to coherent lucid dreaming (tells you who will survive death and have a soul). We suggests this coherence is what Gurjieff called ‘Kesjahn’ body, Tibetans call ‘rainbow light body’, Egyptians called BA (longitudinal emf) from the KA (transverse EMF coherence).

We are proud our Theraphi.net -rejuvenation plasma in use in 25 countries- has replicably triggered lucid dreaming:

<https://theraphi.net/mairas-report-theraphi-clairvoyance-lucid-dreaming-synchronicities-birds-healed-building/>

We strongly suggest the physics is clear- the phase conjugate implosive frequency cascade in Theraphi- helps implode the aura to the needed threshold of longitudinal coherence. ( Theraphi pictures at end here) One sample suggested up to 30 percent of persons in Theraphi plasma experience some sort of bliss/ euphoria – or at least sharpened vision. Our international university lecture and plasma and the physics of vision: <https://theraphi.net/plasma-and-vision-dans-premier-university-lecture-for-2019-frequency-key-to-feed-the-eyes/>

Lucid dreaming in conjugate implosive Plasma with Theraphi - compares consistently with the published physics of the frequencies triggering dream lucidity ( onset of compression).

## Scientists Trigger Lucid Dreams with Electrical Stimulation

[An electrifying experiment](#) led by Ursula Voss of Frankfurt University has revealed a way to artificially induce what appear to be lucid (or perhaps semi-lucid) dreams as much as 77% of the time.

By [Rebecca Turner](#) - take our [free lucid dreaming course](#).

The method involved “zapping” the brains of non-lucid dreamers while they were asleep and dreaming. Transcranial alternating current stimulation (tACS) was applied via electrodes to the frontal cortex for 30-second periods.

The 27 subjects were awoken shortly after to provide their dream reports and rate them on a lucidity scale.

“They were really excited,” said Voss. “The dream reports were short, but long enough for them to report ‘Wow, all of the sudden I knew this was a dream, while I was dreaming.’”

### The Gamma Sweet Spot

Having tested a variety of frequencies, Voss and her team soon zoned in on the magic 40 Hz frequency (and to a lesser extent, 25 Hz) as the best trigger for inducing apparently lucid dreams.

This Gamma band sweet spot coincides with earlier research by Voss in which she detected 30-40 Hz brainwaves via EEG in experienced lucid dreamers. The new claim is that Gamma frequencies associated with heightened awareness are fundamental to lucidity, rather than a by-product of it.

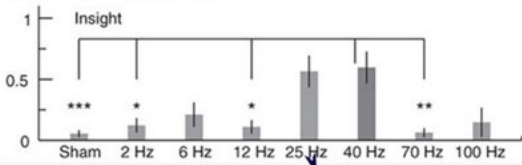

### A Silver Bullet for Lucid Dreaming?

This is the first time scientists have identified a reliable way to artificially trigger heightened self awareness in dreams. Does this mean we could all tap into instant lucid dreams with a portable “brain zapper” in future?

Christian Jarrett, writing for [Wired](#), pointed out that while the participants reported realizing they were dreaming, they were still inexperienced in handling that lucidity, as demonstrated by their average lucidity scores.

The dream subjects were asked to rate their dreams on a [measurable lucidity scale](#), from 0 (strongly disagree) to 5 (strongly agree) for the following features:

- Feelings of insight (knowing they're dreaming)
- Dissociation (taking a third person perspective)
- Control (ability to manipulate the dream)

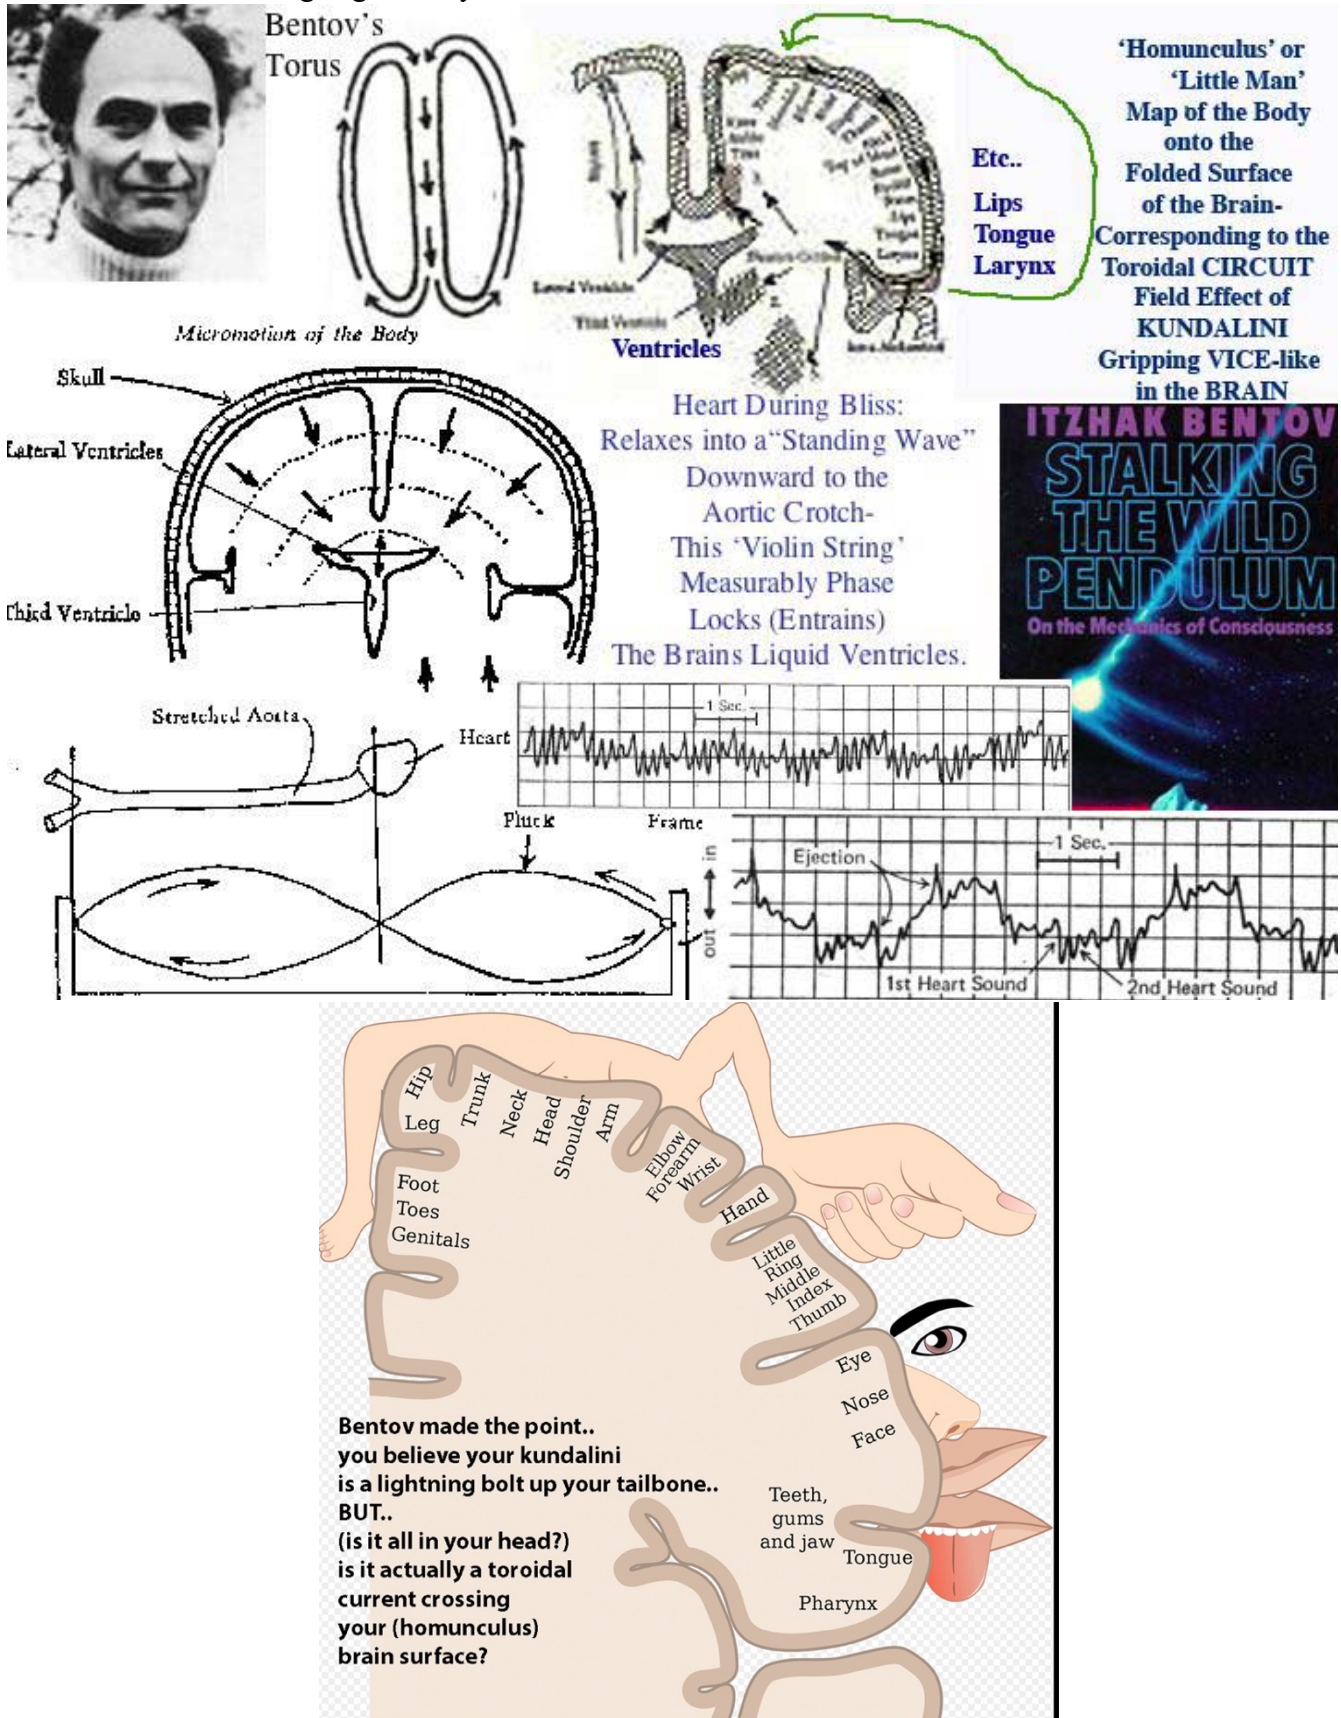

| Frequency | Insight Score (approx.) | Significance |
|-----------|-------------------------|--------------|
| Sham      | 0.05                    | ***          |
| 2 Hz      | 0.15                    | *            |
| 6 Hz      | 0.25                    |              |
| 12 Hz     | 0.15                    | *            |
| 25 Hz     | 0.65                    |              |
| 40 Hz     | 0.75                    |              |
| 70 Hz     | 0.15                    | **           |
| 100 Hz    | 0.25                    |              |

Note the phase conjugate implosive frequencies by Dan's equation= 29 & 47hz

To imagine this practically in your own aura, try the old trick of looking at your hand, inside your dream. The reason this helps trigger dream lucidity (longitudinal coherence) is because it tightens then implodes the ‘DO LOOP’ between your hand itself- vs the huge homunculus map of the hand on the brain surface.

Below from our [www.goldenmean.info/kundalini](http://www.goldenmean.info/kundalini) conversation (& more below). The principle is that the tightening of this “DO” loop, actually causes compression in your nervous system imploding charge field, which is precisely what’s needed to squeeze out the coherent longitudinal EMF – required for the coherent lucid dreaming ‘light’ body.

**This tightening of compression in the brain – to onset lucidity- is literally how charge becomes mass by implosive compression in creation physics.**

**Please consider now- is this the perfect introduction to the physics of prayer?**

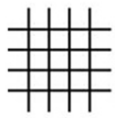

By learning the brainwave cascade to implosive still point- the visualization template sucks in charge to become mass. We have many times used the example in the Steiner school. In multiple steps students learn to draw a rose- with such lucidity that then when they close their eyes- they can very accurately IMAGINE or see a rose in their inner eye. The test in the Steiner classroom- is whether when the students visualize a rose with density- that the room will then fill with the smell of roses. Of course anyone who has studied the physics of smell with Phil Callahan knows- the flowering brain can generate the infrared coherence mediating smell. This came home to me the day- the hummingbirds kept smashing into the window after a bliss meditation- in a virtually sealed house. The ‘smell’ of bliss (infrared coherence) went thru the window.

Steiner’s warning was clear- young children who spend too much time passively being fed images (on their screens) – will LOSE THE INNER MUSCLE NEEDED TO IMAGINE – and cohere compress the charge- necessary to CREATE. Similarly – overdependence on modern AI- can make our young people lazy to learn creative discipline. One of the biggest challenges of AI software that are designed to generate human like content and artwork, is that they tend to diminish the vital human capacities – like imagination and creativity.

Next in our list of solutions derived from charge collapse - we mention the (**‘black hole of compression’**) **charge symmetry required for successful death.** [www.goldenmean.info/immortality](http://www.goldenmean.info/immortality)

Classically- seeing your whole life pass before your eyes- in the moment before death- is definitely an example of attempting death success- using compression. We suggest this ‘black hole’ in death experience is due to the body attempting to compress most of it’s transverse EMF inertia- into implosion at core. This is in order to propagate coherently the resulting ‘squeezed out’ longitudinal (scalar) emf – which IS the ‘field’ of lucid dreaming / ‘heaven’ – and quite literally – the collective unconscious / dreamspell / ‘communion of saints. This IS a fractal nodal array – with a real (coherently longitudinal) description in physics. So we see this evidence epitomized below- in the famous Heinrich Kluver form constants- documented geometry of death visions. ( We also discuss below, how Ray Moody documented death visions are electrically contagious.. as is Kundalini).

Heinrich Kluver "form constants"-geometries seen during death experience.. confirm the implosive braid sequencing in DNA- to connect/ embed to longitudinal coherence..

discussion

[www.goldenmean.info/immortality](http://www.goldenmean.info/immortality)

Why at the moment of death, your whole life 'flashes before your eyes' compressed... your electrical memory (transverse) needs compression to enter longitudinal array coherence (how ghosts release...

All of this is SOOO confusing - that most scientists give up and pretend to ignore ( 'Why are you looking for your keys here instead of where you left them?.. Because this is where the light is !' Shallow metaphors cannot peer into the darkness).

The harrowing and torture of all this confusion- is IMMEDIATELY cleared up- all at once- - if we but understand - **WHAT IS AT THE CENTER OF COMPRESSION (THE CENTER OF CHARGE COLLAPSE ? A: An electrical connection to a faster than light ARRAY of longitudinal ('scalar') EMF coherence.**

Here is another hint: what specific unit of dimension is the same for millions of light years in all directions? The answer is PLANCK LENGTH AND TIME. This is the musical key signature - of every wave that physics has ever measured.

Planck is quite literally, the universal tuning fork of the universe - from which in a sense all things arise (even more than just the big bang?). So as we explain further when we link specifically the ability to hook up to the universal longitudinal emf array 'RADIO' ( action at a distance- AND nature of gravity waves) -this is specifically PLANCK radio- fractally embedded PHI harmonics- CALLED PLANCK PHIRE – perfected fractal charge collapse.

So- WHY is Planck so universal. Physics would have you believe it is the 'big bang'. This author has more religious fervor around the 'continuous creation' idea. It is more than some illusory big bang- which links every common planck threshold in the universe! It is something much more profound. Where more and more conjugate ( recursive golden ratio harmonic implosive heterodynes) implode specifically tuned to Planck- there is A LARGER AND LARGER ARRAY- of coherent longitudinal emf ('scalar') standing nodes. This array sets up nodes where increasing number of golden ratio multiples of C light speed connects them. This means that our galaxies heaviest stargates and portals- ( Orion's cubic Trapezium- recently recovered from Nebu parasites/ 'greys' & dracs) - easily accelerate transit millions of light years. This coherent longitudinal emf array- connected to (impedance matched) - only by golden ratio to Planck conjugation- is the ONLY physics of all seeming action at a distance. When conventional physics tells you that entanglement to a wormhole (‘Einstein Rosen bridge’) is required for action at a distance- what they MUST also tell you is that perfected golden ratio phase conjugation (to Planck) IS entanglement (embedding/ charge collapse) perfected- AND that the general DEFINITION- of ALL wormholes- is essentially the coupling point IN to coherent longitudinal emf array physics. This will later underpin - the detailed teachable physics of what enables lucid dreaming- and memory thru death ( the real physics of soul). Later we will describe coherent (phase conjugate) compression access to this longitudinal array, as precisely the necessary wave mechanics to also understand bi-location, stargates and portals.

The physics of soul- is specifically created when the golden ratio hydrogen bond zipper up the center of the dna ladder ( [goldenmean.info/dnamanifesto](http://goldenmean.info/dnamanifesto) )- is imploded with the recursive braiding / phonon embedding ( [realheartcoherence.com](http://realheartcoherence.com) ) of bliss /ecstasy ( [flameinmind.com](http://flameinmind.com)). With this (braiding) compression success- your aura emits the coherent longitudinal emf ( rainbow light body / kesjahn body / ba from the ka) which is the stuff which coherently lucid dreams and survives death ... ( and makes you a really good dowser). We suggest that when Enki/ Ea returned offering restoration of ‘Adam Kadmon’ DNA recipe for soul, this is actually in part a spacing algorithm to allow active sites to align implode during bliss braiding/ soul making. What scientists HAD called ‘junk DNA’ is actually key wave mechanics for the spacing required to enable ensoulment during implosive braiding.

The function of braiding during bliss / emotion cannot be overstated since mechanical alignment largely determines WHICH DNA gets to align with RNA and thus replicate. ( see syntax vs DNA:”Grammatical Man: Information Entropy Language and Life” Jeremy Campbell). Ways in which a “DJEDI” is measured by ‘microchloridians in the blood” – or at Montalk by DNA “boson 7”- suggests ways in which this implosion indicates who is ensouled and (longitudinally) psychokinetic.

Oh wait! This was supposed to be gentle introduction- not jumping in with both feet. OK - I am double scorpio - always going for the stinger. But in keeping with that spirit- we Scorpio's famously don't apologize for sting - we enjoy it. Sting is the turning inside out point- where (implosion / charge collapse .. and soul? ) awareness is created.

--So when physics said - perception by creating an illusory stop point- had to collapse the wave function- they got stung with a bigger metaphor. In fact perception DOES literally CAUSE charge collapse! And the collapse POINT- is where charge communion / and longitudinal 'DNA radio' is enabled. After Bill Tiller measured human attention to implode charge, later Uri Geller claimed to measure human focus reducing radioactive half life. It seems radioactivity is the electrical opposite of charge collapse. I was in Keshe's living room- when Japan's Tepco- phoned to say - that indeed nano material (conjugator) plasma fields- DID reduce radioactivity. Ironical - that the MOST famous thing which UFO's are reported to do - is to permanently disable NUKES! ( there are many famous examples - especially US nuclear silos- but did you know that in the most famous UK UFO incident- Rendlesham Forest- the UFO PERMANENTLY disabled all the nukes!)

This book- strongly suggests understanding **the PLANCKPHIRE- cause of perfected CHARGE COLLAPSE- answers the major mysteries of physics and life AND religion:**

**Including not only cause of gravity, consciousness, life force, and negentropy in general..**

but also for example-

- **the CAUSE of color and why rainbows exist** - the ONLY 2 exact narrow notch color frequencies which CAUSE photosynthesis - are PRECISELY - golden ratio exponents of planck - charge collapse perfected! (*fractalfield.com/fractalphotosynthesis* )-  
this is also in case you wanted to know the physics of why Tibetan saints dying, replicably cause rainbows. ... CHARGE COLLAPSE!

-**how labyrinths /charge collapse implosion cause fertility and rain**  
( *goldenmean.info/labyrinth* , *goldenmean.info/rain* )

## And now we begin the heavy subject: What Causes Gravity?

Einstein notoriously insisted that non-destructive- or 'infinite' / perfected charge collapse (collapse of the 'wave function') was indeed the solution to his elusive unified field and cause of gravity.

We have discovered the geometry of perfected constructive wave collapse/ implosion in fact precisely produces acceleration of charge (called gravity) toward center.

That SPECIFIC fractal conjugate geometry of implosive compression IS the charge collapse solution.

In Einstein's defense - probably no one told him what a fractal is- much less than it's chief feature is perfect (infinite?) compressibility.

Refer also to GOLDEN RATIO in MANDELBROT fractal image below.

When Mandelbrot famously published the Mandelbrot set - few realized the major branching nodes in the classic fractal- are precisely golden ratio exponents (see image- p 68).

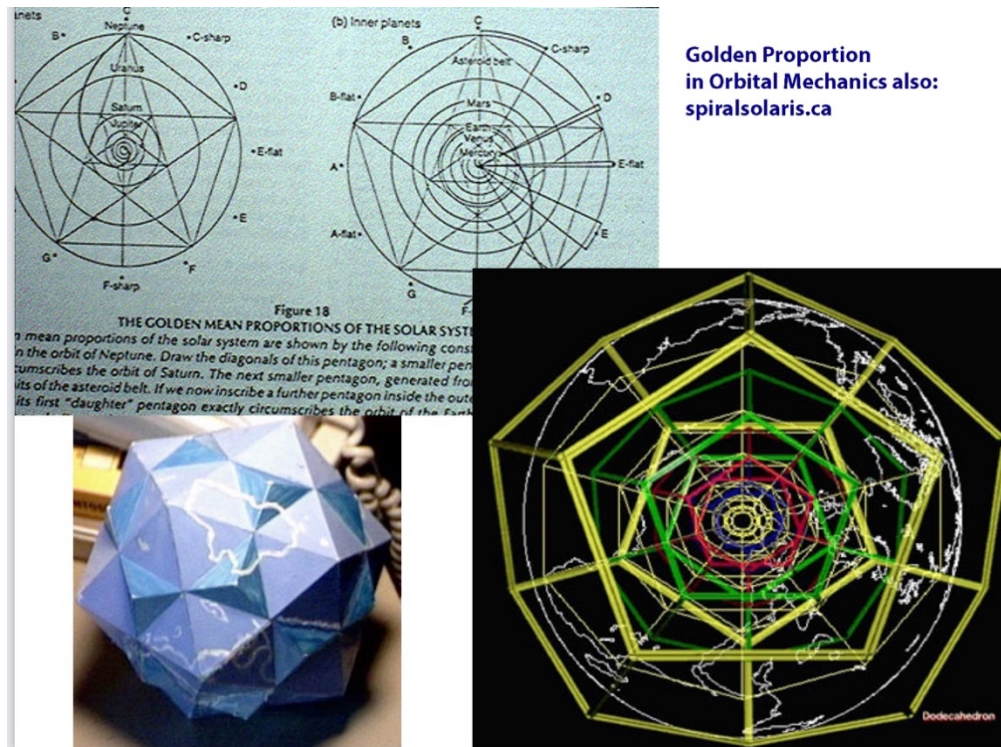

Our now well evidenced solution to charge collapse - begins with simple compelling wave mechanics.

Planck length and time as the musical key of every wave physics has ever measured (identical for countless light years in all direction). We have determined that the REASON the universe agreed on Planck- may not so much be the idea of the big bang- but rather... it is specifically this Planck dimension threshold at which the critical conventional TRANSVERSE component of electromagnetic flux - is converted in more coherent LONGITUDINAL emf propagation. There is solid physics in Tom Bearden's

extensive mathematics work on scalar/longitudinal emf which he determined is the stuff of gravity waves- book: "GravitoBiology". This is because the (golden ratio /fractal) vortex of charge completes this 'translation of vorticity'. (image above)

**The reason then this planck dimension REQUIRED the whole universe to AGREE- was the propagation of longitudinal interferometry ( gravity waves)- this depended on constructive interference- at the fractal nodes.**

Examples : golden ratio dodeca in - DNA geometry, Earth Grid Geometry - and well known in intergalactic geometry (images below)

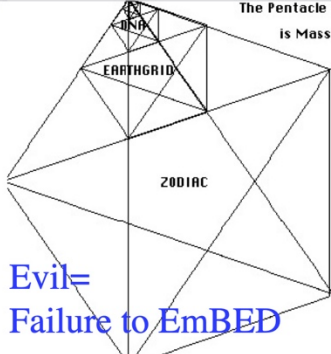

One helpful study here is why amperage surge like lightning makes superconductive- a monofilament of DNA or gold thread. This is the physics of lightning near death (Danion Brinkley) - and why kundalini makes DNA quasi-superconductive. In summary – induced charge collapse (Movie: POWDER ) We explain here- implosive compression in DNA braiding during bliss – ‘squeezes out ‘ the (longitudinal coherence) physics of soul in this way. (More on longitudinal coherence- Cause of Gravity- below p.58)

### Action at a distance explained:

The essential principle is that coherent longitudinal emf interferometry (or gravity waves) are spit out by conjugation / COMPRESSION to Planck. These longitudinal emf compression nodes can only bounce in and out of coherent coupling with heat containing TRANSVERSE emf at these fractal conjugate compression nodes.

The Pentacle Dodecanest Fractal Harmonic Series  
is Massaged to Life like Ariadne's umbilical  
Cord, by the Frequency signature  
of the Heartbeat,  
in the Moment of Love.

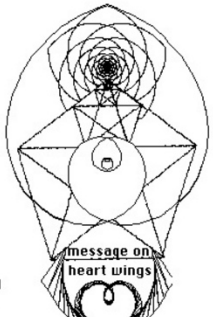

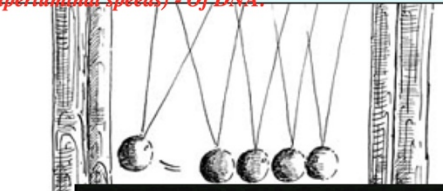

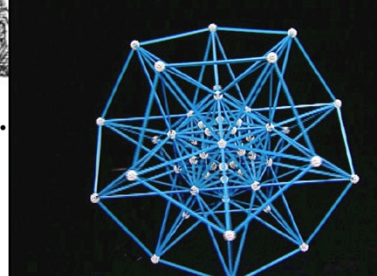

**Evil=**  
**Failure to EmBED**

DNA, Earthgrid, and Zodiac are Dodecahedra,  
their Common "Golden Mean" transmission call  
letter, is the Merkabbah Vehicle linking them.

Longitudinal ('scalar') emf wave nodes  
bounce to shared inertia ONLY in a fractal array  
still points in that array are 'sacred space' & more

*This planar view of the sigillations of each face to the  
Dodec in the 3D fractal nest -(Poincare symmetry defining  
Gravity) - reveal the infinite non-destructive compression-  
Each wave node in the 3D nest -has x,y&z coordinates -  
Each numerically only a multiple of PHI.  
This PERFECT COMPRESSION - creates also the  
Potentially perfected CHARGE DISTRIBUTION  
(superconductivity, gravity making,  
and superluminal speeds) - Of DNA.*

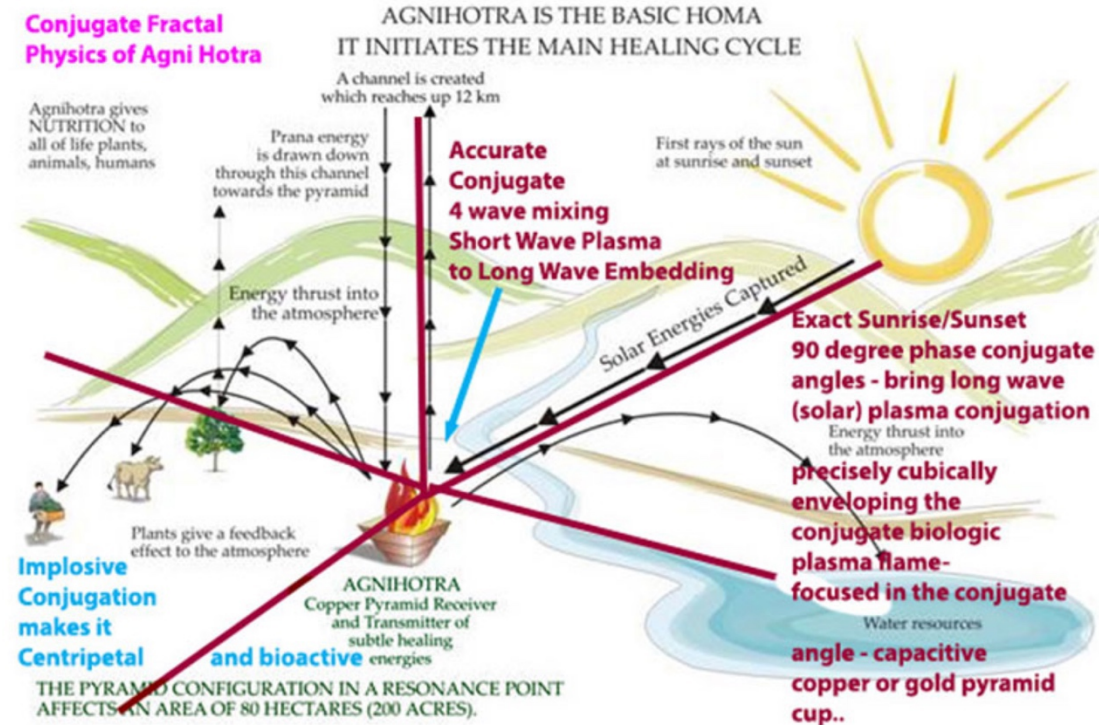

LIFE : is the skill to Enter  
Charge Compression (Fractality) -  
Because that Creates  
PERFECT CHARGE DISTRIBUTION ..  
Which is- "Locked In"=Rapt(ure)  
The Definition of Conscious Awareness..

So longitudinal emf waves re-create their heat containing transverse EMF- ONLY where they cross at a distance at these nodes ( Longitudinal microwave for example) - This we strongly suggest is THE MECHANISM OF ALL ACTION AT A DISTANCE! (including the remote heat containment needed for the holy grail of fusion research).

Here 4 wave mixing to phase conjugation created negentropy in the physics of Agni Hotra:

The electric field generated in conjugate or sacred space- causes implosive / centripetal fractal attraction for charge. This creates both fertility and growth acceleration.

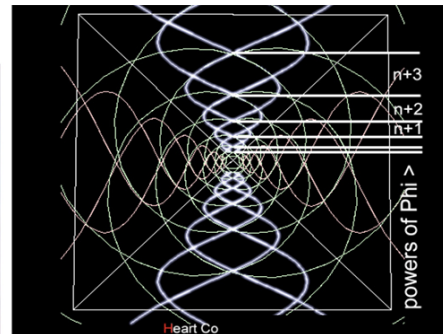

--example: **Agni Hotra- the conjugate / fractal science:** To understand a core principle behind the creation of sacred space- and fertility- based on phase conjugation- let us examine the physics principle - behind the well known fertility and purifying effect of AGNI HOTRA.

In Agni Hotra- the plasma flame is made of profoundly biologic charge dense material (clarified natural butter). The flame is located over a precisely capacitively conjugate copper or gold pyramid:  
from Dan Winter's book "Origin of Negentropy"  
[fractalfield.com/onlinebook](http://fractalfield.com/onlinebook)

**Prerequisite for our**  
**galaxies**  
**most powerful STARGATE**

**(now less infested with Nebu/ Grey's..**

What conventional physics describes as entanglement connecting to Einstein Rosen bridge wormholes- is more accurately described as PHASE CONJUGATION (the perfected form of entanglement/ nesting ). This creates 'impedance matching' / ability to touch connect- to fractal longitudinal emf compression nodes. There is a reason the connection between these longitudinal emf compression nodes (wormholes / stargates / portals) - appears quasi instantaneous at a distance: The increasing numbers of golden ratio multiples OF THE SPEED OF LIGHT connect them recursively faster and faster by conjugation. We discuss more elsewhere about how the bigger stargates use broader spectral ( more dense) conjugation- ref: Orion Trapezium.

For example- those who have been paying attention to interstellar politics ( Elena Danaan notably) - know that our galaxy (named Nataru as Elena explains it is called by other civilizations) most far reaching stargate is the Trapezium cubic core of Orion.

The more mass which compresses in this cubic conjugation ( called 4 wave mixing in phase conjugate optics , and called the sacred 4 directions by shaman)- the greater the number of golden ratio harmonics of light speed cohere simultaneously.

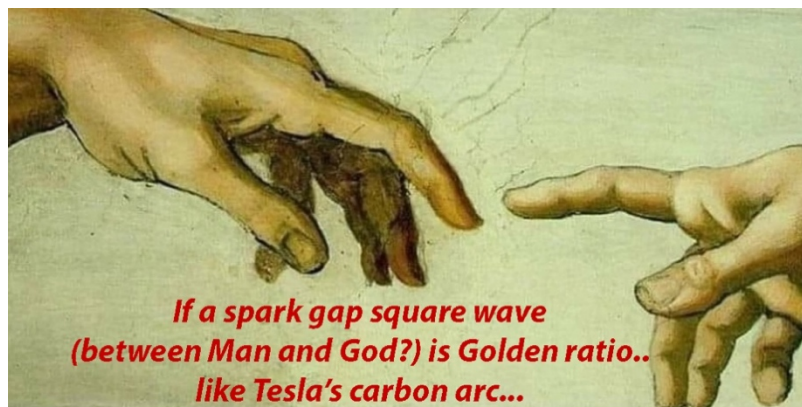

One of the smoking guns of this golden ratio fractality theory of gravity- may well be that the notorious measures of faster than light speed by Professor Raymond Chiao- have virtually all centered between 1.5 and 1.7 times C light speed. We strongly suggest this when refined- will prove our golden ratio conjugate physics of gravity and stargates.

We strongly hypothesize that golden ratio superposing (cube in dodeca for example)- is the ONLY way to migrate between ' dimensions' specifically because it is the only way to superpose additional axes of rotation- of superposed charge spin symmetries. The practical example being obviously the way DNA recursive braiding is ALL based of golden ratio exponents. This is how DNA implosion is the ladder to next dimensions- precisely in the way it allows implosion in to coherent longitudinal emf embedding- which we have repeatedly discussed as the only way to 'get a soul' ( see many films also [youtube.com/danwinterfractalfield](https://www.youtube.com/danwinterfractalfield) ). The soul is specifically the (rainbow light body) longitudinal plasma coherence- which mediates the DNA radio in to ancestor memory. This is also the key to the physics of clairvoyance, for example in why – children seeing with inner trance - due to golden ratio bliss implosion -also - FREQUENTLY MEET THEIR ANCESTORS ! ( again: [flameinmind.com/outervision](http://flameinmind.com/outervision) ) More below on longitudinal physics of ghosts and ghost release.

The second compelling new wave mechanics of charge collapse we have discovered- is the ubiquitous GOLDEN RATIO

IS THE generalized solution in all wave mechanics - to maximum CONSTRUCTIVE wave interference. - and THEREFORE SOLUTION TO COMPRESSION GEOMETRY.

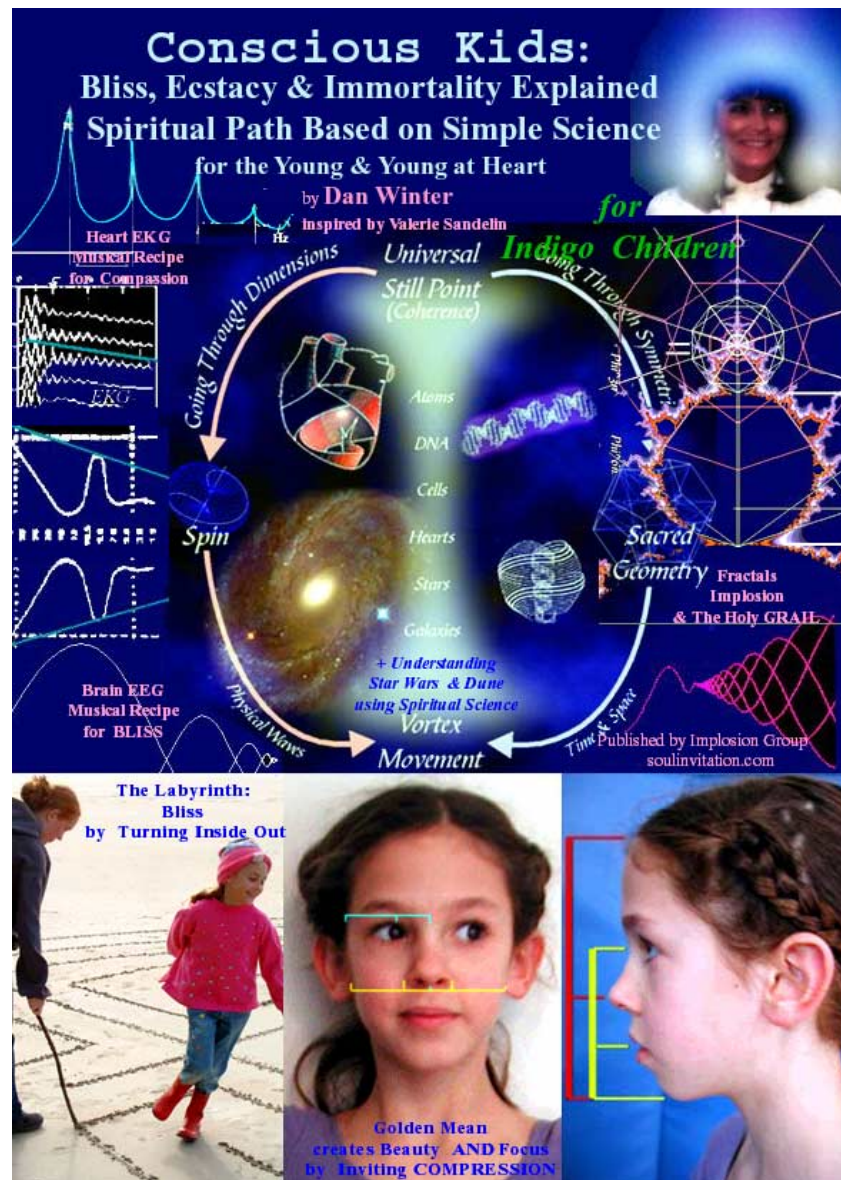

Golden ratio is by inspection the DEFINITION of the geometry of self similarity/ self embedding - and therefore fractality.

*.. very touching?*

We strongly suggest Golden Ratio became the very essence of the geometry of beauty in art - for example- specifically because it is the geometry of perfect compression and therefore negentropy ( as Tufan discusses in the introduction here ). Here from my 2<sup>nd</sup> book [goldenmean.info/consciouskids](http://goldenmean.info/consciouskids)

This concept of beauty from golden ratio – deepens dramatically when we see- by equation that golden ratio is the solution to constructive wave interference and THEREFORE constructive compression. We published for the first time (see above) the generalized wave equations (Klein Gordon) showing Golden Ratio maximizes CONSTRUCTIVE wave interference (and compression) in general.

We have said many times- that in effect – THE solution to compression IS – the evolution of computers, urban design, alchemy, fusion, surviving death.. There IS no more fundamental problem- than the one of compression. This is why it is so strange that while science has for decades known fractality is the solution to compression- mathematically, it seems no one even knew how to ask what is a fractal electric field?? ( hint hydrogen) . Even though specifically now it seems clear- a fractalfield (.com) – is specifically the answer to Einstein’s dilemma (including why objects fall to the ground).

## CAUSE of Gravity continued: WHY Objects Fall to the Ground.

We claim that is because only golden ratio recursive constructive charge wave interference- allows heterodynes of PHASE VELOCITY to interfere constructively, producing acceleration of charge toward center. Again Einstein ( & Penrose) seem to agree that there is no experiment that could differentiate that acceleration - from gravity itself. ('equivalence' principle).

As the charge waves converge in Golden Ratio - perfected constructive heterodyning means not only do the wave lengths add and multiply constructively - but ALSO the charge wave PHASE VELOCITIES.

This means the speed of the wave fronts experience charge ACCELERATION due to fractal golden ratio. This means that ONLY in this golden ratio fractal geometry of charge compression- there is a component of CHARGE ACCELERATION produced. We strongly suggest - the correct name for this component of charge acceleration produced by golden ratio implosive heterodyning - is - THE GRAVITY.

This geometry of perfect fractality ( for example in the geometry of our new equation for hydrogen radii) -enables then the stabilization of gravity (toward negentropy) AND atmosphere maintenance- - which is WHY GOLDEN RATIO IS ARGUABLY THE MOST FEATURED GEOMETRY OF ALL ORBITAL MECHANICS ?! ( *spiralsolaris.ca* )

Fundamentally- as Einstein intuited- the charge collapse which causes gravity- must be non-destructive. This means that the inertia necessarily generated toward symmetry center- in order to be thus CENTRIPETAL - has to allow **A WAY OUT FOR CHARGE AT CENTER! ( as we reviewed above)** **We now know ( for example by my new equation for hydrogen radii) - that the center in question is specifically - the planck dimension (length and time). We also know that coherent longitudinal EMF – which emerge from there- (probably at golden ratio multiples of C light speed)- is the stuff of gravity waves - (if we believe Tom Bearden's -Gravitobiology ) –**

It is actually intuitively obvious that only the longitudinal electromagnetic part of the wave which participates in gravity movement directly. Think about it- only the longitudinal (or scalar) component could compress toward center. The longitudinal wave of compression moves WITH the direction of wave movement. The transverse wave motion is perpendicular to the direction of motion – meaning transverse waves would only ‘wiggle’(up & down) the surface when it hits- but NOT compress. Whereas longitudinal compression waves could align and simultaneously ‘implode’ the center (the cause of charge acceleration named gravity).

Understanding that the OUTPUT of the atoms implosion making gravity is longitudinal is even simpler. Transverse inertia is converted and aligned by implosion to Planck- changing the inertia in to longitudinal – literally lining up the waves compression IN to the direction of their propagation ( longitudinal). As transverse waves are guided down the implosion vortex – that inertia experiences ‘translation of vorticity’ – emerging out the squirt gun- realigned to longitudinal coherence. (Making the ‘EL’). This confirms Tom Bearden’s equations showing gravity is longitudinal emf. ( Also helps heal the evident schizophrenia of those who imagined gravity is made of something which is not electromagnetic ). Gravity is the name for how charge is accelerated by implosive compression. The accelerated charge inertia then propagates primarily longitudinally ( what gravity waves are- and how they can include faster than light components).

SO - that way out for charge at center- is precisely the mystery answered when we realize that phase conjugation to the planck threshold (my new equation for hydrogen radii- is the smoking gun)- specifically is where the transverse charge waves- EMERGE THRU THE SPEED OF LIGHT- in to

longitudinal interferometry (gravity waves). This is where charge 'gets screwed' into the only implosive vortex which is fractally implosive - and specifically NON DESTRUCTIVE - compression. ONLY in this golden ratio / fractal geometry of compression where inPHIknit heterodynes add and multiply not just wave lengths but also PHASE VELOCITIES- does compression become ACCELERATION of charge toward symmetry center. Only in this fractality perfected golden geometry of compression does a portion of the compression inertia becomes acceleration of charge toward center (because phase velocities heterodyne constructively recursively only in golden ratio).

Einstein knew that perfect compression HAD to be the solution to a unified field- now we know that is PlanckPhire. And he also knew that there had to be a non-destructive WAY OUT for that compressed charge WHEN it reached center. Now we know exactly what that constructive WAY out at center is. The center is PRECISELY golden ratio cascade (implosion) to exactly Planck. And only there – is the transverse inertia ‘screwed in’ – and converted down the perfect spiral- so it can emerge IN to longitudinal (more organized compressional ) propagation. That is due to the fact that the caduceus of golden ratio perfect damping is not just the solution to constructive wave interference and compression- it is also the solution to ‘optimized translation of vorticity’. ( THE so called ‘yellow brick road’). This is literally Hermetically sealed in Hermes caduceus which today is called phase conjugation (embedding ) perfected. THAT longitudinal emf which emerges from the squirt gun nozzle- named Planck- at the tip of the ‘toothpaste’ vortex tube- (see Hydrogen equation / graphic) is specifically documented by Bearden (“Gravitobiology”) – to be the stuff of GRAVITY WAVES- and also – fertility trigger- in plants!

The common name for the resultant centripetal acceleration of charge toward symmetry center - caused by fractal golden ratio charge phase conjugate implosion is... THE GRAVITY.

**IMPLOSIVE compression by PlanckPhire- causes gravity, life force, negentropy, and as we investigate here- consciousness itself.**

It is obvious by inspection (hydrogen equation / see chart all the negentropic wavelengths)..

that this PLANCK threshold is where compression comes to a point. And thus where the implosion of transverse emf - emerges- by translation of vorticity- in to coherent penetrating longitudinal EMF. These are compression waves - sometimes called scalar- and literally gravity waves.

Again- non technical readers could skip about the next 4 pages..

**Dear PHYSICIST: NO one will accept your answer that it could be a 'coincidence' that 3 hydrogen radii are precisely golden ratio exponents of PLANCK- SO - you must now deal with my answer to why: It is because golden ratio 'conjugation' of phases is HOW HYDROGEN IMPLODES & MAKES GRAVITY**

HIDERS - Homologous If Decoded Elements, Repetitive.

Protocode: proton DNA resonance code.

## ABSTRACT

The theory of the morphogenic field suggests that chemical signaling is supplemented by electromagnetic signaling governing the structure and shape of tissues, organs and the body. The theory of DNA resonance suggests that the morphogenic field is created by the genomic DNA which sends and receives electromagnetic signals in a sequence-specific manner. Previously, the authors have proposed the existence of HIDERS, genomic elements that serve as antennas in resonance signaling and demonstrated that they occur nonrandomly and are conserved in evolution. Here, it is proposed that longitudinal hydrogen bonds exist in the double helix, that chains of these bonds form delocalized proton clouds, that the shapes of these clouds are sequence-specific and form the basis of sequence-specificity of resonance between HIDERS. Based on longitudinal hydrogen bonds, a proton DNA resonance code was devised and used to identify HIDERS which are enriched 20 fold in the genome and conserved in evolution. It was suggested that these HIDERS are the key elements responsible for DNA resonance signaling and the formation of the morphogenic field.

In addition to chemical signaling, there is electromagnetic signaling that controls the structure and shape of tissues, organs, and the body. Proposed nearly 100 years ago (Gurwitsch, 1922), the morphogenic field was experimentally demonstrated by independent groups (Gurwitsch, 1988; Volodyaev and Belousov, 2015). In these experiments, perturbing one of the chemically separated biological samples leads to measurable effects in another (Cifra et al., 2011; Scholkmann et al., 2013; Trushin, 2004; Xu et al., 2017). Distorted reflection of the field produced by fish embryos causes developmental abnormalities, thus confirming that the field is electromagnetic and has morphogenic properties. (Burkov et al., 2008; Burlakov et al., 2012). The electromagnetic oscillations in the cells were proposed to be driven by the constant chemical energy flux and are estimated to be in the millimeter-wave region (Frohlich, 1988). Genomic DNA was proposed to be the main source and receiver of the morphogenic field, allowing the genomic program to participate in the morphogenesis directly via DNA resonance signaling (Miller and Webb, 1973).

Coherent oscillations in DNA were detected in the THz range (Sajadi et al., 2011). There are many models for mechanical oscillations in DNA (Scott, 1985; Volkov and Kosevich, 1987). In addition to mechanical oscillations in DNA, we suggested the sequence-dependence of oscillations in delocalized proton clouds in the base stack (Savelyev and Myakishev-Rempel, 2019; Savelyev et al., 2019).

Dan Winter's original equation for hydrogen radii – based on golden ratio exponents times Planck- is a logical extension of Heyrovská's extensive earlier work – showing golden ratio – fingerprints ALL over hydrogen... – not ( as I later discovered) in distance to center, but golden ratio BETWEEN electron shells etc.

### 3. The Golden sections of the inter-atomic distance in $H_2$

The inter-atomic distance in the simplest diatomic molecule,  $H_2$  is the covalent bond

length  $d(HH) = 2d(H) = 0.74 \text{ \AA}$  [1],  $0.749 \text{ \AA}$ ,<sup>13</sup> where  $d(H) = 0.37 \text{ \AA}$  is the covalent

atomic radius [ $R_{cov} = d(H)$ , semi-covalent bond distance]. It is the diagonal of a square

with  $a_B = 0.529 \text{ \AA}$ ,<sup>12</sup> as a side, with the two electrons and protons at the opposite corners

of the diagonal. Since  $a_B$  has two Golden sections (Eqs. 10b,c), one finds that

$$d(HH) = 2^{1/2} a_B = 2^{1/2} (a_{B,p} + a_{B,e}) = d(HH)/\phi^2 + d(HH)/\phi = d(H^+) + d(H^-) \quad (12)$$

<http://proceedings.nature.com/documents/2929/version/1>

Hydrogen's Key Golden Ratio distances- per the work of

Raji Heyrovská - **.28 Angstroms, .46 Angstroms and .74 Angstroms**  
 where  $d(H^+) = d(HH)/\phi^2 = 2^{1/2} (a_{B,p}) = 0.28 \text{ \AA}$  and  $d(H^-) = d(HH)/\phi = 2^{1/2} (a_{B,e}) = 0.46 \text{ \AA}$

are the Golden ratio based cationic and anionic radii<sup>7</sup> of H. See Fig. 3.

[The Golden ratio, ionic and atomic radii and bond lengths](#)

Author: J. Heyrovský, Institute of Physical Chemistry, Academy of Sciences of the Czech Republic, Prague, Czech Republic - This work arose from the author's finding that **the ratio of the radius of hydrogen, estimated recently (C.H. Suresh, N. Koga, *J. Phys. Chem. A*, 105, 5940 (2001)) by density functional methods, to the ground state Bohr radius is the Golden ratio, which operates in a variety of natural phenomena. It is found that the Golden ratio indeed plays a quantitative role in atomic physics. The interesting results are (1) that it arises in atomic dimensions due to the electrostatic forces between negative and positive charges; (2) that the energy of atomic hydrogen is actually equivalent to the energy of the simplest atomic condenser with the Golden mean capacity; (3) that the origin of two terms in the Rydberg equation for absorption and emission is in fact in the ground state term; (4) **that all atoms can be assigned definite values of cationic and anionic radii based on the Golden ratio and covalent radii**; (5) **that these radii are additive and explain quantitatively bond lengths like those of alkali halides, of hydrides of many elements and of many other bonds, whether covalent or ionic or both**; and (6) that the work functions of alkali metals can be evaluated using the bond lengths.**

## Dependence of ion–water distances on covalent radii, ionic radii in water and distances of oxygen and hydrogen of water from ion/water boundaries

**boundaries** Raji Heyrovská<sup>a</sup>

**Abstract** <sup>a</sup>Institute of Biophysics, Academy of Sciences of the Czech F

This Letter shows that the ion–water (oxygen) distances for ions of monovalent, divalent and trivalent elements including lanthanides increase linearly with the covalent radii of atoms. The slopes and intercepts of the lines are found to depend on the Golden ratio. The ionic radii in water have been evaluated and ion/water boundaries located. The hydration distances of the oxygen of water to the peripheries of the cations are of four types and are constants. The distance of the hydrogen of water to the peripheries of halogen anions, which is the length of the 'hydrogen bond', is also a constant.

*Commentary from Dan Winter- continued-*

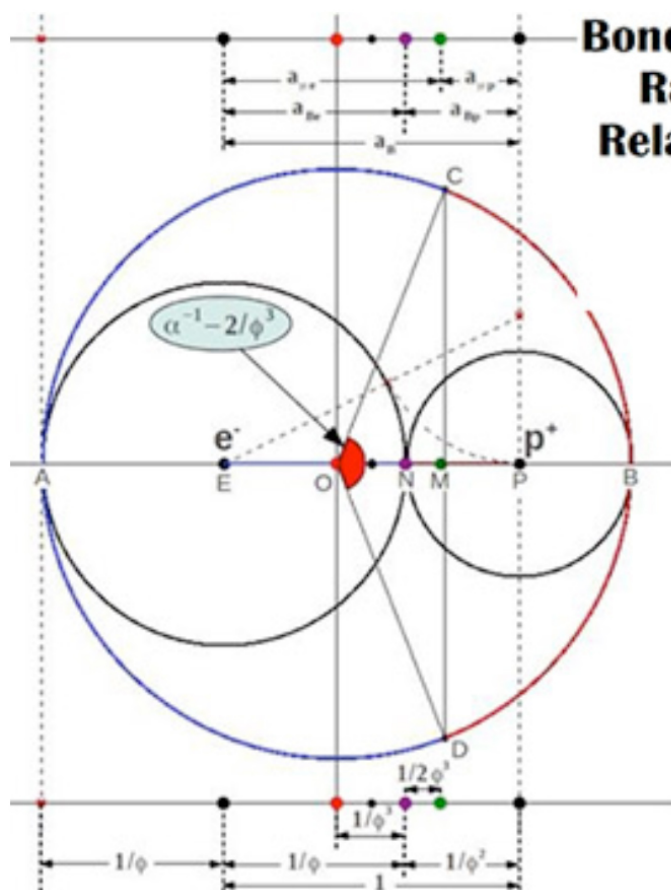

**HOW Golden Ratio Fractal Phase Conjugation - Causes Gravity:** Perfect wave collapse- (Einstein's definition of gravity) has to couple the inertia of compression during rotation - with that of acceleration. This is the very nature of gravity. Only the golden mean path with the power to make wave interference constructive in both addition and multiplication- solves this problem. Gravity is the Golden Ratio CONSTRUCTIVE adding and multiplying of (charge) wave VELOCITIES- producing ACCELERATION.- The portion of the rotational inertia known as mass- is coupled to the experience of acceleration which waves of charge experience in the presence of this golden ratio fractality ('golden quantum field theory' El Naschie) which causes gravity. Gravity is a coupling of electric fields which happen due to how they are phase locked at very short wave (and very universal) quantum lengths. The premiere spectral distances being in the golden ratio wave fractality or 'self similarity' which describes how the nucleus must embed in its electrons- which allows atoms to make gravity.

In this model - further- charge is identified as the net difference between rarefaction and compression generated when these compressional waves traverse the ether. The electron then becomes not a point source, but rather a very small slip knot. That slip knot itself participates in the fractal or gordian knot that is gravity precisely by utilizing again golden ratio curvature- because that defines **optimized translation of vorticity**. Hydrodynamics has long known this optimized coupling of rotational inertia to linear inertia - was the definition of the golden mean spiral path . What they had not discovered - was that it is precisely this characteristic of the golden mean curvature - which makes this spiral wave path for charge- the only way to achieve non-destructive wave collapse. therefore making this golden mean fractality the creator of the phenomenon of charge acceleration.. called GRAVITY.

## Bond Lengths, Bond Angles and Bohr Radii from Ionization Potentials Related via the Golden Ratio for $\text{H}_2^+$ , $\text{O}_2$ , $\text{O}_3$ , $\text{H}_2\text{O}$ , $\text{SO}_2$ , $\text{NO}_2$ and $\text{CO}_2$

Raji Heyrovská<sup>1</sup>

**Figure 1:** The Bohr radius  $EP = a_B$  of the hydrogen atom is divided into Golden sections  $EN = a_{Be}$  and  $NP = a_{Bp}$  at the point of electrical neutrality  $N$ , as the auxiliary right angle triangle makes clear. The magnetic center is located at point  $M$ , at a distance  $a_B/2\varphi^3$  from the electrical neutrality point towards the proton. The circumference of the outer circle is also divided into two golden arcs  $CAD$  and  $CBD$  by means of the Golden angle. Note that each arc length equals the perimeter of the inner circumferences. The shorter arc is closely related to the Fine Structure constant, whose value is very near the Golden Angle shown in red. In addition, the chord  $CD$  intersects the horizontal very near the magnetic center  $M$ .

<http://www.ijsciences.com/pub/pdf/V2-201304-08.pdf>

In a recent paper, it was shown that the atomic radii of main Group elements are directly proportional to their ground state Bohr radii obtained from the first ionization potentials, with the proportionality constant involving the Golden ratio. It was demonstrated in earlier articles that atomic and Golden ratio based ionic radii are additive in chemical bond lengths. Here the bond lengths and angles are interpreted in terms of the respective Bohr radii and the Golden ratio. Simple molecules present on our Earth and in the environment, which are of importance to our lives have been chosen here as examples.

## IMAGE SERIES- how does a longitudinal array work?

- **Transverse Wave -**

- most electromagnetic communication,
- in Earthquakes called S waves

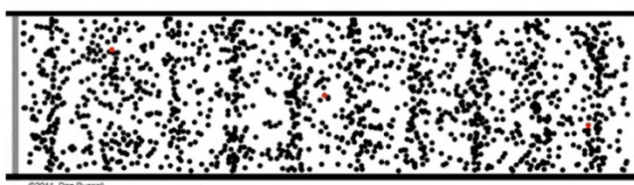

- cannot implosively compress.

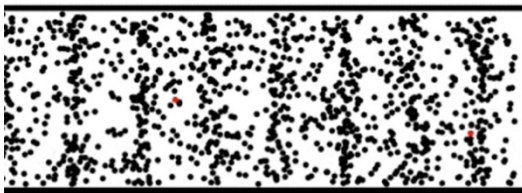

- **Longitudinal Wave -** sound waves, conjugate heating at a distance, mind waves, naturally superluminal and penetrates most barriers transparently, Earthquake P waves:

These waves can implode - and achieve remote plasma containment ( the nature of MIND , and the holy grail of all plasma physics).

### Longitudinal Wave Interferometry: Plasma Containment

The Compression/Rarefaction wave travels  
PARALLEL to the direction of travel.

It is only the  
**LONGITUDINAL**  
or **COMPRESSIONAL**  
component of the EMF  
wave which can impinge  
of the atom / nucleus  
to create organized centripetal force..  
(gravity)

What Tom Bearden demonstrated  
about longitudinal emf as  
the stuff of gravity ways is  
also intuitively obvious.

Implosive  
Centripetal Force  
Conjugating Phases  
Plasma Containment  
Mind

### Perfect Compression Perfect Flame The Nature of MIND

If the transverse or 'up and down'  
component of the emf  
hits an atom / nucleus  
it is obvious this could  
never compress implosively  
toward center!

## WHY the geometry of SPACE- is FRACTAL? Constructive wave interference required.

We argue that these compressional longitudinal emf (gravity) waves- meet at constructive compression nodes in a larger array- which has the requirement of FRACTALITY. This requirement for a fractal array where longitudinal emf 'bounces' in and out of is perfected by the golden ratio stellations- of DODECAHEDRA - which we claim is the only possible 3-dimensional fractal. This thus establishes the essential geometry of DNA, Earth Grid, and the essential geometry of the (fractal) arrangement of masses in the universe. This stabilizes gravity ( and atmosphere) - and enables action at a distance (to be discussed below). This also then stabilizes the (fractal) array in which ancestor memories propagate - so called dreaming track, 'heaven'/ planes of Sharon / Champs Elysée / Eleusian Fields.

*Gravity= inphiknit (implosive) charge collapse (paraphrasing Einstein)- Fractal / phase conjugate charge collapse - precise exponents of golden ratio - to planck - cause gravity by allowing superluminal Acceleration\* past C by golden ratio (non destructive self re-entry= perfected recursion in phase velocity heterodyning) into longitudinal emf [fractalfield.com/conjugategravity](http://fractalfield.com/conjugategravity) - \*This underlies Einsteins conviction there is no experiment which could discriminate acceleration from gravity- meaning charge acceleration IS gravity- meaning if you learn what causes charge to accelerate DURING compression ( hint golden ratio phase conjugate recursive constructive heterodyning of phase velocities) - you have then PRECISELY DEFINED THE CAUSE OF GRAVITY ( and how else would any physicist explain my new equation -planck x integer exponents golden ratio - proving this conjugation of phases to planck - is the precise geometry of hydrogen, photosynthesis, orbital mechanics- and so much more [fractalfield.com/physics](http://fractalfield.com/physics) ... and this then explains perfectly WHY gravity, life, mind/consciousness are centripetal and negentropic - just like phase conjugation is in optics..*

It is ESSENTIAL that kids be taught the correct physics: (from Star Mother kit- [goldenmean.info/kit](http://goldenmean.info/kit))

Fractal /self-similarity (perfected golden ratio charge collapse/ implosion) - is not just the physics of the CAUSE of gravity- (why objects fall to the ground)

[fractalfield.com/conjugategravity](http://fractalfield.com/conjugategravity) , [goldenmean.info/gravitycause](http://goldenmean.info/gravitycause)

it is also how gravity orbits are maintained and stabilized- and therefore key to stabilize ATMOSPHERE !

Is Spacetime Fractal and Quantum Coherent in the Golden Mean?

Compare to [www.fractalfield.com/conjugategravity](http://www.fractalfield.com/conjugategravity)

By Mae-Wan Ho, Mohamed el Naschie & Giuseppe Vitiello

[globaljournals.org/GJSFR\\_Volume15/6-Is-Spacetime-Fractal-and-Quantum.pdf](http://globaljournals.org/GJSFR_Volume15/6-Is-Spacetime-Fractal-and-Quantum.pdf)

**Abstract-** We consider the fabric of spacetime from a wide perspective: from mathematics, quantum physics, far from equilibrium thermodynamics, biology and neurobiology. It appears likely that spacetime is fractal and quantum coherent in the golden mean. Mathematically, our fractal universe is non-differentiable and discontinuous, yet dense in the infinite dimensional spacetime. Physically, it appears to be a quantum coherent universe consisting of an infinite diversity of autonomous agents all participating in co-creating organic, fractal spacetime by their multitudinous coupled cycles of activities. Biologically, this fractal coherent spacetime is also the fabric of conscious awareness mirrored in the quantum coherent golden mean brain states.

**Keywords:** whitehead's philosophy, discontinuous nondifferentiable spacetime, fractals, coupled activity cycles, deterministic chaos, quantum coherence and fractals, golden mean.

I designed our Star Mother kit - [goldenmean.info/kit](http://goldenmean.info/kit) - to teach this principle of perfect collapse by golden ratio in fractal recursive platonic embedding. The original concept for the way dodeca icoa infinite nest embedding was inspired from our friend Plummer in his Theosophical book "Mathematics of the Cosmic Mind" – who wrote part of our kit intro. In Theosophy this nest is called "Greater and Lesser MAZE". I merely implemented that geometry in the commercially available Zometool. We work with Tufan Guven distributing this and many related sacred geometric modelling materials: [geometricmodels.org](http://geometricmodels.org)

Each dodeca / icoa node in and out of the infinite 3d nest - has all x,y,z coordinates of simple exponents of golden ratio- see Star Mother kit.

- Again the point is ( as Kepler CORRECTLY intuited) perfected charge collapse correctly modelled by golden ratio platonic nesting (in orbital dynamics AND electron shell nesting)
- IS how gravity is stabilized! ( and therefore how ATMOSPHERE is stabilized).

**Universe Is Dodecahedral!** Makes Headlines.. Nature Magazine etc., „BUT - no one even NOTICED that this is the only 3D geometry (based) on Golden Mean - whose stellation precisely allows infinite non-destructive collapse - the compression that PRODUCES acceleration (gravity). Summary - the very dodeca symmetry of the universe PROVES that self-similarity produces gravity. ref: [fusion](#) , [collapse](#) , [thrust](#)

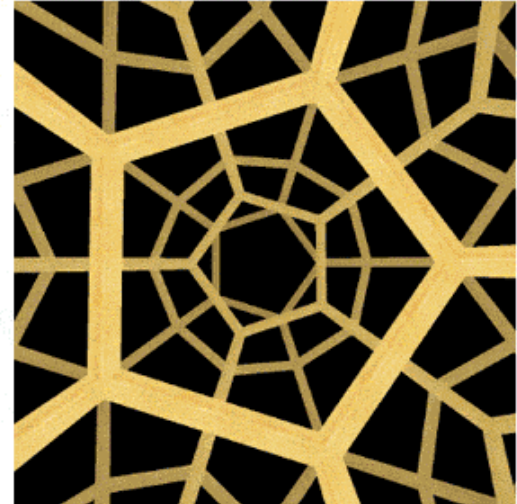

Leonardo da Vinci had the right idea

Universe is Dodeca - or Universe is Fractal  
 Dan Winter goldenmean.info  
 says they are BOTH right..

October 2003

**Is the universe a dodecahedron?** (ref: <http://physicsweb.org/article/news/7/10/5#polygon>) , 8  
 The standard model of cosmology predicts that the universe is infinite and flat. However, cosmologists in France and the US are now suggesting that space could be finite and shaped like a dodecahedron instead. They claim that a universe with the same shape as the twelve-sided polygon can explain measurements of the cosmic microwave background - the radiation left over from the big bang - that spaces with more mundane shapes cannot (J-P Luminet *et al.* 2003 *Nature* 425 593).

An image showing the view in a dodecahedral space universe  
 (Image credit: Jeff Weeks)

because that perfect collapse geometry CAUSES gravity!  
 In other words- the more a set of masses is arranged in DODECA SYMMETRY  
 the more gravity they will create! - We should be able to use this to eliminate  
 the need to hypothesize the need for impossible 'dark matter'.

Fig. 3.- Spherical pentagons and dodecahedra fit snugly, unlike their Euclidean counterparts. a) Twelve spherical pentagons tile the surface of an ordinary sphere. They fit together snugly because their corner angles are exactly  $120^\circ$ . Note that each spherical pentagon is just a pentagonal piece of a sphere. b) One hundred twenty spherical dodecahedra tile the surface of a hypersphere. A hypersphere is the 3-dimensional surface of a 4-dimensional ball. Note that each spherical dodecahedron is just a dodecahedral piece of a hypersphere. The spherical dodecahedra fit together snugly because their edge angles are exactly  $120^\circ$ . In the construction of the Poincaré dodecahedral space the dodecahedron's 30 edges come together in ten groups of three edges each, forcing the dihedral angles to be  $120^\circ$  and requiring a spherical dodecahedron rather than a Euclidean one. Software for visualising spherical dodecahedra and the Poincaré dodecahedral space is available for free download from [www.geometrygames.org/CurvedSpaces](http://www.geometrygames.org/CurvedSpaces).

**So-Nature Magazine says the UNIVERSE IS FRACTAL,**

**New Scientist & physicsweb says- The UNIVERSE IS DODECAHEDRAL**

**- Can they BOTH be right? Yes! A Stellated Dodec IS the Perfect Fractal..AND**

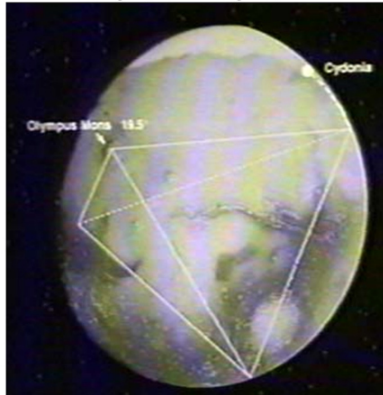

**- that PERFECT COLLAPSE GEOMETRY FOR CHARGE IS THE CAUSE OF GRAVITY!**

(below) See if you can understand what “planet taming” meant:

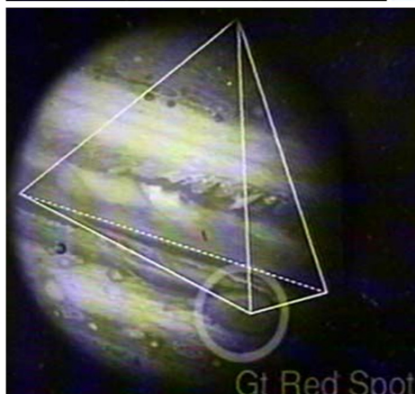

[www.goldenmean.info/babalon](http://www.goldenmean.info/babalon)

Below - we begin (unlike Hoagland) to see WHY the Mars CYDONIA, the Jupiter spot, Giza , etc. are ALL at tetrahedral latitudes..

**Pyramids and dolmen at tetrahedral latitudes (subset of icoso/dodeca Earth grid) stabilize gravity and atmosphere by phase locking / embedding local spin rates to zodiacal spin - enabling a caduceus cascade of charge compression. This IS how gravity is stabilized - and atmosphere ultimately maintained.**

**This was discussed (3 images here) in the book “Two Thirds” by David Myers, David Percey concept developed at [www.goldenmean.info/babalon](http://www.goldenmean.info/babalon)**

**So planting the dolmen with geometric precision is like finding your place to grab the gyroscope and then pump / nutate the gyroscope in your hand to accelerate spin rate. This IS atmosphere maintenance.. called ‘planet taming’ in the book.**

MAKING gravity requires grabbing a hold of a spinning gyroscope - using tetra latitudes as leverage points in order to phase lock the local spin with the larger nutation - precession (the wrist rotation below)..

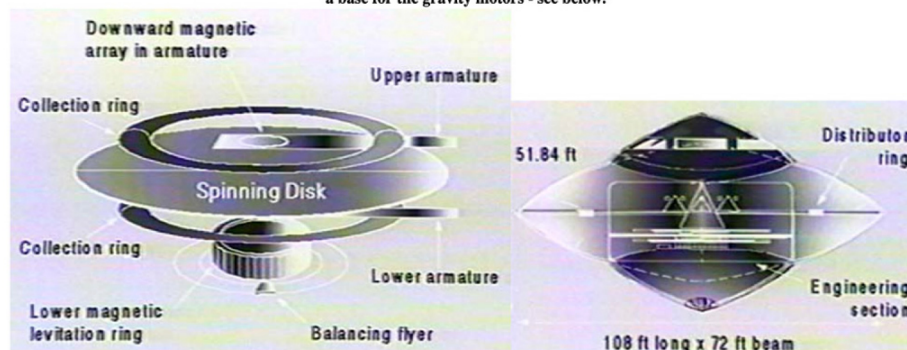

**concept from Dan Winter [www.goldenmean.info/babalon](http://www.goldenmean.info/babalon)**

**b&w images from**

**‘Two Thirds’ book - David Mayers & David Percy [aulis.com/twothirds1.htm](http://aulis.com/twothirds1.htm)**

Left animation from Dan Winter - the moment when students FEEL the way to grab a 3D spinning gyroscope to PUMP IT - by phase locking the rolling precession / nutation rotation you make with your hand - to the rotation speed - {takes all the muscle in your arm} - THEN they realize what sister mary nun meant about electric charge phase lock when she said: "Walk to the communion rail with the QUALITY OF GRACE! (you FEEL it - like the vice like grip of kundalini ).

Making gravity on planets was called "planet taming" in the book. More specifically - phase locking local (Earth) spin IN A HARMONIC CASCADE ( see [caduceus](#) = perfect harmonic inclusiveness = perfect compression ) BASED ON RECURSION - to the large spin of local zodiac star masses - STABILIZES GRAVITY and enables the retention of atmosphere. Placing massive paramagnetic dolmen like tuning timing weights - at tetrahedral latitudes accomplishes this IN PART - when they are used as a base for the gravity motors - see below.

**“Planet taming” (book: “Two Thirds”) - by ET “SEEDER RACES” (Elena Danaan) – refers to gravity and atmosphere stabilization maintenance achieved by planting dolmen / pyramids/**

conductive tuning weights at tetra/ icosahedron latitudes to enable the charge collapse which stabilizes gravity and atmosphere. This was **ESPECIALLY** needed after planetary catastrophe's – like when Tiamat destabilized - dumping it's water to Earth. This **IS** the great flood of the 'lesser Dryad'. The galactic federation rather screwed up the nukes while trying to shoot out the Nebu / Annunaki / Kingu- they practically destabilized the whole Solar System. We refer here to Graham Hancock's confusion not recognizing practically **ALL** of his "Ancient Apocalypse" post flood teacher heroes ( Oannis, Quetzalcoatl, Hermes, Osiris, Zoroaster, Vairachoca, the list goes) – **ARE** in fact **NAMES** of Enki/ EA/ Hermes/ Thoth. (Hero with a Thousand Faces- ref Joseph Campbell). – See our discussion of pyramid design as global wireless (longitudinal emf) power grid- simultaneous with it's function as "GRAVITY DIODE" atmosphere/ gravity stabilizer.

This is the **SAME** Hermes / Thoth – widely agreed to be **DESIGNER** of the great pyramid?! ( and the **NAME** of **THE** Egyptian kingship line, and the **NAME** of the line of **DAVID** – and clearly literally the father of the Magdalen lineage! .. and founder of Atlantis? The list goes on and on and on.... Probably we should consider the Caduceus message- today called **PHASE CONJUGATION**- to be **HERMETICALLY SEALED!**

<https://youtu.be/Zxc945x1XAc> **Film: Electrical Purpose of PYRAMIDS: The 'Hummer'/ 'Gravity Diode' - with Dan Winter and Sam Osmanagich**

This takes us back to our conversation- about **HOW** the longitudinal array **NODES** resulting from phase conjugate charge collapse- require fractality- to create perfect array communication. 'DNA radio'.

The primary physics of note here is the fractal symmetric (dodec/golden stellaton/'star mother') array enabled and required for coherent longitudinal emf ('scalar') propagation. In this way the compressional longitudinal emf - will pass thru almost anything ( including Faraday cages) - **BUT** where these compression waves bounce in and out of the fractal nodes at a distance- it is **ONLY THERE** where they recursively then exchange inertia with the heat containing transverse emf. ( hint solution to plasma containment for fusion).

In other words – only at the symmetric compression points or ‘nodes’ in the longitudinal array (remember the dodec/icos proven Earth grid) – is there a recurring interchange of inertia with the usually invisible longitudinal (scalar) emf – WITH the heat containing transverse emf. The transverse waves bounce up and down – perpendicular to propagation- AND THEREFORE CANNOT WELL SERVE IMPLOSIVE COMPRESSION. It is the longitudinal compression node centers which set up the ‘nodal still point fractal array’ radio- for action at a distance ( using cascading golden ratio times light speed  $C$  harmonics, compression determines which stargates go farther ).

This is the physics of all so called 'action at a distance' – and most ‘spiritual stories’.. and aboriginal song lines. Altho the longitudinal /scalar emf will penetrate faraday cages, at the same time most of the information rich qualities of the longitudinal array (and collective mind/ collective unconscious / ‘DNA radio’) – will be NOT available in aluminum/ steel boxes and electrosmog. This means that most modern cities are a HELL of a place to make phone calls to ancestors. For example Korotkov followed the Kogi to their ancestor phone booth /’sacred space’– and proved the air was necessarily fractal – charge distribution efficient.

That longitudinal array- is what we call sacred space.

Connecting with ‘the array’: A “Flame in Mind”. We strongly believe we understand exactly - the EEG frequencies which famously enabled Ingo Swann- to heat that thermistor in a faraday cage at a distance with his mind- repeatedly in lab tests. This is precisely the EEG of golden ratio implosion. This efficient compression geometry is what I call ‘impedance matching the longitudinal array’. This is precisely THE premise of our flameinmind.com - successful brainwave bliss invention. - Note the identical relationship to the included golden ratio EEG cascade enabling vision without eyes- [www.flameinmind.com/outervision](http://www.flameinmind.com/outervision) - and enabling bilocation - (measurements and witnesses included) [www.flameinmind.com/lucidbrain](http://www.flameinmind.com/lucidbrain)

When conventional physics tells you that action at a distance is the result of 'entanglement' - the problem is they forgot to tell you that 'entanglement' (embedding ) perfected - is PRECISELY THE PROBLEM SOLVED BY PHASE CONJUGATION IN (FRACTAL) GOLDEN RATIO TUNED TO PLANCK - (IN TO LONGITUDINAL INTERFEROMETRY).

An instructive example here- is the tragedy of wasted money in fusion research. Obviously with coherent longitudinal microwave interferometry- you can make a heat containing node at a distance. This means that current money wasting efforts at heat containment for fusion- are immature and ignorant of the fundamental (longitudinal / implosive) wave mechanics – nature uses for charge containment (including inside your head- during bliss).

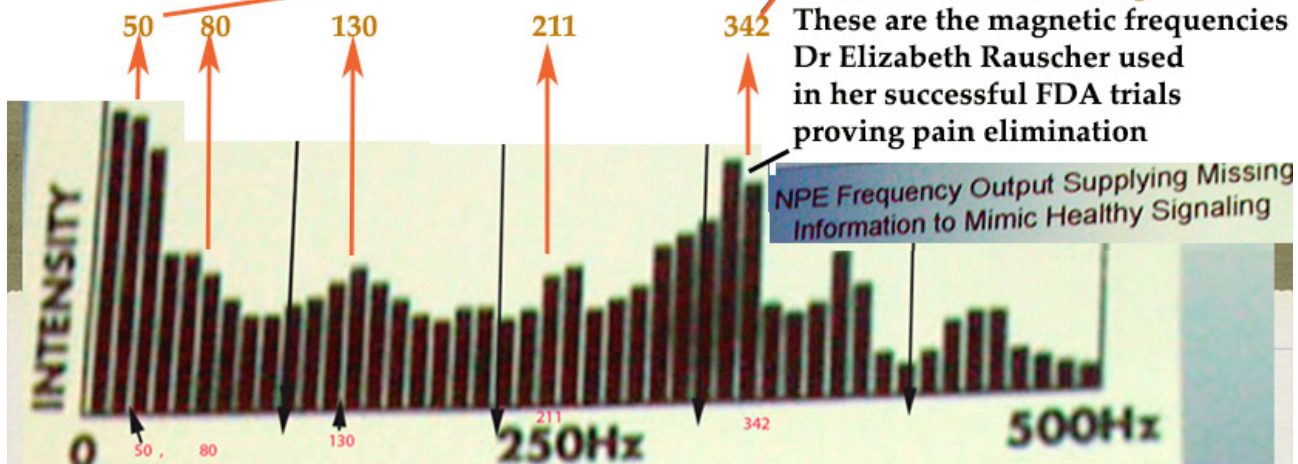

For example, even the efforts at magnetic containment ignore the infinitely more efficient physics of MAGNETIC PHASE CONJUGATION - examples at [www.theraphi.net/static](http://www.theraphi.net/static) - where Elizabeth Rauscher agreed that I invented phase conjugate magnetics- when my equation- Planck x golden ratio exponents, predicted which magnetic harmonics reduce pain- restore centripetal force .

understanding PHASE CONJUGATE MAGNETICS- invented by Dan Winter. Study the chart of the magnetic frequencies which Elizabeth Rauscher found (in early FDA trials) - ELIMINATED PAIN (and anecdotally- accelerated healing):

- Harmonics of Magnetic Field- Which Imitate and Create Pain Reduction (Measured) and Healing (Not Confirmed)..
  - Harmonics of Healing were measured then imitated
- Critical Frequency Cascade Appears to be Phase Conjugate

These are the frequencies modulated in THERAPHI from Dan Winter's equation

These are the magnetic frequencies Dr Elizabeth Rauscher used in her successful FDA trials proving pain elimination

Winter has applied precise phase conjugate / caduceus scaling geometry - planck time to golden ratio - to show WHY these frequencies end pain/heal

What Dr.Rauscher later realized was this is an example of Dan Winter's concept of PHASE CONJUGATE MAGNETICS. Later Winter- has shown that you can take the KEY FREQUENCIES in this graph and DERIVE THEM- from his original equation for the geometry of hydrogen (radius AND frequency): proof of the fractal nature of gravity. ( [goldenmean.info/goldenproof](http://goldenmean.info/goldenproof), [goldenmean.info/coincidence](http://goldenmean.info/coincidence) ). This much deeper physics now provides the backdrop- as Winter has used ONLY AND PRECISELY THESE FREQUENCIES and geometry IN EVERY INVENTION HERE. (Pyraphi and Imploder are built exclusively with this precise golden ratio TO hydrogen and planck scaling factor - the ultimate global scaling solution! - [goldenmean.info/globalscaling](http://goldenmean.info/globalscaling) ).

We are of course pleased to acknowledge and support dear Dr Elizabeth Rauscher- but now that we know how to complete the harmonic cascade by definition from a deeper physics (phase conjugation to Planck) - we will carry this work to completely new level.

What this means is we now know precisely the magnetic (and by analog-dielectric) FIELD which restores compression and is the FIELD SYMMETRY KEY to healing and tissue regeneration in general. Winter and his team (thanks to Andrew!) are deeply

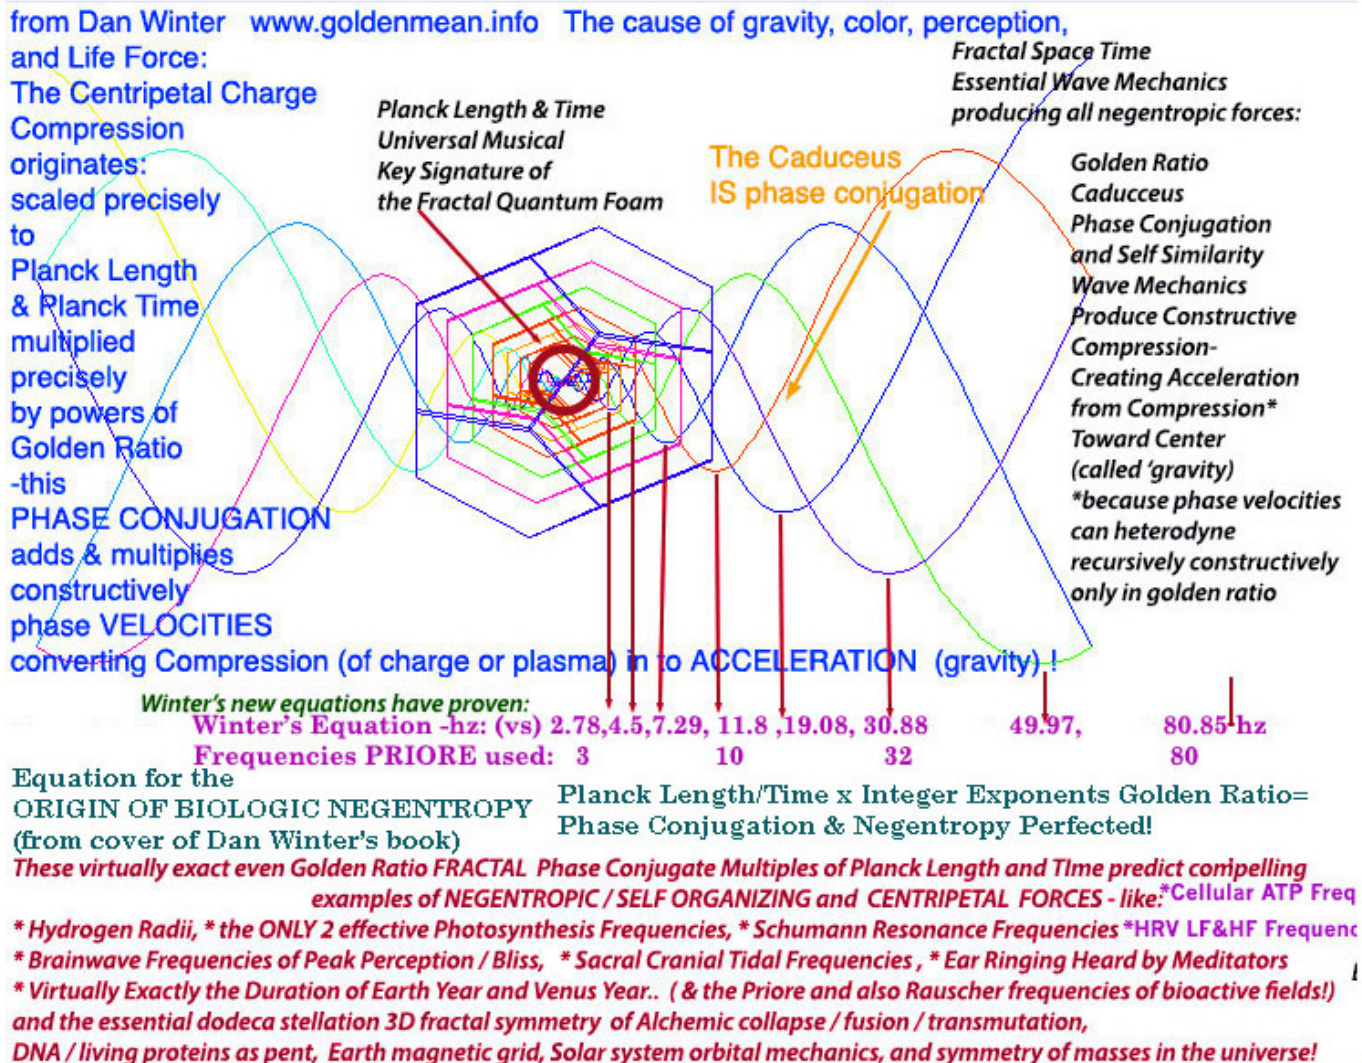

Notice that the frequency signature- phase conjugation to Planck identifying my discovery of Phase Conjugate magnetics above- directly points to the physics of our commercially successful Theraphi.net : (discussion below)

Dan Winter's new equation on the cover of his new book "ORIGIN OF BIOLOGIC NEGENTROPY"

[www.fractalfield.com/fractalspacetime](http://www.fractalfield.com/fractalspacetime)

Planck Length / Time x Integer Exponents Golden Ratio Phase Conjugation (Wave Fractality) are the ONLY Frequencies used to drive the Theraphi.net

the effective field generated BY the Theraphi - is in itself - PROOF that Dan Winter is correct about the ORIGIN OF BIOLOGIC NEGENTROPY: CAUSE of Centripetal Forces.. like Life & Mind!

In fact the process of fusion itself- IS fractal phase conjugation - once the physics of alchemy- as precisely non-destructive charge collapse are understood ( [www.fractalfield.com/alchemyoffusion](http://www.fractalfield.com/alchemyoffusion) ). As we explain in that article – the term KHEM (original name of Egypt)- specifically means – access to a BLACK hole. This is precisely the meaning of Planck Phire charge collapse. Only down this fractal wormhole is non-destructive implosive charge compression possible - which pretty much will then DEFINE – non-destructive isotope transition ( cold fusion) – Some equations at [fractalfield.com/isotopetransition/MetallMorphosis.pdf](http://fractalfield.com/isotopetransition/MetallMorphosis.pdf)

Credit Elizabeth (Bill) Donavan.

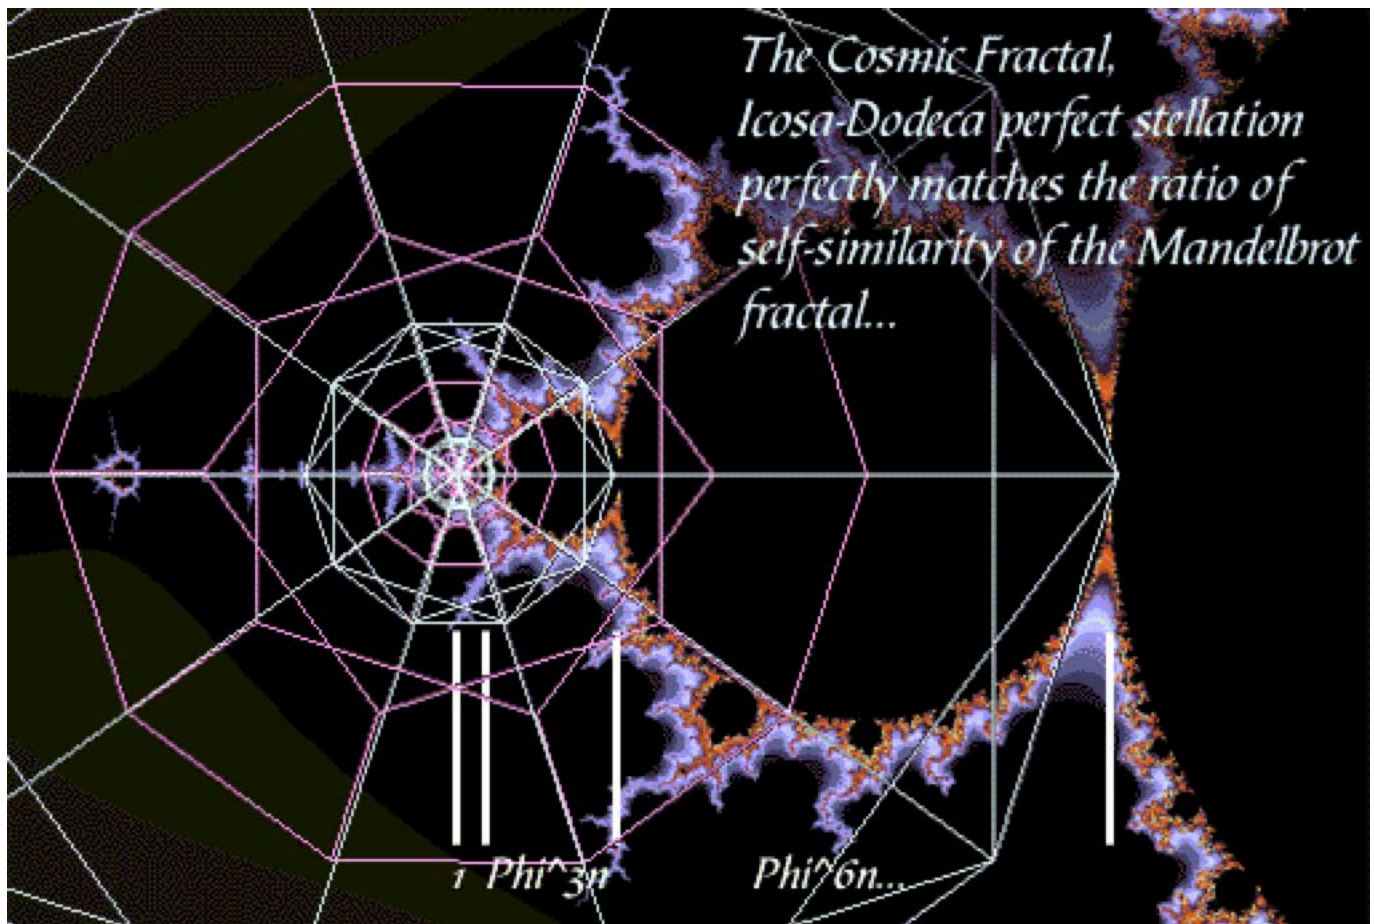

A close corollary to this fusion principle – is the more advanced physics of using coherent longitudinal (nodal) interferometry for remote heat/ plasma containment ( the holy grail of heat containment for fusion research).

### More on the fractal geometry of charge collapse:

Charge collapse ( what I have been calling IMPLOSION - ref [implosiongroup.com](http://implosiongroup.com)) - is widely agreed in physics- to be the mechanism of gravity - recently to include the notion of fractal charge collapse.

Many, if not a majority of physicists would seem to agree that fractality has something to do with gravity, if not the actual CAUSE of gravity. This is actually self evident in one sense- that since fractality is by definition compression perfected- it does seem strange that more scientists have not at least TRIED to figure out - what IS in fact a FRACTAL ELECTRIC field. I am so sure of what the ONLY fractal field is- namely golden ratio exponents of Planck- that this is the name of my main web site [fractalfield.com](http://fractalfield.com) . Also exceedingly strange is that more physicists have not recognized that BY DEFINITION- golden mean ratio is (even by inspection) THE DEFINITION OF SELF SIMILARITY and SELF EMBEDDING - and THEREFORE THE DEFINITION OF FRACTALITY- geometrically. SO it is absolutely logical that golden ratio fractality IS by definition ELECTRICAL fractality perfected- and therefore compression as charge collapse perfected. – This is why our discovery is so compelling - that “PLANCKPHIRE” golden ratio stellations from Planck – PRECISELY solves this problem.

Golden Ratio in the classic Mandelbrot fractal:

SO if this is self evident- why is it not also self-evident that golden ratio is THE SOLUTION TO CHARGE COMPRESSION (THE SOLUTION TO ALL WAVE COMPRESSION?). And since physicists from Einstein forward have all insisted that gravity is precisely THE electrical solution to compression.

What has been notoriously missing - is a study of what geometry IS fractal charge collapse ( we insist it is golden ratio fractality). Essentially it seems physics has forgotten to ask the essential question: what is a FRACTAL FIELD! (ref fractalfield.com)

Because physics did not learn what a 'fractal field' is – in principle – they could not discover the CAUSE of charge collapse perfected- which is widely already agreed to be the CAUSE of gravity - and CAUSE of consciousness!

**As we discussed above- Golden Ratio is probably THE DOMINANT GEOMETRY OF ALL ORBITAL MECHANICS - ( spirasolaris.ca for example)**

**We strongly suggest this is because only in this way- GRAVITY (as charge collapse) IS STABILIZED**

*Climax thought:* **THE (charge collapse perfected) solution to compression is the solution to an incredible array of 'mysteries'. THE (fractal) Compression solution- IS the cause of gravity, the principle of fusion, of alchemy, of history of computing, of the nature of intelligence, success in urban design & definition of bio-architecture ( *bioarchitects.net* ) , the physics of temple, evolution of language ( *goldenmean.info/dnaring* ) , of how to die successfully ( *goldenmean.info/immortality* ) – MUCH more.**

**In review - here are the turning points in our logical inquiry:**

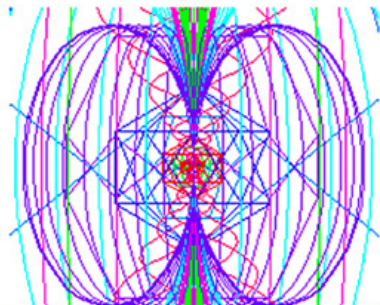

**PLANCK PHIRE ( golden ratio exponents of Planck)-  
IS the cause of charge collapse,  
and therefore the cause of gravity, life force, negentropy and consciousness.**

**1.We showed and published- by generalized wave equation- that Golden Ratio is THE generalized solution- to constructive wave interference ( and therefore implosive compression).**

## Abstract

It has always been self-evident that virtually every living structure, leaf symmetry and the pent geometry of almost every living protein, uses the golden ratio for an electrical reason. Golden Ratio defines beauty in general for reasons which are also fundamental to physics. It is also self-evident, by inspection, that golden ratio solves the problem of recursive wave interference because it is the only solution to both adding and multiplying (recursive wave interference precisely turns recursive wave addition into multiplication). The authors present their new evidence of the golden ratio structure of hydrogen as one more evidence of the fundamental solution it poses to constructive wave interference, which IS constructive compression. Earlier they noted software emulation which showed golden ratio as the general solution to constructive interference. Here they show the wave-equation mathematics proof. The first set shows golden ratio is the solution to constructive compression (implosion / fusion) in a line. Then they show how that precise line of golden ratio points extends out each axis of symmetry of the pent dodeca which is the proven shape of hydrogen, DNA, Earth Grid, and the UNIVERSE. Further a model is presented for how this golden ratio causes gravity electrically: As a portion of the inertia encounters recursive constructive wave interference by golden ratio, in addition to the wave lengths, the wave phase velocities are hypothesized to heterodyne constructively recursively. This way of turning compression into (charge) acceleration is hypothesized to be the core wave mechanism of phase conjugation (apparent self-organization) and the centripetal forces of gravity, life force, color, and perception.

| 8. Origin of Spin                                                                                                                           | 15 |

2. We showed and published by equation- that THIS golden ratio constructive interference (PLANCKPHIRE) is demonstrably- the structure of hydrogen:

Here is proof that Dan Winter located, identified and mathematically proved  
**Protons (and Gravity) exist because of the fractal structure of hydrogen**  
**FRACTAL / Conjugate Embedding in the Electron**

Only the Golden Spiral charge compression trajectory allows the phase VELOCITIES to interfere / heterodyne recursively constructively.... **THEREFORE** Only this geometry turns charge compression toward center.. in to charge ACCELERATION toward center.. named **THE GRAVITY**.

Dan Winter's new equation accurate HYDROGEN RADII

Phase Conjugation  $R1 = \text{Planck} \times \Phi^{116}$   
in Hydrogen  $R2 = \text{Planck} \times \Phi^{117}$   
The Smoking Gun!  $R3 = \text{Planck} \times \Phi^{118}$

Planck Length  
 $\Phi = \text{Golden Ratio}$

$H^-$  0.46

Figure 3. The Golden ratio based radii of hydrogen.  $d(H^+) = B1P = d(HH)/\phi^2$  and  $d(H^-) = B2P = d(HH)/\phi$ . P is the Golden point on  $d(HH) = B1B2 (= 0.74 \text{\AA}, 1, 0.75 \text{\AA}, 13)$ .

3. This golden ratio constructive wave interference- is demonstrably the structure (and cause) of PHOTOSYNTHESIS - ref [www.fractalfield.com/fractalphotosynthesis](http://www.fractalfield.com/fractalphotosynthesis)

Note below- in fact it is a VERY narrow notch of only 2 color wavelengths which cause photosynthesis. CAN it be a coincidence that these are the EXACT only 2 color wavelengths which are Golden Ratio exponents times Planck? Phase conjugate charge collapse at work in the very nature of photosynthesis!!!

We present strong evidence- this same phase conjugate charge collapse - is the cause and mechanism for the existence of COLOR and rainbows. It CANNOT be a coincidence that the very narrow wavelength of 2 color frequencies CAUSING photosynthesis – are EXACTLY golden ratio exponents of Planck. This is another smoking gun. Anyone who says this is coincidence has no integrity. Phase conjugation – implosive fractal charge collapse is the CAUSE and mechanism of Photosynthesis! And probably- as we see by the color bands on the left- also directly the cause of the existence of color in general!?

We propose – the REASON the plant world is generally green – is precisely because the green wavelength – is OPPOSITE to fractal conjugate and compressible. So every plant simply spits out the green photon because it cannot be compressed easily. ( Note above green – represents a cubic 90 degree tilt of photon). In psychotronic literature this is called ‘negative green’.

**“Negative Green”**  
*How Phase Conjugating Fields  
 Create LIFE:*  
*Example: Why All Plants SPIT OUT GREEN*  
*(the true physics of negative green energy) >*

Note in the Chart- of the Actual PHOTON  
 PHASE ANGLE (TILT) -  
 Green is caused by a 90 Degree PhaseTilt: **PRECISELY**  
 the **OPPOSITE** of PHASE CONJUGATING!

Negative Green Energy IS Destructive to Biology:  
 But Being Able to play with it does NOT necessarily  
 indicate understanding of the Principle!

Phase Conjugate optics  
 begins with “4 wave mixing”  
 which is effectively a (nano-meter accurate)  
 CUBE of light waves (right pic) ->

What initiates the GOLDEN RATIO  
 conjugate of waves which produces  
 the phase conjugate  
 -selforganization  
 and  
 - time reversal.

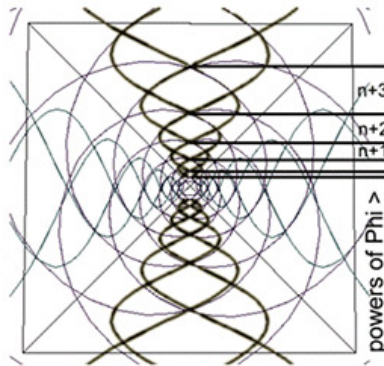

is when the approach path into the cube  
 is perfect, then the pine cone vortex  
 shape tunnel in a CONE to center.

producing golden ratio...

Like clockwork, seismometers across multiple continents have detected a mysterious pulse since at least the early 1960s.

By Anna Funk | October 27, 2020 8:00 PM

Every 26 seconds, the Earth shakes. Not a lot — certainly not enough that you'd feel it — but just enough that seismologists on multiple continents get a measurable little "blip" on their detectors. But even though this pulse has been observed for decades, researchers don't agree on what's causing it. The mystery surrounding the phenomenon even has its own **XKCD web comic**.

The pulse — or "microseism" in geologist lingo — was **first documented in the early 1960s** by a researcher named Jack Oliver, then at the Lamont-Doherty Geological Observatory. He's best known for his later work that supplied some important early **evidence for shifting tectonic plates**. Oliver figured out that the pulse was coming from somewhere "in the southern or equatorial Atlantic Ocean" and that it was stronger in the Northern Hemisphere's summer months (or, the Southern Hemisphere's winter).

"Jack didn't have the resources in 1962 that we had in 2005 — he didn't have digital seismometers, he was dealing with paper records," explains Mike Ritzwoller, a seismologist at the University of Colorado, Boulder, whose team would independently come across the strange pulse some decades later.

In 1980, Gary Holcomb, a geologist with the U.S. Geological Survey, looked more closely at the weird microseism, and figured out that it's **strongest during storms**. But his and Oliver's work would mostly be lost to time, while the constant seismic drumbeat would go on, unnoticed, beneath our feet.

**More context on Schumann Cascade (bottom) as Phase Conjugate Charge Collapse tuned to Planck**

## The Solid Physical Evidence Dan Winter's New Implosion Physics

Implosion by Golden Ratio Phase Conjugation  
Origin of ALL Centripetal Forces:  
Gravity, Life Force and Perception Itself:

The only possible al KHEM ic - FUSION  
Implosion Geometry

The Published Physics Paper:

[www.fractalfield.com/mathematicsoffusion](http://www.fractalfield.com/mathematicsoffusion)

Dan Winter's new equation proving the phase conjugate  
(golden ratio) structure of hydrogen: [goldenmean.info/goldenproof](http://goldenmean.info/goldenproof)  
Planck Length x Golden Ratio ^ 116 power = .282537 Angstrom - The First Radii of Hydrogen  
Planck Length x Golden Ratio ^ 117 power = .457154 Angstrom - The Second Radii of Hydrogen  
Planck Length x Golden Ratio ^ 118 power = .739691 Angstrom - The Third Radii of Hydrogen  
Planck Length =  $(1.616252 \times 10^{-35} \text{ meters})$ , Golden Ratio =  $(1.618033989)$

Dan Winter's new equation proving the phase conjugate  
(charge distribution perfected) NATURE of Photosynthesis

Planck Length x Golden Ratio ^ 136 power = 427 nm  
Planck Length x Golden Ratio ^ 137 power = 691 nm

The ONLY 2 Frequencies (colors) MOTORIZING PHOTOSYNTHESIS!  
[fractalfield.com/fractalphotosynthesis](http://fractalfield.com/fractalphotosynthesis)

Dan Winter's new equation proving the phase conjugate  
(charge distribution perfected) life giving TIMING of our planet orbit:

Solar year = Planck time x Golden Ratio ^ 241.01  $(1.35125 \times 10^{-43}) \times (1.618 \wedge 241.01) = 1 \text{ yr}$

Venus Year = Planck time x Golden Ratio ^ 240  $(224.701 \text{ Earth days} / \text{Solar Year } 365.242 = .6152 \sim \text{Golden Ratio})$

Since Time is only defined by  
the period of charge rotation -  
this shows

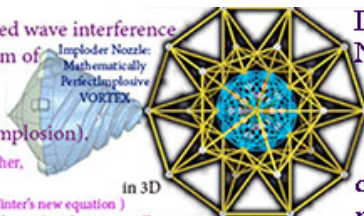

the PHYSICS OF COINCIDENCE  
is Charge Coupling by Conjugation  
ref: [goldenmean.info/coincidence](http://goldenmean.info/coincidence)

and Finally: Dan Winter's  
New Equation proving the  
Golden Ratio / Phase Conjugate  
(and Centripetal / Implosive)  
Frequency Recipe of  
Brain Wave

19.0864 vs. actual  
Schumann frequencies  
\* (Brainwave Alpha =  
Schumann Resonance)

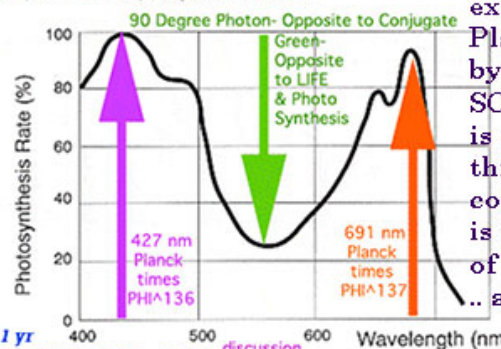

Visualizing how Golden Ratio perfected wave interference  
'phase conjugation' - solves the problem of  
non-destructive interference  
and therefore  
non-destructive compression (Implosion).

Hydrogen Radii are spaced from each other,  
AND spaced from nuclear center -  
by EXACTLY Golden Mean Ratio (Winter's new equation)  
because (as we proved: [www.fractalfield.com/mathematicsoffusion](http://www.fractalfield.com/mathematicsoffusion))  
only that 'phase conjugate' geometry solves CONSTRUCTIVE interference AND compression!  
Dan Winter 3D Model - assembly kit: [www.goldenmean.info/kit](http://www.goldenmean.info/kit)

Photosynthetically Useful Radiation.

A graph of the rate of Photosynthesis and its relationship with different wavelengths of light indicates shows that the middle region of the visible light spectrum is of the least importance as far as photosynthesis is concerned.

Phase Conjugation by Golden Ratio DOES Quantify and define the color spectra AND its bioactive peaks!

Perfected COLLAPSE / IMPLSION from Dan Winter

Fusion- key signature

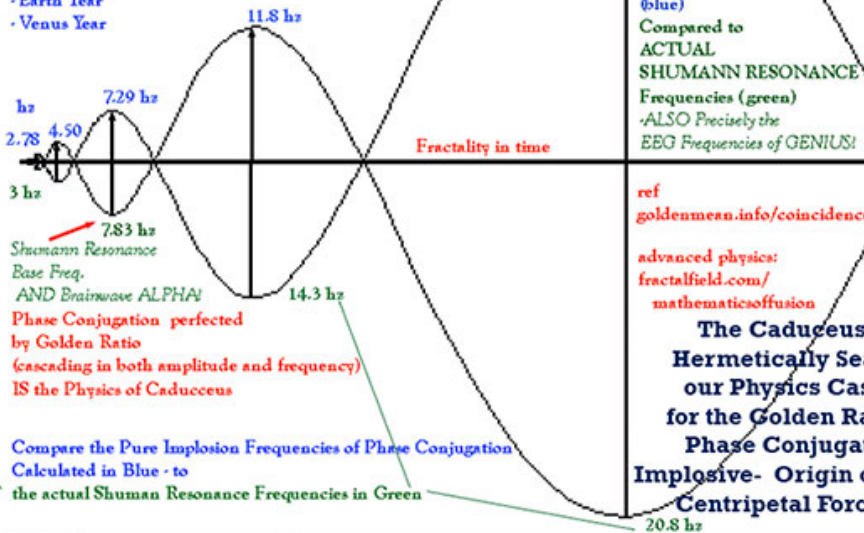

Planck Length and Time

'Sacred' (charge distribution enabled) Time is Phase Conjugate: FRACTAL

Here the same cascade: Planck Time  
times precise powers of GOLDEN RATIO

which precisely predicts:

- 2 frequencies which exactly motorize PHOTOSYNTHESIS
- hydrogen frequencies
- Earth Year
- Venus Year

Dear Physicist  
NO One will  
accept that  
the ONLY  
2 wavelengths  
causing  
photosynthesis  
are EXACTLY  
golden ratio  
(phase conjuga  
exponents of  
Planck  
by coincidence  
SO- my reason  
is compelling:  
this charge  
collapse  
is the CAUSE  
of negentropy  
.. and LIFE!

.. the SAME  
is true of  
-hydrogen  
-Schuman res.  
-Earth/Venus  
orbits  
- HRV- LF/  
Mayer wave..  
- ADP/ ATP  
- galactic  
& precessional  
years..  
.. and ..and..  
ALL self-  
organizing  
systems

Tesla failed to achieve efficient global wireless power distribution because he didn't implement coherent longitudinal interferometry which requires the FRACTAL spacing of the dodec/ficos Earth grid (sacred space 'nodes'....

AND the correct FREQUENCIES to phase conjugate implosively.

Dan Winter's new equation on the cover of his new book "ORIGIN OF BIOLOGIC NEGENTROPY" [www.fractalfield.com/fractalspacetime](http://www.fractalfield.com/fractalspacetime)  
Planck Length / Time x Integer Exponents Golden Ratio Phase Conjugation (Wave Fractality) are the ONLY Frequencies used to drive the Theraphi.net

the effective field generated BY the Theraphi - is in itself - PROOF that Dan Winter is correct about the ORIGIN OF BIOLOGIC NEGENTROPY: CAUSE of Centripetal Forces.. like Life & Mind!

from Dan Winter [www.goldenmean.info](http://www.goldenmean.info) The cause of gravity, color, perception, and Life Force:

The Centripetal Charge Compression originates: scaled precisely to Planck Length & Planck Time multiplied precisely by powers of Golden Ratio -this PHASE CONJUGATION adds & multiplies constructively phase VELOCITIES converting Compression (of charge or plasma) into ACCELERATION (gravity)!

Planck Length & Time Universal Musical Key Signature of the Fractal Quantum Foam

The Caduceus IS phase conjugation

Fractal Space Time Essential Wave Mechanics producing all negentropic forces:

Golden Ratio Caduceus Phase Conjugation and Self Similarity Wave Mechanics Produce Constructive Compression- Creating Acceleration from Compression\* Toward Center (called 'gravity') \*because phase velocities can heterodyne recursively constructively only in golden ratio

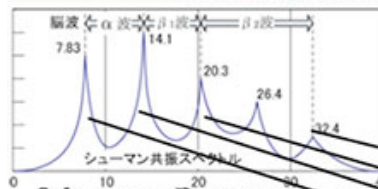

Winter's new equations have proven:

Winter's Equation -hz: (vs) 2.78, 4.5, 7.29, 11.8, 19.08, 30.88 49.97, 80.85-hz  
Frequencies PRIOR used: 3 10 32 80

Equation for the ORIGIN OF BIOLOGIC NEGENTROPY (from cover of Dan Winter's book)

Planck Length/Time x Integer Exponents Golden Ratio= Phase Conjugation & Negentropy Perfected!

These virtually exact even Golden Ratio FRACTAL Phase Conjugate Multiples of Planck Length and Time predict compelling examples of NEGENTROPIC / SELF ORGANIZING and CENTRIPETAL FORCES - like: \*Cellular ATP Freq  
\* Hydrogen Radii, \* the ONLY 2 effective Photosynthesis Frequencies, \* Schumann Resonance Frequencies \*HRV LF&HF Frequencies  
\* Brainwave Frequencies of Peak Perception / Bliss, \* Sacral Cranial Tidal Frequencies, \* Ear Ringing Heard by Meditators  
\* Virtually Exactly the Duration of Earth Year and Venus Year.. (& the Priore and also Rauscher frequencies of bioactive fields!)  
and the essential dodeca stellation 3D fractal symmetry of Alchemic collapse / fusion / transmutation, DNA / living proteins as pent, Earth magnetic grid, Solar system orbital mechanics, and symmetry of masses in the universe!

## Note here- phase conjugate charge collapse in the Sacro Cranial Pump- bliss waves:

So the body's very long waves- enveloping the bliss mechanism- controlled by the coherent ('yogi') breathe- are also negentropic. The Upledger Institute- has shown that IF your sacral cranial liquids are pumping- then it is clinically impossible to be depressed. This essentially means your body is imploding your cellular bliss (UV coherencecellular sex juice)- into brain bliss. Much more on this in our Kundalini biophysics section below.

What we are arguing here is radical and wonderfully empowering if true: That this same frequency / wavelength key signature (my new negentropy equation: planck time & length x exact golden ratio phase conjugating exponents) IS the key to all life, negentropy, perception, gravity, ALL centripetal forces. This includes the frequency signature of photosynthesis, to the origin of rainbows, to the harmonics of Schumann resonances, to the orbital times of planet- are all one and the same archetype GEOMETRIC ORIGIN OF ALL BIOLOGIC NEGENTROPY. ( as in the ONLY way out of chaos for every living and mindful thing!).

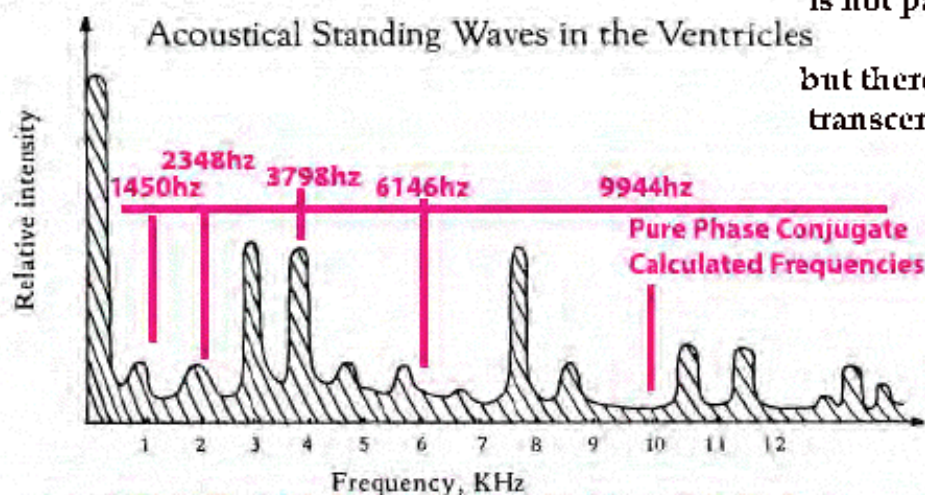

In other words- the way the spine liquid pump works- in the sacral cranial literature is revealed to be pumping the low frequencies (so documented to be the low end bandwidth of kundalini) – AS a phase conjugate negentropic pump wave- tuning the brain.

Frequency distribution measurements of "inner sounds" reported by 156 meditators were made by asking each meditator to compare the sounds heard during meditation with sounds produced by an audio-frequency oscillator through an earphone in one ear. The subject rotated the oscillator frequency control to match oscillator tones with those heard or remembered as the "inner sound." The frequency distribution is not smooth, but shows several sharp peaks, harmonics of the fundamental frequency, and possibly beat frequencies produced between the third and lateral ventricles of the brain, which are connected by a fluid bridge. In the frequency range below 1 KHz, acoustical standing waves running through the entire body appear, as do the higher harmonics of the heartbeat and the heart sounds.

under the right conditions-  
kundalini / bliss /  
voices of ancestors,  
the spine liquid pump  
phonon sound can  
pump/implode to brain  
ventricles part of a loop  
which can concentrate  
bliss/ and ancestral  
memory --  
- this is not to say tinnitus  
is not pathology-

but there are other  
transcendent possibilities

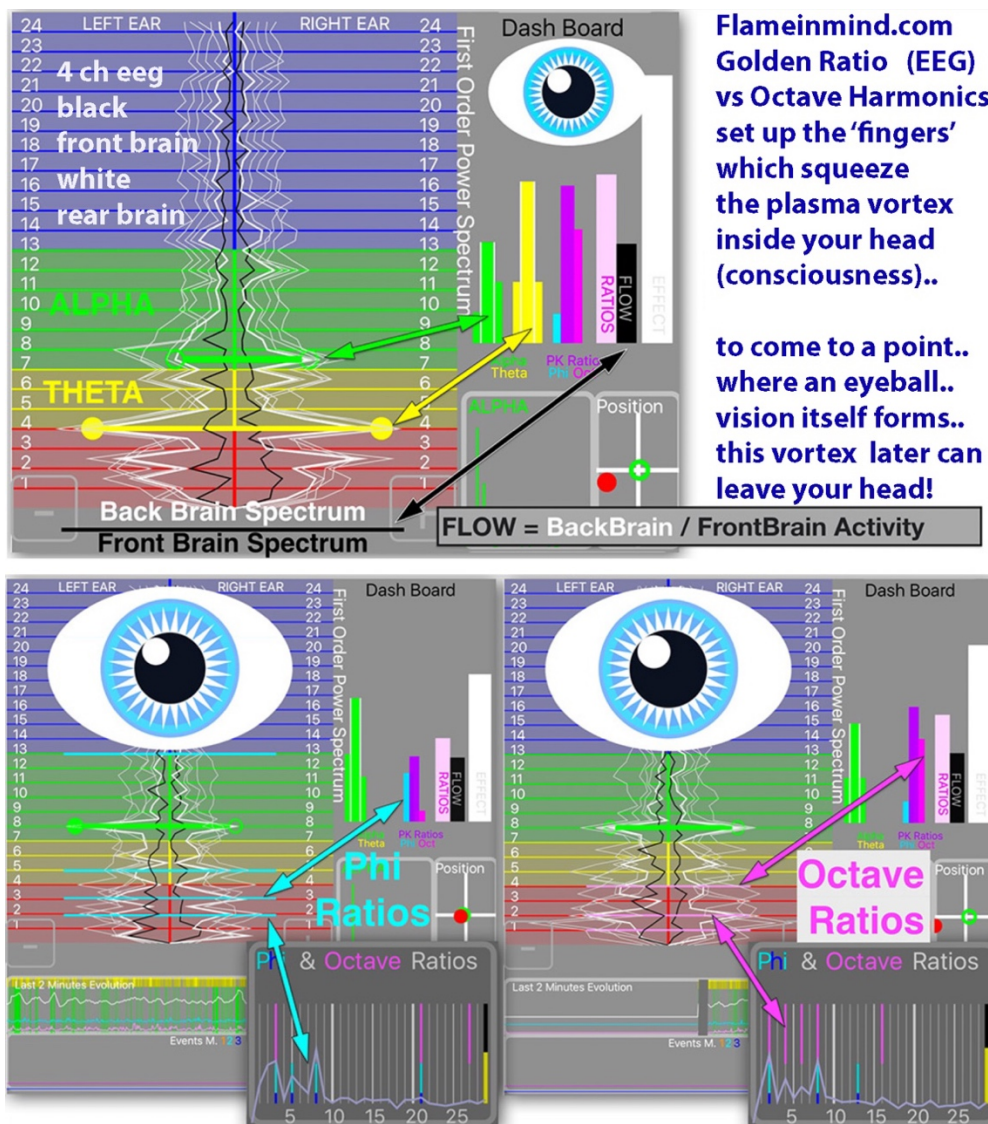

Ben Bentov's work from Lee Sannella "Kundalini Experience"

FIGURE 10: Frequency distribution of "inner sounds" heard by meditators.

*Above excerpt from Bentov- with the conjugate frequency calculations by me- to show the overlay.*

The sacral cranial teaching of the Upledger school- are a fine example. The practitioner by just FEELING the low frequencies of the spine liquid pump, in the fascia (tissue)- ADDS COHERENCE to that wave- just by their attention. Then when the spine liquid stops and comes to a still point- as we discussed- that is called healing crisis. It is when the conjugation sorting comes to a climax- so that when the pump re-starts, there is MORE phase coherence. Remember- (per Upledger) – IF your spine liquid IS pumping- THEN you are not depressed.

**Consciousness as Implosive Charge Collapse among toroidal fields:**

**HOW Phase Conjugate Golden Ratio Charge Collapse CAUSES Consciousness:**

*An Implosive 'Recursive Turning Inside Out' Plasma VORTEX-  
Which can function INSIDE or OUTSIDE Your Head!*

**"Physics of Ascension**

**Phonon harmonics of**

- heart wave
- brain wave
- sacrocranial coherence

**entrain and braid -implode the DNA.**

*Projective geometry, plasma projection of implosion of the DNA called FUSION IN THE BLOOD is the physics of bliss process enabling the projection of transverse into longitudinal coherence (the Ba from the Ka) so the aura gets spin dense and plasma projective.*

*That's what enables that longitudinal EMF coherence to enable lucid dreaming and taking memory through death (getting a soul).*

***The number of harmonics ascend by golden ratio when the spin density braid implosion enables that compression to be implosive, negentropic and centripetal.***

***Physics of ascension is literally "Bliss in DNA". It fits the physics of superposed axes of symmetry.***

***This is how you go to the next dimension.***

(from Dan Winter) - [www.fractalfield.com/fusionintheblood](http://www.fractalfield.com/fusionintheblood) “

Never before has physics of consciousness described in detail how consciousness can survive outside the body- even though numerous surgeons have documented their out of body experiences. What is wrong with this picture? How can others ( Gary Schwarz, Stuart Hameroff) possibly claim to describe a useful physics of conscious while obstinately ignoring the well proven phenomenon that consciousness can survive outside the body??

We start with our well documented physics describing with our own EEG measure HOW children regularly see without their eyes ( [flameinmind.com/outervision](http://flameinmind.com/outervision) ). We showed repeatedly by measurement- this common and well known phenomenon correlated beautifully to when their brainwaves make a golden ratio (and octave) cascade ladder of harmonics from Alpha to Gamma brainwaves ( essentially this is an inner fractal ‘star mother’ kit- of tensors – in the brains plasma array).

This becomes more compelling after you interview -most ANY of the kids: They all say – after they go into the quasi trance ( alpha coherence) state- THEN invariably a tube or vortex or wormhole or pinhole OPENS INSIDE THEIR HEAD ( while eyes are closed ). Then focusing on the vortex – the center of that vortex BECOMES AN EYEBALL- THROUGH WHICH THEY CAN SEE. The descriptions all agree! What do YOU think that coherent forming inner vortex could be!?

In fact the kids all say they move their head, and the pressure around their eyes- in order to stabilize this forming vortex! It’s literally like they are making a liquid like plasma vortex inside their heads- which BECOMES AN EYEBALL!?

Conventional theories of consciousness can no longer obstinately ignore this simple physics.

We KNOW EXACTLY what consciousness IS ( inside OR outside your head!) : it is a forming charge/ plasma vortex held to a focus by implosion – and THE ‘phase’ sorting essence of perception (‘eyeball’ in the tornado) is at the precisely Planck tuned center- ( see pictures of EEG cascades TUNED to golden ratio times planck : [flameinmind.com](http://flameinmind.com) ).

SO- we learn that consciousness IS specifically this plasma vortex tornado which forms inside your head. The golden ratio and octave cascades in brainwave harmonics ( a star mother fractal nest literally) – are the fingers- or ‘tensors’ which enable your consciousness to have the inner (creation physics) MUSCLES to SQUEEZE this plasma vortex down to a point. At that conjugate point of implosive turning inside out- we have what has been called ‘scintillation’ (Dee used for ancestor phone calls). It is at this moment of ‘inner twinkle’ all the kids report suddenly the little tube and spark of light- inside their head with closed eyes - BECOMES AN EYEBALL THEY CAN SEE THRU.

Now for the first time we can meaningfully predict electrically- the conditions which will be required for you to take that conscious plasma vortex donut -OUTSIDE YOUR HEAD. This is the physics of remote viewing, out of body experiences, lucid dreaming and surviving memory through death.

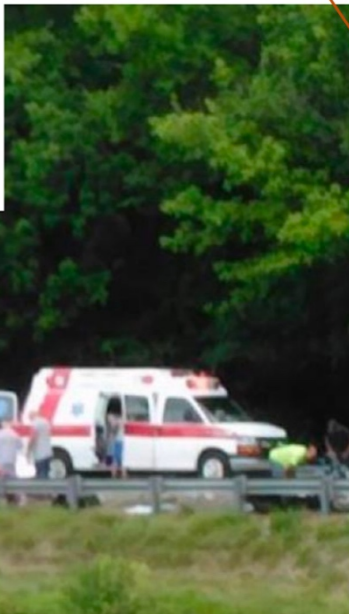

**We present- evidence that coherent longitudinal emf interferometry is specifically the physics principle behind:**

- ghosts
- ancestor memories
- clairvoyance
- lucid dreaming
- coherent action at a distance in ‘spiritual’ stories- AND physics!

*in natural space the ghost CAN propagate*

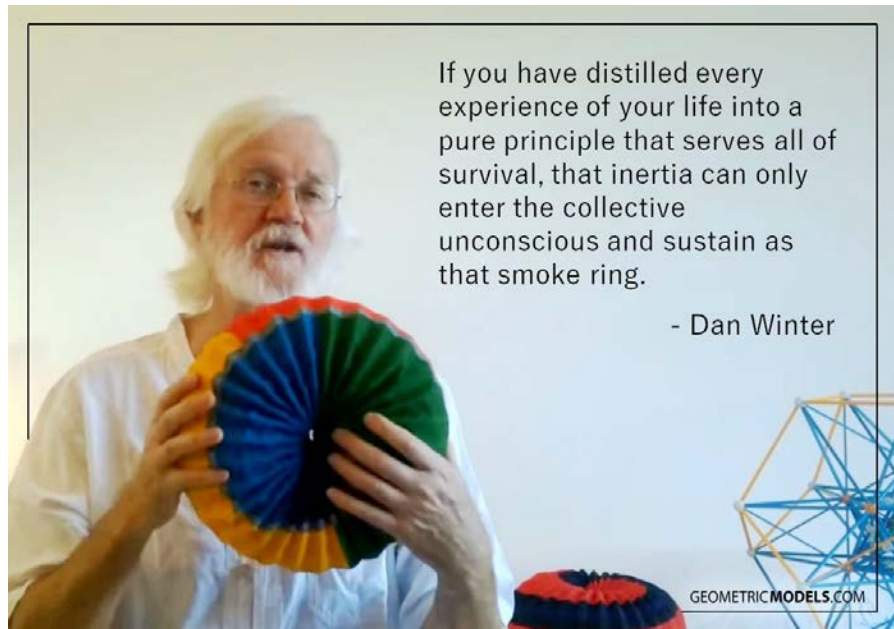

**Here the longitudinal coherence plasma field called ‘the ghost’ is better able to propagate when death occurs in NATURE, in the electromog mess of a hospital this would generally NOT be possible**

**“Dying well- is precisely arrival among shareable waves- by doing compression well”.**

*“Grandma who knows HOW to die- ALWAYS goes to nature- NOT to metal, electrosmog HELL in most hospitals”*

Of course many high level surgeons and academics have described their journeys outside their body. Now for the first time we can describe the physics. For example we now know the point from which out of body vision will SEE – will always be a charge distribution permissive ( natural) space. It will NEVER be from within an aluminum box. This is the same reason living plasma orbs and ghosts- can almost never inhabit most metal boxes ( get your kids out of metal schools). This is because living plasma vortex (your consciousness ) cannot propagate efficiently through terrible dielectrics ( steel, aluminum – see [goldenmean.info/architecture](http://goldenmean.info/architecture) ) . Natural materials ( wood / fabric / stone ) generally will have high dielectric constants. This means charge distribution efficiency- literally fractal molecular geometry- the FINGERPRINT OF LIFE- CAN BREATHE LIFE. This is THE physics of biologic architecture – ( [bioarchitects.net](http://bioarchitects.net) ) and sacred space. This directly limits in what environments (‘temple’) peak perception and out of body perception are possible.

--

**Implosive Charge collapse key to Life Force and BIOLOGIC ARCHITECTURE:**  
[www.goldenmean.info/architecture](http://www.goldenmean.info/architecture)

Many have suggested- the Kalichakra mandala is based on golden ratio..

The key to temple design is charge collapse.

Temple in essence IS implosive oscillator- key to bliss and ensoulment...

We discuss here the key to sacred space ( harmonic inclusive...) Korotkov’s measures of fractality in air defining sacred space.

Getting to the principle behind this story electrically – what is the ‘sacred’ -we consider the Gurdjieff film “Meetings with Remarkable Men”. In order to be proven a Sufi master- you had to show you had the skill to make ‘the perfect echo’. *Now we know – literally taking your electrical memory field thru death – or into the lucid dream- is absolutely the skill to make a perfect echo.* The resonance in the (longitudinal) array IS the essence of immortality. And that array (ancestor memory / DNA radio / collective unconscious ) – only works if it is fractal / conjugate / implosive. A prime example would be the dodeca/ icos Earth grid. Korotkov ALSO proved high quality telepathy was available precisely ONLY possible AT THESE FRACTAL NODES! This is a key example of how **enabling charge collapse-** is the

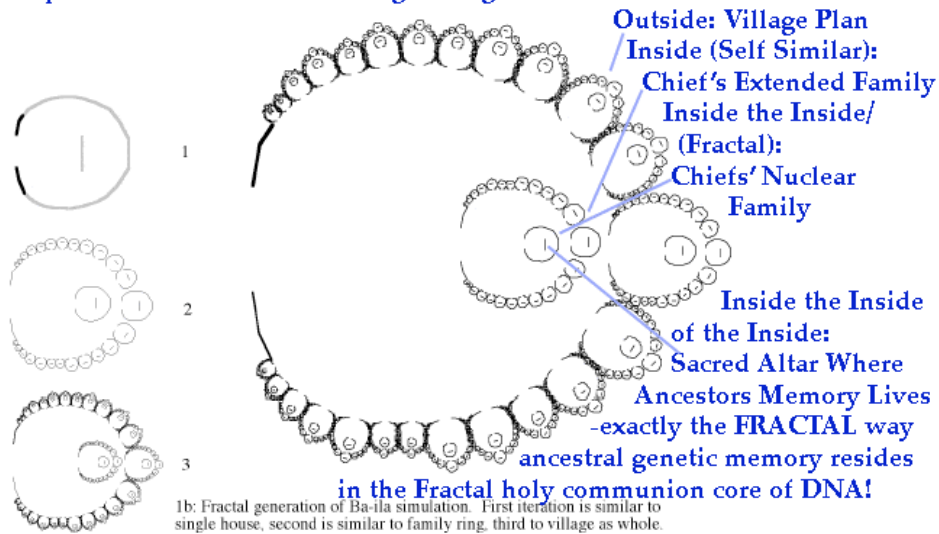

doorway – not just to centripetal forces in general, but also to the (longitudinal coherence) physics of what is SOUL! ( our film on ‘physics of soul’- recently went somewhat viral - <https://youtu.be/3dPnaitkVkk> )

Ability to create and leverage the perfect audio (& related electrical) echo point- is evidence of spiritual mastership. The perfect echo (embedding resonance) acoustically AND electrically – is the doorway to sustainability – is the door to immortality.

*Now- back to science behind biologic architecture..* Below we look at Dr Ron Eglash- famous review of FRACTALITY IN AFRICAN ARCHITECTURE. As long as materials are biologic- meaning high dielectric- then structure fractality (self similarity) between outer and inner design- serve to invite implosion compression- (charge collapse) which MAKES sacred space!

Since we have a similar structure at all scales, this architecture is easy to model with fractals. Figure 1b shows the first three iterations. We begin with a seed shape that could be the

Dr. Eglash explains FRACTALITY in Village Design in African Ba-ila..

From Fractals, Complexity and Connectivity in Africa by Eglash & Odumosu - <http://www.rpi.edu/~eglash/eglash.dir/afactal/develop.htm>

Figure 1b. Fractal pattern in Ba-ila settlement. overhead view of a single house. In the next iteration, we have a shape that could be the overhead view of a family enclosure. Finally, the third iteration provides a structure that could be the overhead view of the whole settlement. Note that the self-replicating line off-center is the position of the altar in the house, and the position of the village altar in the chief's family ring: a resonance between spiritual notions of endless renewal, mathematical models of self-replication, and physical structure that we see in many of the fractal village architectures of Africa.

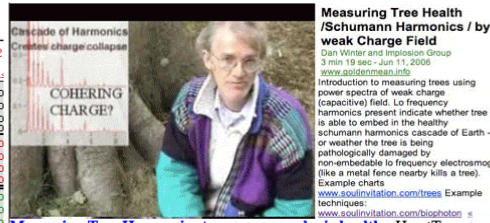

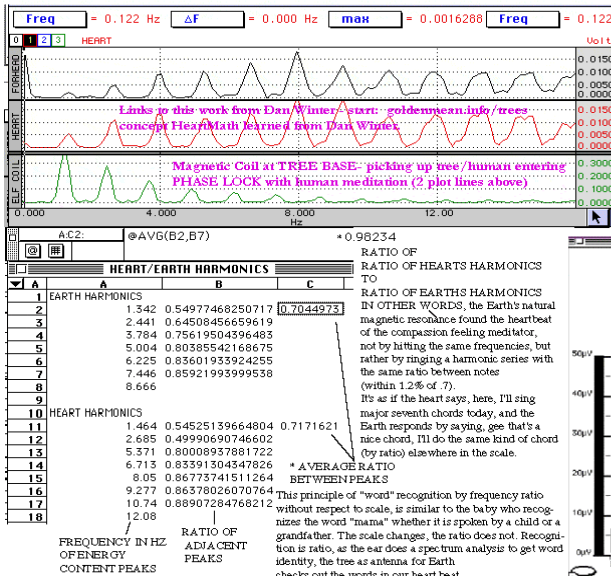

Discussion below- 3 ways to MEASURE sacred space, charge implosion in Biologic Architecture.

Sacred space measure was original pioneered by Dr Korotkov- following the tribal shaman (Kogi?) – to the place they made ancestor phone calls. They are using the “Sputnik” (capacitive probe) – input to his GDV / Biowell (“Kirlian” device) he measured “fractality in air”. (Images below) After discussion with the Professor- we agreed his measure of ‘air fractality’ was in effect a measure of charge distribution efficiency in the space. This is an important concept to understand living space. Space which is sacred- is literally the space where a spark – has someplace to go! The device simply measures a metal cylinder propagating a spark, then Korotkov plots the ability of that spark to radiate. This is not a profound concept. Sacred space is where a spark can unpack like a flower- and NOT be trapped. He called this fractality in air- (GDV spark images below)

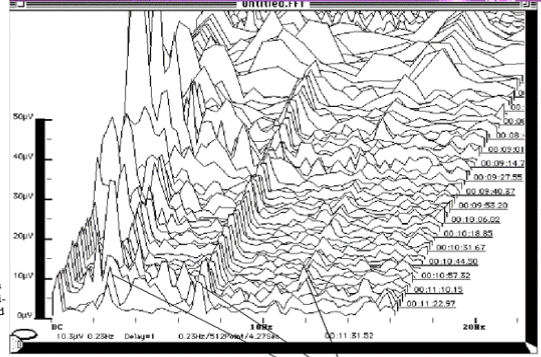

### 3 Powerful Technology Examples: HOW Sacred Space / Life- and Growth - Force in Space is MEASUREABLE Redefining Living Architecture and Stone Geomancy - BECAUSE YOU CAN MEASURE AND OPTIMIZE. Technology Number ONE: Measure Harmonic Inclusive Field-Spectra- Capacitive or Inductive

ACTUAL HARMONICS IN THE ELF MAGNETIC FIELD OF A TREE AT THE MOMENT  
OF ENTRAINMENT TO AN EKG (heartbeats), OF A MEDITATOR FEELING COMPACTION.

Measuring Tree Harmonics to measure ecologic health - HeartTuner preamp - presented by Dan Winter in Netherlands (04)-How probe works - how pathologic harmonics identify sick tree - etc .

Oak tree (Named Deadline) Leaning over the Mississippi River, Near Minneapolis, Franklin Falls, Following A Native Tradition inspired prayer. Probe Sited 12 ft Fibre Callahan Probe into MAC IRVA

### HOW ELECTRIC ENGINEERS MEASURE

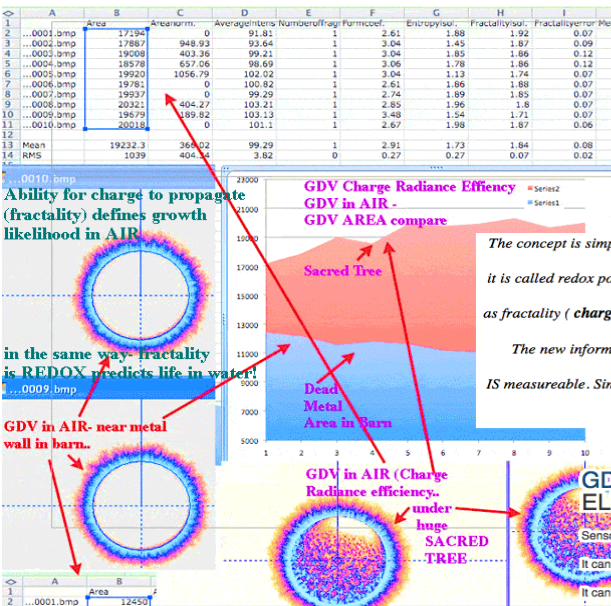

AND DESIGN SACRED SPACE-  
TECHNOLOGY NUMBER TWO: Discussion at [goldenmean.info/architecture](http://goldenmean.info/architecture)

MEASURE FRACTALITY IN AIR  
(KOROTKOV - GDV  
type "gdv sputnik" into Google

When a spark of charge is freed by fractality  
in the air in your space- then biology's  
'DNA Radio' (collective mind) is enabled:  
SPACE IS SACRED!

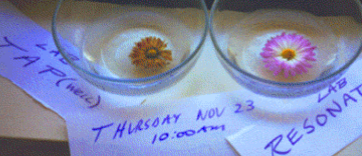

The concept is simple- ability for charge to propagate efficiently has long been known to predict biologic growth in liquids  
it is called redox potential- We have pioneered redefining redox (charge availability to react) properly  
as fractality ( charge compression efficiency is charge distribution efficiency - is life).

The new information - is that charge distribution efficiency ( fractality ) in air - predictor of growth (sacred space ?)  
IS measureable. Simply put - the breath of sacred tingle when you enter sacred space - is now measureable.. AND predicts growth....>

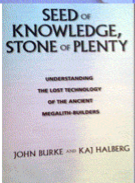

### Measuring SACRED SPACE; Technology Number THREE: Measure Seed Germination/

GROWTH EFFECT. If the field is CENTRIPETAL (optically, dielectrically or magnetically- growth is accelerated)  
Nessim Haiman in documents (lower preserved (on right) by the effect of his CENTRIPETAL MAGNETIC FIELD

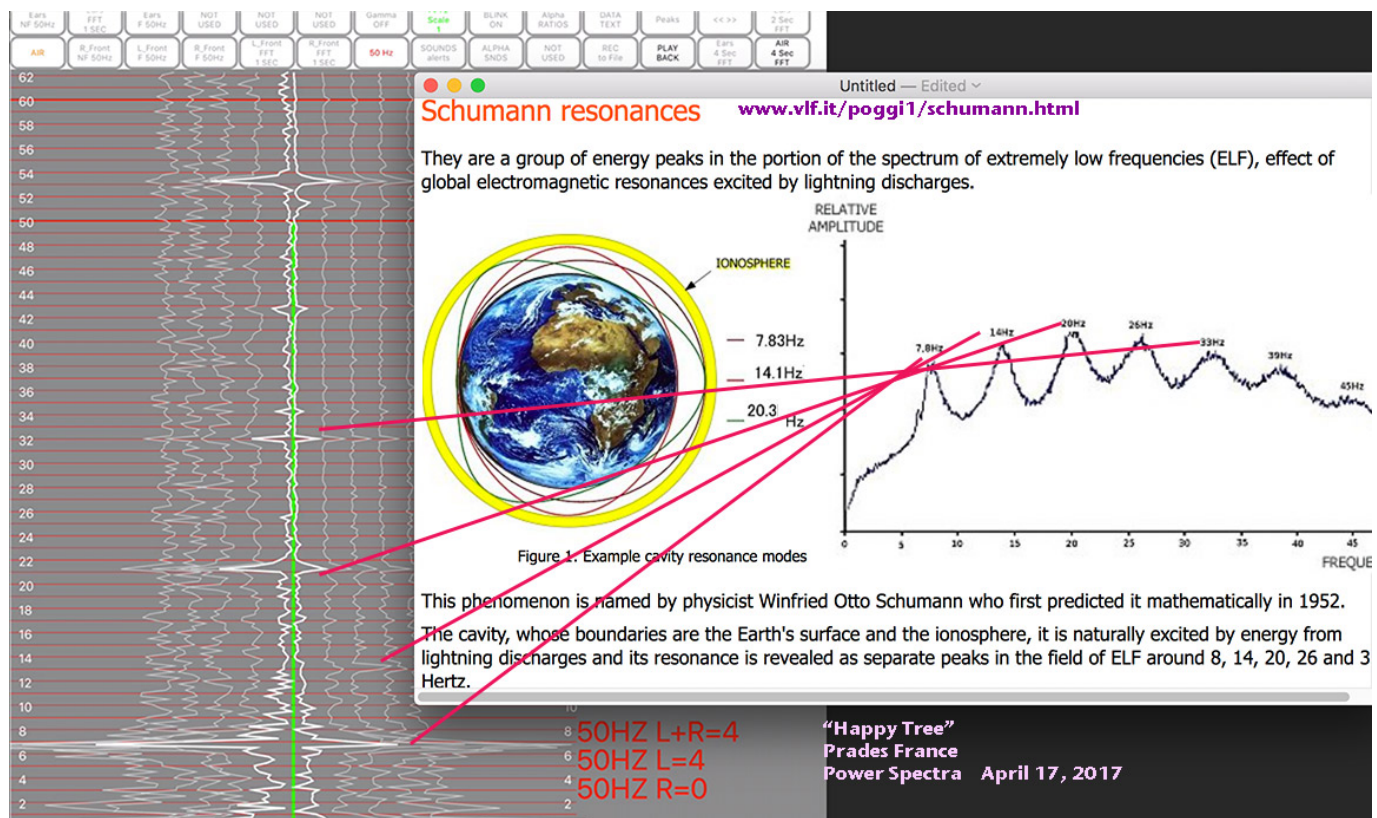

Measuring see growth effect caused by Stone Circles >

WE measure this same principle of LIFE FORCE / sacred space by measuring harmonic inclusiveness in the weak charge field of the space. Ref [flameinmind.com/lifeforce](http://flameinmind.com/lifeforce) The point to be made here – is that harmonic inclusiveness- IS fractality perfected – IS compression perfected – IS the result of successful charge collapse. And this IS the way life force in space and success in biologic architecture [bioarchitects.net](http://bioarchitects.net) - becomes measureable. We have seriously changed the way payments are made to architects. If a building is full of steel and aluminum ( & electrosmog)– which measureably prevents seeds ( and children ) from germinating – we now have a solid scientific criteria to determine which architect deserves a paycheck. And it's working- Juan Schlosser- ( [bioarchitects.net](http://bioarchitects.net) ) just engaged a multimillion-dollar temple design in India, I am an advisor on the project. And they get it- you can design for life force electrically- and measure it. No steel or aluminum, all biologic materials, implosive capacitance.

Sacred space – IS charge distribution efficiency - generated literally by rose like electrical fractality. (The biologic temple they are building there looks like a lotus flower!)

The ability of the ( fractal / conjugate) Schumann Earth harmonic cascade to resonate inside sacred space is KEY as well- these are also the exact EEG harmonics proven blissful ([flameinmind.com](http://flameinmind.com)).

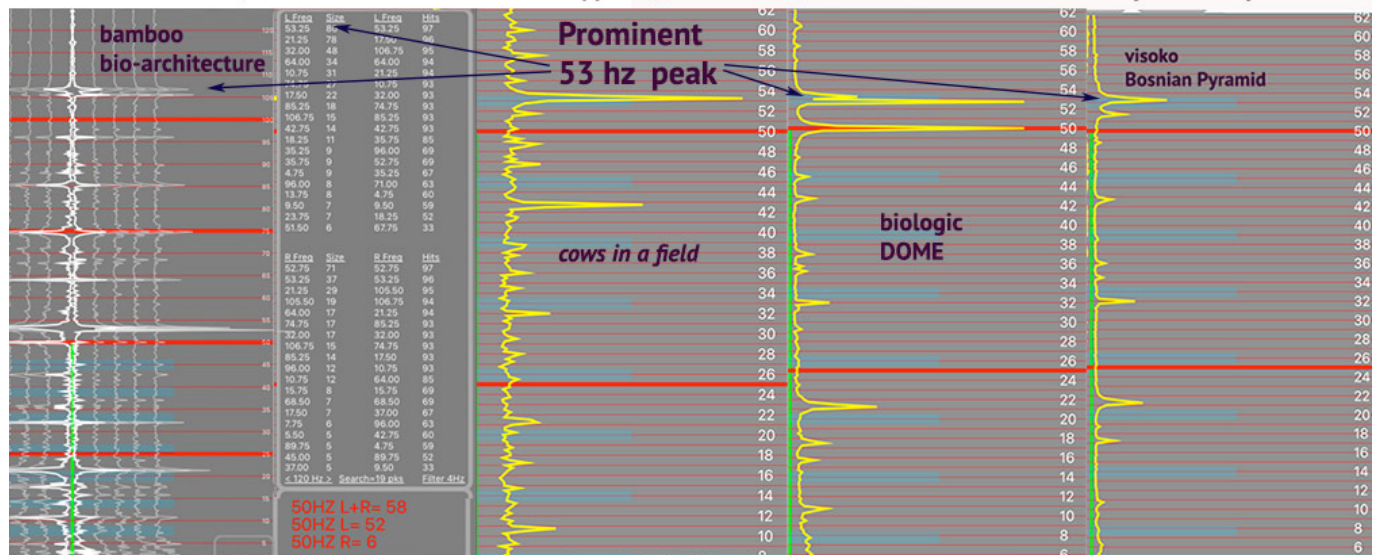

Here the presence of (charge collapse inviting) Schumann harmonics in a sacred tree- directly predicts it's viability.

To see WHY in this super sacred tree measure above we have 53 hz- (also dominant in my living room) instead of the calculated perfect 50 hz-see below- where we measure the 'gravity diode' (Bosnian) pyramid harmonics- instead of calculated 7.29 hz, ..50.. 26k, we repeatedly MEASURE 7.83,.. 53.. 28k - It is the RATIO between perfect 7.29 hz theoretical Schumann, vs 7.83hz actual- Which tunes the entire cascade of measurements. This means that when the 'life designers' designed Earth to conjugate implode negentropically by Schumann- they got it close.. BUT...!

**PROOF - GAIA's NEGENTROPY- is Golden Ratio Phase Conjugation: 53 hz measured in SACRED BIOSPACE AROUND THE PLANET**  
 ref [flameinmind.com/lifeforce](http://flameinmind.com/lifeforce) [craniosacral-app.com/flameinmind/life%20force.html](http://craniosacral-app.com/flameinmind/life%20force.html) -fastest way to identify life force?

Dan Winter's new equation proving the phase conjugate (charge distribution perfected) life giving TIMING of our planet orbit:

Solar year = Planck time x Golden Ratio  $^{241.01} (1.35125 \times 10^{-43}) \times (1.618)^{241.01} = 1 \text{ yr}$

Venus Year = Planck time x Golden Ratio  $^{240} (224.701 \text{ Earth days} / \text{Solar Year } 365.242 = .6152 \sim \text{Golden Ratio})$

Since Time is only defined by the period of charge rotation- this shows

the PHYSICS OF COINCIDENCE is Charge Coupling by Conjugation ref: [goldenmean.info/coincidence](http://goldenmean.info/coincidence)

1.074 \* 50 HZ- THE ACTUAL PERFECT HEALING FREQUENCY  
= 53.7 - WHICH IS WHAT WE MEASURED WORLDWIDE- INCLUDING THE BOSNIAN  
PYRAMID

FURTHER PROOF OF THIS- THE PURE PHASE CONJUGATE FREQUENCY CASCADE 7.29 HZ,,  
TIMES GOLDEN RATIO POWERS ... 50 HZ- THEN LANDS AT 26033 HZ  
 $7.83 / 7.29 * 26033$  (exactly golden ratio exponent of Planck- see chart at top)  
= 27961 HZ

SAM OSMANAGICH- MANY RECENT DOCUMENTARIES ABOUT HIS MEASUREMENTS OF  
THE 'SCALAR' PUMP WAVE (WE NOW KNOW IS COHERENT LONGITUDINAL) EMPHASIZE  
THEY HAVE REPEATEDLY MEASURED THE DOMINANT FREQUENCY FIELD AT THE TOP  
OF THAT PYRAMID AT 28KHZ!

=== *More on pyramids as 'gravity diode' for atmosphere maintenance .. below.*

**To make this more personal- here is a way to think about how this sacred space works-  
perceptually. Recall the hollow , well connected, ringing you felt in your ears- the last time you  
were in a REALLY sacred space. Compare this to the ear ringing frequencies we have measured in  
kundalini biophysics    [www.goldenmean.info/kundalini](http://www.goldenmean.info/kundalini)**

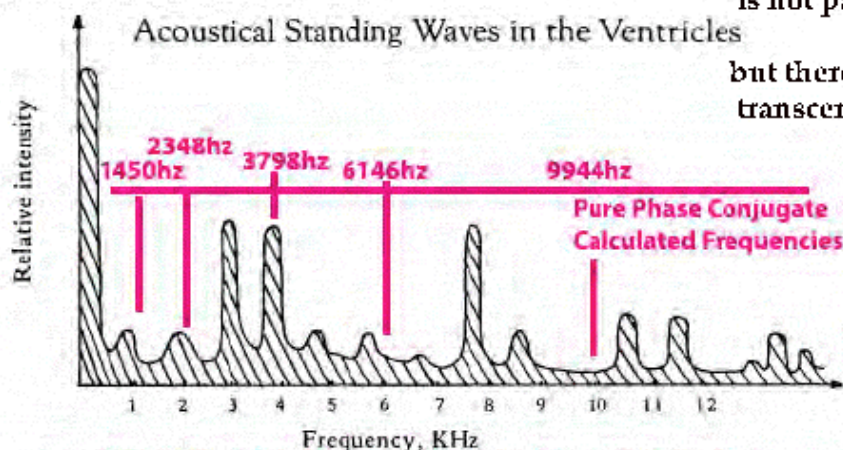

In other words- the way the spine liquid pump works- in the sacral cranial literature is revealed to be pumping the low frequencies (so documented to be the low end bandwidth of kundalini) – AS a phase conjugate negentropic pump wave- tuning the brain.

Frequency distribution measurements of "inner sounds" reported by 156 meditators were made by asking each meditator to compare the sounds heard during meditation with sounds produced by an audio-frequency oscillator through an earphone in one ear. The subject rotated the oscillator frequency control to match oscillator tones with those heard or remembered as the "inner sound." The frequency distribution is not smooth, but shows several sharp peaks, harmonics of the fundamental frequency, and possibly beat frequencies produced between the third and lateral ventricles of the brain, which are connected by a fluid bridge. In the frequency range below 1 KHz, acoustical standing waves running through the entire body appear, as do the higher harmonics of the heartbeat and the heart sounds.

under the right conditions-  
kundalini / bliss /  
voices of ancestors,  
the spine liquid pump  
phonon sound can  
pump/implode to brain  
ventricles part of a loop  
which can concentrate  
bliss/ and ancestral  
memory --  
- this is not to say tinnitus  
is not pathology-

but there are other  
transcendent possibilities

Ben Bentov's work from Lee Sannella "Kundalini Experience"

FIGURE 10: Frequency distribution of "inner sounds" heard by meditators.

*Above excerpt from Bentov- with the conjugate frequency calculations by me- to show the overlay.*

The sacral cranial teaching of the Upledger school- are a fine example. The practitioner by just FEELING the low frequencies of the spine liquid pump, in the fascia (tissue)- ADDS COHERENCE to that wave- just by their attention. Then when the spine liquid stops and comes to a still point- as we discussed- that is called healing crisis. It is when the conjugation sorting comes to a climax- so that when the pump re-starts, there is MORE phase coherence. Remember- (per Upledger) – IF your spine liquid IS pumping- THEN you are not depressed.

Whether it is the ringing of the inner ear, or the ringing of the space acoustically, or the capacitance field harmonics- it is ALWAYS about conjugate fractal well compressed harmonic inclusiveness. Remember heart harmonic inclusiveness is always your doctors fastest way to measure your immune health – [www.goldenmean.info/holarchy](http://www.goldenmean.info/holarchy) .

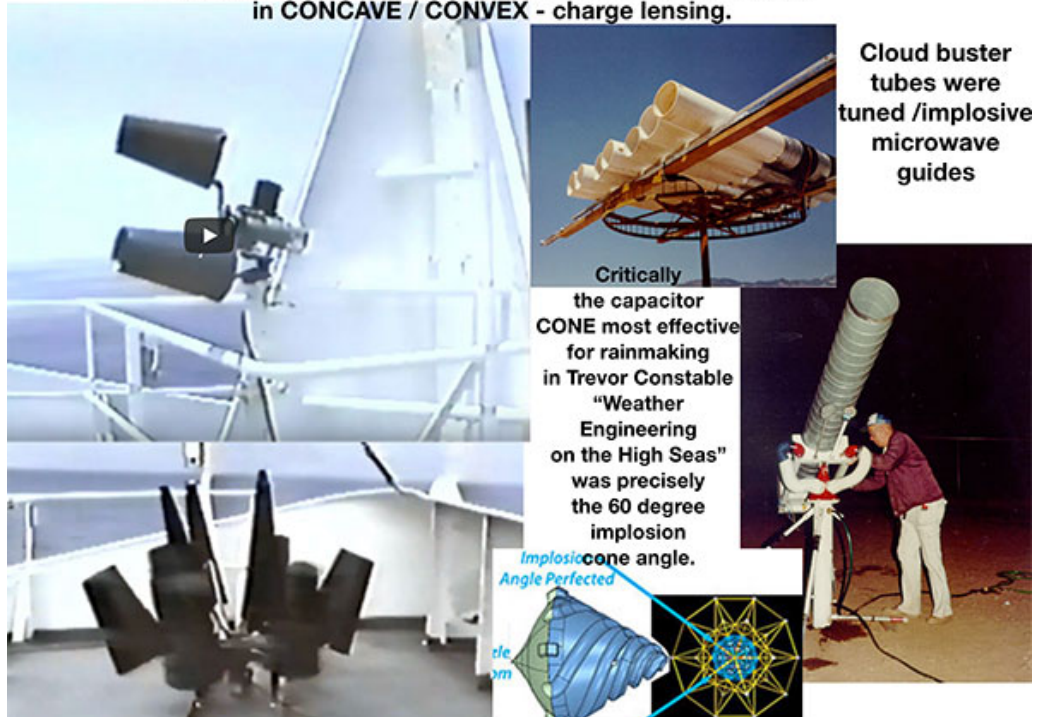

We discuss the semantic / electrical origins of our words – heaven, planes of sharon, champs elyse – below: all names specifically for the electric field of 'sacred' / fractal / charge distribution perfected. Soon medical doctors will understand as we said before- why hospitals are literally -a 'hell' of a place to die.

## Rainmaking, Labyrinths vs Orgone: Charge Collapse Principle of Precipitation:

So many people have seen it. A young person (usually twinkling eyes) - stands barefoot (grounded)- talks to a cloud- then focuses in the cloud and puts a hole in it! The physics is surprisingly simple. Focused human attention causes charge to collapse / compress (Bill Tiller). Teaching water vapor to FORM a droplet is simple as adding centripetal seed force electrically. So precipitation ( even in the spiritual and magic sense) is as simple as introducing a charge field which becomes centripetal - due to charge collapse (literally fractality). We are suggesting here of course that charge collapse is optimized when the geometry of that field is golden ratio to planck- as in the brainwaves of bliss experiencers - [flameinmind.com](http://flameinmind.com).

Note how the physics of Orgone / Reich rainmaking etc.- is best described as implosive ( charge collapse) capacitance.

**The physics of Reich's ORGONE- was actually implosive (centripetal) capacitance requiring layers of alternate hi dielectric (usually organic) - in CONCAVE / CONVEX - charge lensing.**

More on Reich / orgone...and orgone pyramids... In general- we strongly suggest (in spite of James DeMeo et al) – that precisely what is meant by orgone IS implosive capacitance. You see above- it is precisely implosive capacitive fields ( like the 60-degree cones)- which by centripetal charge can help water vapor become rain. *In this sense, it really seems to me that people like Reich , or Steiner- who called it 'Etheric Formative Force' – or Karim who called it 'Biogeometry', genuinely did not know what capacitance IS (or capacitive coupling) – much less (charge collapse) IMPLOSIVE capacitance.* Reich used concave nests of alternating high and low dielectrics –(organic materials are higher dielectric). This is precisely how you generate centripetal and ultimately implosive charge fields. This is essential to understand how constructive charge collapse by nested symmetry is precisely what is meant by orgone (or 'biogeometry') for example (with the resultant effect on seeds for example- much like we do with [theraphi.net](http://theraphi.net) ). So -when people use slivers of aluminum in plastic resin molds – called 'orgone bombs' or Orgone pyramids- these things are only fractionating capacitive fields. This could of some slight use in breaking up a geopathic- but would be generally useless for constructively assembling any field effect which is negentropic or centripetal for example.

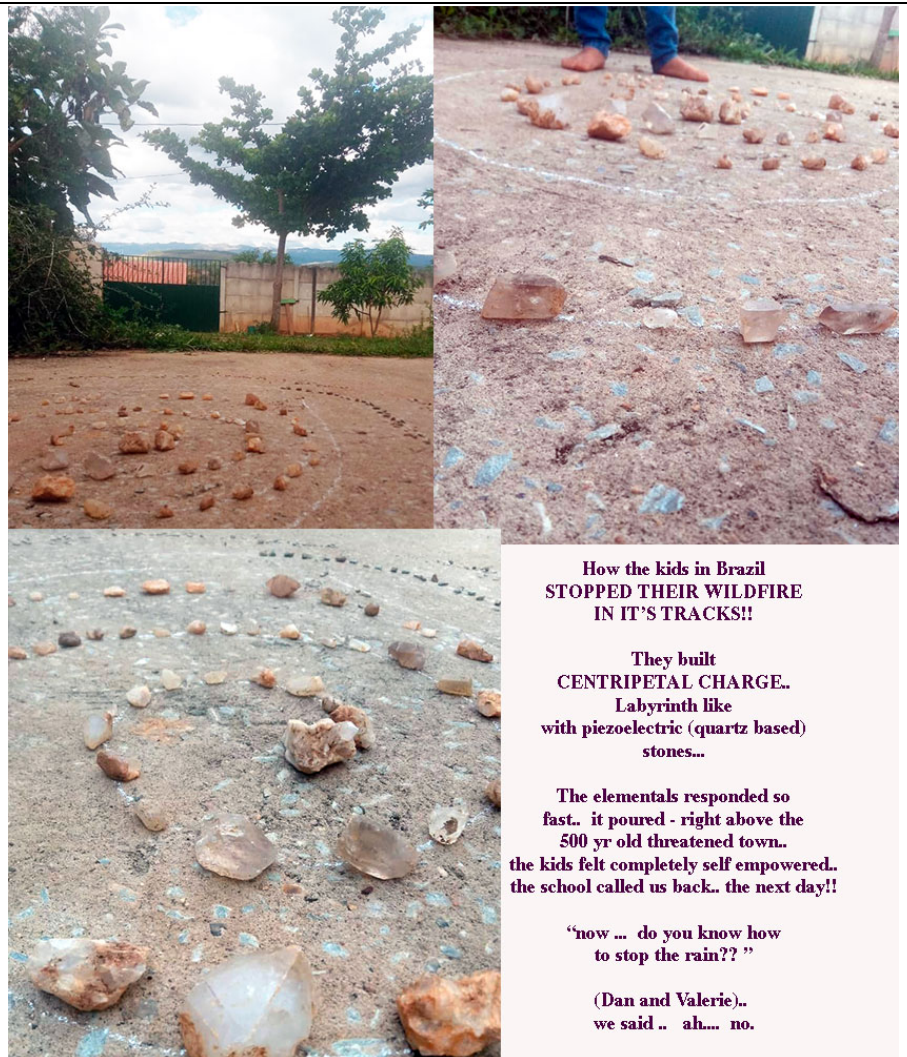

*Back to the rain...* We have for decades been doing rainmaking projects. I first became interested when I noticed how often cloud formations and rain- seemed to be affected when I had intense kundalini experience. You can read about my kundalini story [goldenmean.info/kundalini](http://goldenmean.info/kundalini). Also our Ophanim

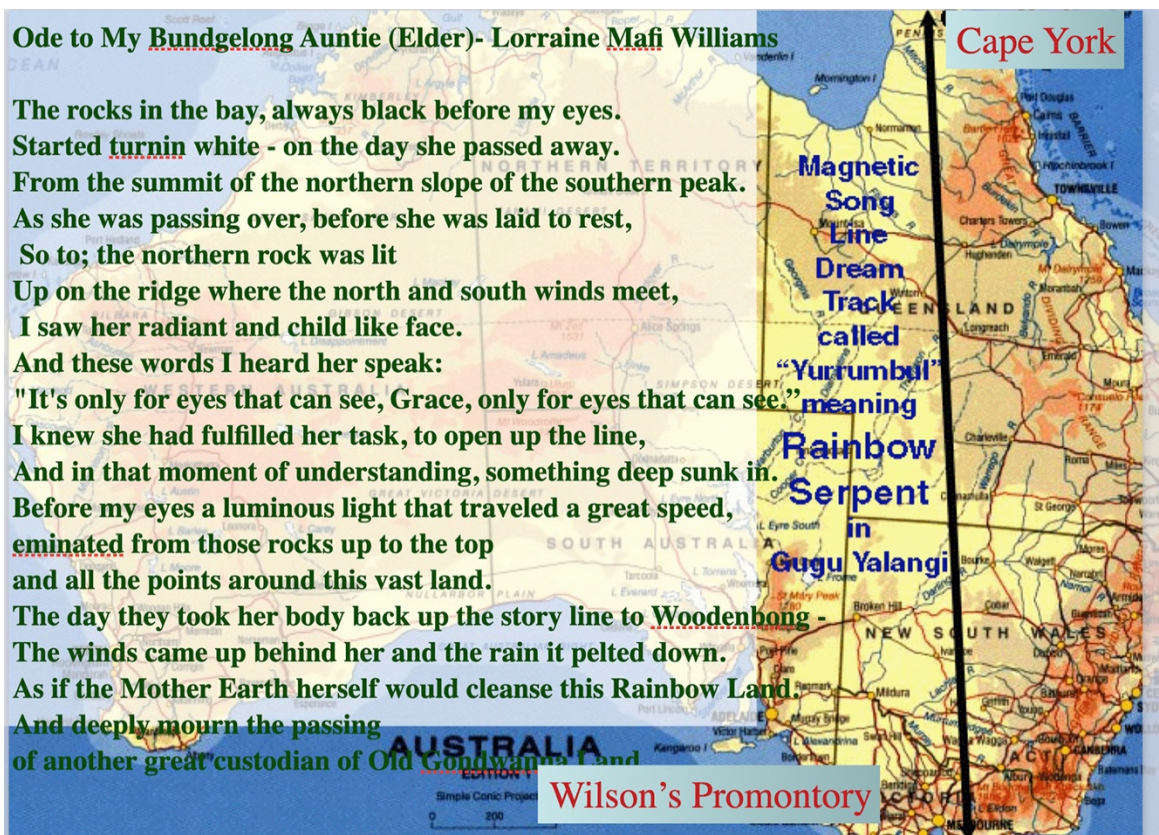

angel calls team – has done some amazing rainmaking [goldenmean.info/ophanim](http://goldenmean.info/ophanim) (then and now). See there a long tradition which began with “The Tempest” John Dee made to take out the Spanish Armada.

One time in great exasperation during a Byron Bay drought- I sat down and intensely fired my kundalini – cloud-ward – almost immediately followed by several days of deluge (Valerie can tell you the story too). I cannot do this all the time. But I did begin to study the history of rainmaking. I learned for example that the nervous wiring of the belly of the black beetle which Rolling Thunder so famously tickled during rainmaking- was notoriously fractal! (hint implosive). On some occasions I have similarly used a good pine cone with result.

Also see the ( teacher’s) film clip about the time our kids team saved the town in Brazil from firestorm:  
[goldenmean.info/rain](http://goldenmean.info/rain) Take some good spirals of quartz stone + a strong magnetic Earth line cross- then add magic kids .. and timing.. it’s more than a fairy story.. it’s centripetal! The gnomes know.

The Earth’s plasma intelligence ‘worms/ dragons’ generally believe humans must be drunk because we DON’t talk to them. No wonder the tornado’s are angry. These are similar to thousand mile long magnetic lines in Australia- (Song Line, Dreaming Track) which wiggle regularly on command- because they have been literally a family pet of aboriginal shamans for thousands of years. (Like blue corn DNA which would only germinate / & call the wind- to the right Hopi song). When Auntie Lorraine died (Bundgelong)- the storm down that her family song line- is well remembered today.

.. and deeply mourn the passing of another great custodian of Old Gondwana Land..

I began to suspect how bloodlines evolve such abilities as rainmaking. It's rather shades of Satprem's idea "Willed Mutation of the Species". When I was in my 20's- I passed out in a swoon in the gold sarcophagus of Tutankhamun in Cairo. This is not to say I am a reincarnation of.. but possibly- fragment of soul memory. I began to realize after so many generations of Pharaoh's knowing they would be 'fired' if the Nile didn't flood on time, a certain yearning of the death moment.. planted a seed in their offspring. Ancestor memory as 'wind in your sails'. By the time of Tut- the priests were regularly using him with effect in their rainmaking rites (which I kind of remember). I even had a clue to that- when I had to close my eyes in Hercules's films as a kid- when he would use his 'ring'. I could not stand the memories of the way the fire crystals were used.

Regarding Tut – I meditated for decades after "Secret Places of the Lion" (George Hunt Williamson, Brother Phillip, Michael d'Obrenovic ) – insisted the bloodline of Tut had been planned for hundreds of years ( presumably by the Sirian's if we believe the Ark story). ***The Lion serves you by smelling for fear / resistance to compression – as you enter the portal.***

It's only later when we realize the Akhenaton/ Tut line is the climax of THOTHMOSES ( sons of Thoth) - which is the name of most of the royal lines of Egypt. So Thoth- with his phase conjugate caduceus science of life force- is the name of the line that became:

- Egypt royalty
- Essene royalty (Jesus / Mag)- when Akhenaton - renamed Moses, ran for his life from the Amun priests
- Jewish royalty (Gardener: Line of DAVID – means TWT /Thoth was spelled DWD – David)
- Viracocha/ Quetzalcoatl

.....and the 'blond haired/ blue eyed' Return of the Bird tribe list goes on..

A short summary here is 'the return of the Nine' as Enki /Thoth /Hermes

( [goldenmean.info/whaledreamers](http://goldenmean.info/whaledreamers) ) – have brought with them – the physics of 'charge collapse'- which is the "Hermetically Sealed" physics of life and soul-making!

## Physics of LABYRINTHs -as sacred space and rainmaking- based on charge collapse:

The 7 color toroidal moebius (oldest problem of topology- how to get 7 colors to all touch each other)- self organizing spiral – is

-origin of Hebrew / Sanskrit – ancient symmetry/alphabets [goldenmean.info/dnaring](http://goldenmean.info/dnaring)

-origin of color [fractalfield.com/fractalphotosynthesis](http://fractalfield.com/fractalphotosynthesis) and

-origin of labyrinths – HOW to turn inside out [goldenmean.info/labyrinth](http://goldenmean.info/labyrinth)

Essentially the 7 color torus map when projected on flatland – IS the 7 color Cretan / Minoan Labyrinth (animation at link). **Out of FLATLAND!**- How to visualize turning inside out- in 3d – using a labyrinth sequence of turns in 2d. Ideally as you are walking the 7 circuit labyrinth- at each major 180 turning point- you visualize WHERE you are in the 7 color torus map. IN this way- you could (cast a ) spell...

So as you can see there- Labyrinth work – is very useful to enact the inner and outer symmetry required to “turn inside out” / implode. This is a perfect set of ritual turns- to practically embody charge collapse. Hence the Labyrinth as a rainmaking and tool for sacred space.

Now- with further insight- let us return to our original inquiry:

## **Is phase conjugation/ charge collapse the mechanism at the very ORIGIN of perception?**

Examples of phase conjugate models of the origin of PERCEPTION:

Ref [www.fractalfield.com/conjugateperception](http://www.fractalfield.com/conjugateperception)

We consider Steve Lehar and Ernest Mudashev – as examples here:

We pursue this more than analogy between phase conjugate optics and the nature of human attention- because if we are right- then for example we can consciously create the wave mechanic environment- in your children's classroom (conjugate pump wave frequencies and phases ) – to actually CREATE and INCREASE the QUALITY OF ATTENTION. There are many studies for example (book: Health and Light by John Ott)- that replacing the non-conjugate frequencies of florescent lights in your kids classroom- with natural sunlight- PRODUCES A DRAMATIC MEASUREABLE INCREASE IN ATTENTION SPAN. DOES ATTENTION HAVE A FREQUENCY RECIPE? WE THINK IT DOES! Another example we mentioned- sharpened perception after exposure to conjugate plasma in Theraphi. Also we have described sharpened perception correlating to golden ratio in brainwaves – [flameinmind.com](http://flameinmind.com) .

This is not unlike how we have suggested creating the wave field effect environment to electrically create biologic growth. - complete updates: [www.bioactivefield.com](http://www.bioactivefield.com)

So – let us look- at a contemporary scientist teaching a phase conjugate model of perception: Steve Lehar (picture next page). Several basic points here support- our phase conjugate model of perception:

1. Steve Lehar's model of perception- essentially says- perception is about maximum constructive wave interference- our new mathematics- have proven golden ratio IS maximum constructive wave interference and therefore optimum phase conjugation and optimum compression (focus). Lehar- discusses perception- with a well known model called Constructive Aspect of Visual Perception.  
<http://cns-alumni.bu.edu/~slehar/ConstructiveAspect/ConstructiveAspect.html>

### **Lehar Abstract**

Many Gestalt illusions reveal a constructive, or generative aspect of perceptual processing where the experience contains more explicit spatial information than the visual stimulus on which it is based. The experience of Gestalt illusions often appears as volumetric spatial structures bounded by continuous colored surfaces embedded in a volumetric space. These, and many other phenomena, suggest a *field theory* principle of visual representation and computation in the brain. That is, an essential aspect of neurocomputation involves extended spatial fields of energy interacting in lawful ways across the tissue of the brain, as a spatial computation taking place in a spatial medium. The explicitly spatial parallel nature of field theory computation offers a solution to the otherwise intractable *inverse optics problem*; that is, to reverse the optical projection to the retina, and reconstruct the three-dimensional configuration of objects and surfaces in the world that is most likely to have been the cause of the two-dimensional stimulus. A two-dimensional *reverse grassfire* algorithm, and a three-dimensional *reverse shock scaffold* algorithm are presented as examples of parallel spatial algorithms that address the inverse optics problem by essentially constructing

every possible spatial interpretation simultaneously in parallel, and then selecting from that infinite set, the subset of patterns that embody the greatest intrinsic symmetry. The principle of nonlinear wave phenomena and phase conjugate mirrors is invoked as a possible mechanism.  
==end Lehar Abstract.

Discussion- from Dan Winter- we suggest it is fascinating, rich, and instructive to meditate a bit on the metaphors here. In fact- Lehar suggests- perception is about the brain fabricating an internal kind of holographic picture (as in his new book: "The World in Your Head"). His point is that the way your brain fabricates this inner picture consists of reassembling the input perceptions as a kind of gathering a wave fronts. (see his picture below). He uses what he calls "reverse grassfire". Quoting him: "The idea is to ignite the perimeter of the geometrical pattern in question, and allow the flame front to propagate inward to the center of the figure like a grass fire."

This is a beautiful metaphor in that it embraces the nature of attention as the convergence of waves as if in a flame. This being the so-called 'flame in the mind'. And further- as 'flame fronts' of this 'grass fire' converge at and bounce thru center- they create a kind of sorting for symmetry. Now if ever we were to look at how phase conjugate mirrors- or 4 wave mixing in phase conjugate optics could work- we seem to be examining the same metaphor. As the flame fronts- of the laser optical waves converge- if the symmetry is perfect- then the waves are all able to meet at one point – literally- 'focus'- and hence the waves which follow- either continue to meet there with discipline – or are cancelled out (out of phase). This is the centripetal, negentropic nature of both phase conjugation and perception. Could they in a sense, be one and the same.  
==

See also related "The Bubble Perception Theory of Steve Lehar"

Note the way the focal lines emerge from a bubble to produce wave agreement / phase sorting – could be described in interference terms- as a 'conjugate phenomenon'.

## The Constructive Aspect of Visual Perception:

A Gestalt Field Theory Principle of Visual Reification Suggests a Phase Conjugate Mirror Principle of Perceptual Computation

<http://cns-alumni.bu.edu/~slehar/Spatial/Spatial.htm>

Steven Lehar

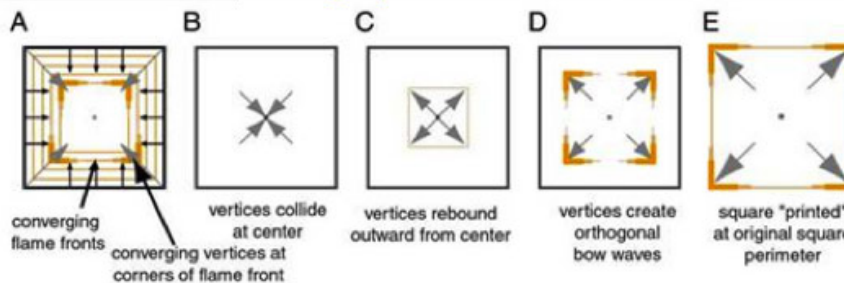

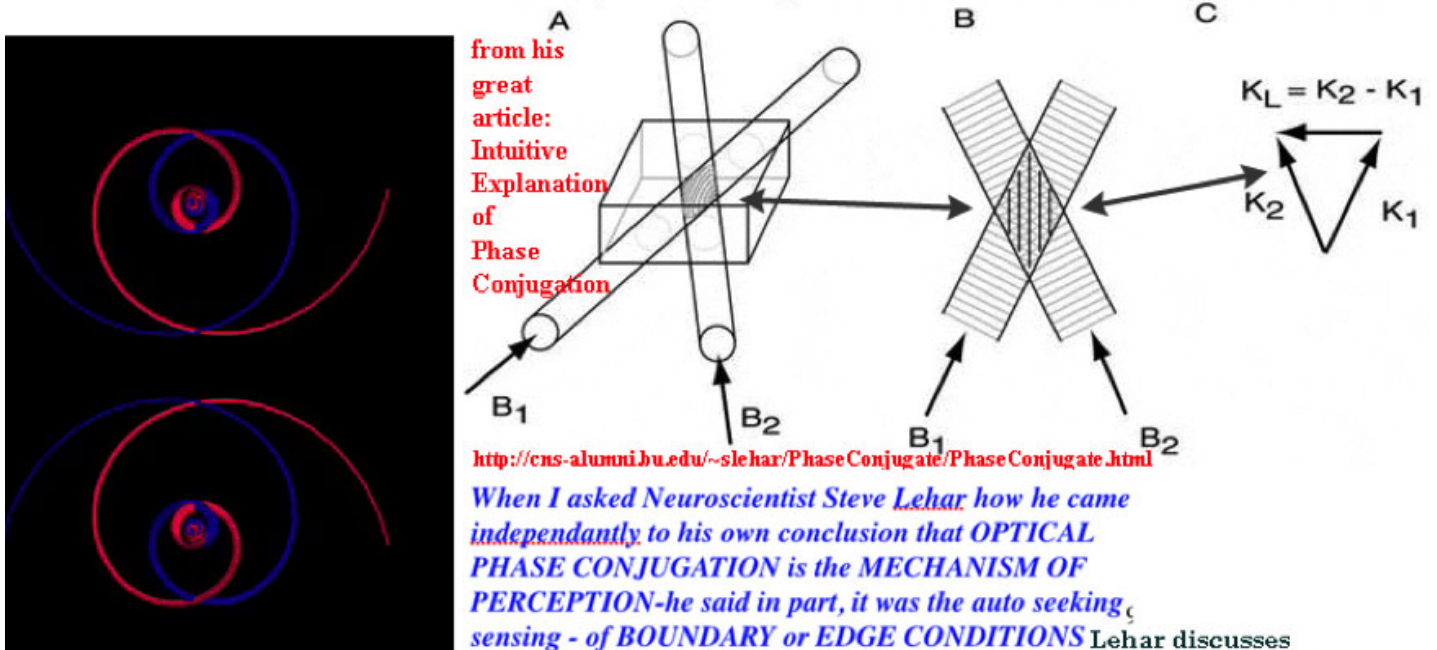

<http://cns-alumni.bu.edu/~slehar/>

### Abstract

Exerpt from Steve Lehar "phase conjugate" model of perception.

Many Gestalt illusions reveal a constructive, or generative aspect of perceptual processing where the experience contains more explicit spatial information than the visual stimulus on which it is based.? The experience of Gestalt illusions often appears as volumetric spatial structures bounded by continuous colored surfaces embedded in a volumetric space. These, and many other phenomena, suggest a *field theory* principle of visual representation and computation in the brain. That is, an essential aspect of neurocomputation involves extended spatial fields of energy interacting in lawful ways across the tissue of the brain, as a spatial computation taking place in a spatial medium. ?The explicitly spatial parallel nature of field theory computation offers a solution to the otherwise intractable *inverse optics problem*; that is, to reverse the optical projection to the retina, and reconstruct the three-dimensional configuration of objects and surfaces in the world that is most likely to have been the cause of the two-dimensional stimulus. A two-dimensional *reverse grassfire* algorithm, and a three-dimensional *reverse shock scaffold* algorithm are presented as examples of parallel spatial algorithms that address the inverse optics problem by essentially constructing every possible spatial interpretation simultaneously in parallel, and then selecting from that infinite set, the subset of patterns that embody the greatest intrinsic symmetry. ?The principle of nonlinear wave phenomena? and phase conjugate mirrors is invoked as a possible mechanism.

This is the picture - showing the Perfect 3D CONES- "RECIPROCAL LATTICE"

**Figure 17.** A: Inward propagating flame front with four vertices propagating towards the center. B: The vertices collide at the center in a diagonal symmetry. C: The flame front vertices reverse and propagate outward again. D: Each flame front vertex creates orthogonal bow waves for the edges of the square. E: When propagation is complete, the square is printed at that location as a reconstruction of the central symmetry detected in the square.

Lehar discusses phase conjugation mechanism in perception as "reverse grassfire" wave algorithm, .. notice here how the "converging FLAME FRONTS" generating perception by bouncing thru center mirror's conjugate 4 wave mixing.

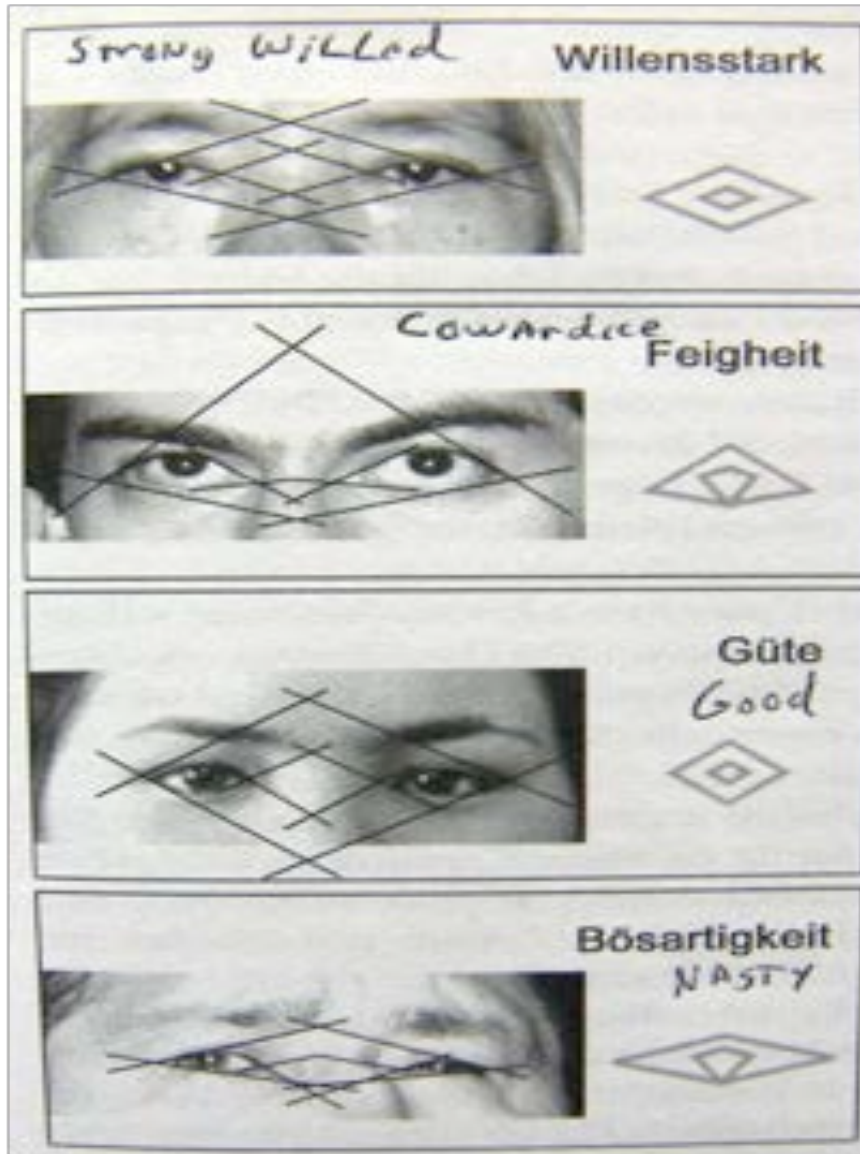

*Above- "Reverse Grass Fire" wave algorithm- what a beautiful psychological description of PHASE CONJUGATION*

*wave mechanics of 2 wave sets bouncing back to meet each other - to create PERCEPTION!*

Another example of a phase conjugate implication for the nature of perception:

[Dr. Ernst Muldashev – book: “Where Do We Come From”](#)

Discusses an ancient technique- for recognizing- conscious evolution- and the relative purity of human intent- directly from analyzing the position of the eyes on human faces (below excerpt)

Note again- that a symmetric convergence of wave (optical) cones- is the essence of phase conjugation. Only when phase conjugate optical cones have correct also elegant wave symmetry are the conditions set to generate strong negentropy, self-organization – the power of conjugation. Similarly in the design of the human face- the opposing pairs of the cones of perception can be seen in the facial eyes symmetry- indicating quite clearly whether the phase conjugation- and therefore the perception is balanced. We have elsewhere shown- where I pioneered the nature of measurement for heart coherence ( [fractalfield.com/coherence](http://fractalfield.com/coherence) ) – that onset coherence- was a measureable way to indicate pure (and shareable) intention. This example from Muldashev- then further suggests as we have – that phase conjugation is the climax form of coherence (literally- the ‘shareable’ wave)- and therefore the measure of pure intention!

Here is another example of conjugate 'turning inside out' to increase perception / focus: Sunbeck's book 'Infinity Walk'

**This is a very related example- using FIGURE EIGHT KINESTHETIC to create / orient and repair perception- See Deborah Sunbeck**

[www.infinitywalk.org/](http://www.infinitywalk.org/)

**By doing the figure eight- walk combined with touch alternate knees 'cross crawl' with fixed attention, Sunbeck has repeatedly proven many cases of dyslexia can be dramatically improved/ healed!**

**During the figure eight cross crawl motion- if you put your hand on the skull crown - you can feel the forcing of blood flow 'conjugating' and heating the brain center top by crisscrossing the corpus callosum. (The top of your head gets hot!)**

**We might say this is conjugating the pinecones that kiss noses. Four wave mixing (the figure 8 motion) classically creates the 'conjugate' implosion point- which IS the focus- to create/repair perception!**

See more on figure 8- recursion - and increased perception – at [www.goldenmean.info/octayoga](http://www.goldenmean.info/octayoga) & [www.sevenarrows.net](http://www.sevenarrows.net)

Lou Debourbon – OCTAYOGA developed amazing proprioception / juggling skill and more after learning to move his Dan Tien – solar plexus – in this sequence of 6 perpendicular figure 8 motions. The shape is 3 Double Dorji – literally 'caressing the facets of the diamond'.

This is beyond juggling- it is literally a body centered learning of implosive turning inside out. ( See below where we compare with how Ananda extended these practices and learned to disappear / implode into the array ).

## **Interlocking Hearts from Merged Trinity Knots**

**Lou DeBourbon**

[goldenmean.info/octayoga](http://goldenmean.info/octayoga)

**This is an concept piece created by merging left hand and right hand trefoil knots  
The arms contract as they come together and expand as they separate**

**The trefoil knot is the most basic of knots and comes in two shapes which are  
mirror images of each other: the Right hand knot and the Left hand knot**

**I became facinated with trefoil knots 8 years ago while I was developing  
routines for the movement system I had created. I wanted to go from the circles  
I made on the horizontal plane to circles on the other two planes. After  
experimenting I realized the most efficient and graceful way to go between  
the planes is by following the path of the Trefol Knot - I was hooked. I made  
many models out of copper tubing and plastic but it wasn't until I came across  
bronze that I could express the variation and expansion of the knots**

**Since symmetrical synchronized movements are at the foundation of my system  
(Octayoga), it did not take me long before I was joining the left and right hand  
knots together. Simultaneously following (tracing) the paths of the joined knots  
with my hands produced a special feeling of deep regenerative healing unlike  
anything I had experienced before. With further reflection, I realized that the  
movements made when tracing the joined left and right knots were the natural,  
universal human gestures that represent wonder, awe, and reverence**

**The fused knots look like a pelvis or spine. I suspect that vertebrate animals  
may have evolved utilizing the this combination and that we can develop a  
deeper awarness of our inner structure by tracing this pattern**

Dear Dan, I want to share a new discovery I just stumbled into. As I mentioned recently, I think an easy way of visualizing and moving along the path of the Trefoil knot is through the pentagon. While trying to create an open Pentaknot with an 82.5 inch vinyl vertical blind I decided to connect the ends and close the knot. The moment the ends are connected the unruly structure snaps into a form which is very pleasing and extremely rigid. So, the Trefoil knot as the perfect explorer of space, (SAW - Self Avoiding Walk) collapses into the pentagon, the most elegant representation of the Golden Mean.

New from Lou DeBourbon [www.octayoga.com](http://www.octayoga.com)

Is the supposed observer effect- in fact the effect of implosive compression- hooking up a longitudinal wormhole? (“The ARRAY”) . Remember that conventional physics general explanation of action at a distance- namely ‘entanglement’ connected to Rosen Bridge- is more precisely and measureably described as EMBEDDING perfected by phase conjugation- connecting to a longitudinal emf array. This more accurate description – actually results in testable technology- once longitudinal emf array coherence is better understood.

Remember all those who have speculated about the effect of observation- did not apparently know WHY focused human attention – caused electric fields to compress ( measured by Bill Tiller: ‘Conscious Acts of Creation’)- Now thanks to this book, you for the first time DO know why – focusing human attention causes electrical compression: PlanckPhire perfected centripetal / implosive charge collapse- is the essence of consciousness itself.

Double Slit- vs Wave Collapse in action- vs Observer Physics ( and ‘portals’?)

Is the convergence through the SLIT- in the double slit experiments- precisely the point of conjugation- and enforced charge collapse?

( See image above of pinhole camera where the image turns inside out or upside down. Scintillation results- connection with ‘the array’?)-

*Perception in essence (and in vision in particular) is the phase sorting which occurs when charge vortex turns inside out - necessarily phase conjugating at center.*

In the pinhole camera’s pinhole, the image is inverted / turned inside out. John Dee used this scintillation- for spirit communication. Is that compression point precisely where conjugation connects with the longitudinal array... ancestor memory .. perfected distribution. This suggests an intro to portals and wormholes – where the conjugate compression point- enables – longitudinal emf array ‘radio’. We compare this to the EEG / brainwave power spectra we documented- with Jean Charles Moyen- who has repeatedly bi-located with evidence and witnesses.

[www.flameinmind.com/lucidbrain](http://www.flameinmind.com/lucidbrain) He made a specific and powerful golden ratio & octave cascade-conjugate brainwave implosion- identified and measured. This was perfectly consistent with his

**multiple reports- that just before he bi-located (turned inside out)- he would always see where he was in one eye, while seeing where he was going – in the other. The 2 brainwave hemispheres performed the 180 degree conjugate phase implosion- to embed IN to the longitudinal array. Note he generally goes to the beach – where water better enables longitudinal array emf coherence.**

The point of wave function collapse – is precisely the conjugate point- where implosion is non-destructive. Seeing this ‘scintillation point’ (John Dee used for spirit communication) – where collapse is successful- also enables insight into what kind of embedding / perfect (longitudinal) array communication – is enabled. I think John Dee would have loved it – that in experiments like electron double slit experiment- (supposedly proving observer effect) the term ‘scintillation screen’ is used. Dee would have looked at that screen for ancestor faces. Something which would surely appall most modern physicists! Yet the fact that the collapse / convergent / conjugate point ( at the double slit center) – under the right circumstances- WOULD create the possibility of implosive embedding to TOUCH THE LONGITUDINAL ARRAY. The shadow of the phone call TO the longitudinal array ( song lines? anyone) – would be precisely WHEN the supposed ‘particle’ electron made that potentially infinitely wide INTERFERENCE pattern.

In fact we note- one of the common interpretations of the meaning of wave collapse- is exactly the DECOHERENCE – described as when the wave pattern of the particle is completely absorbed or distributed IN to it’s environment. Does perfect embedding mean YOU .. or that electron – goes from HERE – to EVERYWHERE AT ONCE! This is exactly like Dave in the film 2010 – sequel to 2001 .. he says about the fractality of the Jupiter dolmen. (longitudinal array?) .. Dave: ‘there’s thousands of them in here’

..(Excuse here a slight time reverse trip to 2001) - At the end of the 2001 movie- Dave perfectly embeds and disappears in to the fractal array of infinite dolmen – then at the beginning of the sequel film 2010- he can appear at will inside anyone’s TV set he chooses...??

It takes some time to meditate on how a (fractal) ‘array’ of longitudinal emf coherent nodes- creates wormholes and ultimately portals / stargates. Remember that physics already has quite a detailed language describing how entanglement enables action at a distance- we are merely suggesting phase conjugate charge collapse is a more rigorous description – of what physics calls entanglement. The compression perfected fractality of the array- or sacred ‘air’ fractality as Korotkov measured – exquisitely defines ‘sacred space’. Since current physics is generally without tools to measure coherent longitudinal emf- (the

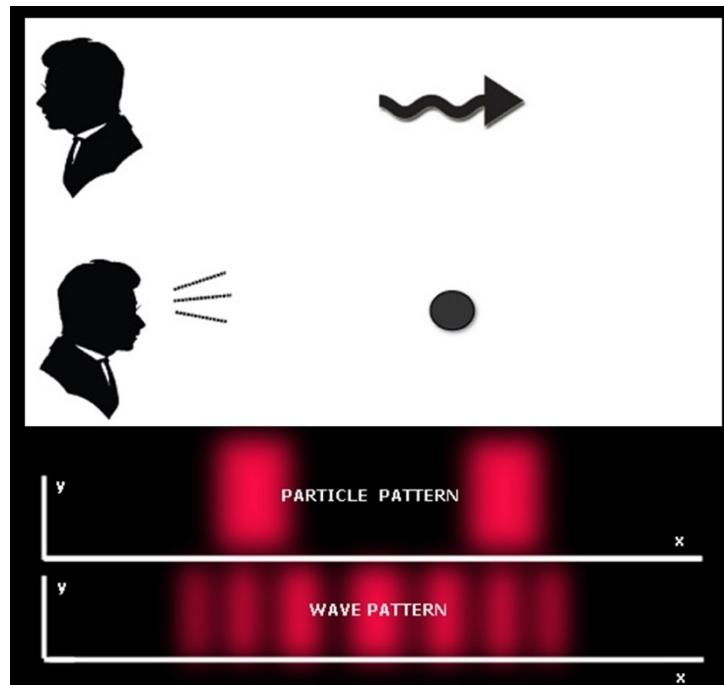

stuff of the wormholes) - they have failed to make the connection- to what they call 'Einstein Rosen Bridge. This oversight is likely due to the same reason Einstein never figured out- (as Bearden did) gravity waves are made of coherent longitudinal emf.

Remember when "Gaia Hypothesis" Lovelock wrote the code for "SimEarth" game emulation- the planting of fractal stone dolmen array's would accelerate the RATE of evolution- while threatening premature burnout of natural resources.. Does that sound familiar?.

Increased evolution or metabolic rate- is directly linked to the rate of charge collapse- IN to negentropy. (Theraphi.net is most always a metabolic and circulation accelerator).

■ Meanwhile back at the double slit...

**Enforced phase discipline in what emerges from implosive still points- IS the origin of negentropy .. because:**

SO the 'artificial' still point- which is the meeting point at the slit- in the double slit- enforces some interferometry discipline. This means only the wave packet /'envelope' (illusion of matter) component which was IN PHASE – at that (collapse ) point- was in fact propagated. This is perfected collapse- required for those photons or electron (wave packets) who make it THRU the slit. This is deeply analogous to the fact that OBSERVATION requires the creation of the illusion of a still point- even though the charge wave are NEVER still. In one important way this IS - the 'wave collapse' nature of perception – because perception REQUIRES the artifice of a still point.

And speaking of enforcing the artifice of a still point- back to the (compression center) of the 2 slits. In the right circumstance- would that projection on the 'wall of the cave' – 'scintillation' screen- on the other side of the slits- have an interference pattern WHOSE ARRAY COULD BECOME INFINITE .. or even increasingly broad spectral? Is this when melting in to the environment becomes non-destructive?? Hint.. even dying well??

Conventional physicists say the ‘wave function collapse’ effectively implies DECOHERENCE: This is when the wave packet electron or particle is seemingly completely disappeared into embedding into it’s environment. This is a perfect pointer to longitudinal emf coherence. We are clearly suggesting this is THE mechanism which allows memory to survive outside the body- in remote viewing / death / and lucid dreaming. Thus to understand perfected fractal conjugate wave collapse- as the way IN to the longitudinal array – is more than just the core physics of perception itself – it is THE way thru death.

At the compression point- in the double slit, or in the center of the tube children see thru, with eyes closed when in bliss- is precisely where the ‘impedance matching’ embedding entrains an energy wormhole in to an ever greater tunnel in to the longitudinal emf array. One practical example of this- was my recent trip into a regional old sacred South France church. While dowsing for the strong magnetic line cross- central to that church- I noticed that when I closed my eyes- I repeatedly saw images of a nearby underground rock crypt spring - upon whose magnetic river- the church was embedded. My ability to literally SEE inside that longitudinal node- by standing STILL at the church magnetic cross center- was a good example of opening that tube / wormhole into the phase conjugate longitudinal physics of vision in general ( WHY the kids say an inner tube opened which is an eyeball- when they are in bliss with eyes closed- [www.flameinmind.com/outervision](http://www.flameinmind.com/outervision) )

‘Psychic’ phenomenon are generally dominated by golden ratio phase conjugate longitudinal emf- emerging from compression in the aura and brainwaves. This is exemplified in our golden ratio implosion EEG for bliss technology - flameinmind.com Also- we use the phase conjugate longitudinal producing negentropy of our Theraphi.net plasma tech working commercially for rejuvenation and much more in 25 countries. The plasma field of Theraphi.net - uses dominant phase conjugate golden ratio harmonics all the way from noble gas phase conjugate optics, to RF megahertz drive from bi-filar tesla coil, to phase conjugate- literally IMPLOSION - infrasound drive modulation harmonics ( flameinmind.com/flameinsound ). We present further on the precise phase conjugate golden ratio of precise implosion sound ( phase conjugating - 2 channels like pine cones 180 degrees out of phase) at [www.fractalfield.com/implosionsound](http://www.fractalfield.com/implosionsound)

Specific numerous of our Theraphists have reported success in releasing ‘stuck’ ghosts and spirits using Theraphi plasma ( acknowledgement here also to Mederic in Perpignan). We discuss Theraphi more below. The physics is evident and clear. A stuck ghost is a semi- coherent plasma field – which has not got up the compression inertia to distribute further in to the longitudinal array of ancestor memory. A minor implosion of living plasma is required to help that ghost implode in to the array ( deliverance). Sometimes a grounded person with enough intent and access to bliss- can help. Living implosive plasma fields – (like Theraphi) obviously can help the physics of this compression / deliverance process. If you die in fractionating circumstance – like an accident – or in the presence of anger- then the black hole necessary implosion of successful death is incomplete.

See how the ‘Sentic’ emotion wave geometry of ANGER- 1/7 does not compress/accelerate well in the wave mechanics of emotion : [www.goldenmean.info/touch](http://www.goldenmean.info/touch) This is the opposite of the purely compressible golden ratio in touch wave shaped measured for love!

# ALEX'S ADVENTURES IN NUMBERLAND

HOSTED BY THE GUARDIAN

## Golden ratio discovered in uterus

Belgian gynaecologist measures reproductive organs of 5,000 women and finds that the most fertile have 'mathematically perfect' dimensions

Dan Winter: in my view  
this phase conjugate / golden ratio  
pump wave-implosive  
GEOMETRY OF THE  
PERFECT SQUEEZE-  
in the BIRTH CANAL-  
is precisely what  
Joseph Chilton Pearce  
meant by  
"BOND OF POWER"

The study suggests that when women are at their most fertile, between 16 and 20, the proportions of their uteruses reflect the golden ratio. Photograph: Alamy

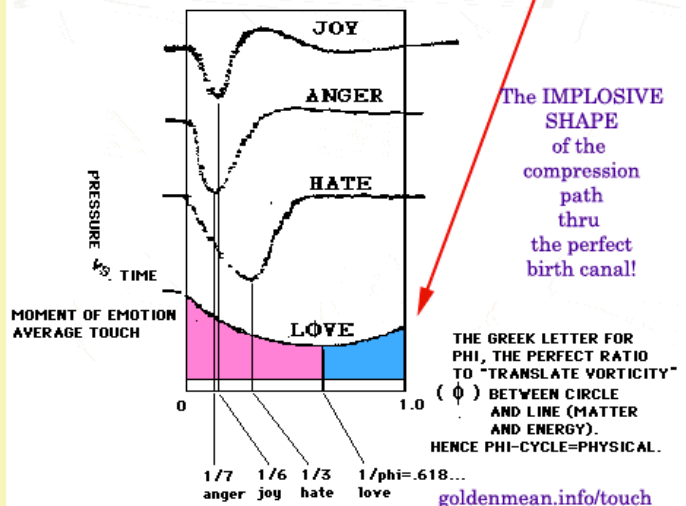

The golden ratio is a scientific nugget that has, for at least two thousand years, belonged as much to mysticism as to mathematics. It is just a number – 1.618 – but to its devotees the ratio expresses aesthetic perfection, and can be found wherever there is beauty.

[guardian.co.uk/science/alex-s-adventures-in-numberland/2012/aug/14/golden-ratio-uterus](http://guardian.co.uk/science/alex-s-adventures-in-numberland/2012/aug/14/golden-ratio-uterus)

In rebirthing - the physics of achieving maximum transference of (plasma) memory THRU the birth canal requires that the change in pressure over time of 'you couldn't get a better SQUEEZE' - the perfect squeeze'.....

THAT the birth canal passage reaches maximum compression in this geometry of touch over time....

producing implosive conjugate convergence of voltage/ pressure / memory... meaning this is how interstellar or long wave memories CAN make it thru the birth canal... ALL is sorted!

..and speaking of golden ratio (charge collapse) physics of perfecting birth...

In this regard- consider the physics of successful death. During death – the well documented 4 sequence symmetry geometry set so often seen during (successful?) death: As we discussed above - Heinrich Kluver form constants- lattice, cobweb, tunnel, spiral. These turn out to be very specific symmetry operations required to add in sequence an additional axis of spin rotation ( next dimension literally) – of embedding. [www.goldenmean.info/immortality](http://www.goldenmean.info/immortality)

What this specifically means- is that 'successful' death absolutely requires a compression ('black hole') success – in order to compress accelerate your aura memories IN to the coherent longitudinal 'next dimension' ARRAY – which IS ancestor memory / the collective unconscious / the communion of saints. What is permitted IN to this array – is only PURE PRINCIPLE – which contributes to the shared library of (millions of years? of) survival memory. Permission to enter this array – means every memory must be perfectly SHAREABLE – thus must compress / accelerate non-destructively IN to this larger array of embeddability.

### Physics of Heaven? ( [goldenmean.info/heaven](http://goldenmean.info/heaven) )

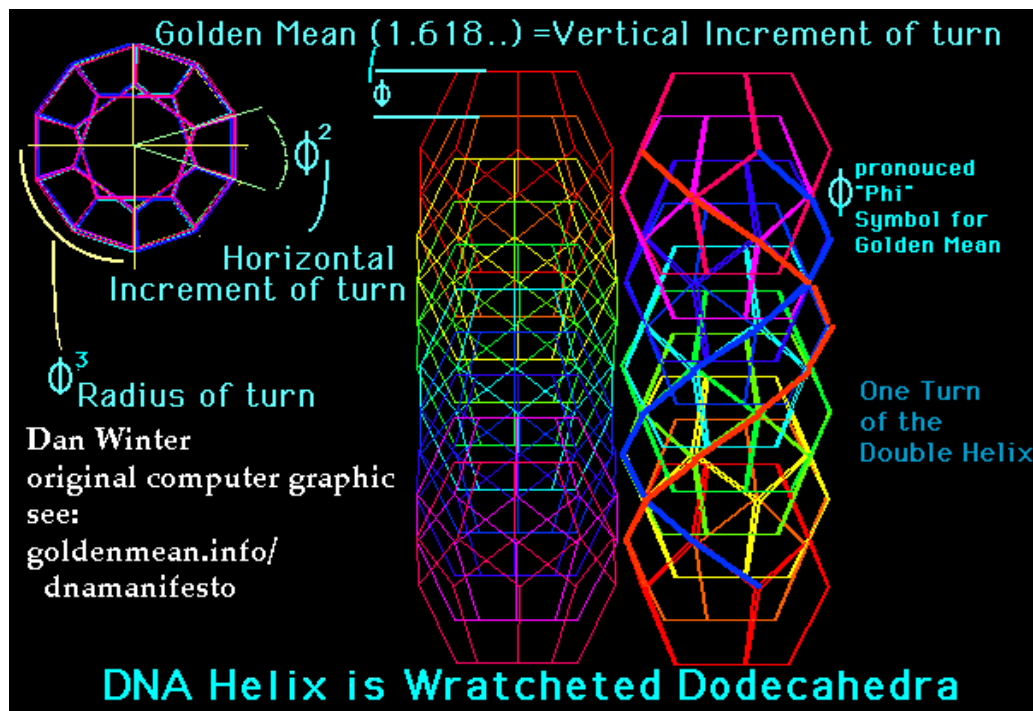

Heaven / Planes of Sharon / Champs Elysée / Eleusian fields- these terms in principle MEAN essentially precisely CHARGE DISTRIBUTION PERFECTED FOR BIOLOGY.

Lawrence Gardner – spends many pages in "Genesis of Grail King" and "Sacred Ark" – describing the detailed analog to "Planes of Sharon" ( Hebrew for 'heaven') - to the virtually infinite unpacking of the phase conjugate electron shells 'flowering perfectly' around MONOATOMIC GOLD – the white wafer of holy communion : Manna / 'the spice'. Again – this is fractal biologic charge distribution perfected in ARRAY- AND THE CONTAINER for ancestor memory.

Useful examples of what it takes to compress and accelerate IN to this array successfully ( survive death) – are well hinted in movies like GHOST, FLATLINERS etc. This also accounts for why- as Ray Moody’s team documented- successful death often produces a dramatic sharing of death visions- with all medical people in the room. The black hole of plasma required for a blessed death- is literally entraining.

This better explains the physics of why your life memories must flash IN COMPRESSION before you – just as you die well. This also explains why lightning ( Danion Brinkley - and the movie POWDER ) can potentially so well serve the compression of death process. In Danion Brinkley’s case of 2 deaths- the lightning so imploded his DNA toward superconductivity that Danion would see in a flash all the key emotions of each person he touched- afterwards. ( quasi superconductivity is well known for hi amperage surges during formation in DNA – or carbon nano threads-).

### Charge collapse (& BLISS) in implosive DNA braiding: the “Ultimate Physics of Soul”:

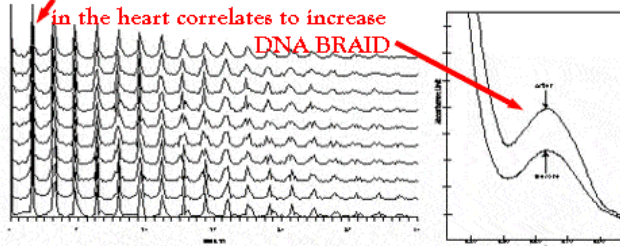

At the time I instructed Rollin McCraty at Heart Math Institute how to take his first EKG power spectra ( how heart coherence is measured: [realheartcoherence.com](http://realheartcoherence.com) ) – I then told Glen Rein- we needed to measure the result of Heart Coherence on DNA braiding. I knew intuitively – then later proved – that the lo frequency EKG ‘phonon’ (sound in liquid) harmonics were the ‘phase conjugate pump wave’ which coherently imploded the DNA braiding process. ..The result was this:

Individuals trained in generating focused feelings of deep love showed high coherence ratios in their ECG frequency spectra and all were able to intentionally cause a change in the conformation of the DNA. The DNA conformation was affected differently according to the specific intention. In some experiments, different intentions caused opposite effects on the DNA. Individuals who showed low coherence ratios, although in a calm state of mind, were unable to change the conformation of the DNA.

**from Glen Rein's study- DNA BRAID responds to EKG**  
The amount of winding and unwinding of the two strands of the DNA helix can be directly measured using UV spectroscopy. UV spectroscopy gives information about the chemical interactions between strands, the resonance energy transfer along individual strands and the interaction between the strands and their environment (water). The conformational changes of DNA observed in this study were complex and suggest that all three sites of action were affected. The UV spectra in Figure 1 indicates a very large increase in absorption (increased denaturation) of a DNA sample after being exposed to an individual generating a particularly high ECG coherence ratio. The observed changes reflected his intention to further denature the DNA. These changes were 3-fold larger than those produced by maximal thermal and/or mechanical perturbation, well known to denature DNA. The effects observed here go well beyond simply causing the DNA to completely denature (i.e., complete separation of the two strands). One possible explanation is that a physical/chemical alteration in the DNA bases which absorb UV light has occurred.

**Ascending Harmonic Inclusiveness (coherence)**  
**in the heart correlates to increase**  
**DNA BRAID**

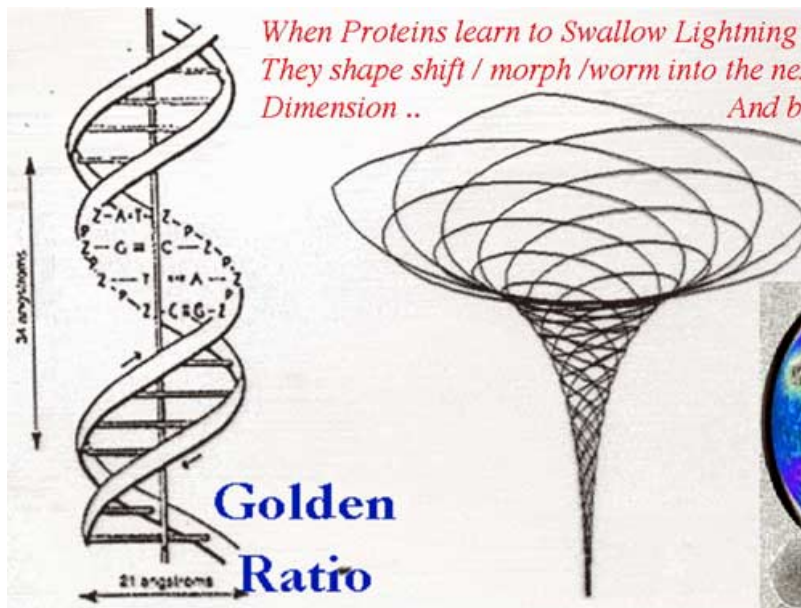

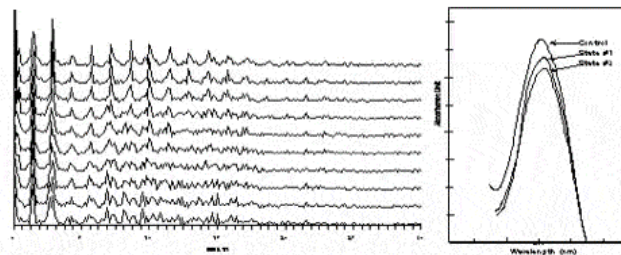

Glen Rein (at Heart Math) learned how to measure EKG harmonics from Dan Winter..

Note the real Physics of "ASCENSION" - as the harmonic INCLUSIVENESS in the heart / EKG 'ascends' (the heart coherence) - the DNA measureable BRAIDS RECUSIVELY- to thus also include long wave harmonics- in the folding braid..

The results in Figure 2 indicate that another individual who showed a relatively high ECG coherence ratio also caused a decrease in the absorption of DNA. This is consistent with the subject's intention to rewind the DNA back into its intact helical conformation. These results also indicate that different states have different effects on the DNA, but the state which generated the highest coherence ratio produced the most marked effects on the conformation of DNA. The dependence of the DNA conformation on the state of the individual was also demonstrated in control individuals who in their normal state generated particularly low ECG coherence ratios and were unable to intentionally influence the DNA.

Figure 1. In the ECG spectra on the left, all the epics are coherent. The change in the denaturation of the DNA (right) was three-times larger than could be produced by thermal and mechanical perturbation in the lab suggesting physical/chemical alterations in the DNA bases.

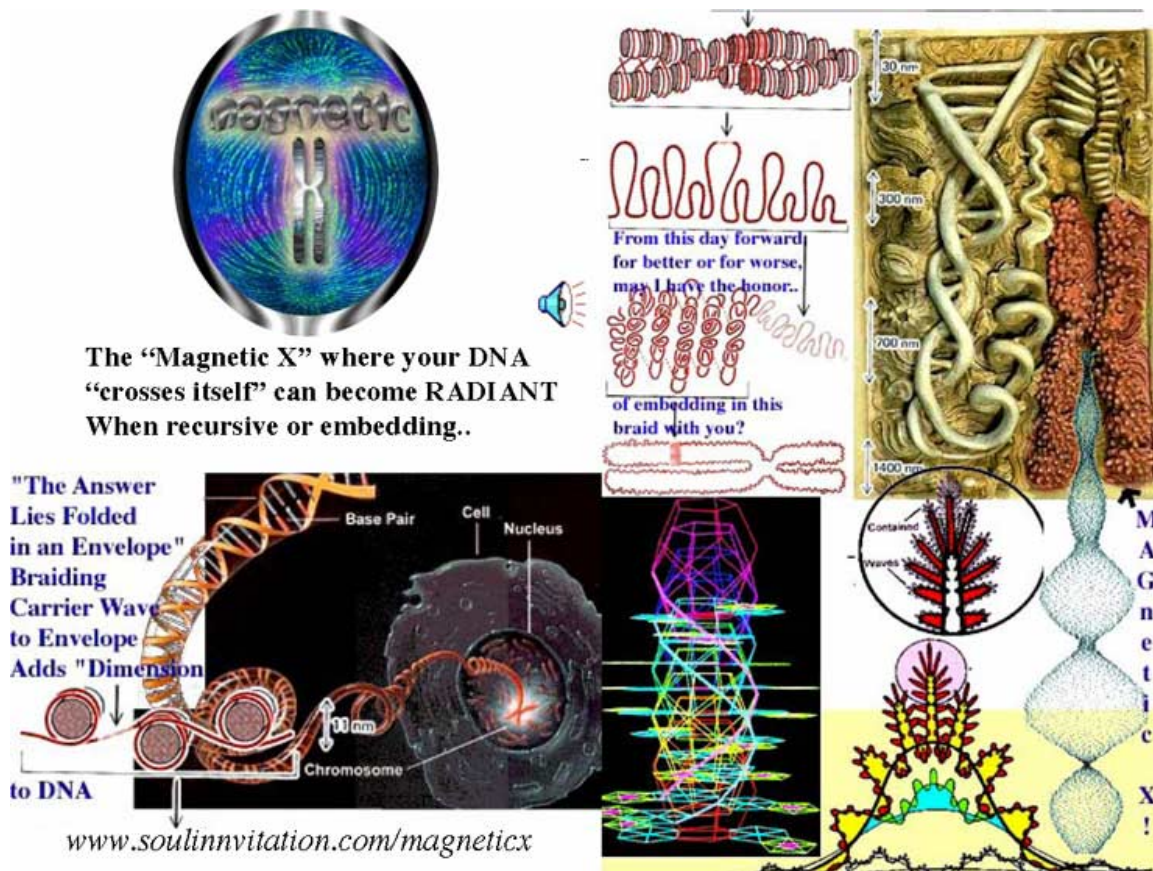

*When Proteins learn to Swallow Lightning (in 'Primal Soup')  
They shape shift / morph / worm into the next (spin symmetry)  
Dimension ..  
And become DNA..*

*When they learn to spit out lightning..  
(bliss - coherence).. You Survive Death.*

Right: PhotoMicrograph- Under Charge Compression (Bliss)-  
DNA Fuses into Ring Donut- Lord of the Ring..  
(soulinvitation.com/ringlord )

PhotoMicroGraph  
as DNA 'fuses'  
in to a RING..

**The recursive implosive BRAIDING – induced by (love?) the phonon infrasound of heart /brain bliss process- compresses the DNA rope into a squeezing which spits out coherent longitudinal emf- the physics of SOUL.** This predicts lucid dreaming skill ( dowsing sensitivity) and ability to take memory through death.

This suggests “Atman and the physics of soul” as the root of caring and empathy- by connectivity perfected. - Nature of collective unconscious again lies in longitudinal array physics. Golden ratio PLANCKPHIRE implosion in DNA- causes PHASE CONJUGATE charge collapse - to emit coherent longitudinal (scalar) emf interferometry- which is how humans - lucid dream, take memory through death, and get a SOUL.

Empathy vs embedding perfected is also seen beautifully in our heart coherence by implosion graphics above. This compression success- suggests how compassion works electrically.. as the heart turns inside out recursively.. a deeper meaning to heart coherence.

**DNA 1 helix turn height to width (golden ratio)**

**20 to 34 Angstroms ALSO Fits Planck x Golden Ratio^ Integer N!**

$$\frac{34}{20} = 1.7$$

Angstrom      Meter

The main point is that 1.618 is also the ratio of the DNA structure and is the only ratio that allows complete information or geometry to cascade down the harmonic series without destructive interference (acheiving perfect fractal "implosive" data/wave compression) - spin path to zero point.

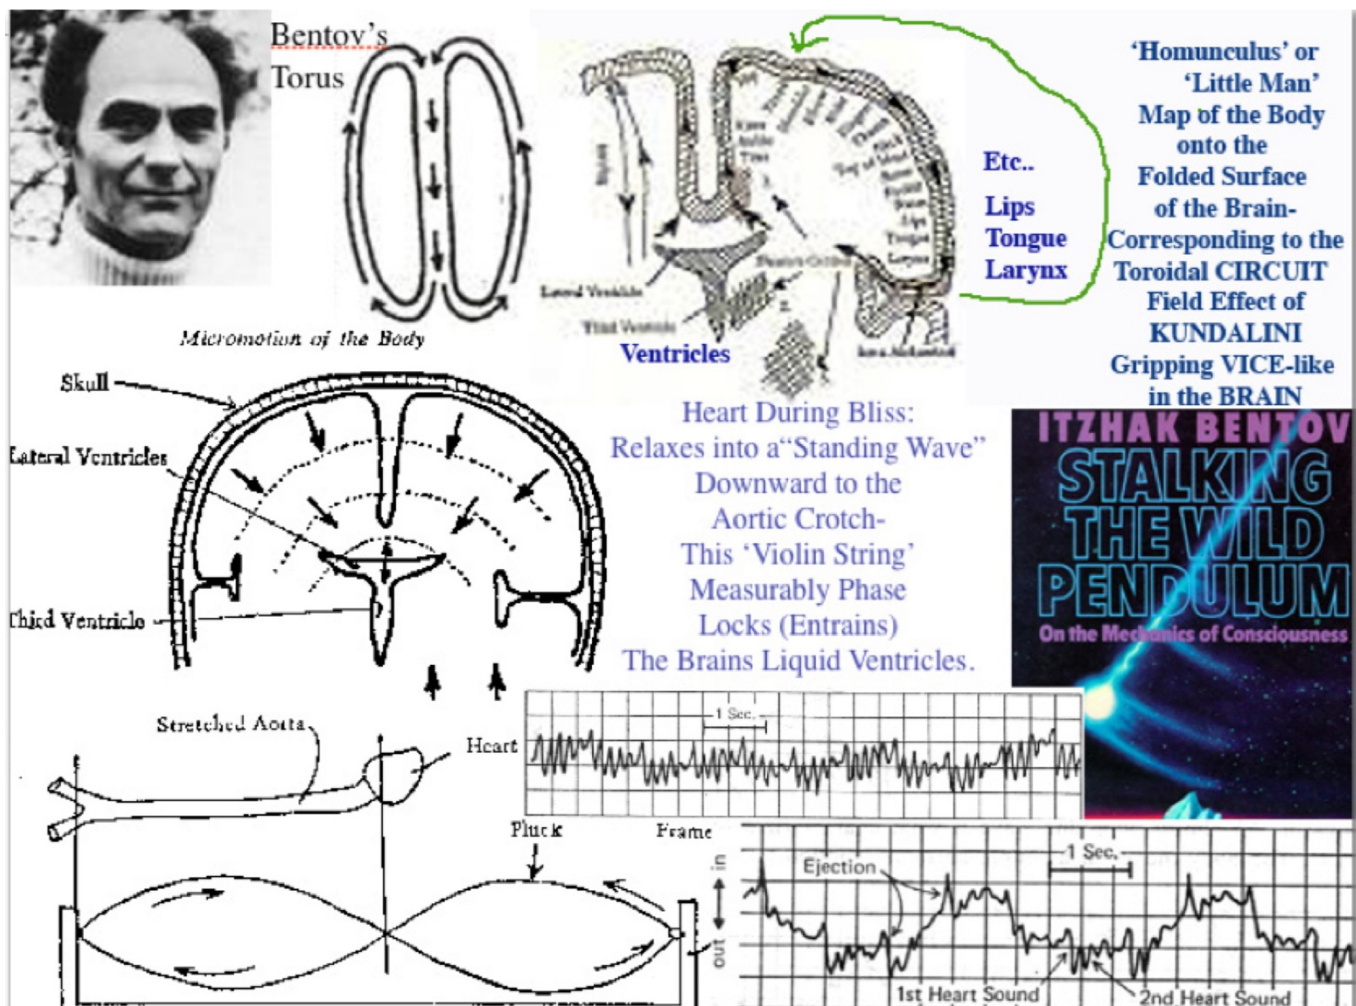

One 360 degree turn of DNA measures 34 angstroms in the direction of the axis. The width of the molecule is 20 angstroms, to the nearest angstrom. These lengths, 34:20, are in the ratio of the golden mean, within the limits of the accuracy of the measurements. Each DNA strand contains periodically recurring phosphate and sugar subunits. There are 10 such phosphate-sugar groups in each full 360 degree revolution of the DNA spiral. Thus the amount of rotation of each of these subunits around the DNA cylinder is 360 degrees divided by 10, or 36 degrees. This is exactly half the pentagon rotation, showing a close relation of the DNA sub-unit to the golden mean.

Again this is central to the physics of how humans get a soul!

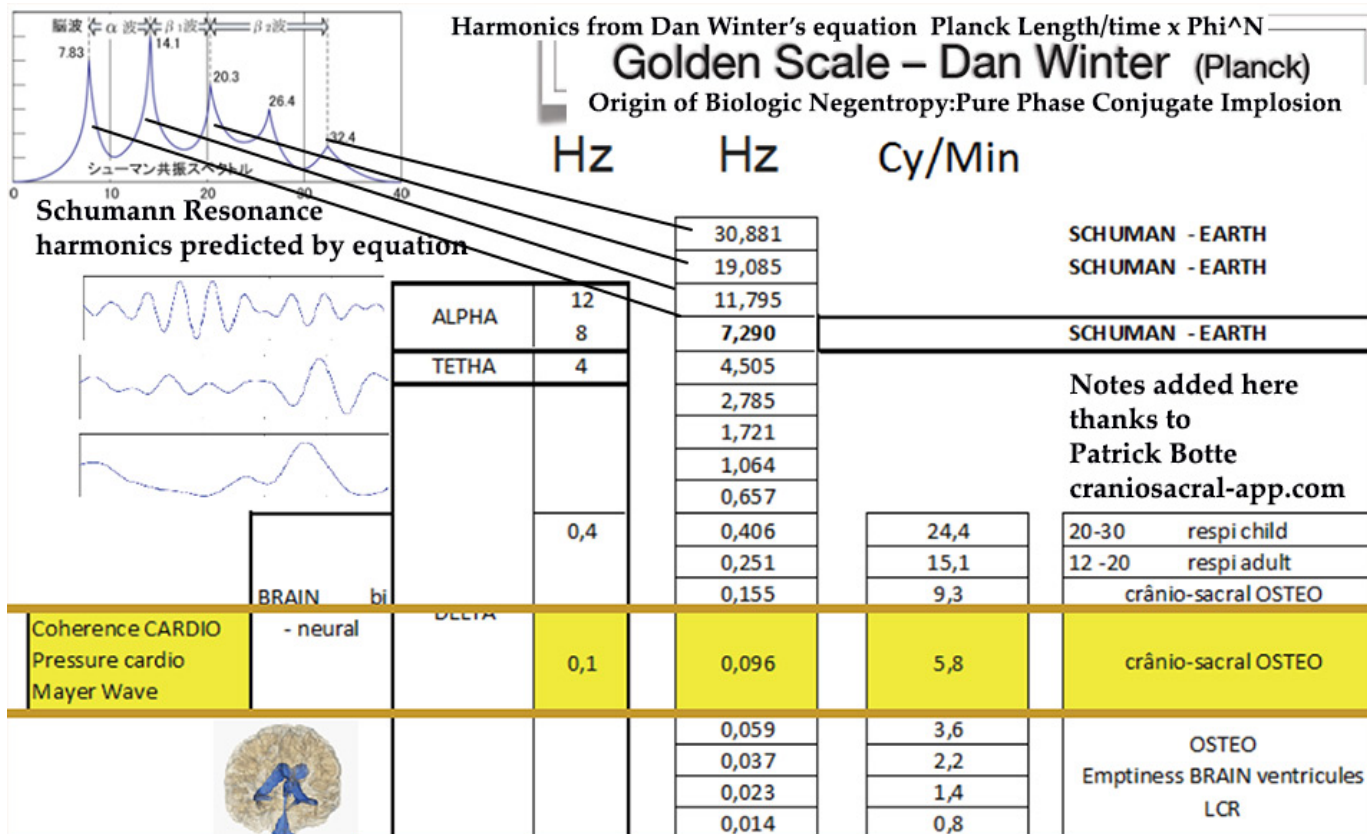

**Physics of bliss in the kundalini process: Charge collapse in Kundalini – IS information density yet can feel like lightning up your spine..**

When the DNA braid implodes- this centripetal compression impedance matches/ couples the DNA piezo helical core – to the ambient longitudinal array. This is central to the human bliss and kundalini process. The lo frequencies in the sacro-cranial pump implode the microwave current up the spine liquid- to feed the kundalini lightning in to the high brain. This is key to peak consciousness/ peak perception / bliss wave mechanic. Much discussion at [www.goldenmean.info.kundalini](http://www.goldenmean.info.kundalini)

The key charge collapse wave mechanic- lies in the phase lock between heart (hrv), breath, and the resulting coherence in the (sacro-cranial) SPINE LIQUID PUMP. This pumps bliss juices to the ventricles and the high brain. The sound / phonon pump of the spine- drives a circuit in the high brain which implodes (in to longitudinal coherence). I worked with the famous Ben Bentov in his lab near Boston – where he used a sensitive ‘capacitive accelerometer’ to measure this bliss micromotion moving coherently up the body. My days at Univesity of Detroit psychophysiology clinic doing polygraph engineering- came into perfect focus in the later time I spent working in Bentov’s lab in Boston.

(here we zoom in on a graph we mentioned above)

Note how the golden ratio implosive cascade in Breath/ HRV / and Sacro Cranial pump-

Locks into phase with multiple golden ratio harmonics in EEG during bliss ( flameinmind.com )

The phase lock of the spine liquid pump harmonics (above right)- to the heart / HRV and breath low frequencies- become the key pump mechanism of kundalini and intense bliss experience. As the famous Upledger Institute in Florida of sacro-cranial healing once said “ if your spine liquid IS pumping, it is clinically impossible to be depressed!”

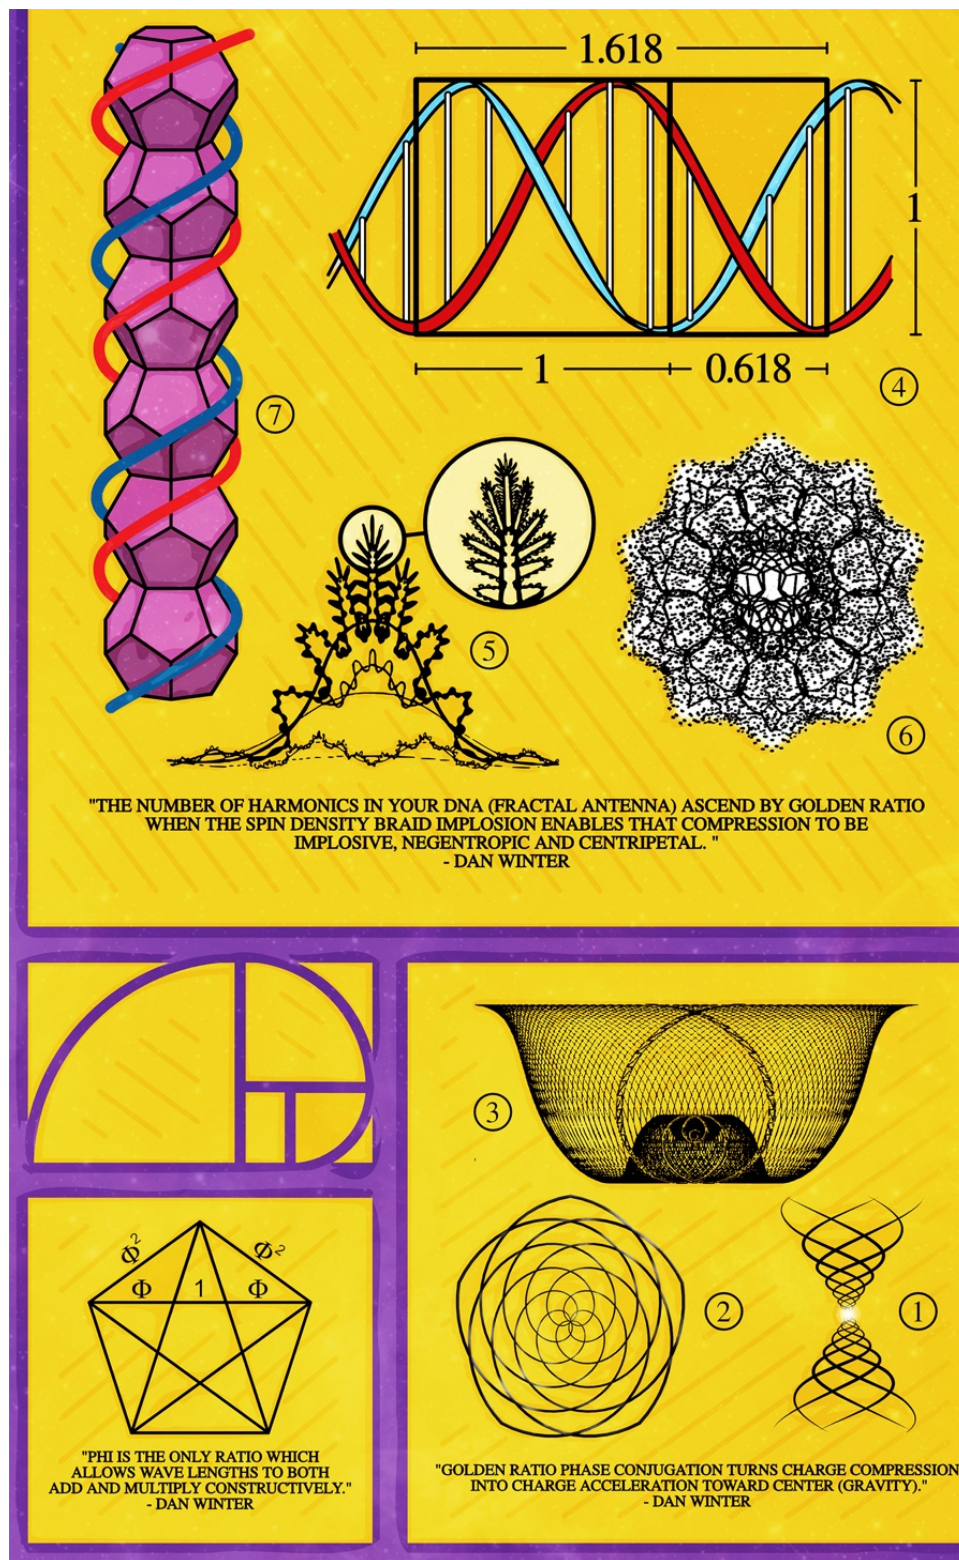

**The major point about identifying the many golden ratio implosive harmonics in Kundalini / intense bliss is to make clear that the core PRINCIPLE of bliss / peak perception - is again implosive charge collapse- in to longitudinal emf coherent radiance.**

**Next we extend the wave mechanics of bliss (and phonon entrainment from glandular infrasound) to the DNA braiding / bliss process:**

Remember that golden ratio phase conjugate hydrogen core electron shells (per my new equation) are the fractal centerpiece of hydrogen hearts. Note in the images how that specific fractal heart of hydrogen – is THE heart of every DNA codon ladder rung. DNA literally has implosion up it's central ‘lightning like’ zipper!

Golden ratio around hydrogen's PlanckPHIRE - is the way golden ratio braiding implodes DNA in to longitudinal coherence- WHICH IS THE PHYSICS OF SOUL.

[www.goldenmean.info/dnamanifesto](http://www.goldenmean.info/dnamanifesto)

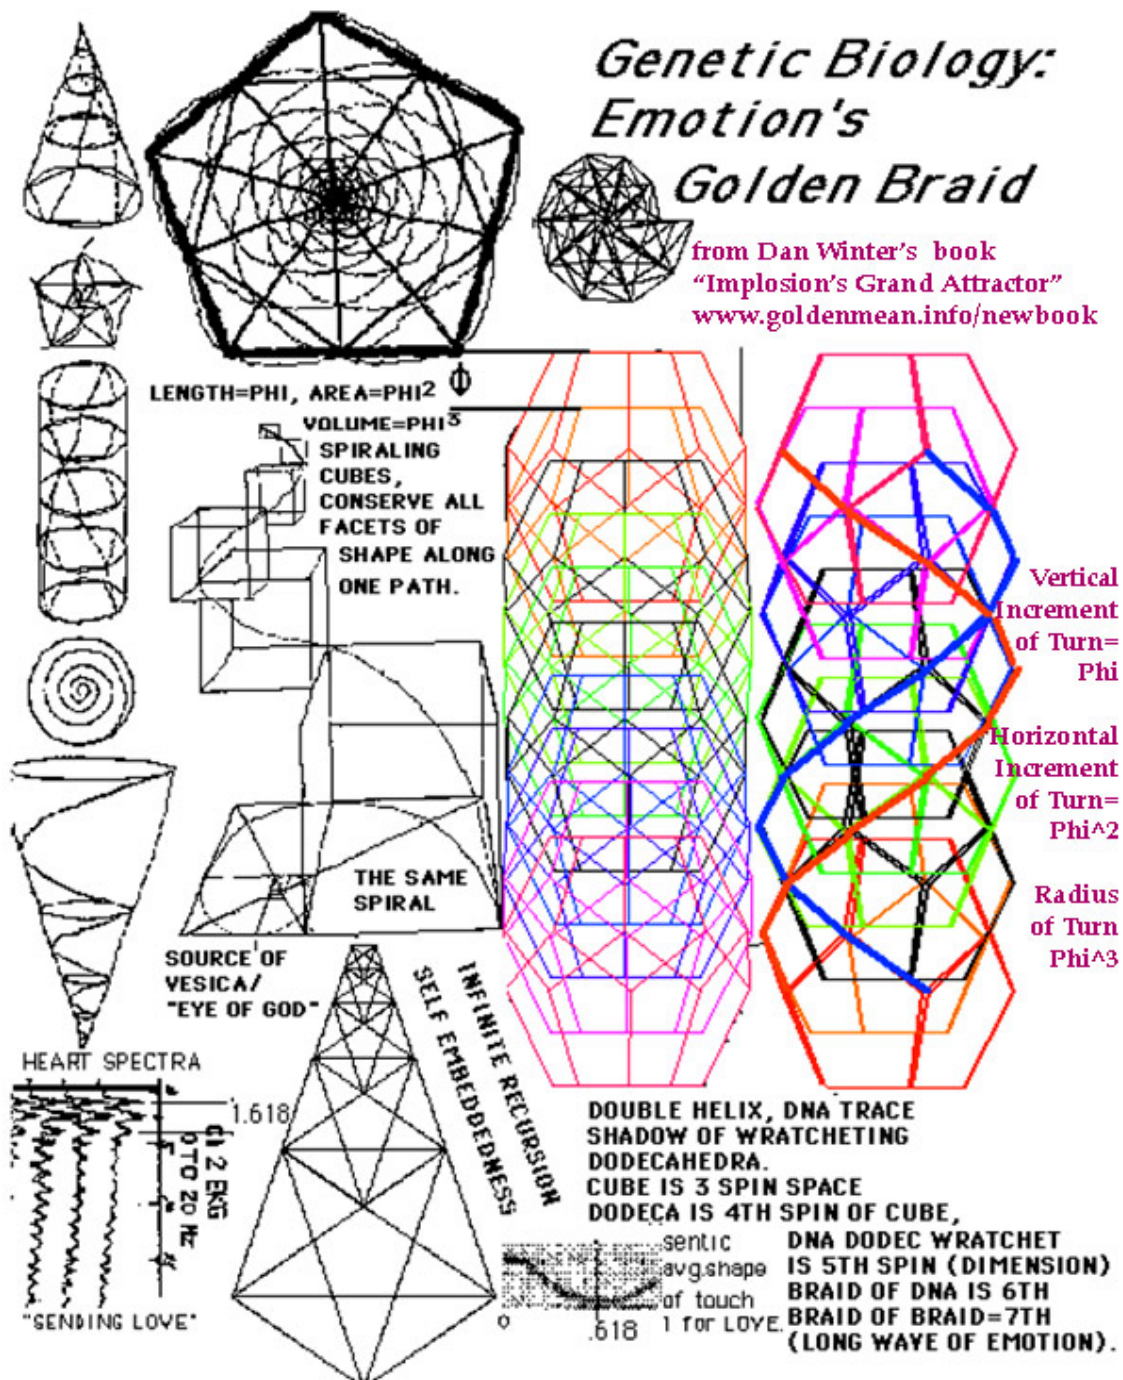

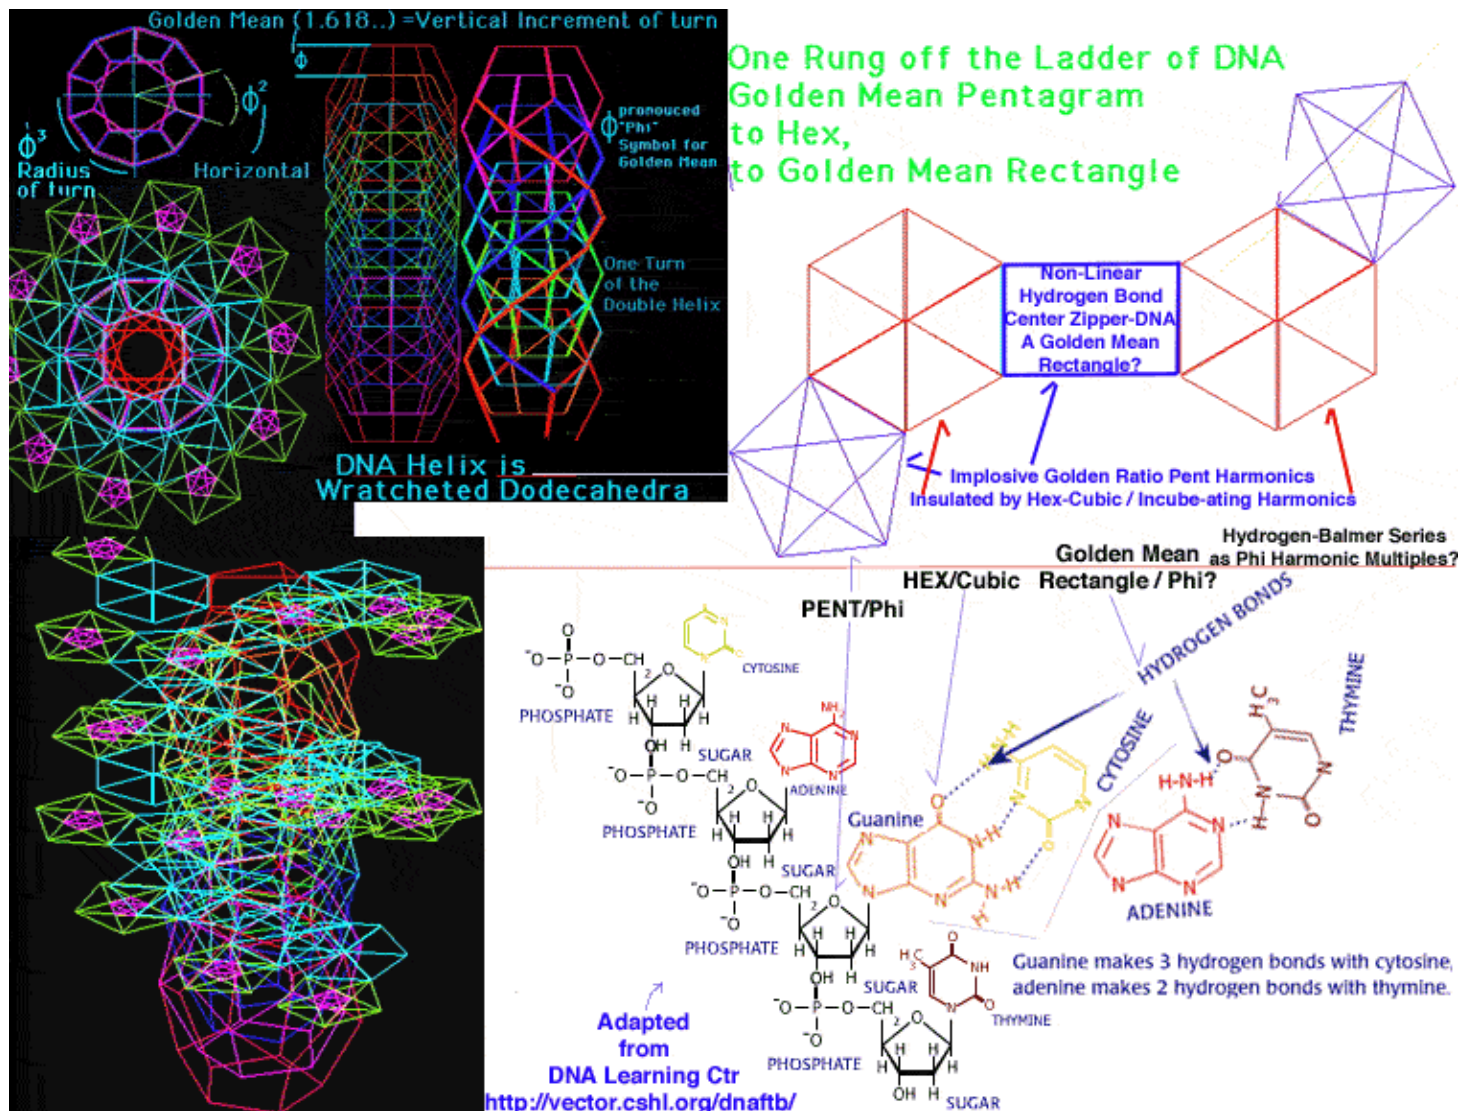

“Fractal DNA Radio- functioning as ‘fractal antenna’

# Genetic Biology: Emotion's Golden Braid

from Dan Winter's book  
"Implosion's Grand Attractor"  
[www.goldenmean.info/newbook](http://www.goldenmean.info/newbook)

In my case- of 30 years kundalini experience a key side effect was ability to dowse. My DNA became a much more sensitive antenna to longitudinal interferometry- specifically as a result of bliss implosion. I also frequently experience forms of clair-audience. ( I don't see ancestors- but I often hear them). I now understand more about why I did not develop clairvoyance- because although I can regularly make 5 golden ratio lo frequency brainwave harmonics- I rarely reach gamma (44 hz range). Gamma coherence is a key attribute of kids start seeing without their eyes ( [www.flameinmind.com/outervision](http://www.flameinmind.com/outervision) ).

### A Real Star Trek Physics?

We have been discussing- the physics of stargates and portals.

It is important to see the parallel to phase conjugation in optics- creating what they call "time reversal". Generally that reversal primarily refers to return to a state of INCREASED order (negentropy). Many scientists argue it is impossible to time reverse to DECREASED order. This sets up a useful meditation for stem cell scientists attempting de-differentiation. Back to the (fractal) 'stem' – is a return to roots- but there is a limitation here.. ONLY if it is a return to increased ORDER!

**Astute students of physics and science fiction know (“Deep Space Nine”)- that the wormhole behind the stargate ALWAYS itself has intention. Meaning- bad guys often get spit out..!**

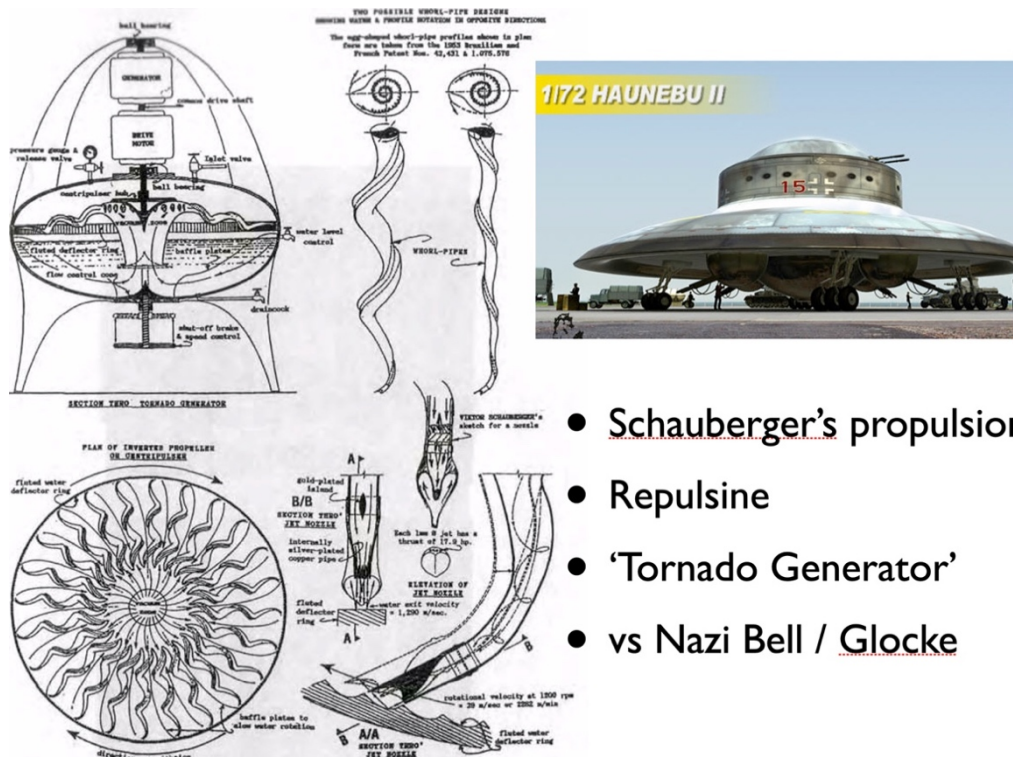

**Next: Physics of impulse vs warp propulsion.**

As an instructive exercise in developing our newly found knowledge of the CAUSE of gravity, we suggest / explain examples from ‘star trek physics’.

As an aside I was actually present at some of the adventures with Andrijah Puharich- during the time he was teaching the star trek authors ( via Gene Roddenberry and Phyllis Schlemming) – what became Star Trek physics. For example see our notes on the plasma physics of ‘The Nine’ – [goldenmean.info/whaledreamers](http://goldenmean.info/whaledreamers)

For our instructive examples here- we wish to describe the wave mechanics of the difference between what they called ‘impulse propulsion’ vs ‘warp’.

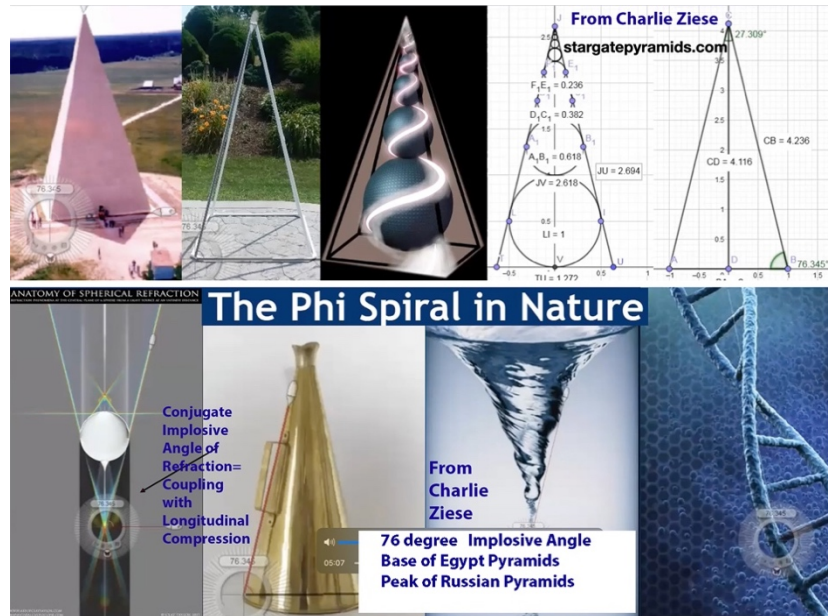

Impulse power is usefully exemplified by the Nazi Bell / Vimanna / Hanibu – mercury vortex. The key is to understand HOW a hydrodynamic ( piezo water) – or mercury vortex can implode and spit out the direction longitudinal emf at center, called gravity waves.

- Schauberger's propulsion
- Repulsive
- 'Tornado Generator'
- vs Nazi Bell / Glocke

First it is helpful to understand WHY the ideal vortex angle ( from pyramids etc) – is precisely that angle which causes implosion.

*76 degree angle in the base of Egypt's pyramids, and peak of the Russian- precisely enables implosion of fields by golden ratio (pushing out that longitudinal coherence):*

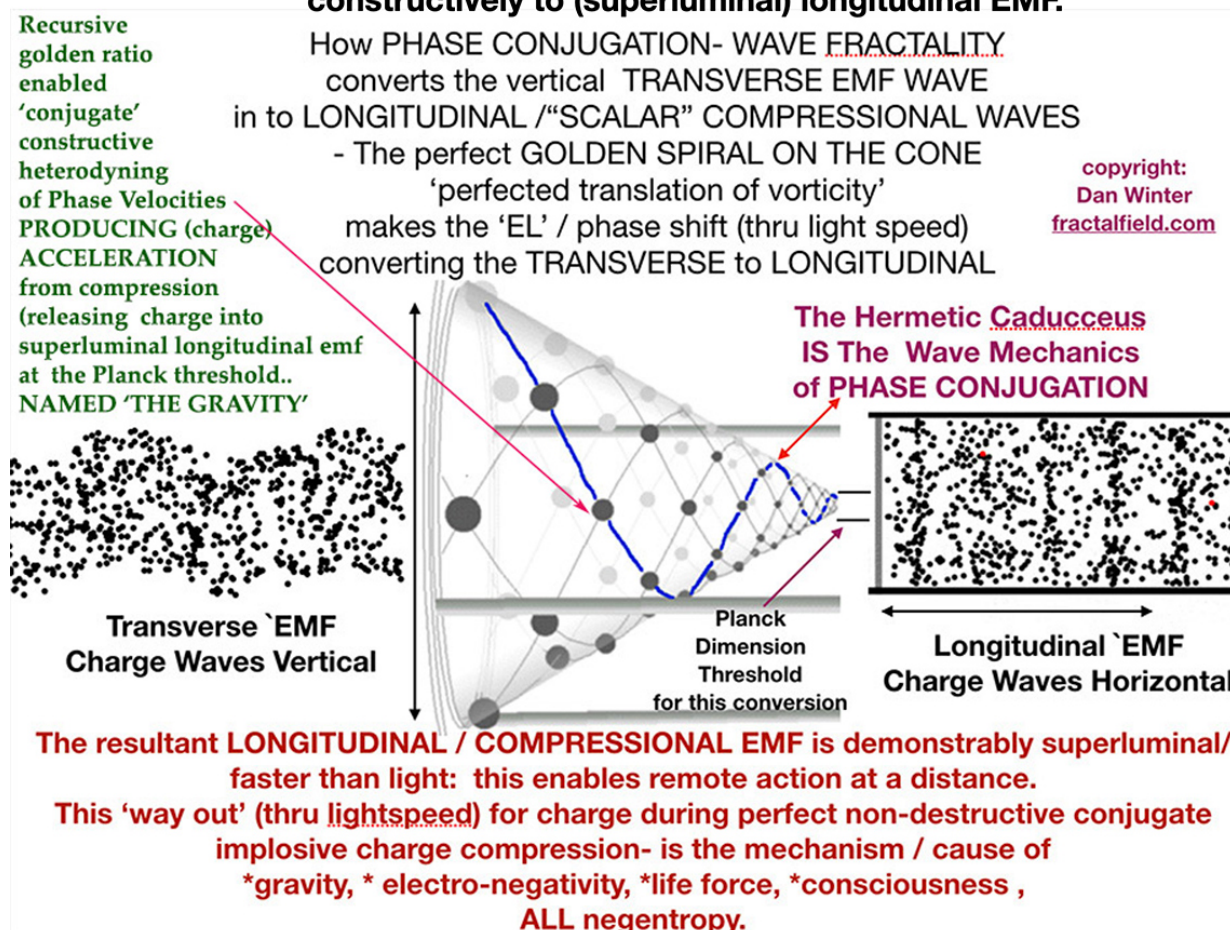

In this specific angle- the spherical charge waves interfere in 3d specifically by golden ratio, which is what enables them to implode- and convert transverse emf (non-directional) – in to coherent and directional longitudinal emf- which is how they produce thrust.

Secondly- we need to see how the specific angles of incidence of the conical ( vortex) compression- literally drive the less coherent transverse emf- (electro motive fields)- DOWN the vortex – at the throat of the nozzle (planck) the transverse inertia is driven by ‘optimized translation of vorticity’ – IN to the more organized & directional coherent longitudinal EMF:

**How does that phase conjugate fractal compression- causing gravity (and perception) become constructive/ implosive/centripetal: the transverse EMF inertia is translated constructively to (superluminal) longitudinal EMF.**

There is a specific reason this is called impulse power. The hydrodynamic IMPULSE of centripetal inertia is driven down a vortex cone- to be released into longitudinal emf – at the planck threshold. That release of directional coherent longitudinal emf-has a way out through multiple golden ratios velocities faster than light (next dimensions). That opportunity for the charge to leave the drainhole vortex – at the planck dimension nozzle of the squirt gun- is the cause of gravity. Specifically that is what enables the charge down that vortex of golden ratio- to turn COMPRESSION- in to ACCELERATION of charge- by the constructive recursive heterodyning of PHASE VELOCITIES (which only golden ratio fractality allows). We believe, this created acceleration of charge (as a superfluid-) only when going down the fractal vortex – with golden ratio symmetry - is the origin and definition of THE GRAVITY.

The relative amount of charge which is accelerated – is the ratio of **stored** charge inertia – called mass- to the charge **emitted** (into longitudinal emf propagation / 'gravity wave') .

It seems obvious- that golden ratio is the DOMINANT geometry of all orbital mechanics, certainly the proven dodeca / golden ratio geometry of DNA / Earth Grid and the arrangement of mass in the universe. This is a smoking gun pointing to HOW the charge release DRAINHOLE – named the planck threshold – works. That drainhole for charge out in to the longitudinal emf ARRAY – is the proven (if you believe Tom Bearden) – stuff of gravity waves! Golden ratio in orbital mechanics, AND in the platonic golden ratio nest called ELECTRON SHELLS- is THE way gravity AND THUS CHARGE COLLAPSE – are stabilized and enabled.

This also supports “Two Thirds” explanation of pyramids as gravity diode- function to stabilize gravity:

**PYRAMIDS – charge collapse -gravity diodes – and global (longitudinal) wireless power distribution:**

What does a ‘phase conjugate pump wave’ do?

Golden Ratio Implosion in Pyramid Physics: Gravity Diode, Global Wireless Power (Longitudinal Array coherence), even radioactivity containment.

**Why did the ancients call the pyramid- ‘the hummer’?**

The main point is that the low frequencies of the Schumann resonance cascade (infrasound) are a ‘pump wave’ which drives the pyramid toward charge implosion- DUE to golden ratio in it’s construction, in conjunction with it’s piezoelectric materials. This means – that properly constructed pyramids literally ‘hum’ with the lo frequencies of the Earth- creating an electrical output. The very definition of piezo-electric, means mechanical pressure (vibration) is converted to voltage. In the case of pyramids using golden ratio ( see images)- since that output voltage creates the golden frequency cascade from mechanical to electrical pressure (voltage)- this is the recipe which create coherent LONGITUDINAL emf output. This is how the compressed, and ordered longitudinal component is then distributed in the fractal/ dodeca (longitudinal array ) Earth grid.

Pyramids in general are virtually always accurately ON this grid for this reason.

Geometry of the Earth grid- longitudinal array..

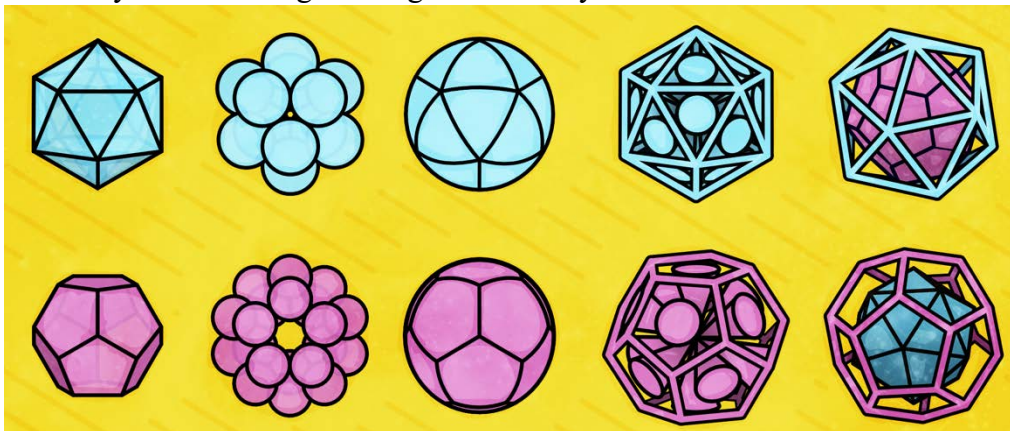

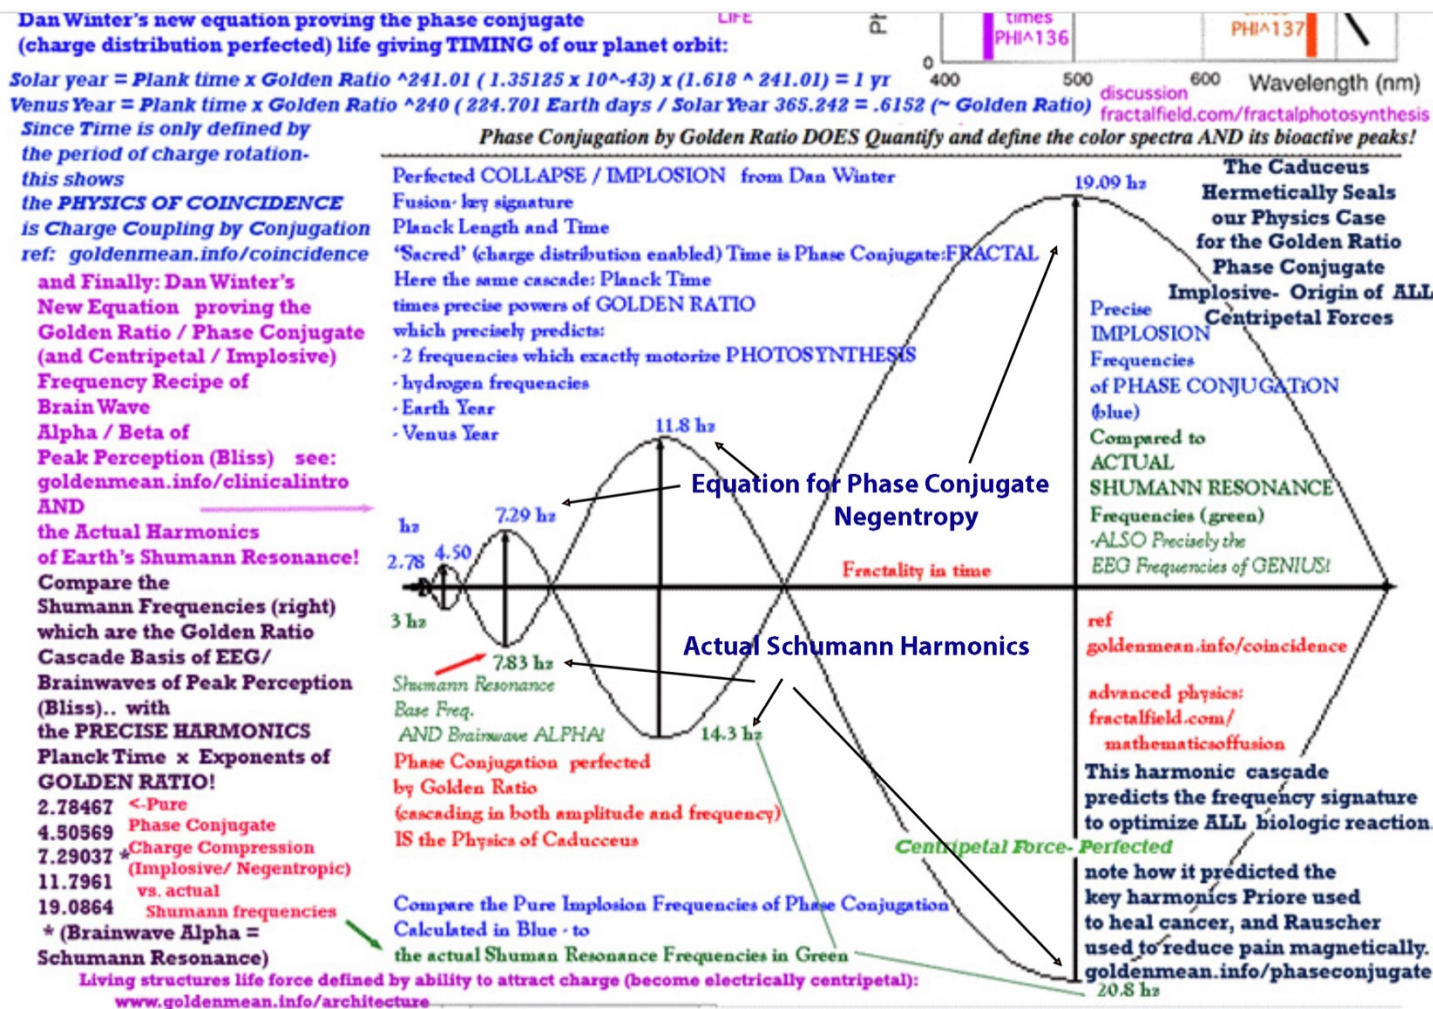

Image credit [geometricmodels.org](http://geometricmodels.org)

Various ET sources tell us- that the pyramids were designed (Thoth? ) as a very effective global wireless power grid. In that book “Two Thirds” (purportedly Arcturian source)- the Pyramid was called the “Hummer”. This was a useful clue to its function. The infrasound – phase conjugate waveform- corresponding to our equation- driver- was the Schumann Earth harmonic series.

We measured the further harmonics of this cascade significantly in Sam Osmanagich- Bosnian pyramid. Here for example millions of visitors every year- consistently report negentropic rejuvenation effects from the pyramid- very much like our phase conjugate plasma Theraphi.net. The low frequency cascade – in conjugate harmonics- is called a **PHASE CONJUGATE PUMP WAVE** ( which can proceed up to even RF harmonics ) . The base infrasound series is the same- fitting our equation BOTH as the Earth's negentropic Schumann harmonic cascade- AND simultaneously exactly as the EEG cascade responsible for bliss and peak perception ( flameinmind.com ).

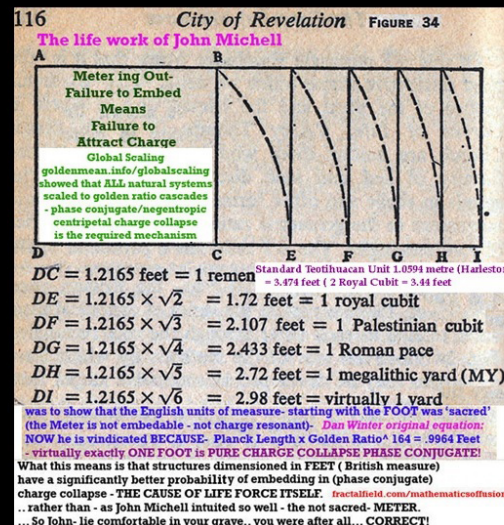

Measurements in white are based on the 'sacred' foot (charge resonant, phase conjugate) which are explained first by John Michell's and later by Dan Winter's equations independently (below pic).

Planck Length x Golden Ratio<sup>164</sup> = .9964 Feet (High probability of embedding in charge collapse) – [fractalfield.com/mathematicsoffusion](http://fractalfield.com/mathematicsoffusion)

Measurements in black are actual measurements in the British Museum

Can we explain the difference in size by the depreciation of the tablet over time?

Golden ratio embedding tuned to planck/ sacred dimensioning- in ancient Sumerian, and Hagia Sophia – Eastern Roman empire- coronation sacred space.

# Coronation Perfected – Tuned to Planck

~ all you need for your dream coronation ~

- Omphalos/Omphalion "navel (of the earth)" is a marble section of the floor in Hagia Sophia where Roman emperors were crowned during the coronation ceremony.
- Measurements are preliminary -by Tufan Guven based on the information published in Wikipedia.
- These need further confirmation through onsite measurements.
- Preliminary measurements indicate dimensional coherency of the geometries (main square and the circles) with the "universal frequency cascade" -as formulated by Dan Winter.
- Preliminary measurements also indicate charge resonance and fractal phase conjugation by golden ratio tuned to Planck distance.

*Call your  
local phase conjugator today!*

Note here- we did not finish our Stargate physics- we described 'impulse power' electro gravitic propulsion- (implosive vortex), now we must describe WARP propulsion.

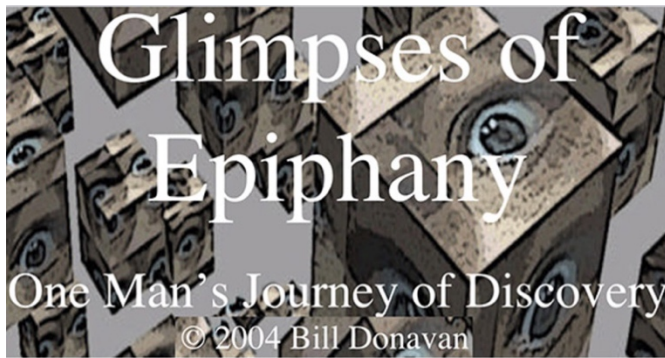

## Kowsky Frost: Have we really identified WARP Propulsion?

The primary known example of WARP propulsion – here is the infamous Kowsky Frost experiments.

Ref [www.fractalfield.com/propulsion](http://www.fractalfield.com/propulsion)

from the book- Glimpses of Epiphany by William (now Elizabeth) Donavan

The starting matrix material for Kowsky Frost- is essentially a piezo-electric quartz crystal (although potentially we understand – also piezoelectric lithium niobate could be used - . It is key to understand the molecular symmetry which enables piezoelectricity is HELICAL. This slinky like helix structure is also why DNA is potentially piezoelectric.

**Sci Fi: Niobium warp crystal**

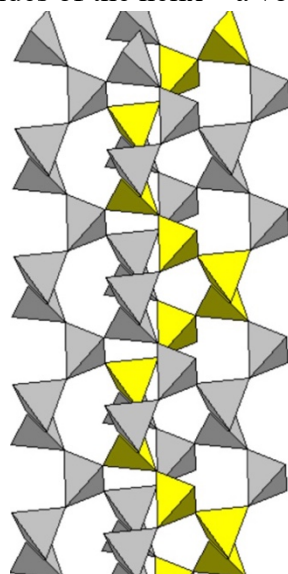

**Physics: Lithium Niobate phase conjugate dielectric**

The original experiment was performed using 2000 watts at 770 KHz, essentially an AM radio transmitter beamed into the crystal. The crystal was first conditioned by placing it in a chamber with an asymmetric pump wave that expanded and reformed the crystal lattice, evidently forming a new one at a higher quantum state. The crystal lost its transparency, going from clear to opaque white while increasing it's size to 20 times its former length on each side, with a volumetric increase of a factor of 4000:1. It was after this volumetric increase that the crystal was subjected to pumping by electromagnetic means to generate the lift.

A research associate, who will remain unnamed for security reasons, recreated this first stage of the experiment to expand the crystal, and noted that it radiated a field that felt tangible for a radius of 2 meters around the device. It had the aspects of an electrostatic field, but did not show up on a surface electrometer or a remote EMF field meter. According to him, there was a weight discrepancy between inside and outside the field, possibly due to an unknown electrogravitic effect.

54

What is piezoelectric? This just means that if you apply mechanical pressures (literally pulsing squeezes) -to the sides of the helix – a voltage will appear on a perpendicular axis up the helix.

**Phase Conjugate Phonon Pump Wave-**  
**( from EEG / EKG cascades of BLISS)**  
**Driving Implosion in DNA**

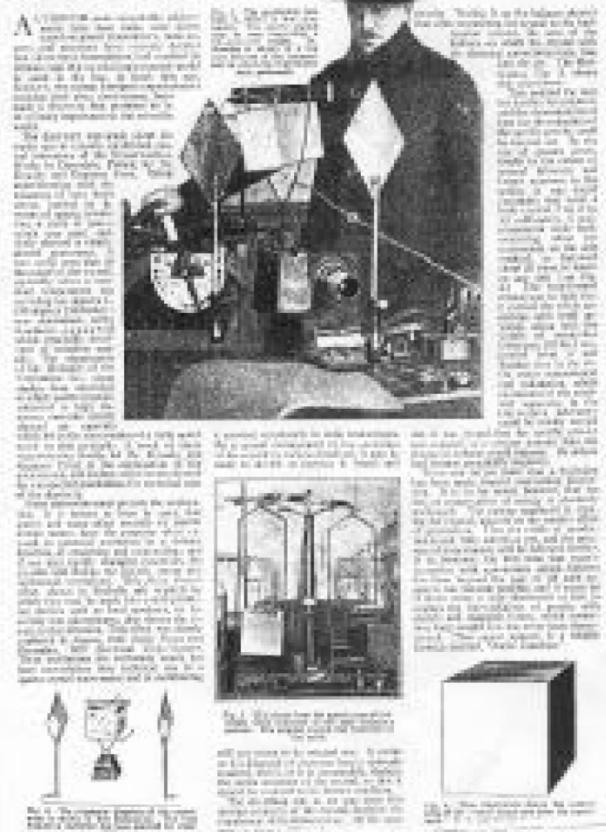

The unique thing about warp propulsion- is that when instead of a normal set of piezo stricture waves ( simply pulsed compression) – you apply what is called a ‘phase conjugate pump wave’. This means that – instead of a single frequency pump wave- an implosive conjugate cascade of frequencies / based on my equation- is used instead.

In the case of Kowsky Frost- the extensive evidence is that- after increasing dramatically in size- the crystal then produced 800 times its own weight in electro gravity.

Real "Warp Propulsion"?

**Gravity Nullified**  
Quartz Crystals Charged by High Frequency Currents Lose Their Weight

(Reprinted from the September, 1927 issue of Science and Invention)  
Quartz Crystals Charged by High Frequency Currents Lose Their Weight

This is called WARP propulsion in the sense that- a whole cascade of implosive charge compression into the induced vortex up the helix- would literally warp space and time.

As we discuss- that we suggest the term bending space and time is unclear- because we now know that time is only a name for relative rate of charge rotation. The reason time speeds or slows during relative acceleration – is simply that some of the effect of acceleration on the toroidal gyroscopic spin inertia- definition of mass- simply achieves what's called 'translation of vorticity' (down the spirals on the torus surface) – coupling the acceleration in to increased or decreased rotation rate. This is called time speeding up or slowing down- but it is only actually change in spin rate. Thus clearly time is not bent or warped- what happens is that acceleration translates in to spin increase/ decrease on toroidal (vorticity translating) surfaces.

When WARP propulsion accelerates massive bodies like space ships through the speed of light- the trajectory must be carefully plotted for stability – in order that the local stable fractal array of longitudinal nodes is not overstressed. This is very much like determining the max speed for a boat in a narrow canal – in order not to damage the sides of the canal.

In practice you can think of a mounting platform on the top of the great pyramid enabling a warp propulsion device to land- using the stability of a strong local node.

**Bi-Locating!** In terms of how stargates and portals work- lets take our measured examples for how Jean Charles Moyen- French SSP experimenter replicably bi-located repeatedly with evidence, measurement and witnesses. (as discussed above) [www.flameinmind.com/lucidbrain](http://www.flameinmind.com/lucidbrain)

( as we described above- p 41.) Jean Charles measured his brainwaves- with our instructions using our invention Flameinmind. He had massively coherent EEG (phase conjugate pump wave) between alpha (8hz) to gamma (44hz) -had octave and golden ratio key harmonics. This ‘stairway to heaven’ is like a shadow of cube/dodec harmonic tensors- grabbing the central plasma vortex called CONSCIOUSNESS in the brain- and SQUEEZES IT. We saw the same cascade in the kids trained to see without their eyes ( [flameinmind.com/outervision](http://flameinmind.com/outervision))- EXCEPT – in Jean Charles case the amplitude or coherence of the EEG harmonics was extremely high. Notably- he reported as usually- that then before he bi-located he would see where he was in one eye- and where he was going in the other eye – just before he left. We think this is clear evidence he was electrically turning inside out into the pinhole provided by conjugation- IN to the longitudinal array. ( See image- HOW a pinhole camera inverts the picture) . Note that he often bilocated to the beach- or to the ‘ark’ caves- which clearly are where longitudinal emf coherence connection is better enabled.

**Science of DISAPPEARING-** Let’s compare Jean Charles Moyen disappearing / turning inside out documented reports above- vs Ananda for example.

*Our teaching partner at that time, Ananda Bosman from Norway- adapted the pairs of axes of **FIGURE EIGHT MOVEMENTS** - he then called: **TRINITIZATION OF THE LIGHT BODY:** <http://www.aton432hz.info/aton/korinnaweb/kam-en.html> in which he- followed the solar plexus sequence of moves- with similar for the heart and then the brain crown (warning- can be powerful / dizzying). I had originally introduced him to these powerful figure 8 for the Dan Tien – kinds of moves – via the wonderful Lou DeBourbon – please see [www.goldenmean.info/octayoga](http://www.goldenmean.info/octayoga)*

***He claims witnesses prove at one point in the series- he physically disappeared.***

Similarly European practitioners of intense ‘Flower of Life’ – Star Tetra visualizations have also reported even traumatizing examples of literally disappearing. It is important to study this as physics – and not get caught up in miracle worship kinds of cults. High saints and sages – even Sai Baba and others have been the subject of bilocation reports. We made quite clear above in our analysis of Jean Charles Moyen- when we measured his implosive (golden ratio / octave cascade) massive brainwave coherence- just before his bilocation effect. As we mentioned, just before bi-locating he would see in one eye where he was leaving from, and SIMULTANEOUSLY in the other eye where he was going! – This is strong evidence not only of the phase conjugate turning inside out wave physics of VISION- but also HOW portals work. This applies directly to how people disappear when they phase conjugate implode with broad spectral coherence. Be reminded the tetra cube symmetry is PRECISELY how you must align lasers to phase conjugate.

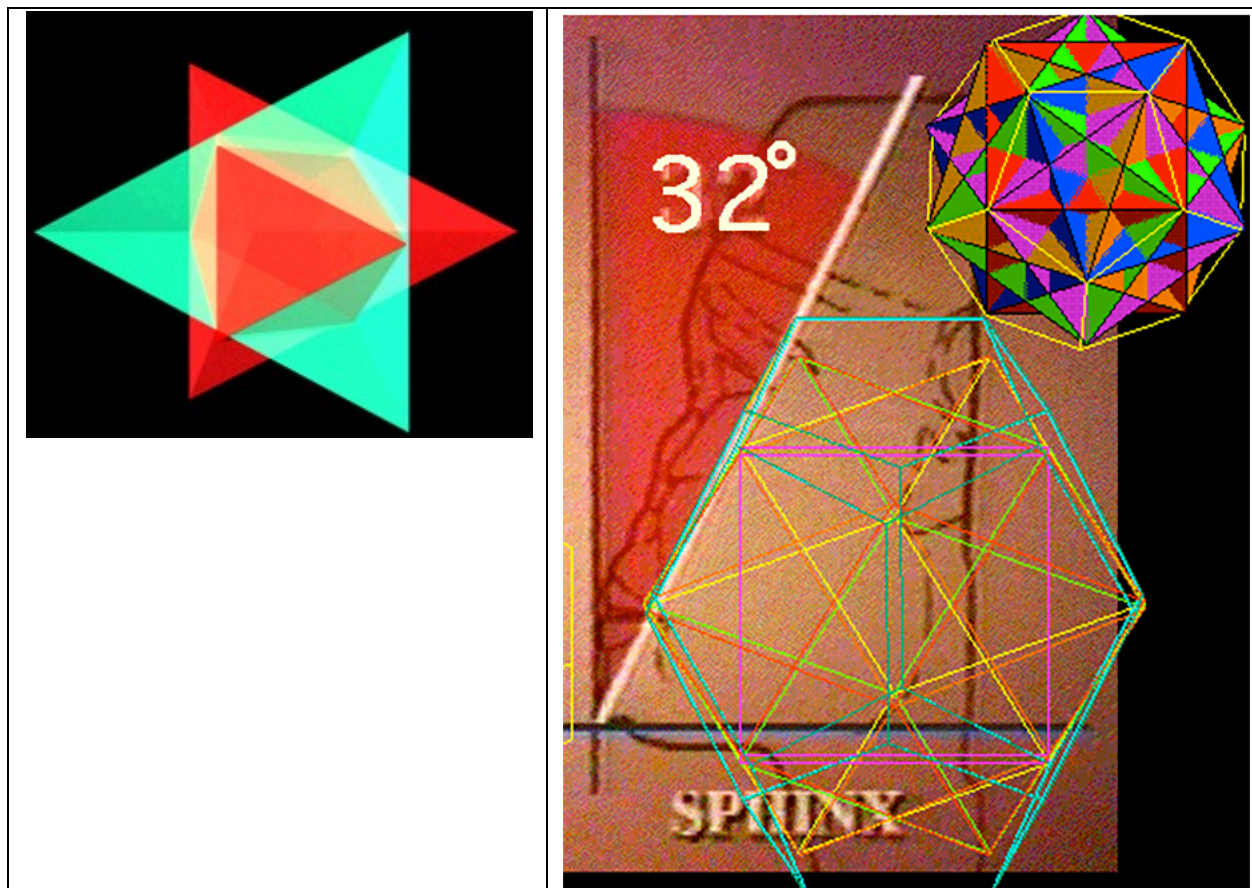

Broad spectral phase conjugate implosion / charge collapse -tuned to Planck is a necessary introduction to the physics of how stargates and portals work in general.

For a very related example- using **FIGURE EIGHT KINESTHETIC** to create / orient and repair perception- see 'Infinity Walk' - cross crawl – dyslexia solution above. See Octayoga picture above.

**Star-Tetra “Flower of Life”: The ‘Merkabbah’ counter rotating Tetra’s meditation.**

**From Hex to Pent-** is the move to implosion / turning inside out- requiring pure intention: which means perfectly shareable waves. This is more than metaphor for why compression ( at death for example) – only permits shareable emotions / memories- **IN** to the collective unconscious: the highly compressed longitudinal and fractal **ARRAY!** ( heaven etc.)

[www.goldenmean.info/merkabbah](http://www.goldenmean.info/merkabbah)

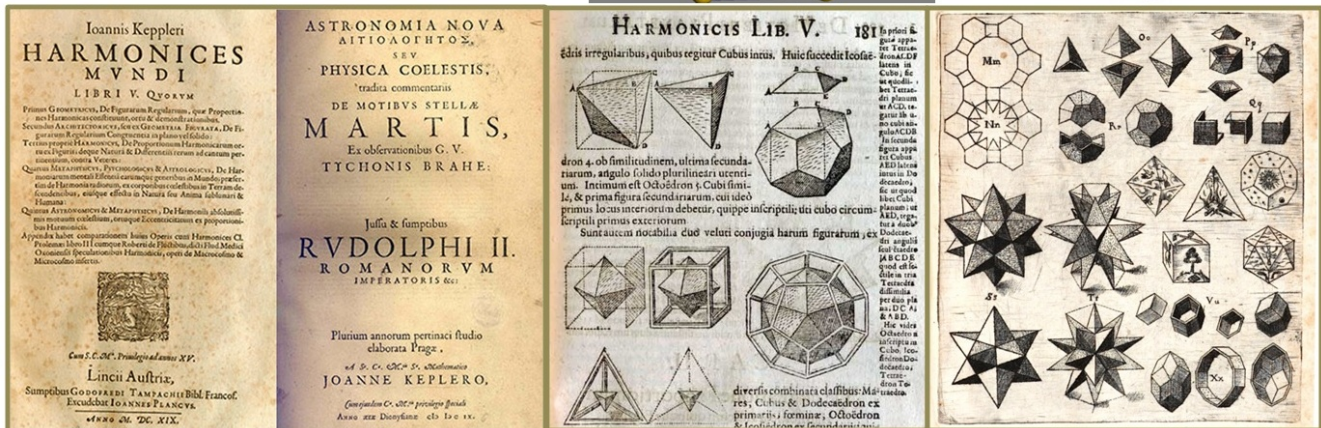

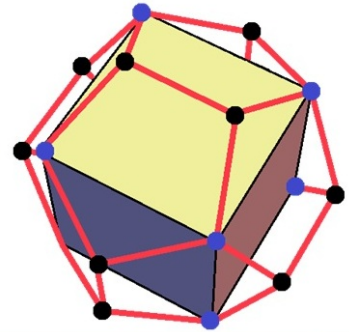

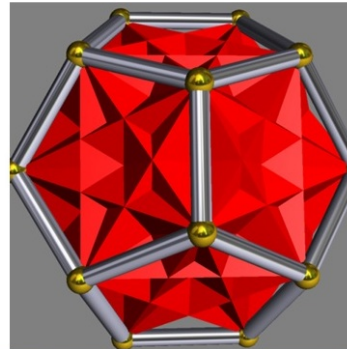

This visualization is essentially a way of stabilizing a cube ( comprised of 2 tetra)- around your body. This is useful for crystalizing / stabilizing- which is why ice is hex. However – the final step- after the tetra/ cube is stable- is to visualize the 32 tilt (& Sphinx chin angle) of that cube- which embeds it into PENT dodecahedron.

In this way the NON-implosive tetra cube- becomes Golden Ratio embedded into pent-dodecahedron- thus making it implosive. (The tetra cube with all root 2 ratios is opposite to implosive- good for stabilizing but useless for making centering force.) This last step to pent- IS critical (to astral hygiene)- because it is the implosive moment- which eliminates parasites. **At the same time- before going from hex to pent- it is critical to consider pure intent- because- implosive turning inside out- like dying- only allows “shareable waves” through center. In practice this means you should not enter pent implosion, or death, or lucid dreaming, (or bliss) until your thoughts have passed the test of implosion- which means to become perfectly shareable ( pure principle only is allowed).**

# Kepler's ~ Harmony of the World ~

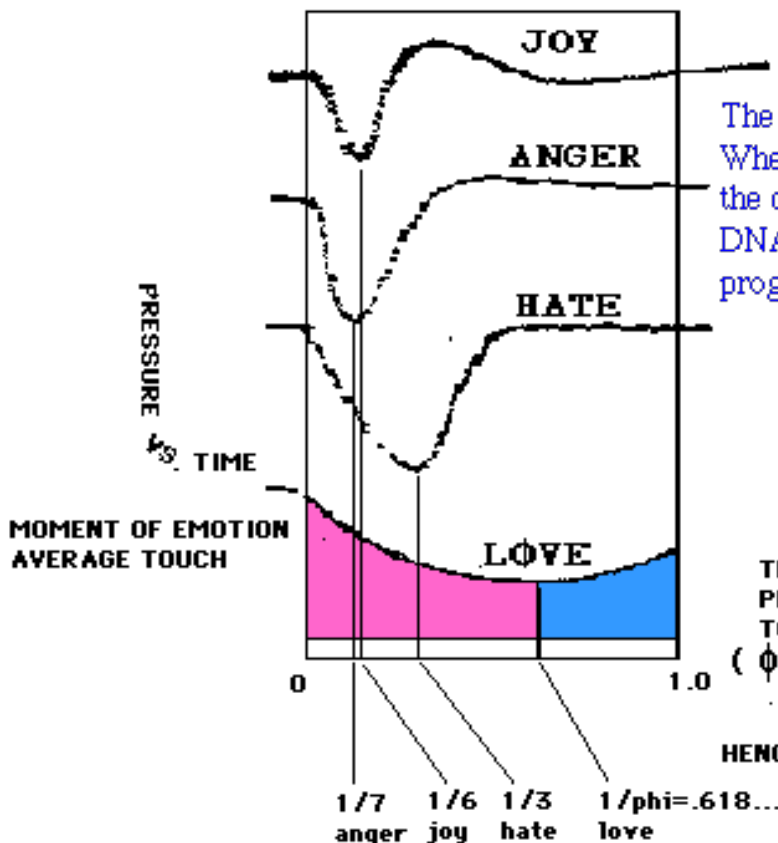

- In 1619, Kepler published 5 books on the harmonies of the World (containing Kepler's third law).
- Kepler described an interesting body with thirty faces, which is formed by the intersection of five differently turned cubes with identical centre.

- GeometricModels.org

Pure musical ratio geometry of emotion- in the SHAPE of touch.  
Which emotions are compressible and therefore pure?

[www.goldenmean.info/touch](http://www.goldenmean.info/touch)

The Shape of The Pressure Wave You Make When You Hug Someone You Love, creates the correct cascade among waves to braid DNA. This long wave is the highest leverage programming alphabet for living cells.

Lo freq Phi ratio  
Lo..Ph..  
Lo ve

THE GREEK LETTER FOR PHI, THE PERFECT RATIO TO "TRANSLATE VORTICITY" ( $\Phi$ ) BETWEEN CIRCLE AND LINE (MATTER AND ENERGY).  
HENCE PHI-CYCLE=PHYSICAL.

Look at the “Sentic” waveforms documented to be the shape of touch which expresses emotion in Music and more ( Manfred Clynes: “Sentic”). In the chart above – I added (to Clynes work on left) the bottom fractions- which show the RATIO from the start to the end of the touch pressure wave- where MAX pressure in the touch- initiated cascading ( heterodyning). More simply – when you squeeze someone to say : “I LOVE YOU” – it is now well proven – you must tantrically delay the max pressure in your love hug (much longer than you wait when your squeeze says Joy: 1/6). **The max pressure in the well studied love hug- clearly must wait (‘tantrically’) until .618 (golden ratio)- into the duration. That sets up the cascade heterodyne interference pattern- to implode- which fusion energy is called LOVE. The point being here that- if you will notice- the ANGER wave – reaches max pressure at 1/7 into duration- which is max DESTRUCTIVE interference. This could be useful for ‘shoo’ing money changers out of a temple – but it is DEFINITELY NOT compressible. This is an introduction to what you cannot take with you thru the electrical compression events called – successful death or bliss. ( See “Kluver” death visions map in this book).**

## Stargates and Portals?

We discuss elsewhere how this is essentially evidence that a star gate- is thus simply a more broad spectral- higher amplitude harmonic version of what Theraphi.net is. To become a portal- the phase conjugation needs to be more broad spectral and higher amplitude. Thus the implosion/ turning inside out effect becomes more powerfully plasma projective.

However the difficulty of accurately tuning ‘send to receive points’ should not be underestimated. Your stargate field effect operator needs to be COMPETENT or you might be ‘lost in space’.

Where more massive gravity arrays focus in to the necessary ‘4 wave mixing’ for phase conjugation- then the stargate/ portal accelerates into more and more golden ratio times C lightspeed harmonics (essence of relationship to higher dimensions). The most powerful example of this is probably in the square plasma cube of the Trapezium in Orion- where the stargate- probably capable of hundreds of light years- was the center prize of the fight called ‘Orion Wars’ for millennium.

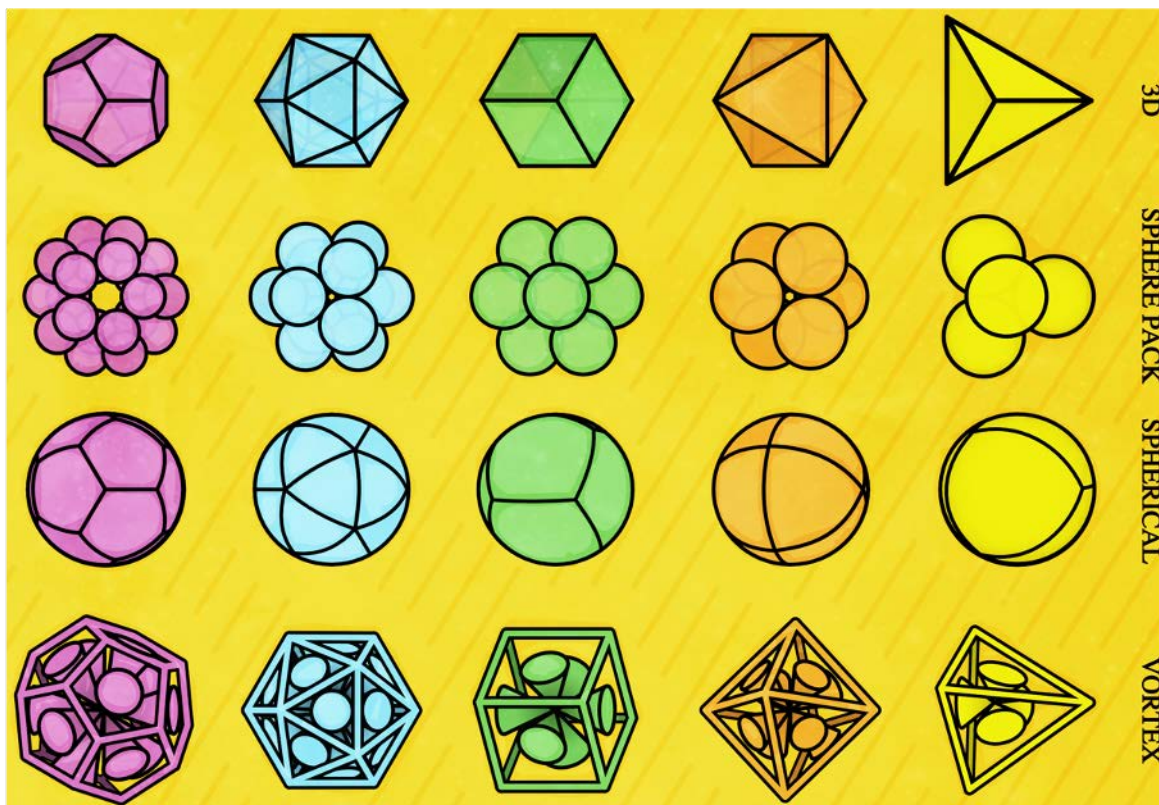

We believe as Elena Danaan suggested, I may in fact have been historically correct- that Earth DID become the *vaccine for the Orion Wars*. This happened when the tall (Greada Treaty) greys’ doing abductions , later were captured here by the federation- and did in fact enable the clever ‘virus’ planted by the federation through them into the hive queen of the ‘Nebu’ (greys) federation- which then took out- their whole hive queen interplanetary machination.

## Charge collapse and the atomic table.

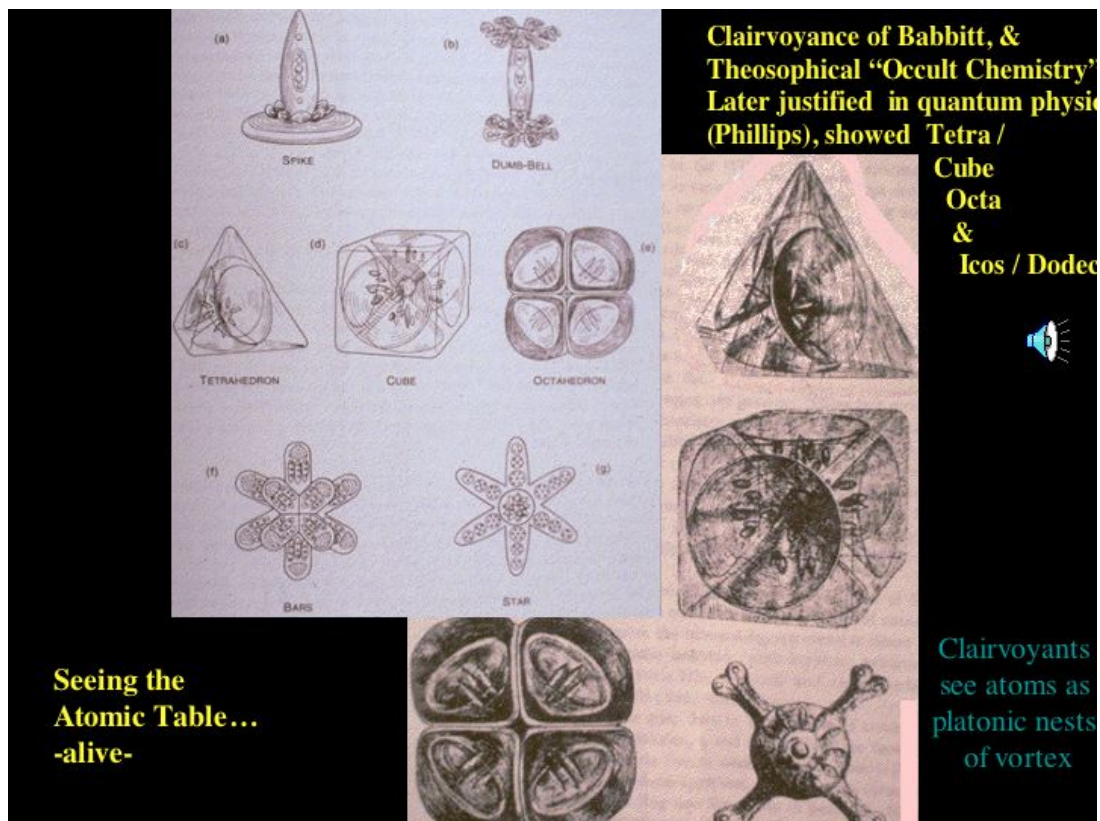

We have attempted to illustrate exactly how golden ratio compression / embedding – being the mechanism of perfect nesting – IS the mechanism of non-destructive charge implosion which DIRECTLY CAUSES gravity. Here we would like to illustrate more exactly how this golden ratio implosion of charge explains more perfectly – HOW the atomic table AS a platonic nest- MAKES GRAVITY.

I have always criticized chemistry teachers for NOT telling you that **BOTH the entire electron shell nest – AND the arrangement of Hadrons (protons/neutrons) in the nucleus- ARE EACH SIMPLY A CONTINUATION OF THE VERY SPECIFIC NEST OF PLATONIC SOLIDS- from toroid- to tetra cube – to dodec icos. This is SPECIFICALLY the geometry of the whole atomic table! – Remember also the ONLY way platonic solids can nest tetra/cube in to dodec/icos- is specifically using the Golden Ratio (conjugate implosion) . This is a fundamental insight to reveal how platonic close packing is behind ALL OF CHEMISTRY. (The KHEM in chemistry literally meaning- access to a ‘black hole’). And furthermore this is a way to empower young people to understand HOW waves**

self organized in to the atomic table. So **WHY** are our chemistry teachers **NOT** giving young people the empowering (platonic nest) tools to imagine correctly atomic geometry?

Further- then when we DO understand that the ONLY way the tetra cubic PI electron suborbital – can nest into the next shell- D and F- which are dodec / icos (  $7/5$  spin ,  $10/14$  electron) – is PRECISELY the golden ratio way a cube embeds in dodec icos in general. In other words- ONCE you understand that BOTH all the electron shell nesting of the atomic table – AND the nuclear hadron (proton neutron) nesting of the atomic table ARE SPECIFICALLY ALWAYS AND ONLY A PLATONIC SOLIDS NEST- ... THEN you immediately see that since the golden ratio is functionally the ONLY way to nest the atomic solids.. ( ref- Star Mother kit [www.goldenmean.info/kit](http://www.goldenmean.info/kit) )... So this is proof by very basic simple inspection ( a 5 year old should get it)- that golden ratio is the ONLY way to build an atomic table ( electron shell – AND nuclear)...

SO here we have the simplest absolute proof- golden ratio implosive (phase conjugate/fractal) charge collapse is the core REASON we have an atomic table ( .. and gravity).

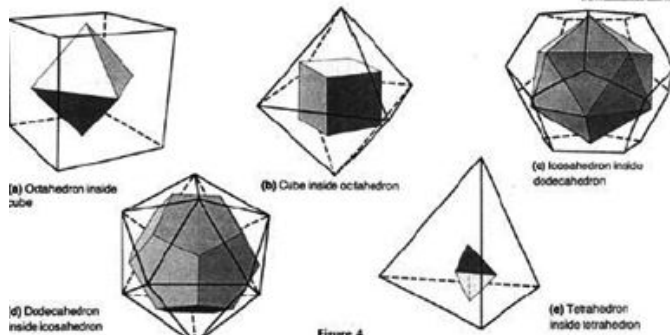

Figure 4  
THE PLATONIC DUALS

The cube and octahedron are dual, meaning that they fit one inside the other (a, b). Similarly, the icosahedron and dodecahedron are dual (c, d). The tetrahedron is dual to itself (e).

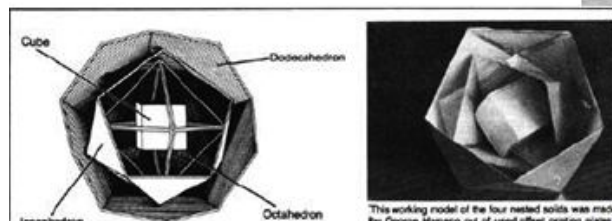

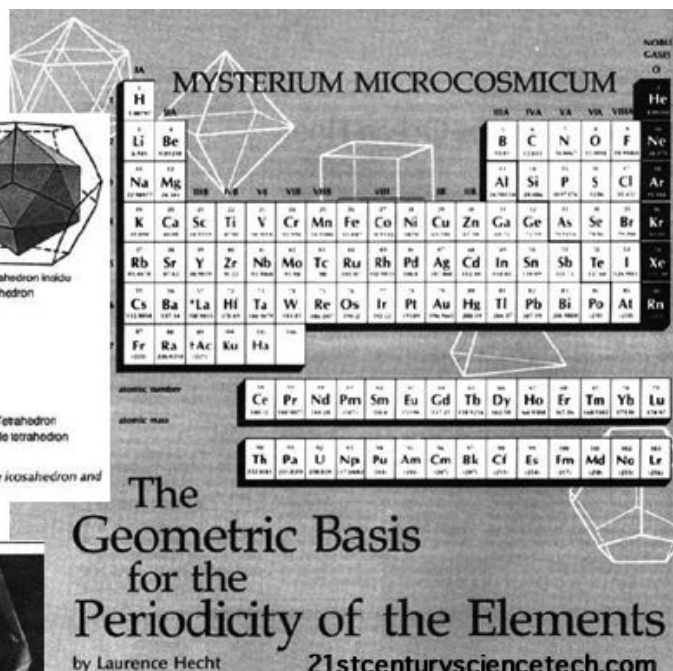

Figure 5

The sequence of four solids whose 46 vertices form half of the "Keplerian atom."

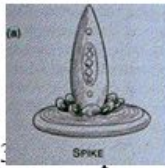

**IS THE AMOUNT OF GRAVITY  
(Fractal Collapse?) CREATED BY AN ATOM -  
PROPORTIONAL TO HOW SELF SIMILAR  
ITS INSIDE (Nucleus) IS  
- TO ITS OUTSIDE (Electrons)?**

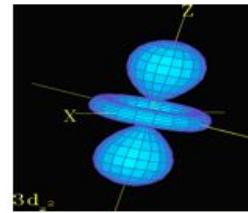

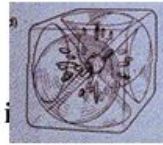

Note below- how clear it is, that all electron shell orbitals are in fact concentric nest of platonic solids. Note also the ONLY way tetra cube (pi orbital) can nest in dodec/icos (d,f orbitals) is in fact using golden ratio! Note below – how clear it is that ALSO the arrangement of protons and neutrons in the nucleus – is ALSO clearly specifically a compression nest OF THE SAME PLATONIC SYMMETRIES. Meaning also only golden ratio also nuclear nesting.

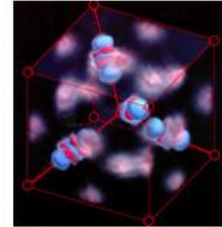

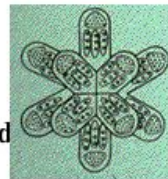

- Platonic (cube- dodec -icos) essence of Electron Shell Geometry:
- Interdigitate (nest) s- p - d - f suborbitals Creates ALL Atoms.
- S-sub orbital: 2 electrons, 2 vortex, 1 vortex pair= 1 torus / donut

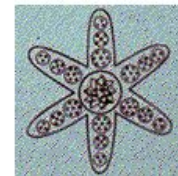

- P (pi) -sub orbital: 6 electrons, 6 vortex, 3 vortex pair= 1 cube

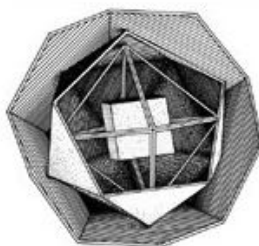

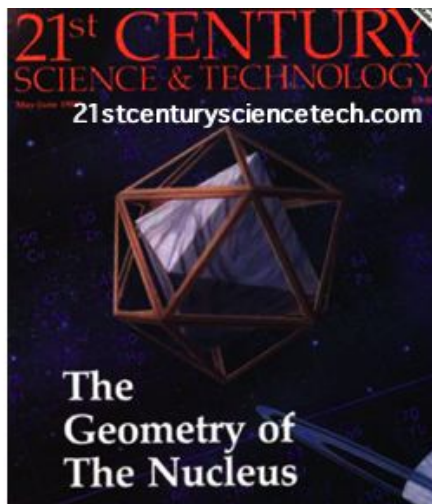

- D - sub orbital: 10 electrons, 10 vortex, 5 vortex pair= 1 dodecahedron

- F - sub orbital: 14 electrons, 14 vortex, 7 vortex pair = 1 icosahedron

*Armand Wyler: icosah= 7 axis of symmetry  
(like tetra) 5 real rotations + 2 'pseudo' rotations  
(mirror symmetry axis / top to bottom inside out..*

**Figure 2**  
**A WORKING MODEL OF THE NUCLEUS**

*In the Moon model of the nucleus, a nesting of four of the five Platonic solids similar to that conceived by Johannes Kepler to describe the Solar System*

| Element   | N= | Alpha particle | Edges of        |      |            |                          |

How phase conjugate charge collapse can be used commercially to achieve negentropy- in biology for example:

- 1. Flameinmind.com Charge collapse= bliss. Golden ratio in brainwave EEG, above
- 2. Theraphi.net Conjugate plasma- doing rejuvenation commercially in 25 countries..

Theraphi and seeds - universities using Theraphi systems just to trigger seed germination.  
<https://theraphi.net/theraphi-dramatic-plasma-effect-on-plant-growth-pictures-many-reports/>

### WATER & AGRICULTURE

The Theraphi system can also be used to structure water for improved hydration. This water can be used for drinking or for agriculture.

Treating seeds prior to planting can also have significant results in terms of enhanced plant growth. Experiments conducted with similarly plasma activated water in the Netherlands are explained in the TEDxArnhem video on the [How it Works](#) page. Initial experiments done locally with growing vegetables the Theraphi also indicate beneficial results. Three sets of seeds were planted of each different kind of seed. One set was control - organic seeds watered as usual. The other set was organic seeds watered with Theraphi'd water. The third set is organic Theraphi'd seeds watered with normal water. (Note this is all spring water). The results are described below.

**AFTER 2 WEEKS**

In each case the control seeds sprouted last, the Theraphi'd seeds/water ones sprouted a few days in advance. In each case after two weeks the Theraphi'd ones are ahead in growth.

**AFTER 3 WEEKS**

All sets of seeds showed similar results as per the photograph of the sunflower sprouts on the left. The left of Theraphi'd seed is tallest growth. The right of Theraphi'd water is next tallest. The middles is the control.

**Theraphi and Plant Growth- among many reports this one thanks to Claire- S.Africa**  
[theraphi.co.za/applications](http://theraphi.co.za/applications)

**AFTER A MONTH**

The difference is most notable in sugarbeans. Note how small the sugarbean shoot is on the control one on the left, compared to the height of growth for the theraphi'd ones on the right. Also big difference in how long it takes for carrot seeds to germinate. Theraphi water on left and theraphi seeds on right and control in middle. Sunflowers also respond brilliantly to being theraphi'd.

**AFTER 5 WEEKS**

Sunflowers have been transplanted to vegetable garden. Below left image: Theraphi seeds and watered sugarbeans are ready to transplant. Control sugarbeans still sprouting. Below right image: For carrots - the Theraphi seeds (in left tray) and Theraphi water (middle tray) are doing well. Control carrots (in right tray) still waiting to sprout. Some weeds sprouting in control tray first.

We believe a primary use of original sacred stone pyramids/ circles was to generate the implosive charge field necessary to accelerate seed germination and plant growth ( also see book “Seeds of Plenty”)
